CANAL

RECORD

Volume VII.

ANCON, CANAL ZONE, WEDNESDAY, AUGUST 27, 1913.

No. 1.

The Canal Record

Published weekly under the authority and supervision of the Isthmian Canal Commission.

The Canal Record is published free of charge, one copy each to all employees of the Commission and Panama Railroad Company whose names are on the gold roll. Extra copies and back numbers can be obtained from the news stands of the Panama Railroad Company for five cents each.

Address all Communications,

THE CANAL RECORD,

Ancon, Canal Zone,

Isthmus of Panama.

No communication, either for publication or requesting information will receive attention unless signed with the full name and address of the writer.

NOTES OF PROGRESS.

Dredge "No. 82" Passes Through Gatun Lake.

Suction dredge No. 82 left its mooring at the edge of the lake, near the landing for small boats at Gatun, at 6.20 o'clock, Tuesday morning, August 26, and was towed by the steam launch *Balboa* to a point in the Canal channel north of the Gamboa dike, where it will be set at work within the next few days removing mud and gravel brought down and deposited there by the Chagres River. The dredge has been tied up at Gatun for several months waiting for the lake to rise to a height so that it could pass through it and begin the work of dredging. The 24-mile trip was made without incident, the dredge arriving at its destination at 3.20 p. m. It is the first large vessel that has passed through the lake channel.

Moving Employees' Effects in Panama and Colon.

A ruling has been adopted by the Quartermaster's Department to the effect that when an employee moves from Ancon or Cristobal to private quarters in the cities of Panama and Colon, team service may be provided, but where an employee moves from one house to another in those cities, the request for team service will be denied. The employee may, however, have the service on written agreement to pay the cost.

Water at South End of Miraflores Locks.

The waters of the Rio Grande diversion were turned into the Canal prism between Miraflores Locks and the dike across the Canal, 5,000 feet south of the locks proper, on the afternoon of August 23, in preparation for the removal of the dike, which will open a channel from the locks to the Pacific. The diversion was dammed at a point almost opposite the dike, at mile post 42.50, by means of a light fill of rock and earth, and the water was turned into the prism through a shallow trench. The prism is filling rather slowly, and it is probable that the Rio Grande supply will be augmented by letting in water

from the sea. The tripod drills on the side of the dike toward the locks continue at work and it is proposed to shatter the dike by submerged blasts on September 1. The lower level of the locks is protected against flooding by the lower guard gates, which were closed on August 20, and by closing the Stoney gate valves at the lower ends of the culverts in the side and center walls. About 25,000 feet of railway track were removed from this section of the completed channel, in anticipation of its inundation.

New Record in Pulling Cable.

The cable gang at Gatun Locks, under Mr. G. A. Balling, supervisor of electrical installation, consisting of Foreman Williams, F. W. Hallin, P. R. Kiger, N. Owens, N. Gilbert, O. W. Steeds, and silver helpers, established a new local record in cable pulling for an 8-hour day on Thursday, August 21, by pulling 9,828 feet of 8-conductor, No. 10 lead-covered cable, and 12,300 feet of 5-conductor, No. 10 lead-covered cable, a total of 22,128 feet. A total of 9,200 feet of cable was pulled during the first three hours. It rained the entire day, and on this account, the conditions under which the work was carried on were unfavorable. The best local record for any one month is held at Gatun Locks, when 113,002 feet of cable were pulled.

New P. R. R. Time Table.

A new passenger train time table will go into effect on the Panama railroad at 2.30 a. m., on Tuesday, September 2. The new schedule provides for a through main line service from Colon to Panama, via the Gold Hill cut-off, three trains each way daily except Sunday, with changes in the arriving and leaving time. The train leaving Panama at 1.30 p. m. daily, except Sunday, has been withdrawn. Train service for the villages on the west bank of the Canal between Bas Obispo and Culebra, inclusive, is provided, with five trains each way daily except Sunday, including a train out of Panama each week day at 9 p. m. For particulars regarding the new changes, attention is invited to the regular tables which appear on Page 3 of this issue.

Visit of New Zealand Cruiser.

The New Zealand battle cruiser *New Zealand*, Captain Lionel Halsey, R. N., is scheduled to arrive in Panama Bay about August 29, for a stay of six days. The vessel is of 18,000 tons, and is at present on detached duty. A reception will be given the captain and officers of the cruiser by the British and American residents, at the Hotel Tivoli on Wednesday, September 3, at 9 p. m.

The existing 6-inch water main on E street, Colon, will be extended south for a distance of several hundred feet to supply water to a new private laundry and cold storage plant, and other demands in that part of the city, at an estimated cost of \$1,100.

FLOODING CULEBRA CUT.

Steamshovel Work in Cut Proper to Cease September 15—Water to be Admitted October 5.

All steamshovel operations in Culebra Cut proper will be discontinued on Friday, September 15, and between that date and October 5, when water will be admitted, all equipment and other material to be recovered, including over 36 miles of track, must be out of the 9-mile channel between Gamboa dike and Pedro Miguel Locks. At the present time, about 30 shovels are at work in the Cut, all on bottom excavation, with the exception of two on each side of the canal on the higher levels engaged in "lightening the load" as a preventive measure against future slides. The shovels formerly at work on Cucaracha slide have been withdrawn, and the material remaining in the slide will be removed by dredging. All the bottom material remaining after September 15 will be drilled and blasted, preparatory to its removal by dredges. All electric wires crossing the Canal from Tower R, north, have been taken down.

On August 1st, 998,900 cubic yards remained to be removed from inside of the theoretical Canal prism. It is estimated that steamshovel operations between that date and September 15 will reduce that amount to approximately 650,000 cubic yards, which will be taken out by dredges. This is exclusive of all slide excavation, and does not include removal of any of the inclines.

It is the intention to retain 10 of the best conditioned shovels in service, using them in the work of removing material from the east and west banks, near Culebra, to lessen the danger from slides. About six of these machines will be employed on the east bank, and four on the west bank, probably until May, 1914, and an organization sufficient to man and look after the shovels is now under consideration. Two of the shovels picked out for this work were wrecked beyond the point where it would pay to repair them, in a slide on the east bank, opposite Culebra village, on Sunday night, August 17. Empire will very likely be retained as headquarters for steamshovel supplies, as long as rail communication across the Cut is maintained. When communication is interrupted, the plan is to establish a repair outfit and small storehouse in the vicinity of the "Cotton tree" dump engine house on the east bank, with a similar outfit on the west bank. The removal of the Empire suspension bridge will probably not be undertaken until the first of next year.

Water will be admitted to Culebra Cut, under the above schedule, on Tuesday, October 5, five days in advance of the date set for the destruction of Gamboa dike. The means employed will consist of four 26-inch pipes extending underneath the dike, now used in pumping the drainage water out of the Canal. The equipment in the pump station will be removed prior to October 5, and the

concrete building in which it is housed will be dynamited. It is estimated that it would take 17 days to fill the Canal to the level of the dike by this method, and the water that will be admitted in the 5-day period is mainly intended to act as a cushion against the Gamboa dike, which will be dynamited on October 10. A battery of drills is now engaged in sinking holes in the dike to the depth of about 30 feet. The blast is not expected to be spectacular, as it will probably only loosen the material, and possibly cause a small opening through which water from the lake will find its way, gradually increasing in size until a considerable stream flows into the Cut.

Gamboa dike was built in 1908 to protect Culebra Cut from inundation from freshets in the Chagres River. During the flood of December, 1906, the river rose to 81.6 feet at Gamboa but this was before the dike was built, and before the Bas Obispo section of Culebra Cut had been completed. During the flood of November, 1909, the water rose to a height of 72.6 feet, and came so close to the top of the dike, which was then at 71 feet above sealevel, that sluice gates were opened to fill the Cut with water to the level of the river to avoid heavy washing in case a break occurred. Since that year, the safety of the dike has never been menaced by freshets. When Gatun Lake rose to over 50 feet in the latter part of 1912, the dike was widened to an average of 50 feet by dumping clay on the side toward the Cut, and raised to an elevation of 78.2 feet above sealevel. When the water in Gatun Lake reached 59.1 feet on August 23, it was still 19.1 feet below the highest part of the dike, although that section over which trains have been run, is much lower.

The rise of the lake has backed up the water in the Camacho Diversion as far as Bas Obispo. The diversion parallels the Canal for several hundred yards from the point where it enters the Chagres River. A small amount of water has been seeping into the Cut through the barrier between the diversion and the Canal, and to avoid any possibility of its giving way, a row of piling, spaced on 2-foot centers, is being driven along the levee. In addition, several trainloads of earth will be dumped on the west side of the embankment.

A few days ago a hand made dike, designed to prevent the water, which drains from the Culebra dump into a lagoon near the Lirio mill, from passing into the Canal, broke through, and gave rise to several rumors. No damage was caused, and the break was speedily repaired.

Improvements at Hotel Tivoli.

Several desirable changes are to be made at the Hotel Tivoli, including the extension of the driveway and entrance, an addition to the number of bathrooms, an increase in laundry facilities, and the remodeling of the kitchen. The circle in front of the hotel will be extended to take in the bandstand, and the driveway will pass behind this, about where the carriage stand is now. The *porte cochere* is to be lengthened to permit four carriages to enter under its cover at one time. The entrance stairway will be widened and given an easier slope outward. At the foot, the stairway will be divided to form two approaches to the veranda, which will be joined by a broad platform at the top. Under the new arrange-

ment there will be sufficient space at the entrance for two carriages to approach, and turn away again without interfering with each other.

Eight bathrooms will be added in the two wings which were opened last year. Fancy tile floors will be laid in the barber shop, bathrooms, and toilets.

The remodeling of the kitchen will make it one-third larger than at present. The ranges will be swung around to the wall that extends along the bakery, which will give more convenient space for them, as well as the dish washing stands and *bain Marie*, a container for keeping the food hot. There will be three pantries, instead of two; the bakery products will be served from one; cold meats, salads, and lunch dishes from the second; and tea, coffee, and other hot drinks from the third. The service tables will be increased in number, and be placed in parallel rows across the kitchen, with sufficient space between each to permit the waiters to pass without crowding.

Dining quarters for the women employes of the hotel are to be built in the basement. The cement flooring in this compartment is being laid.

Concrete Work in Locks and Spillways.

Concrete work in the Canal locks is nearly completed, the aggregate amount in place at the close of work on August 23, being 4,477,796 cubic yards.

A statement of the concrete laid in the three sets of locks for the Canal, and in Gatun and Miraflores spillways, as of August 23, follows:

GATUN LOCKS.

The last concrete for the locks proper, as distinguished from that necessary to finishing work by the First Division, was mixed and placed on August 16, 1913. At the close of work on that day the total amount of concrete placed by the Atlantic Division amounted to 2,045,485 cubic yards.

SOCIAL LIFE OF THE ZONE.

Program for Visit of Shriners.

The United Fruit Company's steamship *Turrialba* is due to arrive on Thursday, August 28, bringing members of the Ancient Arabic Order, Nobles of the Mystic Shrine, who are making a pilgrimage to the Isthmus under the auspices of Osman Temple of St. Paul, Minn., to view the Canal and to conduct the ceremony of initiation in one of the locks at Miraflores. The boat will dock at pier 16, Cristobal, and upon disembarking, the Shriners will form into a parade and march along Roosevelt avenue to Colon, thence up Front and Seventh streets to the Panama Government building, thence on Bolivar street to the Hotel Washington. The steamer *Cartago*, with the remainder of the party on board, is due to arrive at Colon on Saturday, August 30. The *Turrialba* will bring Mr. J. Harry Lewis, the imperial potentate of the order, the Osman Temple band, and the patrol, together with the paraphernalia incident to the initiation ceremony.

The following program has been arranged:

Thursday, August 28—Embarkation and parade from steamer *Turrialba* to Hotel Washington. Remainder of day to be devoted to individual sightseeing in Colon and Cristobal.

Friday, August 29—Sightseeing trip to Gatun Locks, dam, and spillway. Train leaves Hotel Washington at 8 a.m.; returning, leaves Gatun at 9.50. Round trip tickets, 70 cents. The afternoon will be spent in Colon.

Saturday, August 30—Local and visiting Shriners will meet steamer *Cartago* at dock to welcome incoming members, and a special train will leave dock No. 16, on the arrival of the boat, for Panama. In the evening a reception and ball will be given in honor of the visiting Nobles, ladies, and invited guests at the Hotel Tivoli.

Sunday, August 31—A special sightseeing train will leave the Panama station, going over the Pacific and Central divisions of the Canal, including Culebra Cut. Tickets \$3. 3 p. m.—Parade from Hotel Tivoli up Central avenue, Panama, and return. 8.30 p. m.—Band concert at the Tivoli by the Osman Temple band.

Monday, September 1 (Labor Day)—Train leaves Tivoli spur, back of hotel at 6 a. m., for Miraflores Locks. Ceremonial at 7 a. m., sharp, followed by installation of bronze tablet in the locks. 2.30 p. m.—Special train will leave Panama station for Colon, going through without stop. 9 p. m.—Traditional banquet at the Hotel Washington. Admission by 1913 green card only. 9 p. m.—Reception to visiting and local Shrine ladies by ladies of the Eastern Star in the south wing of the Hotel Washington.

Tuesday, September 2—Visitors will depart for Bocas del Toro, where they will spend a few hours on their return trip.

Prize Contest for Boys and Girls.

The Cristobal Union Church announces a contest for boys and girls 15 years old, and under. For the best answer containing not less than 100 and not more than 150 words to the question, "What is your favorite book and why?" a suitable prize will be given. The essays must be in before September 1. Address "Prize Contest", Box 420, Cristobal, Canal Zone.

The annual meeting of the Tivoli Club will be held at the Hotel Tivoli on Sunday morning, August 31, at 10 o'clock.

Fatal Accident.

Frank D. Gartrell, a conductor in the employ of the Fifth Division, was fatally injured early Friday morning, August 22, while riding on a flat car loaded with railroad cross-ties. At the time of the accident, he was endeavoring to prevent a violent coupling with other cars, also loaded with ties, by means of the hand brake. The cars came together with sufficient force to shift the loads, and he was caught between them, sustaining in-

juries from which he died on the way to Ancon Hospital. He was 24 years of age, unmarried, and is survived by a sister, Mrs. V. H. Smith, living at Memphis, Tenn.

Tours of the Canal.

Mr. H. R. Gregory, president of the travel service bureau of St. Louis, announces that the following five parties will visit the Canal on the dates mentioned: October 18, Louisville Chamber of Commerce; October 18,

National Grain Dealers' Association; October 25, Mississippi Valley Medical Association; November 8, National Laundrymen's Association; November 12, Nashville Board of Trade.

Strangers Club activities during the month of September include an informal dance on the second and fourth Thursdays; special dinners each Sunday and Thursday, with music at the Thursday dinner.

JOINT LAND COMMISSION.

Additional Awards.

The following additional awards were announced by the Joint Land Commission at a public session held on Monday, August 18:

Award No. 19—In the matter of the claims of Francisco V. de la Esparilla, and José H. Stilson, to the property designated as "Miraflores"—To Francisco V. de la Esparilla, for his interest in the lands of "Miraflores" located within the Canal Zone, together with any improvements which may be claimed by the same, \$17,500. To José H. Stilson, for his interest in the lands of "Miraflores" located within the Canal Zone, not heretofore acquired by the United States, together with any improvements, which may be claimed by the same, \$7,500. Total, \$25,000.

Award No. 20—In the matter of the claim of Serafin Achurra, for improvements on lands of Talenquera, Obispo, and Gamboa—To Serafin Achurra, for the settlement of all rights, claims, or other interests in all growing crops, fruit trees and buildings, and all other improvements of every kind, and all other rights and claims in lands designated as Talenquera, Obispo, and Gamboa on the property map of the Canal Zone, \$1,190.

Award No. 21—In the matter of certain claims for houses in the town of Gorgona—In an opinion of the Joint Land Commission, dated July 25, 1913, on the demurrer of Counsel of the United States to the jurisdiction of the Commission, in the matter of the claim of Juan Sotillo, the Commission reached the decision that it had jurisdiction to consider the claims of persons who were the owners of the houses in Gorgona, for whose value they now claim, prior to the issue of leases for such property by the Isthmian Canal Commission, or are the heirs of such persons, and to make awards against the United States in favor of said claimants. The evidence before the Commission shows that the persons hereinafter named were either the owners of the properties hereinafter referred to, before they accepted any leases from the Isthmian Canal Commission, or are the heirs of such persons. In no case did the persons hereinafter named make any claim to the owners of the land. To the owners of buildings, for the settlement of all rights, claims, or other interests which they may have in the same, together with any other improvements on the lots with houses designated by their tax numbers, as follows: Antonio Andrade, tax No. 722, \$400; tax No. 758, \$6,500; total, \$6,900; E. Cadet, tax No. 749, \$1,700; tax No. 762, \$630; tax No. 831, \$420; total, \$2,950; (This award is subject to such equities, if any, as may be possessed by third parties, and it is ordered that the amount of this award be deposited in the Circuit Court of the Second Judicial Circuit at Empire for distribution in accordance with the terms of this award.) W. H. Carrington, administrator of the estate of George Andrade, deceased, tax No. 747, \$540; tax No. 751, \$1,500; tax No. 752, \$1,800; total, \$3,840; Lillian Cookhorn, administratrix of the estate of Horatio Cookhorn, deceased, tax No. 842, \$200; Ferdinand Fanfan, tax No. 829, \$130; Pastora Gordon, tax No. 789, \$85; tax No. 790, \$80; total, \$165; Charles Laurent, tax No. 784, \$250; Modesta Leon, tax No. 803, \$200; Guadalupe Lopez, tax No. 815, \$75; Alejandro Ramos, tax No. 755, \$1,100 (This award is subject to such equities, if any, as may be possessed by third parties, and it is ordered that the amount of this award be deposited in the Circuit Court of the Second Judicial Circuit at Empire for distribution in accordance with the terms of this award.) Grand total, \$15,810.

Award No. 22—In the matter of certain claims for houses in the town of Gorgona—In an opinion of the Joint Land Commission, dated July 25, 1913, on the demurrer of Counsel of the United States to the jurisdiction of the Commission in the matter of Juan Sotillo, the Commission reached the conclusion that it had jurisdiction to consider the claims of persons who were the owners of the houses in Gorgona, for whose value they now claim, prior to the issue of leases for such property by the Isthmian Canal Commission, or are the heirs of such persons, and to make awards against the United States in favor of said claimants. The evidence before the Commission shows that the persons hereinafter named were either the owners of the properties hereinafter referred to, before they accepted any leases from the Isthmian Canal Commission, or are the heirs of such persons. In the cases of the persons hereinafter named, claim was also made for the ownership of the land. The evidence submitted to the Commission does not sustain this contention, and in making awards to the persons hereinafter named for their buildings in the town of Gorgona, it is to be understood that the Commission dismisses, without award, the claims presented by them for ownership in the lands. To the owners of buildings, for the settlement of all rights, claims, or other interests, which they may have in the same, together with any other improvements lo-

cated on the lots with houses designated by their tax numbers, as follows: Joaquina U. de Lasso de la Vega, tax No. 744, \$950; Benita Teran, tax No. 787, \$1,050. Total, \$2,000.

RULE DISMISSING CLAIMS ALREADY SETTLED.

In the matter of sundry claims on the lands of Matachin—The Disbursing Officer of the Canal Zone has certified to the Commission that payments have been made in 1913 to the persons herein named, for their houses and other improvements on the lands of Matachin, covering claims which have been before the Commission for consideration. The record of these claims, showing name, together with the tax number of houses included in such claim, and the record of the Disbursing Officer showing the voucher number of each payment, its amount, and the month of the year 1913 in which the same was paid is, as follows:

In view of the payments noted, the foregoing claims call for no further action by this Commission, and they are accordingly dismissed.

(Signed) FEDERICO BOYD, ROLAND P. FALKNER, SAMUEL LEWIS, L. S. ROWE, Commissioners.

RULE DISMISSING CLAIMS

In the matter of sundry claims on the lands of Matachin—The Disbursing Officer of the Canal Zone has certified to the Commission that vouchers have been prepared and are ready for payment in the name of the persons hereinafter named for the purchase of their houses and other improvements on the lands of Matachin, covering claims which have been before the Commission for consideration. Although these claims have not as yet been paid, the persons concerned have signed a written agreement pledging themselves to accept the sums mentioned in payment for the property in question. The record of these claims, showing name, together with the tax number of the houses included in the

said claims, the register number of the account, and the amount agreed upon is, as follows:

EXECUTIVE ORDERS.

Appointment of Richard Lee Metcalfe Member of the Isthmian Canal Commission.

Richard Lee Metcalfe is hereby appointed a member of the Isthmian Canal Commission at the rate of Fourteen Thousand Dollars (\$14,000) per annum, effective this date.

Commissioner Metcalfe will be allowed the use of a furnished dwelling house on the Isthmus of Panama and will be allowed and paid his actual and necessary expenses while away from the Isthmus on official business.

WOODROW WILSON.

THE WHITE HOUSE,

August 9, 1913.

[No. 1812.]

Providing for the Protection of Birds and their Nests in the Canal Zone.

By virtue of the authority vested in me, I hereby establish the following Executive Order for the Canal Zone:

Section 1. It shall be unlawful for any person to hunt, trap, capture, wilfully disturb, or kill any bird of any kind whatever, or to take the eggs of any bird, except in the form and manner permitted by the regulations provided for by this Order.

Section 2. The Isthmian Canal Commission, or the Governor of the Panama Canal after the reorganization is established, is hereby empowered and directed to enact suitable regulations, from time to time, for the protection of birds and their nests, and prescribing the form and manner in which birds may be hunted, and those that shall not be molested.

Section 3. A violation of any of the regulations established under this Order shall be punished by a fine of not more than one hundred (100) dollars or by imprisonment for not more than thirty days for each offense.

Section 4. This Order shall take effect thirty days after its publication in THE CANAL RECORD.

WOODROW WILSON.

THE WHITE HOUSE,

March 19, 1913.

(Published in The Canal Record of April 9, 1913.)

Pursuant to Section 2 of the above Executive Order, the following regulations for the protection of birds and their nests in the Canal Zone are enacted by the Isthmian Canal Commission:

Section 1. Birds' nests and eggs shall not be taken nor wilfully destroyed or disturbed.

Section 2. No bird shall be held or sold, nor shall any bird be snared, trapped, or captured by any device, except native, or foreign live cage birds known as parrots, parakeets, macaws, skylarks, and canaries.

Section 3. Excepting the hereinafter named game birds, and excepting birds of prey in pursuit of their quarry, no bird shall be hunted or killed, shot at or wilfully disturbed.

Section 4. During the periods specified, but at no other times, the following named game birds may be hunted and killed, but only by a person holding a license to hunt in the Canal Zone:

From and including June 1, to and including October 15 of every year:

The various species of native wild ducks, pigeons and doves, and the native game birds belonging to the families of birds known as quail, curassows and guans.

From and including October 15, to and including January 31 of every year:

(a) The migratory ducks known as blue-winged teal, broad-bill, mallard, pintail, and shoveler.

(b) The migratory shore-birds known as Wilson's or jack-snipe, and those known as yellow-legs.

Section 5. The taking of all birds, their nests and eggs for purely scientific purposes may be authorized by the Chairman of the Isthmian Canal Commission, or by the Governor of the Panama Canal, provided that any person desiring such authority shall first submit in writing satisfactory evidence of his or her object which shall be endorsed by some known ornithologist, or the head of a scientific institution of good standing.

Section 6. Possession of a bird, or any part thereof, plumage, nest, or egg shall be *prima facie* evidence of the violation of these regulations upon the part of the person having it in possession.

GEO. W. GOETHALS,

Chairman and Chief Engineer.

CULEBRA, C. Z., August 22, 1913.

Changes at Pedro Miguel.

The Commission hotel at Pedro Miguel will be dismantled within the next few days, and will not be rebuilt. Arrangements have been made by the Subsistence Department to convert a part of the building containing the European laborers' mess into a dining room for the gold employees, the two sections to be entirely independent. The commissary, formerly at Gorgona, will be reerected at Pedro Miguel on a site, on the east side of the track, near the present railroad station, at a point where a flower bed existed until a few days ago. Other changes in the settlement consist of the dismantling and reerection on higher ground of bachelor quarters Nos. 100, 101, 104, and 105, using the material to construct eight smaller buildings; the removal of cottages Nos. 91 to 99, inclusive, to sites selected by the landscape architect; raising houses Nos. 85 to 89, inclusive, under which concrete piers will be placed; removal of the building in the rear of the hotel, formerly used by the waiters, to Balboa, and the removal of house No. 106, occupied by the commissary help, also to Balboa. The police station, formerly at Gorgona, has been reerected at Pedro Miguel, and the material from the Gorgona clubhouse is on the ground.

Suggested Method for Shipping Employees' Household Goods.

If employees of the Canal Commission, the Panama railroad, and of the contractors engaged in Canal work, will check their personal effects and household goods as baggage, properly boxed, the shipments will be unloaded as soon as the ship docks at New York, and can then be passed by the customs inspector, and forwarded the same day to an out-of-town destination. In this way, the delay in New York incident to waiting for freight to be discharged from ship will be obviated, and the shipper will be saved the expense incurred by entry through the office of a customs broker.

Dr. C. A. Hearne, quarantine officer at Colon and Cristobal, has been detailed to visit the native village of San Juan on the Pequeni River, and inquire into the unusual mortality, which is reported to have taken place among the inhabitants at that point.

CONCRETE PLANT CLOSED.

Mixing Plant No. 1 at Gatun, Largest in Canal Work, Being Dismantled.

The dismantling of the large concrete mixing plant on the west side of Gatun Locks, known as plant No. 1, or the permanent mixing plant, was begun on Saturday, August 16. Three of the eight 64-cubic foot Chicago cube mixers have been lifted out to date, and the superstructure and electric tracks for serving material to the mixers and carrying concrete to the cableways have been removed. The Atlantic Division completed on August 15 the work of decking the lower approach and wing walls, allotted to it from the First Division, and its remaining work in the locks comprises a few parapets and the control house. The three last charges mixed at plant No. 1 were placed in a manhole of the permanent duct line from the hydroelectric station, at the spillway to the locks, on the morning of August 16. That afternoon, the dismantling began. The first concrete delivered from this plant was on August 24, 1909, for the floor of the upper lock; the plant has thus been in service almost four years. During that time, it has mixed over 1,600,000 cubic yards of concrete. A description of the plant, with its electric services from the stock piles and to the cableways, was published in THE CANAL RECORD of September 1, 1909.

The auxiliary plant, of two 2-cubic yard mixers, situated east of the upper approach to the locks, was closed on March 11, 1912, after operation since December 31, 1909, and dismantled shortly afterward. The third large plant, erected to supply concrete for the spillway of Gatun Dam, and equipped with two 2-yard mixers, remains in service. Concrete work for the spillway was 98.53 per cent completed on August 1; the placing of concrete in the walls of the hydroelectric station has just begun. The Atlantic Division is now operating two $\frac{1}{2}$ -yard portable mixers at the locks, for paving slope on the east dam, and constructing the control house.

The estimate of concrete to be placed in the locks by the Atlantic Division, was 2,043,730 cubic yards. The amount actually placed, as shown by monthly place measurements up to June 1, 1913, and by bucket measurement since that date, is approximately 2,045,000 cubic yards. The difference between the amount estimated and the amount placed is thus about one hundredth of one per cent in the masonry estimate for the largest concrete structure ever built.

The following records, from THE CANAL RECORD, and other official reports, give the best daily, monthly, and yearly outputs from the lock plants at Gatun:

	Day.	Month.	Fiscal year.
Cubic yards.....	4,443	89,391	911,137

Missing Men.

Any one having information regarding the whereabouts of Mr. Gibson B. Smith, formerly in the Tenth United States Infantry, is requested to communicate with the American Legation, Panama.

Any one having information regarding the whereabouts of Mr. Lawrence Madden, who is believed to be on the Isthmus, is requested to communicate with Mr. Joseph F. Merritt, 858 Junction avenue, Detroit, Mich.

LOST—At Bas Obispo, or Gorgona shops, a gold signet ring set with a moonstone, "A. J. Mettler" engraved on inside. Reward, if returned to Mr. Robert Richardson, House 83, Room 8, Cristobal.

OFFICIAL CIRCULARS.

Steamship Accommodations for Gold Employees Leaving the Service in October.

CULEBRA, C. Z., August 27, 1913.

HEADS OF DEPARTMENTS AND DIVISIONS:

It is anticipated that, in view of the reduction in force, beginning on or about October 10, there will be an exceptionally heavy demand for accommodations on Panama railroad steamers sailing shortly after that date. In order to meet this situation, it is desired, so far as possible, all accommodations on the steamer *Colon*, sailing October 12; *Ancon*, sailing on or about October 13; *Advance*, sailing October 18, and *Panama*, sailing October 23, be reserved exclusively for employees leaving the service.

Applications for leave of absence with requests for transportation on any of the above sailings will not be approved unless good and sufficient reasons therefor are submitted, and employees are urgently requested to make their arrangements accordingly.

GEO. W. GOETHALS,
Chairman, Isthmian Canal Commission.
President, Panama Railroad Company.

Rules Governing Sales of Material.

CULEBRA, C. Z., August 23, 1913.

CIRCULAR No. 399-B:

1. Effective September 1, 1913, Circular No. 399-A is cancelled, and the following rules will govern sales of material.

2. Sales of material, supplies, and equipment, including fabricated articles, rock, sand, and gravel, and excluding only sales of medical and surgical supplies, and sales of school books and supplies, which latter may continue to be sold by the Chief Sanitary Officer, and the Superintendent of Schools, as now authorized, will be made by the Chief Quartermaster, as follows:

a. Material and supplies that can be spared may be sold to officers and employees of the Isthmian Canal Commission and the Panama Railroad Company, and to other departments of the United States Government, for their personal use, and to clubs, societies, and other organizations of such employees.

b. Material and supplies that can be spared may be sold to the Canal Zone Government, Panama Railroad Company, Commission clubhouses, and to other departments of the United States Government, also to steamship companies and their agents for use on ships.

c. Material and supplies that can be spared and are not obtainable in the local markets, may be sold to individuals and companies, except that if the amount of sale in any case exceeds \$250, prior authority from the Chairman must first be obtained.

3. SALES OF MATERIAL:

a. Sales of regular stock material and supplies, fabricated articles, rock, sand, and gravel. Request for purchase should be made through the Chief Quartermaster, Culebra, who will deliver the material through the nearest storehouse from which the material can be supplied, at price book prices, plus the usual surcharge, except in such cases as may be otherwise provided for by contract.

b. Sales of second-hand lumber, second-hand roofing, and other miscellaneous second-hand material. Request for purchase should be made through the Chief Quartermaster, who will deliver the material at the point where it is available, at prices set by the Board of Appraisal.

c. Sales of surplus and obsolete material that has been turned into the storehouse for obsolete material at Mount Hope. Requests for purchase of this class of material should be made direct upon the Depot Quartermaster at Mount Hope, who will be given blanket authority to make sales of such material, at prices set by the Board of Appraisal, a detailed report of such sales to be made monthly to the Chief Quartermaster.

4. SALES OF EQUIPMENT:

a. Sales of all surplus and obsolete equipment turned in by the various departments and divisions will be handled exclusively by the Chief Quartermaster.

b. The Quartermaster's Department will act as sales agent for the Panama Railroad Company in the sale or disposition of any surplus or obsolete equipment retired by that company.

c. All inquiries from prospective purchasers of equipment should be referred to the Chief Quartermaster.

5. BOARD OF APPRAISAL:

a. The value of all second-hand material, obsolete or surplus material, and of all equipment offered for sale, shall be appraised by the Board of Appraisal, appointed by the Chairman, which shall meet weekly. The Board of Appraisal shall fix

the selling price for such material, supplies, and equipment. After such prices are approved by the Chairman, sales may be made by the Chief Quartermaster without additional authority, at the prices thus fixed, to an amount in any one case of \$100.

b. All requests for appraisal of material, supplies, and equipment will be forwarded to the Board of Appraisal through the Chief Quartermaster, who will submit all data available with the request.

c. The Chief Quartermaster will furnish all necessary clerical work for the proper keeping of the records of the board, and will keep the files of all papers in connection therewith.

6. *Terms of Sale*—All sales shall be made on a cash basis unless otherwise specifically authorized by the Chairman, except the following:

a. Sales to other departments of the United States Government, the Canal Zone Government, the Panama railroad, the Commission clubhouses, and the Republic of Panama.

b. Sales to contractors with the Isthmian Canal Commission or Panama Railroad Company, and to steamship companies, and others, in cases where such individuals or companies secure payment for the material, supplies and equipment, by making a deposit of cash or satisfactory certified check, or by giving a bond in form, with sureties satisfactory to the Examiner of Accounts of the Commission, in an amount to be fixed by the Chief Quartermaster to cover the line of credit which it is deemed advisable to grant, and conditioned upon the payment for such material, supplies and equipment within thirty days from the close of the month within which delivery of the material, supplies, or equipment is made.

c. Sales to contractors with the Isthmian Canal Commission and the Panama Railroad Company, and to steamship companies, in cases where the Isthmian Canal Commission or the Panama railroad is indebted to such contractors or companies for material furnished or services rendered by them to the Commission or the railroad company, in an amount equal to or in excess of the value of any material, supplies, or equipment sold.

7. FREIGHT CHARGES:

a. On second-hand, surplus, and obsolete material and equipment, shipment over the Panama railroad will be made at the expense of the purchaser, unless otherwise provided for in the terms of sale.

b. The purchaser will, however, be granted the freight rates fixed by the tariff for Isthmian Canal Commission business, effective January 1, 1907, and supplements thereto, namely, \$2.25 a ton of 2,000 pounds, minimum carload weight 20,000 pounds, and minimum charge of 20 cents, \$50 for each movement dead weight in train, for special equipment, such as steamshovels, locomotives, cranes, and pile drivers, and \$5 for each empty car. If the general local tariff rates are lower than the rates specified above such rates will apply.

8. DUTY PAYABLE:

a. Material, supplies, and equipment sold for use within the Republic of Panama and the Canal Zone, shall be subject to payment of customs duty by the purchaser to the Republic of Panama.

b. Delivery of such material, supplies, and equipment will not be made to the purchaser until he shall have presented to the depot quartermaster at Mount Hope, or to the district quartermaster at Ancon, two copies of bill covering sale, on which are endorsed certificates signed by the Treasurer of the Republic of Panama or his authorized representative in Panama or Colon, that customs duties on such material, supplies, and equipment have been paid, or have been remitted.

c. This provision shall not apply, however, to sales made:

1. To individuals and companies who have been granted blanket authority by the Republic of Panama to make purchases without payment of customs duties.

2. To the Panama Railroad Company, the Canal Zone Government, other departments of the United States Government, or contractors with the Commission or the Panama Railroad Company when articles purchased are for use in connection with their contracts.

3. To steamship companies and other individuals and companies when the articles purchased are for use solely outside of the territorial limits of the Canal Zone and the Republic of Panama.

4. To churches and charitable organizations.

5. To officers and employees of the Isthmian Canal Commission and the Panama Railroad Company, officers and enlisted men of the United States Army, Navy, and Marine Corps, or officers and employees of other departments

of the United States Government, where the articles are purchased for personal use.

6. To clubs, societies, or other organizations of such officers, employees, and enlisted men in the Government service.

GEO. W. GOETHALS,
Chairman, Isthmian Canal Commission.
President, Panama Railroad Company.

Physical Inventory of French Property.

CULEBRA, C. Z., August 20, 1913.

CIRCULAR No. 497:

Effective August 30, 1913, an inventory will be taken by all accountable officers of all French property, material, and equipment stored, or in use in the various departments and divisions. Great care must be taken to see that this inventory is properly compiled and full information must be shown, so that every article listed thereon can be readily identified. This is to be an actual physical inventory, and not to be taken from the property records.

When inventories are completed they should be transmitted direct to the Examiner of Accounts.

GEO. W. GOETHALS,
Chairman and Chief Engineer.

Surcharges on Labor.

CULEBRA, C. Z., July 31, 1913.

CIRCULAR No. 169-N:

Effective August 1, 1913, the following surcharges on labor, without machinery, for supervision and use of tools, will be applied:

BETWEEN DEPARTMENTS AND DIVISIONS OF THE COMMISSION, GOVERNMENT OF THE CANAL ZONE, AND THE PANAMA RAILROAD COMPANY.

On silver labor.....Ten per cent.
On gold labor.....Twenty-five per cent.

FOR INDIVIDUALS AND COMPANIES.

On silver labor.....Fifteen per cent.
On gold labor.....Forty per cent.

All previous circulars relating to surcharges on labor are modified accordingly.

GEO. W. GOETHALS,
Chairman and Chief Engineer.

Permanent Shops at Balboa.

CULEBRA, C. Z., August 26, 1913.

CIRCULAR No. 498:

The permanent shops at Balboa will hereafter be known and designated as the "Balboa shops."

The shops operated by the Sixth Division and heretofore known as the Balboa shops will hereafter be known and designated as the "Shipways shops."

GEO. W. GOETHALS,
Chairman and Chief Engineer.

Showing Location of Equipment on Survey Request.

CULEBRA, C. Z., August 26, 1913.

CIRCULAR No. 323-D:

Accountable officers presenting rolling stock and other equipment for survey are required to show on survey requests, location of such equipment, so that the surveying officer can readily locate and pass on same, and such equipment will not be removed from location shown on survey requests until after survey has been made and approved by this office, unless the surveying officer shall have been notified of the removal.

GEO. W. GOETHALS,
Chairman.

Shop Expense Percentages.

CULEBRA, C. Z., August 22, 1913.

HEADS OF DEPARTMENTS AND DIVISIONS:

In accordance with the provisions of Circular No. 169-E, the following shop expense percentage for each shop is hereby fixed, effective September 1, 1913, and will be applied, until further orders, to the distributed labor used in all shop work, in accordance with the provisions of Circular No. 264-A, viz:

DIVISION OR SHOP.	Shop expense percentum.
Mechanical Division.....	50
Dry dock shop.....	60
Balboa shop.....	25
Porto Bello.....	40
Toro Point.....	40

Circular letter from this office dated March 29, 1913, is revoked.

GEO. W. GOETHALS,
Chairman and Chief Engineer.

Sample Shipments.

CULEBRA, C. Z., August 22, 1913.

HEADS OF DEPARTMENTS AND DIVISIONS:

Several cases have recently been brought to the attention of this office in which samples of material to be used for testing and other purposes in connection with Commission work have been ordered by employees

under personal consignment, which results in annoyance to both the employe and this office in adjusting transportation charges.

In the future, when a sample shipment is desired for official purposes, the same must be obtained through the Quartermaster's Department.

GEO. W. GOETHALS,
Chairman.

Appointment of Port Captain at Cristobal.

CULEBRA, C. Z., August 20, 1913.

CIRCULAR No. 410-C:

Mr. R. W. Bergin, receiving and forwarding agent, Colon, is hereby appointed captain of the port of Cristobal, effective September 15, 1913, vice Mr. J. St. C. Huot.

GEO. W. GOETHALS,
Chairman.

Removal of Track over Dike at Gatun Locks.

GATUN, C. Z., August 27, 1913.

To All Concerned—The track across the dike at the north end of Gatun Locks will be broken at 7 a. m., on September 2, by the removal of the steel truss bridge over which this track passes.

WM. L. SIBERT,
Division Engineer.

New Account in Classified Expenditures.

EMPIRE, C. Z., August 19, 1913.

CIRCULAR No. 48:

The following new account in classified expenditures of the Isthmian Canal Commission is hereby authorized in the Department of Construction and Engineering—general:

ACCOUNT 352—PERMANENT TOWN SITES.

To this account will be charged all expenses incurred in connection with the construction of permanent town sites in the Canal Zone, including salaries and wages, material and supplies, and other incidental expenses in connection therewith.

H. A. A. SMITH,
Examiner of Accounts.

Approved:

GEO. W. GOETHALS,
Chairman.

Ice and Cold Storage Deliveries.

PANAMA RAILROAD COMMISSARY DEPARTMENT.

CRISTOBAL, C. Z., August 20, 1913.

CIRCULAR No. 459-A:

To All Concerned—Circular No. 459, published in THE CANAL RECORD of August 13, is amended, as follows, effective today:

Deliveries will be made as specified but only to those employes on the gold roll who are entitled to make application for Commission and Panama railroad quarters.

JOHN BURKE,

Approved:

F. O. WHITLOCK,
Acting Subsistence Officer.

Effective Date of New Panama Railroad Timetable.

PANAMA RAILROAD COMPANY,
OFFICE OF GENERAL SUPERINTENDENT,
COLON, R. P., August 23, 1913.

CIRCULAR No. 177:

All Concerned—Circular No. 162, dated August 16, 1913, in regard to abandoning Gorgona and Matachin stations and printing of new time table, should read that the new time card will be put into effect on Tuesday, September 2, 1913, instead of Monday, September 2, 1913.

JOHN D. PATTERSON,
General Superintendent.

Panama Railroad Parlor Car Service.

PANAMA RAILROAD COMPANY,
OFFICE OF GENERAL SUPERINTENDENT,
COLON, R. P., August 19, 1913.

CIRCULAR No. 172:

All Concerned—Circular No. 138, dated July 18, in regard to parlor car service on Panama railroad trains, is hereby cancelled. Effective August 17, parlor car service will be maintained on the regular schedule, as indicated in pocket timetable No. 14.

JOHN D. PATTERSON,
General Superintendent.

Change in Colon Local Freight Agency.

PANAMA RAILROAD COMPANY,
OFFICE OF GENERAL SUPERINTENDENT,
COLON, R. P., August 16, 1913.

CIRCULAR No. 161:

All Concerned—Effective September 15, 1913, the Colon local freight agency will be segregated from the Colon freight department, and Mr. J. C. Warren is appointed local freight agent, effective on that date, reporting to the freight and passenger agent.

J. D. PATTERSON,
General Superintendent.

COMMISSION CLUBHOUSES.

Activities of the Young Men's Christian Association.

GENERAL.

Nearly 100 entries have been received for the athletic and aquatic meet to be held at Corozal on Labor Day, September 1. The athletic events will begin at 9 a. m., and the aquatic events at 2 p. m. There will be a special train to take the spectators to the point at which the aquatic events are to be held. Music will be provided by the bands from the Marine Corps and Tenth Infantry. The work on the athletic field has been completed, and special arrangements are being made for the handling of the crowds that are expected.

The schedule for moving pictures for the week, September 1 to 6 is, as follows: Monday, Culebra; Tuesday, Cristobal; Wednesday, Gatun; Thursday, Corozal; Friday, Empire and Porto Bello.

COROZAL.

The Culebra basketball team defeated the Corozal team by a score of 18 to 16 on Saturday, August 23. The game was closely contested from start to finish.

The standing in the handicap tenpin tournament is, as follows: Albert, first; Ward, second; Walker, third.

High scores in bowling for the week are, as follows:

Tenpins—Bordt, 205, 204; Start, 202, 200; Viller, 201, 213; Whiston, 204. Duckpins—Burke, 106; Beall, 108.

The funeral services of the late Frank Dewitt Gartrell were held at St. Luke's Chapel, Ancon, under the auspices of the Corozal Y. M. C. A., on Sunday afternoon, August 24. Mr. Gartrell was an enthusiastic supporter of the Y. M. C. A., and especially interested in the chess and checker clubs. A number of the prominent chess and checker players have drawn up a set of resolutions in his memory.

In addition to the athletic and aquatic meet to be held at Corozal on Labor Day, there will be an invitation bowling tournament under the management of the Corozal Y. M. C. A., in which all Y. M. C. A. bowlers are invited to participate. Suitable medals will be offered as prizes.

CULEBRA.

On Friday evening, August 22, a "Smokeless smoker" was held under the auspices of the Culebra Y. M. C. A., at the schoolhouse. The following program was rendered: Mandolin orchestra, Messrs. Ramsey, Ar-buckle and Pearsall; piano solo, Mr. Pearsall; reading, Mr. Silver; soprano solo, Mrs. Frank Roberts; selection, mandolin orchestra; exhibition with handcuffs, Carolo Rodriguez; "Twelve minutes in China," Messrs. Aaron and Homer; exhibition of roller skating, Miss Edith Carson. The orchestra played before and after the program. Refreshments of ice cream, homemade cake, and lemonade were served.

At the service on Sunday evening, Rev. Harry Compton gave an address on the subject, "Forget it."

High scores in tenpins during the week are, as follows: Grossberg, 216; Dougherty, 223, 212, 202; Case, 201.

EMPIRE.

The Empire glee club gave a very enjoyable concert on Sunday evening, August 24, at which about 150 people were present. The program was, as follows: Prelude, piano solo, "Rachmaninoff," by Mrs. J. F. Storing; mixed chorus, "They that sow in tears," from "The Holy City;" soprano solo, "Calm as the night," Bohm, by Mrs. J. L. Caldwell; solos, duet, and chorus, "Christian, the morn breaks sweetly o'er thee," Shelley; soprano solo by Mrs. Young; bass solo by Mr. F. C. Conner; tenor solo and chorus, "Seek ye the Lord," Roberts, Mr. H. W. Dohrmann and chorus; soprano solo, "Oh, dry those tears," Mrs. Roberts; chorus, "Thine is the kingdom," from "The Holy City," by the glee club. Mrs. J. F. Storing was accompanist, and Mr. H. W. Dohrmann musical director.

About 250 men attended the "Smoker" given on Monday evening, August 18. The program consisted of moving pictures, tenor solos, wrestling, and fencing bouts, piano solos, and fancy roller skating. Refreshments were served.

The Culebra basketball team played the Empire team on Wednesday evening, August 20, and was defeated, 58 to 13.

GATUN.

The musical smoker held on Saturday evening, August 23, drew a large attendance. The program was, as follows: Tenth Infantry orchestra, opening selection; Edith Carson, roller skating; Aaron and Homer, piano duet; Otis, Burmeister, and Morrison, Barbadian talk; Tenth Infantry squad, Army calisthenics; Ramsey and Arbuckle, mandolin duet; McSparran and Simon, fencing match; Camp Elliott quartet, saxophone sextet; Aaron and company, "Thirteen minutes in China;" C. C. Pearsall, piano solo; Thomas Riley, ballad singing; Ed. King, Irish yodeling; Prince Rajah, Hindoo magic; Quyan and Huber, wrestling match.

The Tenth Infantry band will give a concert at the

Gatun Y. M. C. A. on Saturday evening, August 30. The admission prices will be, members, free; nonmembers, 50 cents; children, 25 cents. All seats will be reserved. The band will be assisted by several prominent vocalists.

The standing of the popular handicap pool tournament on Saturday evening, August 23, was, as follows:

Name.	Won.	Lost.	P.C.
Bailey.....	2	0	1.000
Townley.....	2	0	1.000
O'Hara.....	2	0	1.000
Kerruish.....	2	0	1.000
Dewey.....	1	0	1.000
Pettitt.....	1	1	.500
Johnson.....	1	1	.500
Carkeet.....	1	1	.500
Dennis.....	1	2	.333
Hammill.....	1	1	.000
Von.....	1	1	.000
Reisner.....	1	1	.000
Gray.....	2	2	.000
Bradley.....	2	2	.000
Wall.....	2	2	.000

A large crowd was present on Wednesday evening, August 20, at the north end of Gatun Locks, when swimming events were conducted by the local Y. M. C. A. The results of the men's relay race were, as follows: First, Locks team—J. Mitchell, captain, Huber, Joe Smith, Wright. Second, First Division team—Reisner, captain, Schutt, Duthheimer, Gray. Third, dredge team—Parsons, captain, Forstrom, Gardner, Iarsson. Fourth, McClintic-Marshall team—D. C. Galloway, captain, W. Galloway, Roberts, Farley. Fifth, testing engineer's team—Seeley, captain, Shaw, Wathem, Kyes. Sixth, spillway team—Porter, captain, Dewey, Waster, Walker.

The boys finished in a 75-yard swim in the following order: Atkins, Sisson, Christian, F. Garrison, Kerr, P. Baker, G. Butcher, C. Dewey, H. Butcher, D. Grant.

The results of the indoor baseball games in the week ending August 23 were: Won—First Division, McClintic Marshall office, Transportation, First Division. Lost—First McClintic-Marshall field, Commissary, Second McClintic-Marshall field, Commissary.

CRISTOBAL.

The Cristobal ladies reversed their defeat by the Gatun ladies' duckpin team by winning all three games on the Cristobal alleys on Wednesday, August 20. The totals were, as follows:

Cristobal...	415 419 390	Gatun.....	363 402 383
--------------	-------------	------------	-------------

The Cristobal tenpin team won from the Empire team, two out of three, on Saturday, August 23, by the following scores:

Empire.	Cristobal.
Simms.... 168 159 134	Harrison... 154 211 150
Patterson... 182 156 136	Buser.... 162 172 142
Beattie.... 192 150 151	Collins.... 174 158 170
Gilmore.... 138 172 157	Barnum.... 178 136 225
Gustavson... 175 177 190	Bullard.... 175 228 170
855 814 768	843 905 857

Mr. G. R. Raymond, handcuff artist, assisted in the entertainment at the moving picture show on Saturday night, August 23.

The first regular meeting of the discussion club was held on Tuesday, August 26. After the committee on nominations and the constitution had reported, Mr. W. B. Childers of Gatun led in the discussion, using as his theme, "Natural law in the world of labor."

Interest in the chess club is increasing. Tuesday night, August 26, was devoted to considering the Ruy Lopez opening and the various masters' notations on it. Mr. Wm. Dubois of Culebra will play a simultaneous chess match with the members of the Cristobal club at Cristobal on Saturday night, August 30.

Tide Table.

The following table shows the time of high and low tides at Panama for the week ending Sept. 6, 1913:

DATE.	Low	High	Low	High	Low
	A.M.	A.M.	A.M.	P.M.	P.M.
Aug. 31.....	2.53	9.07	3.12	9.28

CANAL

RECORD

Volume VII.

ANCON, CANAL ZONE, WEDNESDAY, SEPTEMBER 3, 1913.

No. 2.

The Canal Record

Published weekly under the authority and supervision of the Isthmian Canal Commission.

The Canal Record is published free of charge, one copy each to all employees of the Commission and Panama Railroad Company whose names are on the gold roll. Extra copies and back numbers can be obtained from the news stands of the Panama Railroad Company for five cents each.

Address all Communications,

THE CANAL RECORD,

Ancon, Canal Zone,
Isthmus of Panama.

No communication, either for publication or requesting information will receive attention unless signed with the full name and address of the writer.

NOTES OF PROGRESS.

Opening New Passenger Station at Panama.

The north wing of the new passenger station at Panama will be opened for use about Monday, September 8. This, the second-class division, will be used by first-class passengers while the south wing is being finished. The change is made at this time, in order to allow the complete removal of the old station, the steel work of which is needed in the erection of the baggage room in rear of the new station. Second-class passengers will, for the present, enter the train shed through a gate in rear of the old station; temporary waiting benches will be provided for them under the shed at the alighting platform, and tickets will be sold from a booth erected under the runway from the platform to the old station. It is expected that the new station will be placed in full use about November 1, 1913.

Preservation of Retired Equipment.

Messrs. W. H. Bates, H. S. Farish, and C. T. Cushman, have been appointed a committee to investigate the most suitable protection against deterioration, through climatic influences, of equipment permanently retired from service. The committee is also delegated with the work of preparing a set of rules and regulations governing the procedure to be followed upon the permanent retirement from service of any piece of each class of equipment, and to recommend the most advantageous place or places at which the application of the preservative may be made.

Canal Commission Takes over Panama Street Cleaning.

A provisional arrangement has been entered into between the Panama Government and the Canal Commission, whereby the latter, as of September 1, has again taken over the work of street cleaning, garbage collecting, and street sprinkling in the city of Panama. At the outset, and up to 1908, this work was performed gratuitously by the Canal Commission. The

Panama Government then served notice that it desired to take charge of the service, and the transfer took place on September 1, 1908. Since that time, the work has been handled by the Panama Government, the Canal Commission contributing the sum of \$10,000 annually toward its cost. Under the new arrangement, the Canal Commission will have complete jurisdiction over the work, and it will continue from year to year, unless 60 days' notice is given by either party, previous to the termination of the contract year, of desire for cancellation. The agreement also stipulates that Panamanian citizens be given preference in the matter of employment.

Mess Hall at Ancon for Gold Employees.

A mess hall has been authorized at Ancon for gold employees, and the hotel building at Pedro Miguel will be used for the purpose. It was the original intention to reerect the Pedro Miguel hotel as an annex to the mess hall at East Balboa, but this arrangement will not now be necessary, inasmuch as eating accommodations for bachelor employees at Ancon will relieve the congestion at the East Balboa hotel. The probability that a number of bachelors will continue to be quartered at Ancon, even after the completion of the Canal, was also taken into consideration. The new Ancon mess hall will have table accommodations for about 100 people at a sitting, and is to be situated on the road to Bishop's Hollow, near the new quarters recently erected in that locality. The hotel privileges will be extended to gold employees and their families only, and nonemployees will not be served even at the 50-cent rate.

Fill of Marshy Area Near Panama.

The low, swampy area lying between the Curundú River on the north, and that part of the Calidonia district of the city of Panama, known as San Miguel, on the south, will be filled in by the Canal Commission. This section has made an excellent breeding place for mosquitoes in the rainy season, and constitutes a menace to the health of the people living in the vicinity, besides causing continual expense in oiling. The owners of the property, with one exception, have agreed to the proposal, as it will enhance the value of their holdings, and be of no expense to them. The new sanitary rules and regulations placed in effect by the Panama Government, and published in the *Gaceta Oficial* of March 27, 1913, provide:

Section 92. All premises must be kept in such condition as to prevent mosquito breeding, and upon failure of the owner, agent, or occupant of such premises to correct the insanitary conditions therein after notice from the health officer, or his representative, he shall be fined, and the health officer may proceed to correct such condition, the cost of same to be a charge against the delinquent person to be collected by execution against his property.

It is proposed to make the fill hydraulically, using material dredged from the terminal basin at Balboa.

MIRAFLORES TO THE SEA.

Last Barrer at Pacific End of Canal Destroyed on Sunday, August 31.

The last remaining barrier at the Pacific end of the Canal was dynamited at 9.30 o'clock on Sunday morning, August 31. This dike, composed of a trestle fill of rock and earth, prevented the water from the sealevel channel from entering the steamshovel cut 5,000 feet long, 500 feet wide, and 46 feet below mean tide, extending to Miraflores Locks. The Rio Grande Diversion was turned into this pit on August 23, but the depth of water had only reached about 15 feet by Sunday. About 37,000 pounds of 45 and 60 per cent dynamite were used, the charge being placed in 541 holes at an average depth of 30 feet. A large crowd of spectators was present, and pictures of the blast were taken by numerous kodaks, and one moving picture machine.

At the time of the explosion the water in the channel, south of the barrier, was nearly at low tide. The dynamite tore a gap in the dike about 100 feet wide, but as the bottom of the gap was still at some height above the existing tide level, no water passed through. An 18-foot tide was predicted for Sunday, with its maximum at 3.12 p. m., so that before high tide water was expected to flow over the gap in the dike. This expectation was fulfilled a little earlier than was anticipated, for, at 1.35 p. m., the water in the sealevel channel was nearly even with the top of the gap. At this moment a man with a shovel made a small trench across the dike through which a small stream of water began to flow. This rapidly increased in size until 40 minutes later, an opening 30 feet wide had been made, through which a torrent of water poured in a 30 or 35-foot fall. The rush of water ate away the sides of the opening steadily, carrying large sections of the dike, including trestle bents, and other debris, into the pit. The increasing volume of water filled the pit rapidly, and at 3 o'clock, one hour and 25 minutes after the water first began to flow over, the level in the inside channel was that of the outside channel, while the gap had been widened to 400 feet, or more. Some of the Sixth Division floating equipment was anchored in the sealevel channel just above the break of the barrier, and when the suction of the current was at its greatest, a barge was cut loose, and was carried through the gap with sufficient force to part a heavy steel cable which had been left strung across it. The barge then drifted slowly up toward the locks.

The dredge *Marmot* has begun excavating against the south side of the dike, and another dredge will pass through the gap and be set at work on the other side within a few days. It is expected that enough of the barrier will have been removed by October 1 to permit large ships to traverse the Pacific end of the Canal, a distance of 8½ miles, up to Miraflores

Locks. The launch *Birdena* made the trip from the dike to the locks on Tuesday afternoon, September 2, the first vessel to pass through this section of the Canal under its own steam.

Concrete Work in Locks and Spillways.

Concrete work in the Canal locks is nearly completed, the aggregate amount in place at the close of work on August 30, being 4,478,642 cubic yards.

A statement of the concrete laid in the three sets of locks for the Canal, and in Gatun and Miraflores spillways, as of August 30, follows:

GATUN LOCKS.

The last concrete for the locks proper, as distinguished from that necessary to finishing work by the First Division, was mixed and placed on August 16, 1913. At the close of work on that day the total amount of concrete placed by the Atlantic Division amounted to 2,045,485 cubic yards.

The Fifth and Central Divisions are beginning to turn in old rail in large quantities. This rail will be sorted in two classes, service-

able, including rail in condition for reuse, and bent rail, which can be straightened; and unserviceable, which will be "scrapped."

The big tree, formerly standing near the bank of the Chagres River at Gorgona, in the vicinity of the old shops saw mill, has been destroyed by dynamite, in order that it might

not prove an obstruction to future navigation.

An additional pump and motor will be installed at the Gold Hill sluicing plant.

The pay of the dock laborers at Balboa, Colon, and Cristobal has been increased one cent an hour, making their present pay 12 cents an hour.

LABOR FORCE AND QUARTERS IN JULY.

The force report for July 30 shows the actual working force of the Canal Commission to be 33,830; of the Panama railroad, 5,276, and of the contractors, 3,378, a total effective working force of 42,484 men, an increase of 222, as compared with the statement for June. The gold force on the Canal work, composed almost exclusively of white Americans, was 4,173, a reduction of 109, as compared with the previous month. A statement of the Canal force by divisions, follows:

DEPARTMENT OR DIVISION.	SILVER EMPLOYEES*													Total silver.	Total gold.	Grand total
	Artisans.					European laborers.		West Indian laborers								
	Monthly	44 cents.	32 cents.	25 cents.	20 cents.	16 cents.	20 cents.	16 cents	20 cents.	16 cents.	13 cents.	10 cents	7 cents.

JOINT LAND COMMISSION.

Additional Awards.

The following additional awards were announced by the Joint Land Commission at a public session held on Monday, August 25:

*Award No. 23—In the matter of sundry claims—*An award is hereby made against the United States in favor of the persons hereinafter named, in the sum of \$1,455.

This award shall be paid to the respective claimants hereinafter named, in the amounts hereinafter specified, on or before the 24th day of September, 1913, and if payment or tender of payment of any of the items of this award is not made on or before that date, such items shall thereafter bear interest at the rate of six per centum, per annum, until paid.

José A. Alvarez, for all rights, claims, and other interests in growing crops, fruit trees, house tax No. 1846, and any other buildings and any other improvements which the said Alvarez may possess on the lands of Caimito (the said property being distinct from that indicated as 48 on the sketch map of the Lake Gatun and for which a payment was made in May, 1912, by Voucher 20185 to José Manuel Alvarez), the sum of \$35.

Albert Batson, for all rights, claims, and other interests in growing crops, fruit trees, buildings, and any other improvements which the said Albert Batson may possess on the lands of Bailamonos Sur, the sum of \$100.

Isabella Berry, for all rights, claims, and other interests in growing crops, fruit trees, buildings, and any other improvements which the said Isabella Berry may possess in lands located on the estate of Juan Grande (said property being distinct from that for which an award was made by the Joint Land Commission in the town of Gorgona), the sum of \$40.

Albert Boulon, for all rights, claims, and other interests in growing crops, fruit trees, buildings, and any other improvements which the said Boulon may have possessed on or near the Carabali watershed on the lands of Juan Grande (the said property being distinct from that claimed by Boulon in the town of Gorgona) the sum of \$45.

William Bycroft, for all rights, claims, and other interests in growing crops, fruit trees, house tax No. 1068, and any other improvements which the said Bycroft may possess on the lands of Caimito Mulato, the sum of \$75.

Estate of Teresa Canoles, for all rights, claims, and other interests in growing crops, fruit trees, buildings, and any other improvements which the said Teresa Canoles may have possessed on the lands of Tabernilla, the sum of \$175.

Diego Castillo, for all rights, claims, and other interests in growing crops, fruit trees, buildings and any other improvements which the said Castillo may possess or may have possessed on the lands of Peñas Blancas Abajo, the sum of \$150.

Maximiliano Gomez, for all rights, claims, and other interests in growing crops, fruit trees, buildings, and any other improvements which the said Gomez may possess or may have possessed on lands located on the Curutu River, or near the headwaters of the Bailamonos River, or on the Carabali watershed, the sum of \$115.

Custodio Herazo, for all rights, claims, and other interests in growing crops, fruit trees, buildings, and any other improvements which the said Herazo may possess in lands located above the 87-foot level on the lands of Caño Quebrado (said property being distinct from that below the 87-foot level, purchased from the father of the claimant, Sebastian Herazo or Erazo), the sum of \$225.

Eugenio de Leon, for all rights, claims, and other interests in growing crops, fruit trees, buildings, and any other improvements which the said de Leon may have possessed in the lands of Barbacoas or Caimito Mulato at the time he was notified to leave the same, less the value of annual crops which he has been given an opportunity to gather, the sum of \$25.

Rosa Morales, for all rights, claims, and other interests in growing crops, fruit trees, buildings, and any other improvements which the said Rosa Morales may possess in the lands of Caimito Mulato, the sum of \$50.

Gerónimo Ortega, for all rights, claims, and other interests in growing crops, fruit trees, house tax No. 1837, and any other buildings and any other improvements which the said Ortega may possess in property located east of the Panama railroad on the lands of Caimito Mulato, the sum of \$120.

Andre Philippe (known also as Henry Phillips and Andres Felipe), for all rights, claims, and other interests in growing crops, fruit trees, buildings, and any other improvements which the said Philippe may possess or may have possessed in the localities known as Valdo Ospino and Mujeres Nuevas, the sum of \$100.

Robert Smith, for all rights, claims, and other interests in growing crops, fruit trees, buildings, and any

other improvements which the said Smith may possess on the lands of Caimito Mulato, the sum of \$50.

Manuel Tuñon, for all rights, claims, and other interests in growing crops, fruit trees, buildings, and any other improvements which the said Tuñon may possess or may have possessed in lands lying above the 87-foot level on the lands of Caño Quebrado (the said property being distinct from the property which was purchased from Tuñon by the payment in February, 1912, by Voucher 18842, for improvements below the 87-foot level), the sum of \$75.

Jacob Turner, for all rights, claims, and other interests in growing crops, fruit trees, buildings, and any other improvements which the said Turner may possess on lands located east of the Panama railroad on the lands of Caimito Mulato (the said property being distinct from the property which was purchased from said Turner by the payment in February, 1912, by voucher 18653, for House 1064 at Caimito, and improvements), the sum of \$75. Total, \$1,455.

*Award No. 24—In the matter of certain claims for houses in the town of Gorgona—*The evidence before the Commission shows that the persons hereinafter named were the owners of the properties hereinafter referred to before they accepted any leases from the Isthmian Canal Commission. In no case did the persons hereinafter named make any claim to the ownership of the land.

In conformity with the principles formulated in the opinion of July 25, 1913, on the demurrer of Counsel of the United States to the jurisdiction of the Commission in the matter of the claim of Juan Sotillo, and in accordance with the evidence submitted to the Commission, an award is hereby made against the United States of America for certain buildings hereinafter identified by the respective tax numbers, the said award to include all rights, claims, and interests of any persons in the said buildings, together with all claims for improvements of whatsoever nature on the part of any persons hereinafter named, and all rights claimed by them, in the sum of \$700.

This award shall be paid to the respective persons named hereinafter, in the amounts hereinafter specified, on or before the 24th day of September, 1913, and if payment or tender of payment of any of the items of this award is not made on or before that date, such items shall thereafter bear interest at the rate of six per centum, per annum, until paid.

To the owners of buildings, for the settlement of all rights, claims, or other interests which they may have in the same, together with any other improvements located on the lots with houses designated by their tax numbers, as follows: Felix Armién, tax No. 779, \$300; Joseph Minier, tax No. 773, \$400. Grand total, \$700.

*Award No. 25—In the matter of certain claims for houses in the town of Gorgona—*The evidence before the Commission shows that the persons hereinafter named became the owners of the properties hereinafter referred to, before November 15, 1907, and before they had accepted any leases from the Isthmian Canal Commission. In no case did the persons hereinafter named make any claim to the ownership of the land.

In conformity with the principles formulated in the opinion of July 25, 1913, on the demurrer of Counsel of the United States to the jurisdiction of the Commission in the matter of the claim of Juan Sotillo, and the further opinion of August 20, 1913, concerning the date upon which the new system of leases entered into effect, and in accordance with the evidence submitted to the Commission, an award is hereby made against the United States of America for certain buildings hereinafter identified by their respective tax numbers, the said award to include all rights, claims, and interests of any persons in the said buildings, together with all claims for improvements of whatsoever nature on the part of any persons hereinafter named, and all rights claimed by them in the sum of \$1,450. This award shall be paid to the respective persons hereinafter named, in the amounts hereinafter specified, on or before the 24th day of September, 1913, and if payment or tender of payment of any of the items of this award is not made on or before that date, such items shall thereafter bear interest at the rate of six per centum, per annum, until paid.

To the owners of buildings, for the settlement of all rights, claims, or other interests which they may have in the same, together with any other improvements located on the lots with houses designated by their tax numbers, as follows: James Brown, tax No. 807, \$250; W. H. Carrington, administrator of the estate of George Andrade, deceased, a total of \$925, for individual houses, as follows: Tax No. 734, \$700; tax No. 822, \$225; total \$925; Edward Gordon, tax No. 809, \$275. Grand total, \$1,150.

*Award No. 26—In the matter of certain claims for houses in the town of Gorgona—*The evidence before the Commission showed that the persons hereinafter named were the owners of the property hereinafter referred to before they accepted any leases from the Isthmian Canal Commission. In no case did the persons here-

inafter named make any claim for the ownership of the land.

The evidence shows further that the buildings referred to have been partially demolished, and in making its award the Commission has taken into consideration the impairment in the value of the property caused by the partial demolition of the buildings.

In consideration of the principles formulated in the opinion of July 25, on the demurrer of Counsel of the United States to the jurisdiction of the Commission in the matter of Juan Sotillo, and in accordance with the evidence submitted to the Commission, an award is hereby made against the United States of America for certain buildings hereinafter identified by their respective tax numbers, the said award to include all right, title, and interest of any persons in the said buildings, together with all claims for improvements of whatsoever nature on the part of the persons hereinafter named, and all rights claimed by them, in the sum of \$1,245. This award shall be paid to the respective claimants, hereinafter named, in the amounts hereinafter specified, on or before the 24th day of September, 1913, and if payment or tender of payment of any of the items of this award is not made on or before that date, such items shall thereafter bear interest at the rate of six per centum, per annum, until paid.

To the owners of buildings, for the settlement of all rights, claims, or other interests which they may have in the same, together with any other improvements located on the lots with houses designated by their tax numbers, as follows: D. W. Ogilvie, tax No. 826, \$625; Luis de la Peña, for individual houses, as follows: Tax No. 798, \$320; tax No. 832, \$300; Total \$620. Grand total, \$1,245.

To Continue Pumping from Chagres River.

The Division of Municipal Engineering will continue in service the duplex steam plunger pump, situated on the bank of the Chagres River, near Gamboa bridge, in order to provide against a possible deficiency in the water supply on the west side of the Canal during the next dry season, and also for steamshovels that may be kept in service above the 85-foot level on the east and west banks of Culebra Cut. This pump discharges into a 10-inch water main, which crosses the Cut on the Empire suspension bridge. As this bridge will be taken down before all work is completed on the east bank of the Canal, it is proposed to lay the main across the bottom of the Cut at a suitable point in the vicinity of the present structure. In view of the fact that the rise of Gatun Lake will flood the present site of the pump, it has been moved to a point higher up on the bank.

Sale of Scrap Copper Screening and Brass Borings.

Award for the sale of all scrap copper screening has been made to H. D. Moskowitz of New York City for the period beginning July 1, 1913, and terminating June 30, 1914, at the price of \$10.78 per hundredweight. The contract for the last period was held by the Nassau Smelting and Refining Works of New York City, at \$12.15 per hundredweight. The prices at which the scrap screening was sold by the Canal Commission for the three years prior to 1912 have been \$8.25, \$8.17, and \$7.75 per hundredweight, respectively.

Two proposals were received for the purchase of brass borings, one from the Chicago Housewrecking Company, at \$9.25 per hundredweight, and the other from M. Rovetta, at \$5.75 per hundredweight. Both bids were rejected, and it has been decided to hold the borings until the market improves. The Board of Appraisal has fixed on 10 cents a pound, as the upset price for the borings.

The special material train operated between Balboa, Empire, and Gorgona each afternoon dropped the latter place from its itinerary on Saturday, August 16. The train will continue to operate with Empire as its most northerly stop.

COMMISSION CLUBHOUSES.

Athletic and Aquatic Meet at Corozal.

Nearly 1,000 spectators and contestants attended the athletic and aquatic meet held under the auspices of the Corozal Y. M. C. A., on Labor Day, September 1.

The selection of Corozal seems to have met with favor as 149 entries were received. The new athletic field adjoining the clubhouse proved fully adequate for the occasion and will doubtless be useful for future events of a similar nature.

The events of the morning were enlivened by a concert by the band of the United States Marine Corps.

Interest centered in the aquatic events that were held in the afternoon on account of the fact that the contests were held in the forebay of the lower lock at Miraflores, instead of near the dike as had been originally intended. A concert was given by the Tenth Infantry Band at the locks, and later at the clubhouse, when the spectators were returning.

The results follow:

ATHLETIC EVENTS.

Event No. 1, 100-yard dash—First, Detmore Witver, second, Frank W. Hoff; third, K. C. Jackson. Time, 11 1/5 seconds.

Event No. 2, 60-yard dash for boys—First, Wm. Loulan; second, Otis Roe; third, A. M. Bouche, Jr. Time, 7 4/5 seconds.

Event No. 3, Running broad jump—First S. J. Sawyer, distance, 20.7 feet; second, E. T. Baldwin, distance, 19.8 feet; third, Frank W. Hoff, distance, 17.9 feet.

Event No. 4, 120-yard low hurdles—First, L. A. Koperski; second, J. N. Kenealy; third, R. A. Koperski, Time, 17.1 seconds.

Event No. 5, Pole vault—First, J. G. DeCora; second, F. C. Purchase; third, C. Murray. Height, 9 feet 6 inches.

Event No. 6, 220-yard dash—First H. D. Simmons; second, A. J. Johnson; third, F. C. Purchase. Time, 26 seconds.

Event No. 7, Boys' relay—First, Corozal; second, Gatun. Time, 48 seconds.

Event No. 8, 12-pound shot put—First, I. R. Scheel; second, Raymond Van Horn; third, A. J. Johnson. Distance, 40 feet 3 inches.

Event No. 9, Running high jump—First R. A. Koperski; second, P. H. Chadbourne; third, Irving R. Scheel. Height, 5 feet 7 inches.

Event No. 10, 880-yard run—First, P. C. Hulsebosch; second, Wm. R. Anderson; third, S. C. Russell. Time, 2 minutes 19 seconds.

Event No. 11, 440-yard dash—First, H. D. Simmons; second, J. W. Harper; third, H. Laundry. Time 60 3/5 seconds.

Event No. 12, Three-legged race—First, Hoff and Hulsebosch; second, Frey and Russell.

Event No. 13, Tug-of-war—Won by Camp Elliott.

Event No. 14, One mile relay race. (Four laps only)—First, Corozal; second, Camp Elliott; third, Ancon. Time, 3 minutes 2 seconds.

AQUATIC EVENTS.

Event No. 1, 50-yard swim—First, D. E. Simons; second, J. R. Stapler; third, Leon Giavelli.

Event No. 2, 50-yard swim for boys—First, Hal Wardlow; second, John Sweek; third, Clarence Atkins.

Event No. 3, 100-yard swim—First D. C. Galloway; second, D. E. Simons; third, J. R. Stapler.

Event No. 4, Fancy diving—First, J. M. Jimenez; second, Waldo A. Reisner; third, Raymond Smith.

Event No. 5—Equipment race was called off.

Event No. 6, Relay swimming race—First, Gatun.

Event No. 7, One-mile race—First, J. W. Greene; second, Jas. A. McGrath; third, J. A. Fraser.

POINTS BY TOWNS.

The total of points, by towns, follows:

Position.	Town.	Points.
1.....	Camp Elliott.....	46
2.....	Corozal.....	36
3.....	Cristobal.....	27
4.....	Culebra.....	23
5.....	Gatun.....	16
6.....	Ancon.....	12
7.....	Empire.....	5
8.....	Toro Point.....	5

GENERAL.

The moving picture schedule for the week September 8 to 13 is, as follows: Monday, Gatun; Tuesday, Cristobal; Wednesday, Culebra; Thursday, Empire;

Friday, Corozal and Porto Bello. A special reel, "The inauguration of President Wilson," will be shown as a feature this week. Other reels are entitled: "Turpentine industry;" "No trespassing;" "Father had his way;" "Pathe Weekly;" "Saved at the altar;" "Broncho Billy for sheriff;" "From Leatherbrunnen to Murren, Switzerland;" "Small game at the Zoo;" "An eccentric sportsman;" "Stern papa;" "Love's messenger." For next week, September 8 to 13, the following reels will be shown: "Hindoo charm;" "Spring log rolling;" "Harriet Quibby's flight;" "For her Lord;" "The Pickwick predicament;" "The Laird's daughter;" "The convalescent;" "The little wanderer."

CULEBRA.

Moving pictures will be shown on Saturday evening at 8 o'clock. A special reel showing the inauguration of President Wilson will be a feature.

High scores in tenpins for the week were, as follows: Schneck, 204; Bechlem, 204; Case, 204, 201; Dougherty, 218, 223, 215, 200; DeCora, 209, 208.

EMPIRE.

The Empire basketball team defeated the Corozal team on Saturday evening, August 30 by a score of 32 to 11. The Empire men are to form a local league to play prior to the opening of the Isthmian League. There are enough men interested to form five teams.

The "American" Isthmian duckpin tournament, which resulted in a tie between Empire and Cristobal, was rolled off on the Gatun alleys on Saturday evening, August 30. Empire won the first two games, thereby winning the tournament and prizes. The Empire team was composed of the following men: Hill (captain), Huzon, Grund, King, Mengel, and Lowande.

An A. B. C. class pool tournament has been arranged. The entries will close on September 6. Those wishing to enter are requested to see pool room manager.

GATUN.

The Tenth Infantry band, under the direction of Chief Musician Coe, gave a concert at the clubhouse on Saturday evening, August 30.

The "Metropolitan" basketball league was organized on Wednesday evening, August 27. Joseph P. Mitchell is president and Harry Foman, secretary. The following teams and men will participate in the league:

McClintic—M. Conley, Hess, Randill, Roudeluh, Rothgeb. *First Division*—Martino, Tuttle, Bradley, Wathen, Sherrard, Gray, Reisner. *Unattached*—Fitzpatrick, Thompson, L. Mitchell, Bailey, Bruce, Jensen, Cauthers, Giddings, M. Omeara, Chandler. *Commisary*—Kerruish, Grabb, Hallowell, Lutz, Garrison. *Atlantic Division*—J. Mitchell, F. Huber, Wright, Whiston, Roberts, Coleman.

The first two games scheduled are: September 3, Atlantics vs. Unattached; September 4, McClintic-Marshall vs. First Division. Gold medals will be given as prizes. E. D. Christopherson will act as official referee.

The "Red Hot" indoor baseball league was brought to a close on Thursday evening, August 28, with final results, as follows:

Team.	Won.	Lost.	P. C.
Atlantic Division.....	6	0	1.000
First Division.....	5	1	.833
Office, McClintic-Marshall.....	3	3	.500
(1) Field McClintic-Marshall.....	3	3	.500
Transportation.....	2	4	.333
Commissary.....	2	4	.333
(2) Field McClintic-Marshall.....	0	6	.000

The following is the present standing of the popular handicap pool tournament:

Name.	Won.	Lost.	P. C.
Duey.....	3	0	1.000
Townley.....	3	0	1.000
Kerruish.....	3	1	.750
Bailey.....	2	1	.666
O'Hara.....	2	1	.666
Johnson.....	2	1	.666
Carkeet.....	2	1	.666
Pettit.....	1	1	.555
Reisner.....	1	1	.555
Gray.....	1	1	.555
Bradley.....	1	2	.333
Von.....	1	2	.333
Dennis.....	1	3	.250
Hamill.....	0	1	.000
Wall.....	0	4	.000

The final results of the First Division duckpin tournament conducted during the month of August is, as follows:

Team.	Won.	Lost.	P. C.
Dubbs.....	16	2	.888
Billkens.....	14	4	.777
Shuttles.....	14	4	.777
Transmitters.....	7	11	.388
Nut splitters.....	5	13	.277
Boosters.....	4	14	.222
Chronics.....	3	15	.166

CRISTOBAL.

Thirty men attended the opening meeting of the discussion club on Tuesday night, August 26. Fol-

lowing the address by Mr. W. B. Childers, an animated discussion was held.

In the simultaneous chess tournament on Saturday, August 30, Mr. William Dubois of Culebra took four games and lost five to members of the Cristobal chess club. Messrs. Verner, Hurt, Taylor, Ogden, and Dubois won from Mr. Dubois, and Messrs. Wilson, Wechsler, Salzburg, and Martin lost. The members of the chess club favor the proposal to hold an "All-Isthmian" chess tournament.

Mr. Frank Reynolds featured a monologue and song at the moving picture entertainment Saturday night, August 30. Following the entertainment, an informal reception was held in honor of Mr. and Mrs. Irving DeLong, whose marriage had just been announced.

An outing was given the children at the Washington Hotel swimming pool on Labor Day.

PORTO BELLO.

W. B. Childers, superintendent of the McClintic-Marshall Construction Company at Gatun, spoke to a good sized audience at the Porto Bello Y. M. C. A., on Sunday evening, August 24. His subject was "Natural law in the world of labor."

A handicap pool tournament is being played with the following entries and results to date:

Name.	Won.	Lost.	P. C.
Murray.....	3	0	1.000
Doyle.....	1	0	1.000
Bucklin.....	8	1	.889
Heil.....	5	1	.833
Bowen.....	6	2	.750
Smith.....	2	1	.667
Keene.....	3	2	.600
Cummings.....	6	4	.600
T. W. Sherrard.....	1	4	.200
Colberg.....	3	4	.428
Thompson.....	1	5	.167
J. D. Sherrard.....	1	6	.143
Chase.....	0	2	.000
Engelbrecht.....	0	7	.000

The interest in gymnasium work is increasing. The following are among those enrolled in classes: Messrs. Hoehne, Medd, Chase, Jensen, Bradberry, Geyer, Bucklin, Sherrard, Claude Smith, and Wm. Smith.

Handball seems to be the favorite game in the gymnasium, and a local tournament will probably be organized in the near future.

A new supply of gymnasium shoes has been received.

The Sunday evening song services have an average attendance of about 40 people. Mr. Walter Thompson has charge of the singing.

Seven new pianola rolls have been added to the collection.

The "Exiles Dance Club" will have a dance at the clubhouse on September 13. The Tenth Infantry orchestra has been engaged.

Canal Zone Postal Savings Bank Transactions.

A statement of the postal savings bank transactions at Canal Zone post-offices for the month of July, follows:

Married.

DELONG-ROGERS—At the Union Church, Cristobal, Miss Esther A. Rogers of Thonotosassa, Fla., to Mr. Irvin Newton DeLong of Easton, Pa., the Rev. Carl H. Elliott officiating. Canal Zone residence, Cristobal.

McEWEN-ASSY—At the Union Church, Cristobal, on Monday, September 1, Miss Josephine Louise Assy of New York City to Mr. John Alex. McEwen of Boston, the Rev. Carl H. Elliott officiating. Canal Zone residence, Culebra.

SOCIAL LIFE OF THE ZONE.

Centralization of Church Work.

The Woman's Foreign Missionary Society of the Methodist Episcopal Church has issued invitations to the members of the church societies throughout the Canal Zone for a rally to be held in the church parlors of the sea wall church on Saturday, September 6, at 2.30 o'clock. The object of this meeting is to discuss the possibility of forming a central society for the carrying on of Christian work among the women after the disbandment of such societies as now exist. It is thought that if the women concentrate in one strong organization, the work can be done without much tax on their time. It is believed that the women of Corozal, Paraiso, Pedro Miguel, Culebra, and Empire will be interested in the project, and it is to residents in those villages that the appeal is especially made. In addition to the discussion of these plans, there will be a short program, which will include one number by pupils of the mission school, and an address on missions by Mrs. Harry Compton. For the convenience of those ladies who wish to combine a morning business trip with the meeting, Mrs. E. M. Keyser of Ancon will serve luncheon at her home near the hospital gate at 12 o'clock. Those having children to be cared for will find special provision for their entertainment. Women who wish to avail themselves of this hospitality should send word of acceptance to Mrs. E. M. Keyser, Ancon. The committee in charge of the arrangements for the meeting is composed of Mrs. Compton, president of the society, Mrs. C. H. Ports, secretary, and Mrs. James Stokoe, chairman of the committee.

At the meeting of the society on August 2, Mrs. Ports was elected secretary, vice Miss Elise Keyser, resigned. Miss Keyser has left the Isthmus for her home in the United States. It is possible that she may return in the service of the Methodist Missionary Board.

The Methodist Mission School in Panama has an enrollment of 90, and the last report showed an average attendance of 83 pupils. There are three teachers, and one teacher to supervise the children in their play. It has been decided to devote one day in each week to instruction in industrial work. The boys will be taught carpentry and manual work, and the girls will be taught sewing, cooking, and household economics. The missionary society will provide suitable playground equipment for the school.

Miscellaneous Notes.

A large, clear map of the United States is desired by the instructor in a class in English for Chinamen. Any one wishing to donate such a map may address Box 420, Cristobal.

The Cristobal Union Sunday school has forwarded a donation to the Jacob Riis Settlement for its fund for sending a poor family to the country for a few days in the hot weather. Five dollars will take care of a good sized family for one week. Mr. Kromer, superintendent of the Cristobal Union Sunday school, Mr. Simka, Cristobal, and Mr. Page, secretary of the Commission clubhouse at Cristobal, will receive further subscriptions for this purpose.

Mrs. R. C. Warringer of Johannesburg, South Africa, was the guest of honor at the meeting of the Woman's Altar Guild of St. Luke's Church, Ancon, on Tuesday afternoon, September 2. She spoke informally on the work of the women of the church in the

Transvaal. The meeting was held at the home of Mrs. R. E. Noble, and was well attended. The guild will celebrate its sixth anniversary in October. The next meeting will be held at the home of Mrs. S. T. Darling, Ancon Hospital grounds, on Tuesday, October 7. The hour has been changed from 3.30 to 4 o'clock.

Dr. George Chalmers Richmond, D. D., rector of Trinity Church, Philadelphia, has been a recent visitor to the Isthmus. He preached at Christ Church, Colon Beach, on Sunday evening, August 24; at St. Luke's Hospital chapel, Ancon, on Sunday morning, August 31, and at St. Paul's church, Panama, on the evening of the same day. Dr. Richmond sailed for New York on the *Trent* on Tuesday, September 2.

A special service was held at the Cristobal Union Church on Monday evening, September 1, in commemoration of those who have lost their lives in connection with the construction of the Panama Canal. The pastor, Rev. Carl H. Elliott, preached a memorial sermon.

Personal.

Congressman Wyatt Aiken of South Carolina, accompanied by his son, arrived on the *Panama*, on Sunday, August 31, to look over the Canal work.

Visit of Shriners.

One hundred and nine members of the Ancient Arabic Order, Nobles of the Mystic Shrine, arrived on the *Turrialba* from New Orleans on Thursday, August 28, and 81 on the *Carlago* on Saturday, August 30. The most noteworthy event of their stay was the ceremony of initiation which was held in the forenoon of Labor Day in the west chamber of the upper lock at Miraflores, where the setting was made to represent the interior of a Shriners' temple. After the secret work, a bronze tablet was placed on the center wall, commemorative of the event, which bears the following inscription:

Es Selamu Aleikum
Osman Temple, A. A. O. N. M. S., St. Paul, Minnesota,
U. S. A.

J. Harry Lewis, Illustrious Potentate.

John Fishel, Recorder.

Will O. Washburn, Chief Rabban.

This tablet marks the oasis where, on "Aloul Ahaad 1327," (September 1st Nineteen Hundred and Thirteen) a caravan from Osman Temple paused in its journey toward the setting sun and conferred in full form the Ancient Arabic Order of the Nobles of the Mystic Shrine on 171 sons of the desert in service under the Isthmian Canal Commission.

May Allah protect and sustain them.

Aleikum Es Selamu.

The trip was made under the auspices of Osman Temple of St. Paul, Minn., and its band and patrol was brought along. The social features of the visit consisted of a ball at the Hotel Tivoli on Saturday evening, band concerts in Panama and Colon, sight-seeing trips, and a banquet at the Hotel Washington on Monday evening. Mr. W. W. Irwin, Imperial Potentate of the Order, and Mr. J. Harry Lewis, potentate of Osman Temple, were among the visitors.

Examination by Board of Local Inspectors.

The Board of Local Inspectors will conduct examinations at the Administration Building, Ancon, on Wednesday, September 10, 1913, beginning promptly at 2 p. m., for persons desiring to procure the following classes of licenses: Pilots, masters, mates, marine engineers, chauffeurs, and navigators of motor

boats. All applicants for licenses must procure from the Executive Office, Ancon, forms of application and information respecting the filling out of same, at least one day before the examination. Applicants for chauffeurs' licenses must also bring automobiles.

Tivoli Club Election.

The annual meeting of the Tivoli Club was held on Sunday, August 31, when the following officers were elected: President, Col. William C. Gorgas; vice-president, Dr. W. E. Deeks; secretary-treasurer, J. W. Tannehill, reelected. Messrs. B. C. Poole and W. K. Jackson were elected members of the executive committee.

Cristobal Marine Association.

The Cristobal Marine Association meets every first and third Sunday of each month in Cristobal lodge hall, building No. 1. The next meeting will be September 7, at 8 p. m.

L. PETTOLETTI,

Recording Secretary.

Cristobal, C. Z., August 27, 1913.

The dismantling of chamber cranes Nos. 2 and 4, and berm cranes E and F at Miraflores Locks will be done by forces of the Fifth Division.

Family Quarters.

Applications for married quarters on file on July 31, were, as follows:

OFFICIAL CIRCULARS.

Red Cross Ball.

CULEBRA, C. Z., August 28, 1913.

HEADS OF DEPARTMENTS AND DIVISIONS:

A ball will be given at the Hotel Tivoli on September 17, under the auspices of the National Red Cross Society for the benefit of the Canal Zone Chapter, in celebration of the completion of dry excavation in the Canal.

The ball has received official sanction and payments of amounts subscribed by employees for tickets or other purposes in connection with the ball may be made by pay roll deduction, if the employee so requests in writing.

GEO. W. GOETHALS,
Chairman, Isthmian Canal Commission.
President, Panama Railroad Company.

Analysis of Water Supply.

CULEBRA, C. Z., August 26, 1913.

CIRCULAR No. 444-A:

Paragraph D under Section 3 of the "Rules and regulations regarding the examination, treatment, and care of water supplies under the jurisdiction of the Isthmian Canal Commission and Panama Railroad Company from a sanitary standpoint" is changed to read, as follows:

The methods of analysis are to be those of the American Public Health Association.

GEO. W. GOETHALS,
Chairman, Isthmian Canal Commission.
President, Panama Railroad Company.

Standard Oils and Lubricants.

CULEBRA, C. Z., September 1, 1913.

CIRCULAR No. 314-K. (SUPERSEDING CIRCULAR No. 314-I)

The following list of illuminating oils, and lubricating oils and greases will be considered as standard for the Isthmian Canal Commission and Panama Railroad Company, and will be used only for the purposes indicated, excepting only as indicated in the last paragraph of this order. All requisitions on the Quartermaster's Department shall specify the oil or lubricant desired, either by the I. C. C. number given below or by name, or by both, and no name other than that given below for each particular oil or lubricant shall be used in designating the same on requisitions, etc. No oils or lubricants will be requisitioned for unless the same are included in the following list, until after application for authority to procure same, showing the necessity therefor, has been first submitted to, and approved by me.

The metal drums in which most of the lubricating oils are furnished is the property of the oil contractors and have to be returned to them in good condition. Care should, therefore, be exercised in their handling to prevent both damage and loss of oil, and in no case should they be used as a continuous container for same or any other oils, but when empty should be returned promptly to the Quartermaster's Department.

The prices given below indicate the actual cost to the Commission and Panama Railroad Company of all oils, and lubricants, delivered at Cristobal, under the present annual contract (cost of drums not included), and are not intended to supersede the prices given in the price book of the Quartermaster's Department, and should not be used in the material accounts.

I. C. C. No.	Cost per gal. Drums Cons.
1. Valve oil.....	\$.25
For the internal lubrication of steam valves and cylinders on all classes of equipment. For use on the crank case of Westinghouse vertical compound engines.	
2. Air compressor cylinder oil.....	.20
For the internal lubrication of air cylinders of air compressors, and for pneumatic hammers and drills.	
3. Marine engine oil.....	.22
For marine engines, but not in crank cases, where it would be agitated and mixed with water, for, being a compound oil, it would emulsify if so used; also, for the block bearings of suction dredges.	
4. Stationary engine oil.....	.17
For stationary engines, electric dynamos, and motors, wood and metal working machinery, and for the general lubrication of machinery, also, for dies of bolt cutters, turret lathes, etc., except where the use of lard oil is permitted. (See note under lubricant No. 11).	
5. Locomotive engine oil.....	.15
For all locomotives, running gear of all locomotive cranes, deck machinery of dredges (except engines) and for cold saws in machine shops.	
6. Turbine engine oil.....	.18
For all step bearings of turbines in the Miraflores and Gatun power plants only.	

This oil is also known as step bearing oil.

7. Gas engine oil..... .20

For the cylinders of internal combustion engines.

9. Car oil..... .13

For the journals of all cars, passenger coaches, locomotive tenders, and rolling stock generally; for steam shovel bearings where not equipped with grease cups, and for tripod drills and switches.

10. Transformer oil..... .28

For use in the electrical subdivision in air-cooled transformers only.

11. Lard oil..... .6575

For hand torches for illuminating purposes only on marine equipment. On land, for shop use on pipe-threading machines; and it may be substituted for stationary engine oil (I. C. C. No. 4) when necessary, on dies and turret machines and on bolt cutters, when working refined iron or tough machinery steel. The use of this oil should be minimized to the greatest possible extent on account of its high cost.

12. Ammonia cylinder oil..... .35

For the internal lubrication of cylinders of ammonia compressors only.

13. Crude oil..... In bbls.0262

For the lubrication of steamshovel chains, cables where designated, and general purposes where oils and greases have been used as a preservative.

LUBRICATING GREASES.

Cost per Lb. In bbls

20. Nonliquid oil..... .045

This is an oil of the consistency of vaseline, for the lubrication of sheaves of carriages on the Lidgerwood cableways at Gatun, for air brake cylinders and triple valves, and such pneumatic drills and motors as may be equipped for the use of grease.

Cost per Lb. In Cans

21. Cup grease (yellow)..... .065

For all classes of lubrication where grease is used in compression cups. This grease is being received in two consistencies, No. 3 and No. 5, the No. 3 of lesser consistency to be used on machinery subject to normal temperature, and the No. 5 of heavier consistency to be used on machinery subject to higher temperatures.

22. Gear grease..... .027

For all classes of lubrication requiring grease for which compression cups are not adapted. This includes the center and side bearings of cars, cranes, and steamshovels, also wire cables, both standing and running, etc.

Cost per Lb. In bbls

23. Cable grease..... .04

For the "Interlocked-wire" track cables of the Gatun cableways exclusively.

24. Crank pin grease..... .085

For use on locomotive crank pins only where pressure cups are used. Care should be exercised not to confound this grease with cup grease Nos. 3 and 5 (I. C. C. No. 21, which is not suitable for this purpose).

ILLUMINATING OILS.

Cost per Gal. Drums Cons.

30. Signal oil..... .44

For use in railroad lanterns only, and in the cab lights of engines.

31. Kerosene oil..... .102 .169

For use in locomotive headlights, passenger coach, and similar lamps, ordinary lanterns, and for cleaning purposes.

GASOLINE.

40. Gasoline..... .254 .318

For use on gasoline launches, motor cars, blow torches, cleaning, etc.

Standard hand oilers and oil cans should be used as provided in Circular No. 338-D.

A copy of this circular shall be posted in all stationary plants, shops, engine houses, storehouses, oil houses, on all marine equipment, and in such other places as may be necessary to insure the cognizance of same by all concerned.

Substitutions of cheaper grades of the standard I. C. C. and P. R. R. lubricants given above, may be approved by the traveling engineer, or the inspector of lubricants and equipment, whenever practicable,

the above circular defining in a general way their accepted uses.

GEO. W. GOETHALS,
Chairman, Isthmian Canal Commission.
President, Panama Railroad Company.

Quartermaster's Department to Take over Oil Houses.

CULEBRA, C. Z., August 23, 1913.

HEADS OF DEPARTMENTS AND DIVISIONS:

Effective September 1, 1913, the Quartermaster's Department will take over all field oil houses of the Commission on the Isthmus. The necessary arrangements for the issuance of lubricants and greases will be made directly by the Quartermaster's Department with the various departments and divisions interested.

GEO. W. GOETHALS,
Chairman and Chief Engineer.

Tracks Over Gamboa Dike To Be Cut September 10, 1913.

EMPIRE, C. Z., September 3, 1913.

CENTRAL DIVISION CIRCULAR No. 377:

The tracks over Gamboa dike will be cut on September 10, 1913. On and after that date, all trains crossing the Canal will have to use Bridge 573.

A. S. ZINN,
Acting Division Engineer.

Chief Accountant, Central Division.

EMPIRE, C. Z., August 21, 1913.

CENTRAL DIVISION CIRCULAR No. 374.

Effective this date, Mr. J. J. Melgord is appointed chief accountant, Central Division, vice Mr. R. K. Booth, resigned.

A. S. ZINN,
Acting Division Engineer.

Change in Sailing Dates of P. R. R. Steamers.

PANAMA RAILROAD COMPANY.

OFFICE OF GENERAL SUPERINTENDENT.

COLON, R. P., August 28, 1913.

CIRCULAR No. 187:

All Concerned—On account of withdrawing the steamship *Allianca* from the service for necessary repairs, and inability to charter suitable steamer to take its place, the following changes will be made in our steamship schedule:

Advance.....	Aug. 30	Sept. 6
Colon.....	Sept. 2	Sept. 8	Sept. 14	Sept. 20
Advance.....	Sept. 9	Sept. 16	Sept. 22	Sept. 29
Panama.....	Sept. 16	Sept. 22	Sept. 28	Oct. 4
Allianca.....	Sept. 22	Sept. 28	Oct. 4	Oct. 10

JOHN D. PATTERSON,
General Superintendent.

Appointment of Terminal Trainmaster.

PANAMA RAILROAD COMPANY,

OFFICE OF GENERAL SUPERINTENDENT.

COLON, R. P., August 19, 1913.

CIRCULAR No. 174:

All Concerned—Effective Wednesday, August 20, Mr. E. S. Waid is appointed terminal trainmaster, in charge of Cristobal and Colon yards.

JOHN D. PATTERSON,
General Superintendent.

Appointment of Port Captain at Colon.

COLON, R. P., August 16, 1913.

CIRCULAR No. 166:

All Concerned—Effective September 15, 1913, Mr. R. W. Bergin is appointed port captain of the port of Colon, in addition to his duties as receiving and forwarding agent, vice Mr. J. St. C. Hunt.

J. D. PATTERSON,
General Superintendent.

Appointment of Terminal Trainmaster.

PANAMA RAILROAD COMPANY,

OFFICE OF GENERAL SUPERINTENDENT.

COLON, R. P., August 25, 1913.

CIRCULAR No. 183:

All Concerned—Effective Monday, September 1, 1913, Mr. S. W. Heald is appointed terminal trainmaster in charge of Paoama and Balboa yards.

JOHN D. PATTERSON,
General Superintendent.

Charge for Brake Service Sundays and Holidays

CULEBRA, C. Z., August 12, 1913.

ALL DISTRICT QUARTERMASTERS:

The Chairman has approved recommendation that, inasmuch as brake service furnished private individuals is usually required on Sundays and holidays, or in the evenings, and the drivers of the brakes receive no overtime for this service, the district quartermasters be

authorized to collect from the parties using the brake, one dollar, (\$1) United States currency, which sum is to be paid to the driver performing the service, his receipt to be taken therefor.

Please be governed accordingly.

R. E. Wood,
Chief Quartermaster.

District Quartermaster Changes.

CULEBRA, C. Z., August 18, 1913.

All Concerned—Effective September 1, the following changes will be made in stations of district quartermasters:

R. C. Shady, district quartermaster, from Gorgona to Corozal.

J. H. K. Humphrey, district quartermaster, from Corozal to Empire.

J. T. Smith, district quartermaster, from Pedro Miguel to Gatun.

R. E. Wood,
Chief Quartermaster.

Transfer Slips to Show Accrued Vacation Leave.

CULEBRA, C. Z., August 5, 1913.

HEADS OF DEPARTMENTS AND DIVISIONS:

In order to comply with the circular of the Chairman and Chief Engineer of July 26, to Heads of Departments and Divisions, relative to charging the divisions transferring an employee with accrued vacation leave instead of charging the expense to the division requesting the transfer, it will be necessary, effective August 1, to show on the transfer slips furnished the departments and divisions the amount of accrued vacation leave due. Two copies of transfer slips should be sent to the Chief Engineer.

As this information has not been shown on the transfer slips issued during the month of July, please furnish me statement, giving the names, amount of accrued vacation leave, and the department to which transferred, of all employees who have been transferred during July.

In future, the division to which employees are transferred will render bills on the basis of the accrued vacation leave shown on transfer slips.

AD FAURE,
Cost Keeping Accountant.

Involving Accrued Vacation Leave.

CULEBRA, C. Z., August 18, 1913.

HEADS OF DEPARTMENTS AND DIVISIONS:

Referring to the Chairman's circular to the Heads of Departments and Division authorizing bill against the department or division transferring employees for accrued vacation leave:

It is not intended that any invoice be rendered for less than 21 days, or six months' leave, as, under the regulations, no vacation leave is earned under six months.

Bills should only be rendered where the accrued leave is for a period of more than six months.

AD FAURE,
Cost Keeping Accountant.

Supplies for the Canal.

The following steamers with supplies for the Isthmian Canal Commission and Panama Railroad Company, arrived at the ports of Balboa, Cristobal, and Colon, during the two weeks ending August 30, 1913:

Colon, August 18, from New York, with four boxes machinery for Mt. Hope pumping station, for Atlantic Division; five cases tarpaulins, for stock; signal material, for Panama railroad; one box brass cocks, one case repair parts for monotype, for stock; one case drawing material, for Fourth Division; one case drawing material, for stock; 29 reels copper cable, for First Division; 10 boxes plumbing material, 10 cases paint, 213 bundles pipe, 190 bundles tie plates, 200 kegs wire nails, for stock; 52 cases electric fixtures, 20 bundles derrillers, for Panama railroad; two packages medical supplies, for Sanitary Department; 38 barrels foundry supplies, for Mechanical Division; 80 crates roofing tile, for First Division; 242 bundles steel bars, for Fifth Division; 25 pieces lumber, for stock.

Pastores, August 17, from New York, with one case file cases, for stock; three cases pipe fittings, for Mechanical Division; two cases packing, 16 pieces chains, for stock; 34 barrels transil oil, for Mechanical Division; one rail hender and attachments, for Panama railroad; 16 bales life preservers, for stock.

Carl Schurz, August 18, from New York, with two cases vises, 121 pieces pipe, for stock; 151 crates fire brick, 13 sacks fire clay, for Mechanical Division; three boxes bar steel, five cases paper, for stock.

Heredia, August 18, from New Orleans, with 2,188 pieces lumber, for Mechanical Division; 3,691 pieces lumber, for stock; 20 pieces lumber, for fortifications; one box chipping hammers, for First Division; 133 bundles pipe fittings, for stock; 807 barrels paving brick, for Panama railroad.

Olaf, August 18, from St. Marys, Georgia, with 1,507

pieces untreated piling, 151 pieces treated piling, 1,439 pieces lumber, for stock.

Metapan, August 20, from New York, with one reel copper cable, for First Division; 150 cases lined oil, seven bales steam hose, two cases belt lacing, for stock; one crate steel plates, for First Division.

Atenas, August 21, from New Orleans, with two cases brushes, 29 rolls canvas, four cases sledges, 50 cases soap, 183 crates handles, 698 pieces lumber, for stock; 19 cases iron railings, for Panama railroad.

Advance, August 26, from New York, with 5,500 packages hollow tile, for Second Division; two boxes brass cocks, 101 drums oil, 12 cases stationary supplies, for stock; four crates concrete tile machines, for Second Division; 14 barrels crucibles, for foundry, for Mechanical Division; three cases sledges, for stock; one launch propeller, for Second Division; 11 boxes electric lamps, for Mechanical Division; 121 cases steel wire, 18 cases electric fixtures, for Panama railroad; one box brushes, for stock; two crates rail benders, for Panama Railroad Company; 70 boxes burial caskets, for Sanitary Department; one box motors, for Mechanical Division; one box tickets, for Panama Railroad Company; four cases stationary supplies, for stock; one box electrical material, for First Division; six boxes mower repair parts, for stock; two boxes dynamometers, for First Division; 130 barrels molding sand, for Mechanical Division; 26 boxes stationary supplies, eight boxes bolts, for stock; one case motor car parts, for Mechanical Division; one barrel crockery, for Sanitary Department; three cases paint, for stock; one box machinery, for Sixth Division; two boxes electrical material, for Mechanical Division; seven barrels cable fittings, for First Division; three boxes insulators, for Mechanical Division; one box castings, for Panama Railroad Company; 19 bundles car castings, for Mechanical Division; five pieces fittings, for Sixth Division; and a miscellaneous cargo, the whole consisting of 6,286 packages, weighing 146 tons.

Prinz August Wilhelm, August 24, from New York, with 1,203 pieces pipe, for First Division; eight barrels iron pipe fittings, for stock; 120 pieces iron rods, two kegs nuts, for Second Division.

Tivies, August 24, from New York, with 51 cases caustic soda, 15 cases paint, for stock; 20 cases machinery, four reels cable, for First Division; one reel cable for Mechanical Division; 13 cases electrical material, for First Division; two cases telephone equipment, for Panama Railroad Company; 10 barrels copper wire, for Mechanical Division; 1,583 pieces, 373 bundles, 12 cases, 216 pieces, 35 cases structural material, for First Division.

Pennsylvania, August 25, from San Francisco, with 2,046 pieces lumber, for Fortifications Division; 13 cases machinery, for Sixth Division; two cases paint, for stock.

Hookon, August 27, from Jacksonville, Florida, with 469 long tons pig iron, for Mechanical Division; 5,730 pieces lumber, 1,113 pieces piling, 2,500 cross-ties, for stock; five pieces dipper stick, for Sixth Division.

Paristina, August 25, from New Orleans, with 3,936 pieces lumber, 100 switch stands and rods, 10 boxes chisels, 50 draft mules, for stock; 954 barrels paving brick, for Panama Railroad Company.

Zacapa, August 27, from New York, with 71 reels wire rope, 447 bundles shovels, four cases packing, 15 packages copper, for stock; 20 reels copper-clad wire, 1,000 crates insulators, 34 cases parts, one box castings, for First Division; 354 bundles reinforcing rods, for Second Division.

Turrialba, August 28, from New Orleans, with 625 pieces lumber, three cases paint brushes, for stock; 60 barrels brake shoes, for Mechanical Division; 550 creosoted blocks, for Second Division; one piece rock crushing machinery, for Fifth Division; 5,000 pounds compound, for First Division.

Edenhall, August 28, from Baltimore, with 3,000 pieces sewer pipe, 1,500 kegs spikes, 56,000 pieces vitrified tile, 375 barrels sulphate ammonia, 250 bundles brooms, for stock; eight cases miter gate moving machinery, four cases, 18 pieces castings, for First Division; 507 pieces, 44 bundles, 32 boxes structural material, for Panama Railroad Company; 20 boxes ether, for Sanitary Department.

Sale of Building No. 204, Cartagena.

OFFICE OF CHIEF QUARTERMASTER,

CULEBRA, C. Z., August 29, 1913.

Sealed proposals will be received at this office until 3 p. m., Thursday, September 11, 1913, and then opened, for the purchase of building No. 204, located at Cartagena, near Paraiso.

Proposals should be accompanied by certified check, post-office money order, or cash, for five per cent (5%) of the amount bid.

Successful bidder will be granted the Commission freight rate of \$2.25 per ton over the Panama railroad for material recovered from the building, and will be required to remove the building within 30 days from acceptance of bid.

Intending bidders will be shown the building offered

for sale, or given any information desired, upon application to Mr. O. S. Farrar, acting district quartermaster, Pedro Miguel.

Envelopes containing proposals should be marked "Proposal for purchase of building No. 204" and addressed to Capt. R. E. Wood, Chief Quartermaster, Culebra, C. Z.

The right is reserved to accept or reject any or all bids.

R. E. Wood,
Chief Quartermaster.

Misdirected Letters.

ANCON, C. Z., September 3, 1913.

The following insufficiently addressed letters, originating in the United States and its possessions, have been received in the office of the Director of Posts, and may be secured upon request of the addressees:

Sale of Material in Boiler Shed at Gorgona Shop.

OFFICE OF CHIEF QUARTERMASTER,

CULEBRA, C. Z., August 29, 1913.

Sealed proposals will be received at this office until 4 p. m., Saturday, September 6, 1913, and then opened, for the purchase of the structural material in this building. The measurements of the building are approximately 40 feet by 104 feet by 24 feet high. This building has been torn down and material shipped to Mount Hope where it can be inspected. Bidders must familiarize themselves with condition of material, etc., as the Commission makes no guarantee whatever. Bid will be made in a price per gross ton.

Certified check, money order, or cash for ten per cent (10%) of the amount of the bid must accompany bid.

Envelopes containing proposals should be marked "Proposal for purchase of material formerly in boiler shed at Gorgona," and addressed to Capt. R. E. Wood, Chief Quartermaster, Culebra, C. Z.

R. E. Wood,
Chief Quartermaster.

Lost—An Eastman kodak, in case, on train leaving Panama at 7 p. m., on Sunday, August 31. Finder is requested to communicate with J. Langlois, Box 26, Paraiso, C. Z. Reward.

COMMISSARY DEPARTMENT.

Deliveries of Bread Under New Train Schedule.

PANAMA RAILROAD COMPANY,
COMMISSARY DEPARTMENT.

CRISTOBAL, C. Z., August 30, 1913.

CIRCULAR No. 470:

To All Storekeepers—Under the train schedule of the Panama Railroad Company, effective September 2, 1913, commencing at midnight, September 1, bread will be forwarded from the Cristobal bakery, as follows:

For the following points, bread will be forwarded on train No. 3, leaving Colon at 6 a. m.: Colon, Monte Lirio, Frijoles, Calmito, Tower "R," New Culebra, Pedro Miguel, Paraiso, Miraflores, Corozal, Panama, Balboa.

Bread for the following points will be transferred at Pedro Miguel Junction from train No. 3 to train No. 40: Culebra, Empire, Las Cascadas, Bas Obispo.

The district quartermaster at Paraiso will arrange to handle the bread arriving on train No. 3 from Pedro Miguel Junction to Paraiso.

The district quartermaster at Ancon will handle the bread for Ancon and Balboa promptly on arrival of train No. 3 at Ancon.

Bread for Gatun will be handled on train No. 121, leaving Colon at 7:40 a. m.

The afternoon delivery of rolls will be forwarded from Colon on train No. 7, leaving Colon at 1 p. m., handling the bread for points between Colon and Panama, transferring for points between Pedro Miguel Junction and Bas Obispo to train No. 40, leaving Pedro Miguel Junction at 5:35 p. m.

In order that bread may be delivered as soon as possible after baking, deliveries will be made on the following schedule, at the several points:

Gatun—Deliveries to be made on the 10 a. m. grocery delivery.

Paraiso—Deliveries to be made on the 10:30 a. m. grocery delivery.

Pedro Miguel—Deliveries to be made on the 9:30 a. m. grocery delivery.

Corozal—Deliveries to be made on the 8 a. m. grocery delivery.

Ancon—Deliveries to be made from Balboa on the 10:30 a. m. delivery.

East Balboa—Deliveries will be made from Balboa on the 10:30 a. m. delivery. If any deliveries are made at Old Balboa, they can be made by special messenger, there being but few white families located in that place.

Culebra—Deliveries to be made on the 9:30 a. m. delivery.

Empire—Deliveries to be made on the 10:30 a. m. delivery.

Las Cascadas—Deliveries to be made on the 9 a. m. delivery.

Bas Obispo—Deliveries will be made on the 8:30 a. m. delivery.

District quartermasters will arrange to handle the afternoon deliveries leaving Colon on train No. 7, which are transferred to train No. 40, as they are doing at present.

Approved: JOHN BURKE, Manager.

F. O. WHITLOCK, Acting Subsistence Officer.

The commissary stores are open during the following hours:

Cristobal, 8 a. m. to 12:30 p. m., and 2 to 7 p. m.

Balboa, 8 a. m. to 12:30 p. m., and 2:30 to 7 p. m.

Ancon, 8 a. m. to 1 p. m., and 3 to 6 p. m.

All others, 8 a. m. to 1 p. m., and 3 to 7 p. m.

Retail prices of cold storage provisions for the week beginning September 1, 1913:

NOTES OF PROGRESS.

Closing Down In Culebra Cut.

All steamshovels in the Empire district of the Culebra Cut section were withdrawn on Saturday, September 6, and only three were working on the bottom in the Culebra district on Monday, September 8. These will stop work by Saturday, September 13. Seven crews were laid off on Saturday night, and 17 more will be laid off during the present week. The removal of the construction tracks in the Cut was begun on September 2, and the work is well ahead of the schedule. The last sightseeing train to go through the Cut was on Friday, September 5.

Opening Channel from Ocean to Gatun Locks.

Since the removal of the railroad track across the lower approach to Gatun Locks, on September 2, two pipeline suction dredges have been engaged in excavating the barrier of earth over which railway communication had been maintained with the west side of the locks and Gatun Dam. Two steamshovels, six locomotives, and an assortment of box, flat, and dump cars, have been left isolated on the west side for the completion of the dam and spillway, and the general work of clearing up. Such traffic as may be necessary with the west side may be effected by means of barges, traversing the French canal to the unloading wharves for sand and rock, and articles weighing up to six tons may be carried across the lower end of the locks by the cableways. Rock and sand, however, sufficient for the completion of concrete work, are in storage near the cement shed, and the quantity of structural steel and other building materials, and operating machinery to be handled for the completion of the locks and spillway is relatively small.

At the time of the removal of the railway, the barrier was approximately 75 feet wide at the top, which is about eight feet above sealevel, with a slope of about one on two to the depth of the completed channel on either

side, 41 feet below mean sealevel. It contains about 180,000 cubic yards of material, which will probably be removed by October 1. Communication is now open to the lower end of the locks, through the gap which the railroad crossed on a removable span, and in the progress of excavation the gap is being continually enlarged.

Dredge "No. 82" Set at Work.

Suction dredge No. 82, which was towed through the lake channel from Gatun on August 26, began its task of removing the accumulation of mud and gravel from the bed of the Canal a few hundred yards north of Gamboa dike, on Tuesday, September 2. The material is forced through the discharge pipe across an island in the lake, thence over the old channel of the Chagres River to the west bank, where it is wasted into low places in the vicinity of Matachin. Recent measurements show that about 750,000 cubic yards of material will have to be removed to restore the Canal channel to its original depth. About 300,000 cubic yards were left by the Central Division, and the remainder has been brought down by the Chagres River since the steamshovels finished work in that section about three years ago. Dredge No. 82, which was used in making the hydraulic fill of Gatun Dam, has been idle since June, 1912. It has been overhauled for the present work.

First Aid Packages at the Canal Locks.

First aid packages will be placed at all of the locks to cover cases of possible electrical burns. These packages will be small, containing a bottle of oil, bandages, and probably an antiseptic wash, and will be distributed, as follows: Gatun, nine; Pedro Miguel, three; Miraflores, six. They will be placed in the transformer rooms, where convenient cabinets for their protection will be available.

Removal of People from Watersheds.

People living on the watersheds of the Caimitillo, Cameron, and Dominica Rivers will be required to tear down or remove their houses on or before October 1. These streams will become tributaries of Miraflores Lake when the lake is formed, flowing into that arm of the lake on which will be situated the new water works for the Pacific end of the Canal.

Transfer of Work on Hydroelectric Plant.

Effective September 8, the construction of the building, and installation of machinery in the hydroelectric plant at Gatun was placed under the supervision of the First Division, Office of the Chief Engineer. The construction of the building will be in charge of Mr. Frank Holmes, resident engineer, Quartermaster's Department, subject to supervision by the Assistant Chief Engineer.

CROSSING THE CANAL.

Wooden Pontoon Structure To Take the Place of Bridge 57½ at Paraiso.

The construction of a wooden pontoon bridge as a means of crossing the Canal after it becomes necessary to dismantle bridge No. 57½, at Paraiso, has been approved. The crossing will be made a little north of this bridge, and the work of excavating for the east approach has already been begun. The plans are based upon designs obtained from the Chicago, Milwaukee and St. Paul Railway, which has used pontoon bridges of this type for many years. One of the most notable of its bridges is that over the Mississippi River at Prairie du Chien, Wis., which has been in service 35 or 40 years. In the construction of the Canal pontoon bridge, a somewhat simpler design will be followed, consisting of a timber scow 55 feet wide, 378 feet long, and six feet deep. On top of this hull, a wooden trestle, following quite closely the ordinary type of construction, will be built to an elevation of about 113.5 feet, and on this will be placed a railroad track and a highway for vehicles. The spans will be 14 feet between centers, and at these points, a transverse wooden truss, with iron rods, will be placed in the hull to carry the concentrated loads. Lighter trusses, without rods, will be placed at 2-foot intervals between the heavier trusses. The sheathing on the hull will be four inches thick at the bottom and sides, and three inches on top. To minimize the bending and shearing stresses to which the structure will be subjected, the design includes two heavy stiffening trusses, the stringers under the rails being utilized as top chords, while the lower chords are placed at the bottom of the hull. In addition, there will be heavy longitudinal keelsons.

The bridge is designed for a train load of 4,000 pounds per running foot. In order to reduce the expense of the approaches as much as possible, it is proposed to use as a connection between the bridge and the shore some of the spare lock gate girders, supported on rockers. These rocking approaches will have a downward grade when the water is at a low level, and an upward grade when it is at a high level. The pontoon will turn about a fixed pivot, and to avoid its projecting into the fairway of the Canal, a recess will be excavated in the east bank, so that when the bridge is opened, it will leave the Canal channel unobstructed. About 600,000 feet B. M. of yellow pine, or fir, timber, and 375,000 pounds of steel and iron, will be required.

The designs for the bridge are being prepared by Mr. Henry Goldmark, designing engineer in the First Division. Mr. W. G. Comber, resident engineer of the Sixth Division, will have charge of building the pontoon, trestle, and trusses, and Mr. A. S. Zinn, acting division engineer of the Central

Division, will have charge of the excavation and construction of the approaches and all land connections of the bridge.

The pontoon is not intended for a permanent crossing, and will probably be abandoned, when the villages on the west bank of the Canal cease to exist.

To Pass Dredges Through Bridge Across the Cut.

Forces of the Panama railroad began on August 29, the installation of a removable span near the center of Bridge 57½, across Culebra Cut, opposite Paraiso. This is in preparation for the passage of dredging vessels after October 10, engaged in the completion and maintenance of the channel. The span will be built on two 66-foot plate girders, recovered from the Barbaças bridge over the Chagres, on the old main line, and will allow a clearance of 60 feet between the supporting bents. The molded breadth of the ladder dredge *Corocal*, the widest vessel in the dredging fleet, is 45 feet. When it is desired to pass a vessel through the bridge, a barge will be floated under the span, the latter will be lifted clear on jacks, and the barge towed aside. It is estimated that removal and replacement will consume altogether about two hours. A removable span has been in successful use in the track over the barrier across the lower approach to Gatun locks; in this instance, a 40-foot queen-truss span was handled by locomotive crane.

This provision will necessitate the removal of four of the present bents of the trestle, and the erection of two new bents to support the ends of the span. The tops of these will be lower than the present bents, in order that the rails and stringers of the span may be even with the corresponding parts of the adjacent trestle. The total weight of the span, including the floor of the footbridge, will be approximately 68 tons, making the dead load on the support at either end 34 tons, and the maximum load, under a locomotive, about 114 tons. It is believed that the presence of water in the Cut will not affect the stability of the trestle, as most of the bents are anchored to rock by means of concrete pedestals. The bridge is approximately 57 feet high, with its base at 40 feet above sealevel, so that with the water in the cut at its maximum elevation the top will be 10 feet above the surface.

Mailing of Steamship Tickets.

The steamship ticket agent of the Panama Railroad Company at Colon is compelled to answer numerous telephone inquiries from employes, after the arrival of ships, as to when their steamship tickets will be forwarded to them. In a great many of these cases the employes have failed to give their post-office address when sending in their transportation papers, making it impossible to mail out their tickets. It is necessary for employes to give their post-office address if they expect tickets to be mailed to them, when sending in their transportation papers.

Levelman and Transitman Examination.

Examination for promotion to the positions of levelman and transitman is scheduled to be held in the Commission clubhouse at Empire, on Sunday, October 12.

The examination will commence promptly at 9 a. m., and will be divided into three parts, which will be given in the order indicated, viz: Written and oral examinations, and a statement of education and experience. Competi-

tors will be required to complete the written portion of the examination before 1 p. m.

Applications for examination should be addressed to the undersigned, *through the head of department or division*, before the close of business on Thursday, October 9.

Applicants should bring to the examination room pens, pencils, triangles, and tables of circular functions, but no paper, ink, or blotters.

Applicants who fail to appear for examination before 9 a. m., or who do not apply for examination through the proper channels before the close of business on Thursday, October 9, will not be admitted to the examination. No card of admission will be needed.

A. B. NICHOLS,

Chairman, Examining Board.

Culebra, C. Z., September 6, 1913.

Concrete Work in Locks and Spillways.

Concrete work in the Canal locks is nearly completed, the aggregate amount in place at the close of work on September 6, being 4,479,425 cubic yards.

A statement of the concrete laid in the three sets of locks for the Canal, and in Gatun and Miraflores spillways, as of September 6, follows:

GATUN LOCKS.

The last concrete for the locks proper, as distinguished from that necessary to finishing work by the First Division, was mixed and placed on August 16, 1913. At the close of work on that day the total amount of concrete placed by the Atlantic Division amounted to 2,045,485 cubic yards.

MIRAFLORES SPILLWAY.

The total of concrete at Miraflores spillway—75,610 cubic yards—remained unchanged, no concrete having been laid during the week ending September 6.

*Includes hydroelectric station.

Record of Masons.

On account of difficulty in securing photographs, and complying with numerous requests, the closing date for receipt of applications for the "Record of Masons on the Panama Canal" has been extended by the Masonic Club of Empire, to October 15, 1913. Information concerning this book can be obtained by writing to W. I. Beam, chairman of committee, Empire, C. Z.

The regular dance of the Cristobal Dancing Club will be held on Saturday, September 13, at the Commission clubhouse.

MIRAFLORES SPILLWAY DAM.

Finished September 1, Its Construction was Rapid, Considering Difficulties Encountered.

It is believed that the completion of the construction of the Miraflores spillway dam on September 1 constitutes a record for speed in difficult construction work on the Canal. In view of the fact that the waters of Rio Grande River (which are a combination of the Rio Grande, Pedro Miguel, Cocoli, Cameron and Caimitillo Rivers) pass through the site and had to be diverted three times to facilitate the construction during the progress of the work; also, prior to March 1 of the present year the Central Division tracks from the Culebra Cut passed through the site, the excavation was greatly handicapped.

The main dam is 432 feet in length and has a bottom width of 91 to 105 feet, with the bottom on solid rock at elevation 25 feet below mean sealevel.

To protect against washing of the banks on the spillway side, the dam has two wing or retaining walls, one on the east and one on the west end, each approximately 250 feet long, and a core wall 134 feet long joins the main dam with the lock walls.

Construction work was made difficult and tedious on account of the 10-foot machinery tunnel located within the main tunnel, with an air space of one foot around the sides and top throughout the length of the dam and ending in towers at the ends of the dam, these towers having winding stairways, partly interior and partly exterior.

In order to make the gate joints watertight it was necessary to set the steelwork for gates and roller-bearing tracks with accuracy, necessitating care in placing the concrete for the piers lest the steelwork be deflected.

There are eight Stoney gates 47 feet long and 19 feet deep. The elevation of top of the ogee or crest of the dam is 38.67 feet, and the elevation of top of gate piers is 85.17 feet above mean sealevel, or a total height of concrete from bottom of dam to top of piers of 110.17 feet.

The total amount of excavation required was 135,000 cubic yards.

The total amount of concrete laid, not including the drainage opening, which will not be closed until the latter part of September, is 73,482 cubic yards.

The last concrete was placed for the piers on August 27, and the steel footbridges on top were all in place August 29; the eight gates set in the openings were ready to be shoved against the seals on August 30. The Stoney gates weigh 40 tons each, and were handled from a trestle along the north face of the dam by two locomotive cranes, one at each end of the gate.

The principal part of the concrete for the dam was mixed by the berm cranes at the south end, east side of the Miraflores locks, and supplied in 2-yard buckets on transfer cars, hauled by narrow-gage locomotives on tracks built from the berm cranes and ending in various spurs to the south toe of the dam, where the concrete was handled to the forms by derricks and locomotive cranes.

United Spanish War Veterans.

Chagres Camp will hold a dance in the Gatun clubhouse on Saturday evening, September 13.

JOINT LAND COMMISSION.

Additional Awards.

The following additional awards were announced by the Joint Land Commission at an open session held on Tuesday, September 2:

Award No. 27—In the matter of the claim of Juan Sotillo for a house in the town of Gorgona.—On April 8, 1913, Juan Sotillo filed a claim with the Joint Commission for house tax No. 733 in Gorgona, and for the lot on which the said house is built.

As respects the claim to the ownership of the lot, the earliest deed presented by the claimant is dated March 19, 1887 (No. 125) in which M. Pretelt Amador makes conveyance to Ricardo de la Ossa, of house and lot situated in the town of Gorgona. This deed contains the following clause:

"In this sale is included the portion of the lot which has not been built upon. This lot has a frontage of ten meters, ninety centimeters, and a depth of seventeen meters, seventy centimeters. The said lot was acquired by conveyance from Justo Maria de la Esperiella, who had acquired title to said lot by cession from the political authorities of the aforesaid district in accordance with the requirements of law."

The claimant in this case, Juan Sotillo, has been unable to present to the Commission any evidence of the conveyance made by the municipality of Gorgona to Justo Maria de la Esperiella. Much light, however, is thrown on the situation by a deed executed at the same period, to wit, April 4, 1887, by the same grantor, Justo Maria de la Esperiella, in a conveyance made to another property in the town of Gorgona to Alfred Lindo. This deed (No. 83), after reciting the conveyance of the house recited that the grantor conveys all his

"rights acquired in the land on which the aforesaid house is constructed, by purchase by me from Rafael Peladorio Marquez, the first day of March of this year, in full legal form in accordance with Article 5 of the Executive Decree No. 45 of March 16, 1886, of this department."

It is evident that the decree of March 16, 1886, cannot be made the basis for a claim of ownership of lands in Gorgona, inasmuch as this decree, which provided for the issuance of renewable permits for the occupancy of town lots in Gorgona, expressly denies title of building lots to the recipients of such permits. The claimant in this case has been unable to furnish the Commission with a copy of the document under which Justo Maria de la Esperiella conveyed the property to Manuel Pretelt Amador. It is evident, however, from the deed executed at the same period by the said Justo Maria de la Esperiella in a conveyance to Alfred Lindo, that the said Justo Maria de la Esperiella confused the right of occupancy under the decree of March 16, 1886, with the actual title to the lot.

In view of the fact that the claimant in this case has not been able to furnish satisfactory evidence of title to the land, and in view of the circumstance that one of his predecessors in interest has evidently based his claim to ownership of the land on an executive decree which expressly denies such ownership, the Commission has reached the conclusion that the claim of the said Juan Sotillo to ownership of the building lot on which House 733 was erected cannot be sustained, and should not be taken into consideration in making an award in this case.

With respect to House 733, the evidence before the Commission shows that Sotillo was the owner of the house before he accepted any lease from the Isthmian Canal Commission.

In conformity with the principles formulated in the opinion of July 25, 1913, on the demurrer of Counsel for the United States to the jurisdiction of the Commission in the matter of the claim of Juan Sotillo, and in accordance with the evidence submitted to the Commission, an award is hereby made against the United States of America in favor of Juan Sotillo for house No. 733 in the town of Gorgona, said award to include all rights, claims, and interest of the said Sotillo in this building, together with any claim for improvements of whatever nature in the building lot upon which it is located, in the sum of \$530.

This award shall be paid to Juan Sotillo on or before the 20th day of September, 1913, and if payment or tender of payment of this award is not made on or before that date, it shall thereafter bear interest at the rate of six per centum, per annum, until paid.

Award No. 28—In the matter of the claim of José H. Stilson to the property designated as Barro Colorado Abojo.—An award is hereby made against the United States of America for the estate of Barro Colorado Abojo, said award to include all right, title, and interest of any persons to the entire estate not heretofore acquired by the United States, together with all claims for improvements of whatsoever nature which may be made by the owners of said estate, in the sum of \$2,000.

This award shall be paid to the claimant hereinafter named, in this amount herein specified, on or before the

2d day of October, 1913, and if payment or tender of payment of this award is not made on or before that date, said award shall thereafter bear interest at the rate of six per centum, per annum, until paid.

To José H. Stilson for all of his rights, claims, and interest in the estate of Barro Colorado Abojo, together with any improvements which may be claimed by the same, the sum of \$2,000.

Award No. 29—In the matter of the claims of the Colombian Fruit Company, Ltd., and Henry Anderson. (Peñas Blancas Arriba, etc.)—Claims were filed before the Joint Commission by the Colombian Fruit Company as owner and Henry Anderson as mortgagee for the lands known as Peñas Blancas Arriba and part of the lands known as Bohio y Buena Vista on the south bank of the River Chagres, nearly opposite the old townsite of Bohio. An examination of the evidence in this case shows that the designations given to the various portions of the original estate of Ahorca Lagarto and Bohio Soldado are often conflicting, and that the limits assignable to these subdivisions of the original estate cannot be precisely determined.

An award is hereby made against the United States of America for the estate of Peñas Blancas Arriba, said award to include all right, title, and interest of any persons to the entire estate not heretofore acquired by the United States, together with all claims for improvements of whatsoever nature on the part of the owners of said estate, together with any rights, claims, or interests which the claimant hereafter named may have in any part of the land known as Bohio y Buena Vista, in the sum of \$1,500.

This award shall be paid into the Circuit Court of the Second Judicial District at Empire for distribution according to the terms of this award on or before the 2nd day of October, 1913, and if not paid into the said court on or before the said date, the award shall bear interest thereafter at the rate of six per centum, per annum, until paid.

To the Colombian Fruit Company, Limited, for all rights, claims or interest in the lands of Peñas Blancas Arriba, not heretofore acquired by the United States, together with any improvements which may be claimed by the same and for any right, title, or interest which they may possess in lands known as Bohio y Buena Vista, the sum of \$1,500.

This award is subject to such equities, if any, as may be possessed by third parties, and it is directed that the amount of this award be deposited with the Circuit Court of the Second Judicial District of the Canal Zone for distribution in accordance with the terms of this award.

Foundry at Balboa Shops in Full Operation.

The first "blow" of steel from the steel foundry recently transferred to Balboa shops from Gorgona was made at Balboa on September 5; the first iron and brass castings from the new foundry were made on August 15 and 20, respectively. The transferred oxy-acetylene plant produced its first cylinders of gas on September 6. Most of the work of the Mechanical Division of the class formerly performed at Gorgona is being done at Empire shops, the principal activities at Balboa shops consisting of foundry and planing mill operations, and work by the structural gangs engaged in installing machinery and motors at the new location.

Ancon Crusher.

The following is a statement of rock crushed at Ancon quarry during the three weeks ending September 6, 1913:

STEAMSHOVEL RECORDS.

Work of Central Division Shovels During the Month of August.

During the month of August, the total amount of material excavated in the Central Division was 926,900 cubic yards, of which 843,700 cubic yards were excavated by Central Division forces, and 83,200 cubic yards were removed by sluicing at Gold Hill, the latter work being in charge of the Fifth Division of the Chief Engineer's Office. Of the amount removed by the Central Division, 185,441 cubic yards were classified as earth, and 658,259 cubic yards as rock.

Of the total, 893,300 cubic yards were primary excavation for the Canal, and 33,600 cubic yards were classified as "Plant" excavation.

Eight hundred and forty-three thousand and seven hundred cubic yards were removed by steamshovels.

The high record for the month was made by shovel No. 215, working 35½ days in the Empire district, which excavated 42,500 cubic yards of rock.

The second best record for the month was made by shovel No. 203, working 36 days in the Empire district, which excavated 40,500 cubic yards of rock.

The best record for a shovel of the 70-ton class was made by shovel No. 101, working 25 days in the Culebra district, which excavated 27,246 cubic yards of earth.

Shovel No. 230, working in the Culebra district, made a high record for one day by excavating 2,226 cubic yards of rock on August 15.

Shovel No. 215, working on 12-hour shift in the Empire district, made a high record of 3,816 cubic yards of earth on August 11.

Except where noted, monthly reports are computed on place measurement, while the daily reports are based on car measurement. The best records for the month, and for one day, are shown in the following table:

BEST RECORDS FOR THE MONTH.
CULEBRA DISTRICT.

230	Culebra.....	Aug. 27.	Earth.....	2,067

NOTE.—The excess number of days over and above the actual number of working days in the month of August (26) is due to double shift and night work.

Feast of Zebulon.

All Master Masons are invited to attend the Feast of Zebulon, given under the auspices of the Masonic Club of Empire, at Kangaroo Hall, Empire, C. Z., Saturday evening, September 13, 1913, at 8.15 p. m. The usual charge of \$1 will be made. All who expect to attend should notify J. L. Caldwell, secretary, Empire, C. Z.

COAL HANDLING PLANT.

Description of Machinery which will be Installed at Canal Termini.

Awards were made on August 12 for the coal-handling machinery and accessories at Cristobal and Balboa called for by Circular No. 763. Under these awards, the Hunt Construction Company of New York City will furnish six unloading towers, four for the Cristobal plant and two for the Balboa plant, and Augustus Smith of Bayonne, N. J., the remainder of the equipment. The cost of the unloading towers will be \$485,735, and that of the balance of the machinery \$1,347,392, a total cost for machinery for both plants of \$1,833,127, divided, as follows: Cristobal, \$1,307,941, Balboa, \$525,186.

The bids were opened in Washington on June 14, 1913, and five tenders were received, ranging in amounts, for both plants, from \$3,894,750 to \$1,300,890. The different proposals were given careful study. A committee, consisting of Col. H. F. Hodges, Civil Engineer H. H. Rousseau, Mr. H. A. A. Smith, and Civil Engineer F. H. Cooke, appointed by the Chairman to review the bids, recommended on August 11 acceptance of the proposal of Augustus Smith as the lowest satisfactory offer, with the understanding that he is to submit, with the exception of the loading towers, satisfactory proposal to obtain increased storage of coal by widening his reclaiming bridges 50 feet, and by increasing their clearance five feet, this enlargement to apply to all items of the Cristobal coaling plant. The committee further recommended that award be made to the Hunt Construction Company for the six unloading towers, with the understanding that the contractor will adapt the towers bid on to the remainder of the Augustus Smith designs. Under the award, Mr. Smith agrees to begin delivery of the machinery for the Cristobal plant within six months, and to complete delivery and erection in 24 months. Under the adopted plan at Balboa, he will begin delivery within six months, and complete delivery and erection in 30 months.

GENERAL PLANS.

In general, each plant will consist of two water fronts and a storage pile. The water fronts will be designated as the unloading wharf and the reloading wharf, while the storage pile is to consist of a basin for coal, a part of which is to be stored subaqueously, and the remainder to be piled above it in the dry. Each plant will be arranged to receive, store, and deliver separately, coal belonging to individuals and companies, as well as to the Government; to receive it from any part of the unloading wharf and transport it to any part of the storage pile; to reclaim coal from any part of the storage pile and deliver it to any part of the reloading wharf, and to transfer it from any part of the storage pile to any other part of same. Coal will be received at each plant by movable unloading towers running on rails supported by the unloading wharf, and reloaded to colliers and barges by movable reloaders running on rails supported by the reloading wharf. The storage pile at the Cristobal plant is to be commanded by movable stocking and reclaiming bridges running on rails parallel to the longitudinal side walls of the coal basin. The storage pile at Balboa will be commanded by four berm cranes, now at Miraflores,

traveling on rails supported by a suitable concrete and steel trestle running longitudinally of the basin.

CRISTOBAL COALING PLANT.

This will be the main coaling plant, and the machinery specifications were based upon the following storage facilities, exclusive of the requirements of individuals and companies:

	Tons.
Wet storage, reserved for naval use.....	100,000
Dry storage, for Canal use.....	100,000
Emergency storage.....	100,000
Total.....	300,000

The preliminary plans for this plant provided for a normal coal storage pile 1,000 feet in length, so laid out as to be capable of an extension 700 feet in length. The demand for storage space by individuals and companies is much larger than was first anticipated, and in view of this fact, award for the machinery has been made with the understanding that the coal storage pile will be increased in width from 250 to about 300 feet. The length may be increased later from 1,700 to 2,000 feet, if it is found practicable. The other principal elevations and dimensions to which the Cristobal plant will conform are, as follows: Elevation of extreme low water, one foot below mean sealevel; of extreme high water, 1.65 feet above mean sealevel; elevation of bottom of slip alongside wharves, 41 feet below mean sealevel; elevation of bottom of wet coal pile, 19 feet below mean sealevel; assumed elevation of top of wet coal pile and bottom of normal dry coal pile, one foot above mean sealevel; elevation of top of normal dry coal pile, 21 feet above mean sealevel; elevation of top of emergency dry coal pile, 31 feet above mean sealevel; elevation of decks of wharves, 10 feet above mean sealevel.

Unloading towers—The unloading towers at the two plants will be similar in general construction. Their functions will be to mine coal from vessels and deposit it into the hopper built in the tower, whence it may be delivered through chutes to the conveying system, or to cars; to mine coal from vessels and deposit it by bucket into the storage pile behind the tower; to mine coal from storage pile behind the tower and deposit it into the hopper, and to mine coal from the storage pile behind the tower and deposit it by bucket on board vessels. The "normal rated capacity" of each tower will be 250 tons of coal an hour, and the maximum rate, 300 tons an hour, when unloading from colliers' or barges.

The towers will be of steel construction, steam-driven, self-contained, and self-propelling. Each unit will travel on two parallel pairs of rails laid at the elevation of the decks of the unloading wharves and spaced on 30-foot centers at Balboa, and 35-foot centers at Cristobal. There will be laid between the pairs of rails, also at the level of the decks of the unloading wharves, a single 5-foot gage railroad track, suitably located for the reception of coal from the tower hopper. Each tower will be supported by four trucks of four wheels each, and the minimum speed of travel will be 50 feet per minute. The towers will be equipped with buckets of 100 cubic feet capacity each, and a receiving hopper, 12 feet wide and 30 feet long, with a capacity of 50 tons of coal, into which the buckets will discharge, either in unloading from vessels, or reloading from storage pile.

The trolley movement of the buckets will be actuated by two direct-connected steam engines installed at each plant. The body of the hopper will be made of $\frac{3}{4}$ -inch iron plates, with the top edges protected by an 8" x 8" coaming of white oak, and will be provided with the necessary gates, chutes, etc., to deliver coal to the conveying system, and to the cars on the track beneath the tower. The boom, or apron, on the water side of the towers will be capable of lifting or folding by movement in a vertical plane, so that when fully housed, no part of it will project more than four feet beyond the concrete face of the wharf.

Stocking and reclaiming bridges—The stocking and reclaiming bridges at the Cristobal plant will be of the duplex type, that is, each bridge will be equipped with two buckets; at Balboa, the four Pacific Division berm cranes will be reerected and used as stocking and reclaiming bridges. Each bridge will be of steel construction throughout, electrically operated and self-propelling. Each will travel at a speed of not less than 50 feet per minute on two pairs of rails, each pair supported by a concrete and steel structure adjacent to the storage basin, and will be mounted on eight trucks, each truck to have four pairs of wheels. Each bucket will be of 200 cubic feet capacity, and will be capable of reclaiming, singly or together, coal from any depth of the wet, normal dry, and emergency stock piles. Their hoisting and trolleying movements will be controlled, simultaneously or independently, by electric motors. The functions of these bridges consist in stocking coal into any part of the storage pile by means of a part of the conveying system supported by the bridge; of reclaiming coal from any part of the storage pile and delivering it to the conveyor; and of stocking and reclaiming simultaneously. They will be able to stock, or reclaim, at the rate of 1,000 tons an hour.

Reloaders—The reloaders will be nearly identical at both plants; they are of steel construction throughout, electrically operated, and self-propelling. Their function is to receive coal from the conveying system and deliver it to colliers, barges, and other vessels of varying freeboard and size, and location of hatches. To attain this end, each reloader is to be fitted with a hopper for the reception of coal from the conveying system of sufficient size to regulate the flow; a conveying system to transfer the coal to the discharge end of the reloader, and an adjustable arm, or boom, equipped with a telescopic chute to deliver the coal. Each reloader will travel on rails laid at the elevation of the decks of the reloading wharves, and will have a "normal rated capacity" of 500 tons an hour. The boom will house similarly to the boom on the unloading towers.

Conveying system—A conveying system is provided for the transportation of coal within the plant, namely, from unloaders to storage; from unloaders to reloaders; from storage to wharf bunker; from unloaders to wharf bunker; from storage to reloaders, and from one part of storage to another. With this system at Cristobal, it will be possible to receive coal simultaneously from two vessels located anywhere along the unloading wharf, one, two or three unloaders being at work on one vessel, and transport it from both vessels to the same part of the storage pile; to the reloaders direct, or to the wharf

bunker direct, within the capacity of the conveyors supplying the bunker. If coal from both vessels is being transported to the storage pile, it will be possible to reclaim coal simultaneously from any other part of the storage pile by means of the remaining bridge, and transport it to the reloaders, or wharf bunker, direct. The conveying will be accomplished by a double-track 10-ton automatic electric car system.

Wharf bunkers—Each plant will be provided with a wharf bunker, approximately 20 feet wide and 100 feet long, for the supplying of coal to tugs, barges, and other small craft. Each bunker will have a capacity of 1,500 tons of coal, and will be constructed of structural steel, with floors and walls of concrete. It will be divided by two transverse partitions into three bins of 500 tons capacity each. The slope of the floor will be 45 degrees from the horizontal, but all sides and partitions will be vertical. Each bin will be provided with two valves for delivery of coal to barges, each having a clear opening 24 inches wide by 36 inches high, and so spaced as to make the bin self-emptying. Each opening will be set 28 feet above the deck of the wharf, and will be controlled by a gate operated from the ground or from a footwalk along the front of the bunker. Each outlet will be provided with a folding chute, able to deliver coal at the Cristobal plant, when fully extended, on a plane seven feet below wharf level, and at Balboa, 20 feet below wharf level. At its shortest extension, it must deliver coal at Cristobal on a plane seven feet above wharf level, and at Balboa, 10 feet above wharf level. Each of the three bins will be fitted with a second chute, designed to discharge coal at a point five feet above the deck of the wharf, fitted with a valve at the lower end to control the flow.

Power substation and distribution system—The operation of all parts of both plants, with the exception of the unloading towers, will be electrical, and suitable substations of approved design, will be erected at each point. The electrical apparatus will be furnished by the General Electric Company as subcontractor. The operation of the unloading towers will be actuated by steam power, for which engines and boilers will be supplied by the contractor.

Weighing devices—Each of the weighing devices shall automatically record net weight of coal, in so far as practicable. Where the location and service of any weighing device is such as to render it impracticable to weigh automatically, the nearest approach to automatic action possible, consistent with convenience, cost, and accuracy, shall be employed; in any event, all weighing devices shall record the weights automatically, net weights where practicable, and where not practicable, the taking out of the tare shall be effected by simple, reliable, and accurate means. All weighing devices shall weigh within one per cent of absolute accuracy under maximum or minimum conditions of operation, and they shall be such as to require but little attention to keep them in efficient operating condition, shall be thoroughly protected from dust, grit, and moisture, shall be so located as not to be injured by falling coal, or otherwise, and shall not require the services of a skilled man to observe and record their weighings.

All weighing devices shall be of such design, location, and construction as to render it

practicable to check their records by means of passing known weights, separate weighing on other scales of coal weighed by them, or otherwise, and such means of checking shall not require undue time or skill. If any devices for checking weights are made as ordinary commercial adjuncts of the weighing devices, they shall be furnished and erected as part thereof.

Substructures—The forces of the Canal Commission will undertake the erection of all masonry substructures for the coal handling machinery, as well as accomplish all wet and dry excavation, masonry, and backfill for the plants in general; also, supply all rails for the support of the unloading towers, bridges, reloaders, conveyors, and other accessories; all foundations, including anchor bolts and masonry plates, and, practically all the concrete construction and fixed anchorages. The substructures will be of solid masonry, supported by 6-inch caissons sunk to rock. Forces of the Panama railroad are now engaged in establishing rail connection to the island opposite Cristobal, on which the coal-plant will be located, by means of a bridge of the bascule type.

BALBOA COALING PLANT.

This plant will be secondary in importance to the plant at Cristobal, and its storage capacity and facilities for handling will be about one-half of those of the main plant. Two plans for the handling machinery were prepared, one calling for entirely new equipment, and the other providing for the utilization of the four berm cranes at Miraflores Locks, which cost originally about \$300,000. The last mentioned plan was adopted, and is the basis upon which the award for the handling plant at Balboa was made.

The principal dimensions and elevations to which the Balboa plant will conform are, as follows: Elevation of extreme low water, 10.6 feet below mean sealevel; elevation of extreme high water, 11.2 feet above mean sealevel; elevation of bottom of slip, 45 feet below mean sealevel; assumed elevation of top of wet coal pile and bottom of normal dry coal pile, six feet above mean sealevel; elevation of top of normal dry coal pile, 26 feet above mean sealevel; elevation of top of emergency dry coal pile, 36 feet above mean sealevel; elevation of decks of wharves, 16.5 feet above mean sealevel; length of storage basin, 500 feet; water frontage, 1,300 feet.

The storage facilities will consist of the following:

	Tons.
Wet storage, reserved for naval use.....	100,000
Dry storage, for Canal use.....	80,000
Emergency storage, dry.....	30,000
Total.....	210,000

The fundamental difference between the two plans prepared for the Balboa plant lies in the fact that in the design for all new equipment, the storage basin would be commanded by stocking and reclaiming bridges, while in the accepted design, it will be commanded by the four double cantilever cranes, and in this system no provision is made for connecting the unloading towers with the storage pile. The adoption of the alternative plan has necessitated an increase in the width of the storage basin to 340 feet, but its length, 500 feet, remains the same. Under the present plan, it is purposed to load coal into storage by chuting from the unloading towers directly into the coal pile behind, to be rehandled further by the cranes. The conveying system

will be required to serve not only the two unloading towers when reclaiming from stock, but the cranes also, when they are engaged in this operation, the capacity of 1,000 tons of coal an hour being obtained with all six units at work. The guaranteed rate of handling at Balboa is the same per unit as at Cristobal. The cost of removing and erecting the cranes will be borne by the Canal Commission.

In adapting the steam-driven steeple tower of the Hunt Construction Company's design to the proposed conveying system at the two plants, the addition of two 2-valve hoppers on the shore side of the Cristobal plant, and of one 2-valve hopper on the shore side of the Balboa plant will be necessary.

Health Conditions in the Chagres River Villages.

Dr. Charles A. Hearne, quarantine officer at Colon and Cristobal, who visited the native village of San Juan on the Rio Pequeni, one of the principal branches of the Chagres, on August 25 and 26, to investigate the reported heavy mortality among the inhabitants, has advised that in the village itself there has been no abnormal number of deaths. The police report, covering the period from October 1, 1912, to about September 1 this year, showed 28 births and eight deaths, out of a population of about 400. Two cases of sickness were found, both showing evidences of malarial infection. The sanitary conditions in the village were found to be fair; no mosquitoes were seen or heard, and the people claim there are none. On the return trip, the doctor visited and inspected the following river villages: Marañal, population 20; Limon, population 25; Boca de Gatun, population 40; Santa Rosa, population 20; Juan Mina, population 40; and Cruces, population now about 100. Hookworm disease was found to be prevalent in all of the settlements.

The towns along the Chagres River are increasing in population, owing to removals from Gorgona, Matachin, and Cruces. The inhabitants of the latter place are preparing to found a new town, near the Canal Commission's gaging station at El Vigia, which they propose to name Vigia. With the rise of Gatun Lake, and the backing up of the water in the Chagres, the river is probably destined to become quite an artery of trade. Heretofore, bananas, in which a thriving trade is conducted, have been unloaded at Matachin, but the interruption in railroad communication to that point has caused the trade to be diverted to Gamboa and Gatun. It is not an infrequent sight to see 35 or 40 cayucos heavily loaded with bananas coming down the river, trailing one behind the other.

A Sailor Stabbed.

Arthur Rahlin, a sailor on the United States cruiser *Denver*, which arrived at Balboa from Corinto, Nicaragua, on Thursday, September 4, for coal, was stabbed in the Cocoa Grove district of Panama City, early in the morning of Saturday, September 6. He was taken to Ancon Hospital, where his condition is reported as critical. His assailant, a Panamanian named Juan Antonio Almengor, was placed under arrest.

Married.

ROBERTSON-JONES—At the Union Church, Cristobal, on September 8, Miss Minnie Hudson Jones of Louisville, Ky., to William Turner Robertson, of Washington, D. C., the Rev. Carl H. Elliott officiating. Canal Zone residence, Corozal.

SOCIAL LIFE OF THE ZONE.

Meeting of Women to Discuss a Central Organization for Local Church Work.

There was a large gathering of women at the seawall Methodist Episcopal Church in Panama, on Saturday, September 6, in response to a call issued by the Woman's Foreign Missionary Society of the church for a missionary rally. The object of the meeting was to bring together the women engaged in Christian work, especially missionary work, in the Canal Zone, and to discuss plans for the organization of a central society for the continuance of such work. There were present members of the Ladies' Aid Society, Empire, St. Luke's Altar Guild, Ancon, and Ancon Study Club, besides women not affiliated with any organization.

The program was begun with an organ voluntary by Mrs. Keyser of Ancon; following this, 12 little children of the mission school gave a series of recitations, songs, and dialogues. Other numbers included a dramatic reading by Mrs. Taylor of Empire, a reading by Mrs. Smith of Empire, prayer by Mrs. Stokoe of Balboa, and an address of welcome by Mrs. Kingsbury of Ancon. Dr. Rosalie Slaughter Morton of New York City was present and spoke informally on the work of the Methodist church in the countries of South America through which she has been traveling. The president of the society, Mrs. Harry Compton, read a paper on the aims and outlook of the organization, some of the leading points of which were, as follows:

The Woman's Foreign Missionary Society is affiliated with the Baltimore branch of the woman's society of the Methodist church. The yearly dues of \$1, and the receipts from life memberships, are sent to the branch. All other funds are expended in support of scholarships in the local mission school, and for the society's expenses. In 1912, the society paid \$100 toward the education of a young girl. The effort so far this year has been centered in the establishment of a playground in the school yard. The equipment is being made and will cost the society about \$60. One of the youngest children in the school has been made a life member of the Little Light Bearers, the children's branch of the Woman's Foreign Missionary Society; such a membership costs \$10. A feature of the work of the society is the monthly mission study. Meetings have been held during the year at nine homes, and the social hour, following the study and consideration of routine matters, has always proved pleasant. The women have held one public service in the church. In May, a reception was held in the church parlors in honor of Bishop Homer Stuntz, on the occasion of his first episcopal visit to the church.

The enrollment of pupils in the mission school is over 100, and the average daily attendance is 90. Twenty scholarships, held by nine girls and eleven boys, are now maintained. Lessons in manual training and sewing are features recently added to the work of the school. A class in first aid to the injured is also conducted.

The president of the society announced that the new church in Guachapali will soon be completed, and urged the need of a woman teacher to take up the work among the women and children living in that section, one who can make her home on the premises. The society was asked to consider the possibility

of raising money for the support of this teacher.

A plan to bring the societies of women engaged in Christian work on the Isthmus into a central organization was discussed. Each society will be asked to appoint a committee to confer regarding the matter, and prepare suggestions for such an organization to be submitted at the meeting of the foreign missionary society in October. After adjournment, refreshments were served in the church parlors.

Miscellaneous Notes.

Mrs. James Bowdry of San Francisco, gave a lecture on socialism in the lodge hall, Paraiso on Saturday evening, September 6.

The Reverend Alfred G. DeRoos, the Baptist evangelist, who has been holding meetings in various Zone villages, completed one month's mission under the direction of the Reverend J. L. Wise, in the Commission chapel at Empire on Saturday evening, September 6. Eight persons presented themselves for baptism at the close of the mission. Mr. DeRoos has gone to Gatun for a series of meetings under the direction of the pastor of the Baptist Church, the Reverend Stephen Witt.

Special Meeting of Pythian Sisters.

Canal Zone Temple, No. 1, Pythian Sisters, held a special meeting on Monday, September 1, in honor of Mrs. Alice F. Boylan, supreme mistress of finance of the Supreme Temple. Ten members of the order were present. The Canal Zone Temple presented its visitor with a gavel made of native hardwood, and a pair of Satsuma cuff links as souvenirs of her visit to Panama. Mrs. Boylan sailed on the *Carthago*, for Bocas del Toro on Tuesday, September 2.

PERSONAL.

Capt. Courtland Nixon sailed for New York on the *Panama*, on Saturday, September 6, on his annual leave of absence.

Mr. Lewis A. Mason, assistant engineer in charge of the design of floating caisson dams for the lock entrances and the permanent dry dock, sailed for San Francisco on September 4, accompanied by Mrs. Mason, to supervise the fabrication and construction of the first caisson by the Union Iron Works.

Mr. B. F. Harrah, Assistant Examiner of Accounts of the Isthmian Canal Commission, with headquarters at Washington, arrived on the Isthmus, on Monday, September 1, on business connected with the office of the Examiner of Accounts.

Mr. Charles M. Pepper, one of the foreign trade advisers for the Department of State at Washington, is spending a few days visiting the Canal work, which he has seen in various stages of progress, both in French and American times. He expects to retire from his present post on October 1.

Emigrants from the Lake Area.

In anticipation of the rise of Gatun Lake the Department of Law has been engaged for the past year and a half in removing from the area the native families, who live in detached houses scattered through the jungle, or in little villages clustered on the banks of streams or along the line of the railroad. In that time about 70 per cent of the population has moved out of the area, going either above the 87-foot contour or entirely out of the

lake watershed. Some moved promptly on being notified, others had to be taken out when the water was almost at their doors; some have disappeared in the higher levels with the trackless silence of woods creatures; and some have moved in bodies, forming new settlements in which is preserved the community life of the old. Most of the population of old Monte Lirio moved together up the Gatun River and founded a village which they call Limon. On the other hand, about 350 people scattered over an area of several square miles were collected and moved, by rail and water, a distance of nearly 60 miles and set down on a townsite laid out for them. These were people living around Gorgona, Gorgonita, Waterloo, and Matachin, who were taken 40 miles down the Bay of Panama to the location of New Gorgona, set apart for Canal Zone emigrants by the Government of Panama.

A special train of four box cars and four second-class passenger cars carried these people and their belongings to Balboa, making two separate trips. While the crowded passenger cars stood on a sidetrack near the "angle wharf," an electric crane at the wharf edge loaded the goods into the hold of a lighter. The lighter was 112 feet long by 40 feet in beam, and the men of each party found room for passage on the deck. The women and children were carried aboard the tug *Chamé*, which towed the lighter. In the vessel were loaded tables, kitchenware, sewing machines, alarm clocks, charcoal braziers, and other household goods; corrugated iron was carried along in quantities for roofing the new dwellings, and potted plants for adorning them. Several cayucos were taken aboard, and many chickens, ducks, geese, turkeys, pigs, and goats, as well as dogs and one spotted fawn, though no cats were to be seen. It was well toward evening each time when the barge left the wharf, on its way down the bay. The *Chamé* returned to Balboa during the following night, having delivered the emigrants and their goods without mishap.

At New Gorgona, the people were quartered temporarily in a single large building, erected by the Republic of Panama. With this as headquarters, they arranged new locations and set to work at constructing new dwellings, either of rough timber or of poles cut from the woods. The Government of Panama sells them building materials at cost, and is maintaining a commissary store at New Gorgona to supply food and household necessities at cost prices. The Republic has purchased from the Commission, at upset prices, the schoolhouse for native children and the Catholic church at Gorgona, and these, as well as the dwellings whose owners will dismantle and load them, are to be transported to New Gorgona free of charge.

Colon-Panama Passenger Train Service.

Nos. 3, 5, 7, 21, 23, 25, 27, and 29 will stop only at Miraflores and Corozal to allow passengers to get off who hold transportation reading from points north of Pedro Miguel.

Nos. 20, 22, 24, 26, and 28 will stop at Corozal and Miraflores on flag only for passengers going north of Pedro Miguel over new main line.

Lost—On Front street, Colon, on August 26, a gentleman's gold watch, Swiss movement, 16 size. Monogram "F. E. S." engraved in large letters on back. Fob attached with Society of the Chagres pin. Reward, if returned to John Vaucher, jeweler, Colon.

COMMISSION CLUBHOUSES.

Activities of the Young Men's Christian Association.

GENERAL.

The schedule for moving picture entertainments for the week September 15 to 20, is, as follows: Monday, Empire; Tuesday, Culebra; Wednesday, Cristobal; Thursday, Corozal; Friday, Gatun and Porto Bello; Saturday, Cristobal.

A cablegram has been received from Alton Packard, the humorist, stating that he will be unable to keep his engagement to appear at the various clubhouses in September, because of illness in his family. Negotiations are now under way for a company to appear early in October.

The all-Isthmian bowling tournament and the all-Isthmian basketball league will begin about the first of October.

COROZAL.

A sharply contested basketball game took place on Friday night, September 5, between the Culebra and Corozal teams on the latter's floor. The score at the end of the first half stood 22-13, in favor of Corozal. At the end of the second half, it was a tie, 28-28. Two additional five-minute periods were required to decide. The final score was 31-30, in favor of Culebra.

Eight teams have entered the local three-men league of tenpins. Gold medals will be given to the winning team, also a gold medal for high average.

Empire won three straight games from the local team on the local alleys on September 6. Scores: Empire, 869, 875, 943; Corozal, 816, 856, 771. High scores in tenpins for the past week were, as follows: Edwards, 211, 205; Holmes, 213, 207; Taylor, 203; Beall, 200; Ruggles, 203.

The chess match played between Culebra and Corozal resulted, as follows:

Corozal.	Won	Culebra.	Won
Connor.....	2	DuBois.....	0
Fields.....	1	A. M. Warner.....	1
Sherrard.....	1½	J. H. Warner.....	½
Shohan.....	0	McClure.....	1
Mills.....	0	Wilson.....	2
Morehead.....	1	Strong.....	0
Kyte.....	2	Shropshire.....	0
Kingsbury.....	2	Patterson.....	0
Total.....	9½	Total.....	5½

CULEBRA.

High scores for the week in tenpins were, as follows: Case, 200, 223; Dougherty, 269, 211; Finley, 228; Bechlem, 245. The score of 269 made by Dougherty is the high record for the local alleys. In the local tournament Dougherty and Warner are tied by Dougherty and Case for the first prize, with a score of 740.

An order has been placed in the United States for a consignment of new library books.

EMPIRE.

The local bowling league has just closed with the three teams captained by S. King, Sims, and Giavelli tied for first place, each team having won 16 games and lost 8. The tie will be bowled off on once.

New music rolls for the player piano have just arrived from the United States and those assembling in the lobby enjoy the concerts given two or three times a week.

A local basketball league has been formed with five teams captained by Frank Purchase and C. Cushing of Culebra, and F. M. Sawyer, Huldquist, and A. J. Johnson of Empire. Two teams are composed of Culebra players, and the three other teams are formed of Empire men. This league will bring at least 30 men into the game and in this way help to prepare a team for the regular Isthmian league, which will probably start about the first of October. The local league series will be 20 games, each team playing the other teams twice, and two and three games will be played each night.

GATUN.

Mr. Joseph P. Mitchell has been appointed manager and coach for the Gatun basketball team. Practice games will be held three nights each week. Any member of the association is cordially invited to participate in these practice games.

A new schedule for the popular bandicap pool tournament has been drawn up and mailed to each participant. Any man who fails to appear by 9 o'clock on the night he is scheduled to play forfeits the game to his opponent.

A two-man "Ragtime" bowling tournament was conducted on the Gatun alleys on Labor Day, September 1. Twenty-five men participated. The results in the duckpin tournament were: First prize, Barte and Gibson, 200; second prize, Wurster and Grey, 198; third prize, Claherty and Furlong, 197; high single game, Barte, 114. The tenpin tournament results were: First prize, Dennis and Furlong, 411; second prize, Barte and Grover, 378; third prize, tie—Dennis and

Humphrey, 343 and Omeara and Humphrey, 343. High single game, Dennis, 208.

Mr. Ben Jenkins has been appointed a member of the Gatun executive council.

A prize, consisting of a handsome silver medal, will be awarded to the member who rolls the largest number of "200" games of tenpins during the period September 17 to September 30, inclusive.

Messrs. Claherty and Hess have been appointed managers of the bowling alleys, effective September 1.

All bowling records for the Gatun clubhouse were again broken during the month of August, when 3,693 games were rolled. This is an average of 142 games per day.

Chas. C. G. Wurster has been appointed manager of pool and billiards, vice D. C. Galloway, resigned.

CRISTOBAL.

Mr. Roy F. Soule of New York, editor of *The Hordwore Age*, proved an interesting speaker before the discussion club on Thursday, September 4. Mr. Soule divided his time between "Salesmanship" and "Corporations." About 50 men were present. Dr. S. T. Darling will address the club on Thursday, September 11, taking for his subject "Transmission of disease through insects."

Mr. D. V. Stratton will give a lecture illustrated with slides and moving pictures, on Friday, September 12. His subject will be "The Panama-Pacific exposition and the Sacramento Valley." No admission will be charged.

Basketball practice has begun in preparation for the all-Isthmian tournament, which starts early in October. All men interested in basketball are requested to leave their names at the desk.

Mr. J. B. Gomez will start another class in Spanish on Wednesday, September 17. Persons interested in the study of Spanish can enroll at this time.

75th meridian time.

WEATHER CONDITIONS, CANAL ZONE, AUGUST, 1913.

Weather conditions on the Isthmus during the month of August were in most respects approximately normal. The rainfall was generally deficient over the Pacific and Central sections, but above normal along the Atlantic coast. The monthly totals ranged from 4.23 inches at Miraflores to 25.35 inches at Porto Bello. The maximum precipitation recorded in one day was 6.06 inches at Porto Bello, on the 10th.

The average air temperature and relative humidity were slightly above normal.

The wind reached a maximum velocity of 40 miles an hour from the northeast, at Culebra, on the 27th during a local rain squall. The highest wind velocity previously recorded at the Culebra station was 39 miles an hour, from the north, on July 20, 1910.

Normal conditions of night and early morning foginess prevailed at the interior stations. Fifty-four per cent of the fogs observed were dissipated by 6.30 a. m., 88 per cent by 7.30 a. m., and 94 per cent by 8.30 a. m.

The following table summarizes the weather conditions for the month:

STATIONS.	Pressure (reduced to mean of 24 hours.)	Temperature.				Mean relative humidity.	Precipitation.			Wind.		
		Mean.	Maximum.	Date.	Minimum.	Date.	Total inches.	Station average.	Number of rainy days.	Total movement (in miles).	Prevailing direction.	Date.

OFFICIAL DIRECTORY OF PANAMA.

President—Dr. Belisario Porras.
First vice-president—Rodolfo Chiari.
Second vice-president—Ramón M. Valdés.
Third vice-president—Aristides Arjona.

Departments of National Government.

Secretary of Government and Justice—Francisco Filós.
Assistant Secretary—Enrique L. Hurtado.
Secretary of Foreign Affairs—Ernesto T. Lefevre.
Assistant Secretary—José B. Calvo.
Secretary of Finance—Aristides Arjona.
Assistant Secretary—Leovigildo Gonzales.
Secretary of Public Works—Ramón F. Acevedo.
Assistant Secretary—Ladislao Sosa.
Secretary of Public Instruction—Guillermo Andrevé.
Assistant Secretary—Jephtha B. Duncan.
Director General of Posts and Telegraphs—L. F. Ramirez.
Director General of Statistics—Adolfo Alemán.
Administrator General of Public Lands—Jerónimo J. García.
Treasurer General (ad interim)—J. M. Alzamora.
Chief Engineer—Ricardo M. Arango.

Minister at Washington—Eusebio A. Morales.
Secretary of Legation—José E. Lefevre.
Attaché—Nicolas Remón.

Judiciary.

Chief Justice of the Supreme Court—Alberto Mendoza.
Judges of the Supreme Court—H. Patiño, Alberto Mendoza, Saturnino L. Perigault, Aurelio Guardia, Juan Lombardi.
Attorney General—Antonio Papi Aizpuru.

Governors of Provinces.

Panama—Francisco A. Mata.
Colon—Ruben S. Arca.
Bocas del Toro—Pacífico Melendez P.
Coclé—Alfredo Patiño.
Los Santos—José M. Moreno.
Veraguas—A. Gilberto Vega.
Chiriquí—Gerardo Herrera.

Municipalities of Panama and Colon.

Panama—Mayor (Alcalde)—Enoch Adames.
Chief of Police—Leonidas Pretelt.
Captain of the Port—Carlos de Diego.
Colon—Mayor (Alcalde)—Julio Bernal.
Chief of Police—C. A. Matos.
Captain of the Port—Inocencio Galindo, Jr.

Misdirected Letters.

The following insufficiently addressed letters, originating in the United States and its possessions, have been received in the office of the Director of Posts, and may be secured upon request of the addressees:

Brady, Miss Esther	Mehlhope, G. E.
Brown, Frank H.	Mettler, Mrs. A. J.
Collins, E. T.	Rawson, Frank
Conelly, E. C.	Reeder, Willie D.
Elam, Robert	Skeris, Joseph
Gardner, Dean B.	Smith, Mrs. Charles F.
Hall, W. C.	Swanson, Oscar
Harold, W.	Thompson, John
Horgan, M. W.	Van Fleet, Wilbur
Marcuse, S. H.	Van Toll, Nelson

Cold Storage Prices.

The following changes have been made in cold storage prices at the commissaries since the last publication: Sweetbread, beef, reduced from 40 to 34 cents per pound; green peppers reduced from 6 to 4 cents per pound; romaine, added, at 14 cents per pound; tomatoes, reduced from 5 to 4 cents per pound; Malaga grapes, added, at 14 cents per pound; canteloupes, advanced to 7 cents per pound; plums, advanced to 12 cents per pound; pears, added, at 8 cents per pound.

CANAL

RECORD

Volume VII.

ANCON, CANAL ZONE, WEDNESDAY, SEPTEMBER 17, 1913.

No. 4.

The Canal Record

Published weekly under the authority and supervision of the Isthmian Canal Commission.

The Canal Record is published free of charge, one copy each to all employees of the Commission and Panama Railroad Company whose names are on the gold roll. Extra copies and back numbers can be obtained from the new stands of the Panama Railroad Company for five cents each.

Address all Communications.

THE CANAL RECORD,

Ancon, Canal Zone,

Isthmus of Panama.

No communication, either for publication or requesting information will receive attention unless signed with the full name and address of the writer.

NOTES OF PROGRESS.

Canal Record Index.

The index to Volume VI of THE CANAL RECORD, in form suitable for binding, will be ready for distribution shortly. It will be sent free, on application, to such persons, institutions, libraries, etc., as desire to preserve their copies of THE CANAL RECORD in book form. Application should be made to the Secretary, Isthmian Canal Commission, Ancon, C. Z.

Commissary for Ancon.

In view of the decision to continue the settlement at Ancon indefinitely as quarters for the gold employees, a commissary of a permanent character has been authorized. It will be a one-story building, 110 feet long by 70 feet wide, about the size of the Empire commissary, will be constructed of hollow concrete blocks, and will have a tile floor in salesroom. A refrigerator, 20 by 20 feet in size, will be installed, together with the usual counters and shelves. The commissary will be situated near the tennis court, on the site of the old French building, now used as a storehouse by the Quartermaster's Department. The permanent force to be quartered at Ancon, will comprise about 161 families, and 130 bachelors.

Rise of Miraflores Lake.

The opening in the dam of the spillway of Miraflores Lake is to be closed on or before October 1, in order to begin the filling of the lake area to the height required for the passage of vessels. In the construction of the spillway, a gap was left in the lower part of the ogee next to the locks, for the passage of the waters of the Rio Grande and its tributaries; filling this gap with about 700 cubic yards of concrete will effect the completion of the mass masonry of the spillway. Forces of the First Division will complete the installation of the control gates before the water reaches the crest of the spillway at 38.67 feet above sealevel. The rise of the

lake will necessitate the removal of the cement shed on the west side the approach to Miraflores Locks and of the branches of railroad below the 55-foot contour. The buildings in the native section of Miraflores village have been demolished, and the Commission buildings in the lake area will be removed. The police personnel was transferred to Pedro Miguel and consolidated with the station of that village on September 15, and the Miraflores commissary store is closed.

The bottom of the completed channel through the lake, from Pedro Miguel Lock to Miraflores Locks, is to be 10 feet above sealevel, allowing a waterway of 45 feet depth when the lake is at elevation 55 feet, or normal level. Most of this channel has been brought to grade, though some portions of it have been left with a maximum elevation of 16 feet above sealevel, to be excavated by dredges.

Diversion of Drainage South End of Culebra Cut.

Since August 15, 1912, the drainage water from the portion of Culebra Cut south of the summit of excavation has been passed through the 18-foot culvert in the middle wall of Pedro Miguel Lock. On September 11, this drainage was diverted to the culvert in the east wall, to allow the cleaning from the center wall culvert of the silt and debris which have settled in it. This cleaning, which has to be accomplished before the rise of Miraflores Lake, will probably require about 15 days.

Rents under Revocable Licenses to Private Coal and Fuel Oil Companies.

Under the plan of issuing revocable licenses to private dealers in coal and fuel oil who desire to maintain coal storage and oil tanks at the Canal termini, the following rates for rental have been approved: The rate for space occupied by oil tanks will be one-half of a cent per square foot per annum at Balboa, and one-third of a cent per square foot per annum at Mount Hope. The real estate or improvement tax on investments made by the fuel oil licensee will probably be one per cent per annum. Under the present arrangement, the licensee of coal storage will have little, if any, occasion to make improvements. Where the Government makes these improvements, the ground rent and the rent for the improvements will be consolidated into one annual fee in lieu of the ground rental and the tax for improvements charged the licensee for fuel oil tanks.

A Day's Record in Loading Gravel.

American steam ditcher No. 1, belonging to the Panama Railroad Company, made a good day's record at dump No. 1 gravel pile on Saturday, September 6, when it loaded 1,424 cubic yards of gravel in five hours and fifty-five minutes, approximating a rate of 237 cubic yards an hour. The machine was in charge of Steam Engineer E. Richards.

END OF DRY EXCAVATION.

Steamshovel Operations in Canal Proper Discontinued on September 10—Cleaning up in the Cut.

Steamshovel operations in Culebra Cut were permanently suspended on Wednesday, September 10, and by Saturday night, September 13, all track had been removed in the Empire district, except Tower R incline track and track to pumping plant, and all were taken up in the Culebra district, except incline tracks. Many of the ties were past saving and were heaped in piles and burned.

The last steamshovels to stop working in the bottom excavation were No. 204, manned by H. S. Hayes, engineer, and A. E. Alexander, craneman; and No. 226, manned by Albert H. Geddes, engineer, and W. I. Hudson, craneman. These dug their last dipperfuls at about 10.30 a. m. The last dirt train out of the Cut was drawn by engine No. 260, with E. C. Bean as engineer, and E. A. Donnelly, as conductor. Steamshovel No. 210, manned by Frank Loulan, engineer, and S. H. Bryan, craneman, was retained at Cucaracha slide until Thursday, September 11, to keep the track clear.

The pumps which have been maintained just south of Gamboa dike to free the Cut of drainage water flowing north will be removed this week, and the concrete building which has housed them will be destroyed with dynamite. As the pipes which formerly passed the water around Cucaracha slide to the south have been taken up, the natural drainage into the Cut from this week on will collect and remain there. As the water in the lake rises there is an increased seepage through the embankment separating the Cut from the Camacho Diversion, and, in addition, a slight seepage through Gamboa dike has been observed. This, together with the rainwater that will flow in between now and the time the valves in the pipes at Gamboa dike are opened, will probably have the effect of flooding the bottom of the Canal. In order to avoid any hindrance by the water backing up too rapidly while the work of removing the pumps is going on, a small dike will be built across the Canal about a mile south of the dike to retain the drainage flowing north. With the pumps out of the way, the spur track leading to the dike, and the incline track out of the Cut nearby, will be removed.

It is estimated that 600,000 cubic yards of material remain to be removed by dredges from the Culebra Cut section within the original limits of the Canal, exclusive of slides and the inclines at the north and south ends of the Cut. Practically all of this material lies between Cucaracha slide and a point about midway between Empire and Culebra. Slides in this section showed renewed activity during the past week, but these in a large measure have lost their importance, because they will become a part of the regular work

of the dredges in keeping the channel clear. The remaining material is being drilled preparatory to blasting it; most of the blasting will be done after the water is about eight feet deep.

A total of 13 shovels were at work on Saturday in the Central Division. Two of these were engaged in excavating a recess for a mooring basin and an approach for the pontoon bridge on the east bank, and one was at work on the west bank, opposite Cucaracha village, digging a trench for the discharge line of the dredge pumps to be installed at that point. It is proposed to extend the discharge line over into the valley of the Rio Grande, where the material pumped by the dredges working in Cucaracha slide, will be wasted. Another shovel will be set at work this week, excavating for a track leading off the west approach to the pontoon bridge.

Excavation was first begun in Culebra Cut on January 20, 1882, by the French, and has continued with only six years' interruption (1889-1895) to the present time. During the operations of the two French companies, about 17,000,000 cubic yards of material were taken from this section useful to the completed Canal. On May 4, 1904, when the Americans took charge, there were about 700 men employed in excavation work, using side excavators, served by small French dump cars and Belgian locomotives. Work was continued with the equipment left by the French until it could be gradually replaced with modern steamshovels, engines, and cars. The first American steamshovel was placed in operation on November 11, 1904, and the last of the French excavators was discontinued on June 16, 1905. On August 1, 1905, there were eleven American steamshovels at work, but their output was greatly handicapped by lack of proper transportation facilities. Work in the Cut did not begin on a large scale until February, 1907, and from that time until 1911, when the maximum output was reached, there was a steady increase in the amount of material excavated as new equipment was installed.

The following table shows the amount of material removed from the Culebra Cut section by the Americans from the beginning of operations in 1904 up to the suspension of steamshovel work on September 10:

Year.	Cubic Yards.
1904.....	243,472
1905.....	1,084,428
1906.....	2,702,991
1907.....	9,177,130
1908.....	13,912,453
1909.....	14,557,034
1910.....	15,398,599
1911.....	16,596,891
1912.....	15,028,413
1913 (To September 10).....	8,348,190
Total.....	97,049,601

Canal Excavation in August.

The grand total of excavation to September 1 was 209,218,030 cubic yards, leaving to be excavated under the revised estimate of July 1, 1913, 23,134,970 cubic yards.

The total excavation for the month of August was 2,658,785 cubic yards, as compared with 2,443,353 cubic yards for the corresponding month last year, and 2,706,223 cubic yards, in August, 1911. The wet excavation for the month was 1,607,672 cubic yards, and the dry excavation 1,051,113 cubic yards.

In the Atlantic section, the total excavation was 514,250 cubic yards. Of this amount, all but 2,161 cubic yards consisted of material dredged from the Atlantic entrance to the

Canal by forces of the Sixth Division.

The total excavation in the Central Division was 926,900 cubic yards, 83,200 cubic yards of which consisted of material removed in sluicing operations back of Gold Hill, performed by forces of the Fifth Division. Central Division shovels, working on the bottom of the Canal, in slides, and on the banks of the Canal in removing material to lessen the pressure from above, took out a total of 810,100 cubic yards. In addition, 33,600 cubic yards of material, charged to "Plant" excavation, were removed.

In the Pacific section, operations by the Sixth Division resulted in the removal by dredges of 1,012,383 cubic yards, 726,256 cubic yards from the Pacific channel, and 286,127 cubic yards from the terminal basin. Dry excavation amounted to 205,252 cubic yards, 102,238 cubic yards from the terminal site, by forces of the Second Division, and 103,014 cubic yards from the Canal prism, south of Miraflores Locks, by forces of the Fifth Division.

A detailed statement of excavation, and a summary of the work on the locks and dams, follow:

Mean rainfall along Canal (ten stations), 11.28 inches. By "Work" excavation is meant excavation actually made for one of the constituent parts of the Canal, such as prism, diversions, or locks, etc.; that is, it represents material taken from the area to be occupied

by the Canal and constitutes excavation useful for the completed Canal.

By "Plant" excavation is meant excavation outside of any of the constituent parts of the Canal, such as prism, diversions, or locks, etc. It includes material necessary to be excavated for construction purposes only, and is chargeable against the particular plant item for which it is performed, such as prism, diversions, locks, etc.

Changes in Cofferdam at Balboa Terminals.

The plan for the construction of the cofferdam around the outer ends and approaches of the drydocks for the Pacific terminals has been modified with the view of decreasing the amount of fill necessary for its construction, and thus advancing the date of its completion. The conditions and character of the underlying rock and the soft mud of the harbor bottom indicated that a very flat slope would be assumed on the harbor side and the effect of the small quantity of material which was dumped from the trestles caused a bulging of the bottom in the entrance channel to the repair wharf and a settlement of about 18 inches in one section of the west trestle. In general, firm rock was found in driving the piles for the trestle, lower than had been indicated by previous borings over this area. For these reasons it was deemed advisable and expedient to bring the southwest end of the cofferdam trestle inland and away from the channel. Accordingly, two drivers began driving a single-track trestle on the relocated line on August 5 and completed it on August 10, 410 lineal feet of trestle being required to connect with the old railroad fill along the shore. About 600 lineal feet of the original double trestle were utilized and the remainder is being removed and the material used elsewhere. The fill from trestle on the present line will be 39,850 cubic yards as compared with 96,000 cubic yards on the original location. Spoil will be dumped on the seaward side of the trestle until the fill is even with the track, when a spur will be laid on the fill and "fanned" outward, to extend the dam as required. For the rest of the way, from the old to the new site of the dredging landing, a similar procedure will be followed, starting, however, directly from the present shore. The soft fill will be extended out, as desired and then armored on the sea face with rock. In the excavation for the drydocks, part of the fill will be removed by the steamshovels, though the dam will be extended sufficiently to protect the site. The remainder of the spoil will be taken out by dredges, after the completion of the drydock excavation.

Soft clay for the filling is being taken from the northeast toe of Diablo Hill, adjacent to the right of way of the Panama railroad. This excavation will be useful later in the construction of the permanent yards and the main line tracks to Balboa. It is proposed to operate trains to Balboa direct from Corozal, by passing along the east toe of Sosa Dam; southbound passenger trains will go first to Balboa, thence to Panama, superseding the present arrangement by which trains proceed to Panama, and Balboa is served by a shuttle train.

Steamshovel and Dredge Men.

Local No. 19, International Brotherhood of Steamshovel and Dredge Men, will hold its next meeting in the lodge hall at Empire, on Sunday, September 21, at 12.30 p. m.

An addition, 30 by 40 feet in size, will be made to the oil house of the Quartermaster's Department at Balboa, for the storage of rope and cable.

SOCIAL LIFE OF THE ZONE.

Church Notes.

The Rt. Rev. Albion W. Knight, D. D., bishop of the Episcopal church in America, and formerly missionary bishop of Cuba and of the Panama mission, has accepted the appointment of vice-chancellor of the University of the South, Sewanee, Tenn. Bishop Knight, who has been overseer of the Panama mission as commissary of the presiding bishop since its establishment in 1907, will continue in charge. It is expected that his annual visitations will be made in the summer, instead of in January, as hitherto. He will give up the work in Cuba, and his episcopal residence in Havana, where he has resided for a number of years.

A sacred concert took the place of the regular evening service in the Commission chapel at Gatun on Sunday evening, September 7.

The altar chapters of the Episcopal church in Colon and Gatun met for a social afternoon at the rectory on Colon beach on Thursday, September 11. A program of informal music was given, followed by a reception, during which refreshments were served. The party then adjourned to the church, where Mrs. A. G. Farmer played several selections on the organ. The altar chapter of Christ Church, Colon, will hold a Christmas bazaar in December, the proceeds to be used in liquidating the indebtedness on the organ.

The monthly meeting of the Isthmian Ministers Association was held at Culebra on Monday, September 8. The annual election of officers, which should have taken place at this meeting, was postponed, and will be held at the Methodist Episcopal church, Panama, on October 6.

Canal Zone Schools to Open October 1.

The public schools of the Canal Zone will open on Wednesday, October 1, 1913. All children residing in the Canal Zone, whether of employes or nonemployes, and all children of nonresident employes of the Isthmian Canal Commission are entitled to free school privileges. No child will be admitted, however, who will not be six years old on or before February 1, 1914.

Schools for white children will be opened at the following places: Ancon, grades one to eight; Corozal, grades one to eight; Pedro Miguel, grades one to eight; Paraiso, grades one to four; Culebra, grades one to five; Empire, grades one to eight; Las Cascadas, grades one to five; Gatun, grades one to eight; Cristobal, grades one to eight; Porto Bello, grades one to eight.

Schools for colored children will be opened at the following places: Ancon, Paraiso, Cucaracha, Culebra, Empire, Mandingo, Gatun, Mount Hope, Cristobal, and Majagual.

High schools will be conducted as follows:

A branch high school at Gatun for first and second year pupils residing at Cristobal and Gatun.

A branch high school at Empire for first and second year pupils residing at Bas Obispo, Las Cascadas, Empire, and Culebra.

The consolidated high school at Ancon for first and second year pupils residing south of Culebra, and for all third and fourth year pupils in the Zone.

Pupils attending the grade schools should report at 9 a. m.; those attending the Gatun high school, at 9.30 a. m.; those attending the Empire high school, at 9 a. m.; and those

attending the Ancon high school, at 1 p. m.

Requests should be made of the office of the Superintendent of Schools, Ancon, immediately for railroad transportation for all white children living in communities where schools of appropriate grades are not provided, or brake service furnished.

Entertainments at Gamboa Stockade.

The first of a series of entertainments for the prisoners in the Gamboa stockade was given on Sunday, September 14, and included music by the Marine Band and addresses by Mr. Richard L. Metcalfe and Judges H. A. Gudger and W. H. Jackson. It is proposed to provide educational facilities for the illiterate prisoners under the direction of the superintendent of schools with the cooperation of the chief of police.

Examination by Board of Local Inspectors.

The Board of Local Inspectors will conduct examinations at the Administration Building, Ancon, on Wednesday, September 24, 1913, beginning promptly at 2 p. m., for persons desiring to procure the following classes of licenses: Pilots, masters, mates, marine engineers, chauffeurs, and navigators of motor boats. All applicants for licenses must procure from the Executive Office, Ancon, forms of application and information respecting the filling out of same, at least one day before the examination. Applicants for chauffeurs' licenses must also bring automobiles.

Lake Service for Tourists.

In order to provide suitably for the tourist traffic during the coming season, the Panama railroad has decided to add a trip through the lake as one of the regular features of its sightseeing service. This arrangement will be accomplished by lashing two cement lighters broadside, and converting them into a passenger barge by decking them over, providing awnings and railings, and installing toilets and other conveniences. This will give a floor space of about 40 by 100 feet, sufficient to accommodate chairs for approximately 400 people with safety and comfort. The improvised barge will be towed through the lake channel from Gatun by one of the Canal Commission tugs, making a landing near Tower R, about 150 feet north of Gamboa cabin, out of the way of any vessels using the Canal. A small landing stage will be built at that point, with steps leading down to it from the track level.

Under the proposed arrangement, the sightseeing train will leave Colon for Gatun at about 8 a. m. Arriving at Gatun, the passengers will transfer to the lake barge, while the train will proceed to Gamboa to await there the arrival of the barge. The tourists will then be taken by train over the relocated line and the I. C. C. spur track to a point near the Empire suspension bridge, where an excellent view of Culebra Cut may be obtained. From this point, the train will run into Panama, and then return to Colon direct. Parties from Panama wishing to avail themselves of the lake trip may leave Panama on train No. 2, connect at Gatun with the lake service, and return to Panama by the sightseeing train. Parties from Colon may either return by the sightseeing train, or remain in Panama, as they see fit. It is probable that a charge of \$1.50 per person will be made for the lake trip, in addition to the round trip rate of \$4 over the railroad, which will be only \$1 more than the rate charged

tourists at the present time for a trip on the sightseeing train over all divisions. It is planned to place the new service in effect as soon as the barges can be converted and passed through the locks.

Association of Canal Employees.

The Association of the Panama Canal Builders was formed at a meeting held by 21 employes of the Isthmian Canal Commission and the Panama Railroad Company, at the resident engineer's office, Corozal, on September 12.

The object of the association is to furnish to all its members such mementos, historic facts, and other reminders, as will enable them to recall the days of the building of the Panama Canal and to give their friends the best possible idea of the actual conditions under which the work was accomplished.

The association has already prepared a certificate commemorating the building of the Canal, and the Chairman and Chief Engineer has agreed to affix his signature to one certificate for each employe who has been accepted to membership in the society.

A neatly bound record of the building of the Panama Canal and the people who built it will be prepared and dedicated to Col. George W. Goethals. This record will contain photographs of historic importance, comparative figures, and the name and home address of every white person who has ever been an employe of the Isthmian Canal Commission or the Panama Railroad Company since the beginning of the Canal construction. The record will be compiled as rapidly as official data can be obtained from the files of the Chairman's office. The work is of such a nature that it will require several months to complete it, and any members separating from the service in the meantime will be forwarded a copy to the address given on the application blank.

A membership fee of \$5 will be charged, which will entitle every member to one certificate, one of the records, and all the good offices and influences of the society. It is requested that all who are eligible identify themselves with the association without delay, in order to complete the records while the present organization is still intact.

The secretary-treasurer will be bonded in the sum of \$2,000.

The members of the board of governors are: H. O. Cole, president; Dr. D. F. Reeder, first vice-president; J. B. Fields, second vice-president; F. T. Hamlin, secretary-treasurer; L. A. Smith, J. C. Keller, D. E. Wright, E. Zook, J. A. Walker, R. C. Shady, H. H. Hammer, W. A. Lawlor, H. G. Hamlin, J. C. Earle, G. D. Bliss, W. W. Webb, Dr. C. E. Phillips, W. C. Poore, S. C. Russell, Baxter Grier, B. F. Metcalf.

Notice to Photographers.

All who took kodak or other pictures of Shriners August 28 to September 2, are requested to send two prints of each picture, together with name and address to

F. H. WANG, Secretary,
The Panama Shriners Club.

Gatun, C. Z., September 16, 1913.

Missing Man.

Any one having information regarding the whereabouts of Mr. James W. Hays, Jr. of Vicksburg, Miss., who is supposed to be on the Isthmus, is requested to communicate with THE CANAL RECORD.

RECORD OF CANAL WORK SINCE AMERICAN OCCUPATION.

TOTALS BY CUBIC YARDS OF EXCAVATION AND LOCK AND DAM CONSTRUCTION.

PANAMA WATER SUPPLY.

Miraflores Lake Water for Towns at Southern End of Canal.

The work of constructing the new water works for the southern end of the canal is now well under way and forces are at work on the new pump station and purification plant at Miraflores, and the high service reservoir at Ancon.

The project, in general, comprises three electric pump stations, one located east of the

vertically, through specially designed nozzles, and will break into spray, falling to the floor of the basin, then passing into the mixing chambers in the basement of the head house. At this point the water will receive its dose of aluminum sulphate and will flow into the sedimentation basin. Here it will be allowed to stand for a period of eight hours, after which it will pass on to the filters. After passing through the filters, the water will discharge directly through the floor of the pipe

and a 16-inch main between Miraflores and Ancon, which will be connected with the injection chamber, and, in addition, there will be laid from this point to Panama a new 30-inch main, thus giving three mains between the purification plant and the Ancon pump station. The Ancon pump station will contain five electrically-driven centrifugal pumps, three of which, having a capacity of 5,000 gallons per minute, each, will pump the water directly from the mains into the distribution system for Panama, Ancon, and Balboa, at a pressure not to exceed 30 pounds per square inch. The existing 1,000,000-gallon capacity low service reservoir will be so connected to these pumps as to form a storage and surge reservoir. The two remaining pumps in the Ancon station will be of the same type as the low service pumps above referred to, but will be designed to develop 100 pounds per square inch pressure in the mains, and, in ordinary service, will pump the water into the high service reservoir on Ancon hill; in this way it will furnish the water supply for the high lying districts and also a high pressure for use in case of fire.

As a part of the project, there is being constructed an extension to the present 1,000,000-gallon high service reservoir on Ancon hill, which, when completed, will give 2,500,000 gallons storage at an elevation of 300 feet above sealevel. For fire protection in the city of Panama, the high service pumps in the Ancon pump station and the main pipe lines will be so arranged that the high service pres-

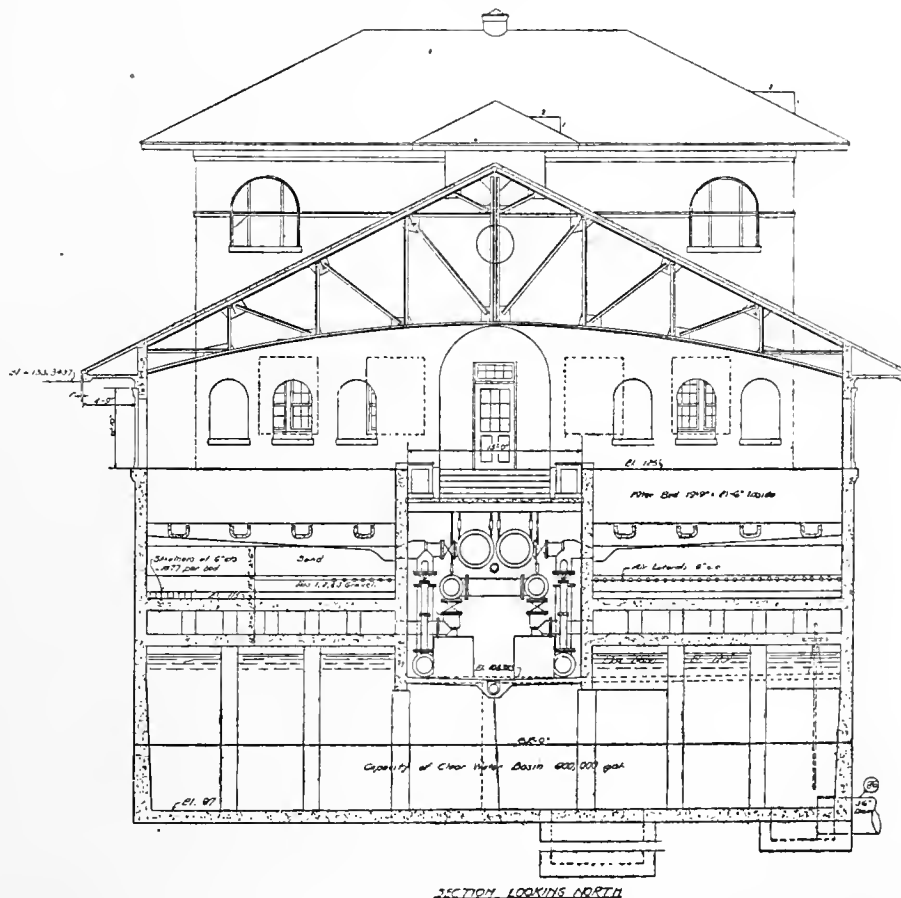

LAYOUT OF FILTRATION PLANT AT MIRAFLORES.

railroad track at Miraflores, to be known as Miraflores pump station No. 1; one to be located between the Miraflores spillway and the southern portal of the Panama railroad tunnel, to be known as Miraflores pump station No. 2; and one to be located along the main line of the Panama railroad between Panama and Balboa and in the vicinity of the new Administration building, to be known as the Ancon pump station; a purification plant, located on the hill immediately above and north of the Miraflores spillway, consisting of an aeration basin, a head house containing aluminum sulphate and hypochlorite of lime storage, together with mixing chambers, float chamber, solution tanks, controllers, electric elevator; sedimentation basin having a capacity of five million gallons; a filter plant containing 14 filters of the rapid mechanical gravity type, each having a nominal capacity of 1125,000 gallons of water every 24 hours, and a clear water basin having a capacity of approximately 900,000 gallons; and an office and laboratory building within which will be provided, in addition to the laboratory and office, living quarters for the chemists who will be on duty in connection with the operation of the plant throughout the 24 hours of the day.

The project also includes a 350,000-gallon wash water tank located on the hill to the southwest of the Miraflores tunnel, at an elevation of approximately 200 feet above sealevel. This tank will store the water delivered to it by pump station No. 2, and will furnish the filtered water for washing the filter, for miscellaneous uses around the plant, and will provide a supply of filtered water through a 16-inch main for the town of Pedro Miguel.

The raw water from Miraflores Lake will pass from the surface of the lake into a screen chamber, and through the screens in this structure, to the sump beneath the electric pumps located in pump station No. 1. From this point, the water will be pumped through a 30-inch main to the aeration basin, where it will be thrown into the air about 15 feet

gallery into the clear water basin, from which point it will flow through a 36-inch line into the hypochlorite injection chamber located near pump station No. 2. At this point the

SECTION, LOOKING NORTH

TYPICAL SECTION OF FILTER BUILDING, MIRAFLORES.

hypochlorite bleach will be applied and the water will pass from this chamber into the mains leading to Panama.

At the present time there are a 20-inch

sure can, within 15 seconds after the fire alarm is turned into the station, be thrown into the main without affecting the low pressure service for Balboa; and, *vice versa*, in case

of fire at Balboa, the high service pressure can be developed at that point without disturbing the low pressure service in Panama.

The project involves the laying of a new 16-inch high service main from the Ancon pump station to the high service reservoir, and a new 20-inch main from the Ancon pump station to the new shops at Balboa, where the line will be reduced to 16-inch. This line will extend through the terminals to the south side of Sosa Hill, where the line will again be reduced to 12-inch, and this size main will extend to the extreme end of the docks at Balboa.

When the entire project is ready for service no water will reach Panama from the Rio Grande reservoir, and all lines now existing north of Pedro Miguel will have been removed. The Rio Grande reservoir will be maintained for the service of Culebra only, and in the event of the abandonment of this town, the use of the Rio Grande reservoir will be discontinued.

One of the accompanying sketches shows the general layout of the different parts of the project in the vicinity of Miraflores, and the other shows a general cross-section of the filter building.

Killed in Attempting to Board Train.

Philip O'Shaughnessy, an American employed as a foreman by the Central Division on the dumps at East Balboa, was instantly killed about 1 p. m., on Thursday, September 11, by falling between two cars while attempting to board a loaded work train at a point about 20 yards from the Tivoli steps in the Panama railroad yard at Panama. He was 38 years of age, and arrived on the Isthmus on August 2, 1905, coming here from New Rochelle, N. Y. He is survived by his wife, living in Panama, a brother, living in Salt Lake City, and two sisters, Mrs. John Boyd, No. 753 Cordero street, Vancouver, B. C., and Mrs. Dora Van Horn, Point Pleasant, N. J.

Obituary.

The death of James H. Hibben, an American employed in the Sixth Division as engineer on the tug *Porto Bello*, with residence at Cristobal, occurred suddenly on Saturday evening, September 13, at the Hotel Washington, at the conclusion of a banquet at which he was officiating as toastmaster. The cause was heart disease. He was 44 years of age, entered the service of the Canal Commission on March 18, 1910, and is survived by a wife and four children, living in New Orleans.

The death of William P. Emmett, a naturalized American employed in the Atlantic Division, with residence at Cristobal, occurred on Wednesday, September 10. He was a native of Ireland, 50 years of age, a widower, and had been on the Isthmus three years and three months. Two daughters, Mrs. A. C. Anderson, No. 1009 Main avenue, Brownsville, Tex., and Mrs. E. Kenzie, No. 1920 Avenue G, Galveston, Tex., survive him.

Civil Service Examinations.

Examinations for the following-named positions are scheduled to be held probably on October 19: Agricultural inspector, Philippine Service; assistant observer, Weather Bureau; aid, Lighthouse Service; cadet engineer, cadet officer, Lighthouse Service; civil

engineer and draftsman, nonapportioned Departmental Service; civil engineer and superintendent of construction, Quartermaster Corps; mechanical draftsman, topographic draftsman, Isthmian Canal Service; electrician, nonapportioned Departmental Service; engineer, Indian Service (steam engineering, electrical engineering, heating, refrigeration, gas, and gasoline engines, hydraulics); junior engineer (mining), Bureau of Mines; junior engineer (civil), junior engineer (mechanical or electrical), Engineer Department at large; postal clerk, Isthmian Canal Service; printer, Philippine Service; scientific assistant, Department of Agriculture; teacher, Indian Service; trained nurse, Indian and Isthmian Canal Services; wireman, nonapportioned Departmental Service.

Women will be admitted to examinations for scientific assistant, teacher, and trained nurse.

Applications should be procured from and filed with this office. In requesting information, the kind of examination desired should be specifically mentioned.

The examinations will be held probably at Empire, in the Commission clubhouse, but the place of examination, and also the date, should be omitted in application forms.

A card of admission will be sent to those found eligible to be admitted, just before the examination.

Applicants for the Isthmian Canal or Philippine Services who fail to present a photograph to the examiner will not be admitted to examination.

In answer to questions as to residence, applicants must show residence in a State or Territory of the United States, and county thereof, up to the time of filing application.

Cold Storage Prices.

No changes have been made during the past week in the list of cold storage articles sold at the commissaries.

FOUND—One heavy gold band finger ring, initialed. Owner can have same, upon proper identification, at Police Headquarters, Ancon.

FOUND—Bathing suit, taken by mistake from the recreation hall at Toro Point on Sunday, September 7. Owner can have same by calling at House 300-C, Cristobal.

EXECUTIVE ORDER

Relating to Bail Bonds and Money Deposits in Lieu Thereof, and to Amend Section 310 of Criminal Procedure of the Canal Zone.

By virtue of the authority vested in me, I hereby establish the following Executive Order for the Canal Zone:

SECTION 1. The defendant in a criminal proceeding before a District Court of the Canal Zone may make a cash deposit in lieu of a bail bond in form and manner as provided for in Sections 305, 306, and 307 of the Criminal Procedure Act No. 15 of the Canal Zone, and a certificate of deposit shall be issued to the defendant by the judge in each case.

SECTION 2. Whenever a warrant is issued by any court or judge of the Canal Zone in a case in which bail may be admitted, the court or judge issuing such warrant shall endorse thereon the amount of bail to be required of the defendant to secure his appearance in the case, and the officer executing the warrant may accept a bail bond or money deposit in lieu thereof in the sum specified in the warrant, and in the form prescribed by law, and the bail bond or money deposit in lieu thereof shall be forthwith delivered to the court having jurisdiction of the case, and a receipt for such bond or deposit shall be given to such officer by the clerk of the court, or the judge thereof if the case is pending in a district court.

When an arrest is made without a warrant in conformity with law in a misdemeanor case, and for any reason the officer making the arrest is unable to take the offender forthwith before a magistrate, he may accept bond or a cash deposit in lieu thereof from the offender in a sum not exceeding five hundred dollars to secure his appearance before the court having jurisdiction of the case, and the offender shall then be released from custody and the bond or cash deposit in lieu thereof shall be delivered to the proper officer or court as hereinbefore provided for in this section.

When a money deposit is made in lieu of bail bond, the deposit shall be held and disposed of in accordance with the provisions of Sections 305, 306, 307, and 311 of the Criminal Procedure of the Canal Zone, and Section 310 thereof, as hereinafter amended.

SECTION 3. That Section 310 of the Criminal Procedure of the Canal Zone is amended to read, as follows:

SECTION 310. If money has been deposited instead of bail, and the defendant, at any time before the forfeiture thereof, surrenders himself to the officer to whom the commitment was directed, in the manner provided in the two preceding sections, the court must order a return of the deposit to the defendant, upon producing the certificate of the officers showing the surrender, and upon a notice of five days to the Prosecuting Attorney, with a copy of the certificate.

SECTION 4. This Order shall take effect from and after its publication in THE CANAL RECORD.

WOODROW WILSON.

THE WHITE HOUSE,
August 29, 1913.

LOST—Gold locket with ruby settings and the initial "B" on face, in Cristobal or Colon, on the morning of September 14. A liberal reward will be paid for same if presented at Cristobal Y. M. C. A.

OFFICIAL CIRCULARS.

Change in Program Regarding P. R. R. Vessels Sailing in October.

CULEBRA, C. Z., September 16, 1913.

HEADS OF DEPARTMENTS AND DIVISIONS:

My circular letter dated August 27, reserving all accommodations on the steamships *Colon*, sailing October 12; *Ancon*, sailing on or about October 13; *Advance*, sailing October 18; and *Panama*, sailing October 23, for employees leaving the service, was based on the supposition that the reduction of force in the Central Division would commence on or about October 10. As a change in the program rendered it necessary to commence reducing the force in the Central Division at an earlier date than was anticipated, it is not considered necessary to reserve these boats exclusively for employees leaving the service, and the circular letter referred to is hereby cancelled.

GEO. W. GOETHALS,
Chairman and Chief Engineer.

Duties of Board of Survey and Appraisal.

CULEBRA, C. Z., September 10, 1913.

CIRCULAR NO. 399-C:

The duties of the board of appraisal, and of the surveying officer and assistant surveying officer, are hereby combined in a board of survey and appraisal.

The membership of the board will be, as follows: Mr. H. S. Farish, chairman, Mr. Charles L. Parker, Mr. B. M. Litt, and Mr. C. T. Cushman.

Appraisals will be made by the chairman and any two members of the board.

Surveys will be made by Mr. Farish and Mr. Litt as at present, and by Mr. Parker and Mr. Cushman at such points and at such times as this work can conveniently be performed in conjunction with their other duties. Any member of the board is hereby authorized to make surveys under the direction of and subject to approval by the chairman of the board; all surveys to be submitted to me by the chairman of the board for final approval.

The present forms and instructions will continue in effect without other change, the above arrangement being temporary and necessary to handle the increased amount of business due to completion of the work.

GEO. W. GOETHALS,
Chairman, Isthmian Canal Commission,
President, Panama Railroad Company.

Charges for Oxygen and Acetylene.

CULEBRA, C. Z., September 9, 1913.

HEADS OF DEPARTMENTS AND DIVISIONS:

Effective September 1, 1913, the charges for oxygen and acetylene gases made by the Mechanical Division are hereafter reduced to \$5 per tank for oxygen, and \$3.50 per tank for acetylene.

GEO. W. GOETHALS,
Chairman and Chief Engineer.

Mailing Tracings and Drawings.

CULEBRA, C. Z., September 15, 1913.

CIRCULAR NO. 499:

Tracings or valuable drawings set through the mails must be carefully packed in tin tubes.

GEO. W. GOETHALS,
Chairman and Chief Engineer.

Changes in Central Division.

EMPIRE, C. Z., September 12, 1913.

CENTRAL DIVISION CIRCULAR NO. 379:

Effective September 14, 1913, the Central Division will be divided into two sections, as follows:

Southern section—From south entrance of Miraflores

tunnel to Balboa, to and including Naos Island breakwater and Sosa Hill quarry. Mr. J. M. Hagan, superintendent of construction, in charge, with headquarters at East Balboa.

Northern section—From north entrance of Miraflores tunnel to Gamboa, to and including relocation dumps. Mr. W. M. Tenny, superintendent of construction, in charge, with headquarters at Empire.

A. S. ZINN,
Acting Division Engineer.

Extension of Labor Train Passes.

EMPIRE, C. Z., September 12, 1913.

All Concerned—The date of expiration of all Bas Obispo-Balboa labor train passes is hereby extended to December 31, 1913.

A. S. ZINN,
Acting Division Engineer.

Acting Post-Office Inspector.

ANCON, C. Z., September 6, 1913.

To Heads of Divisions—Mr. Garfield O. Gilbert, assistant postmaster at Cristobal, is designated acting postoffice inspector, vice Mr. James J. Gilbert, designated acting deputy collector of revenues.

RICHARD L. METCALFE,
Head of Department of Civil Administration.

Consolidation of Telephone and Signal Departments, P. R. R.

PANAMA RAILROAD COMPANY,
OFFICE OF GENERAL SUPERINTENDENT,
COLON, R. P., September 9, 1913.

All Concerned—Effective September 16, 1913, the telephone department and the signal department of the Panama railroad will be consolidated, and Mr. W. H. Fenley appointed superintendent of telephones and signals.

JOHN D. PATTERSON,
General Superintendent.

Launch Trips through Gatun Lake for Masters and Mates.

CRISTOBAL, C. Z., September 8, 1913.

All Concerned—The launch *Margaret* will be run every Sunday from Gatun to Gamboa dike and return, the object of this trip being to enable masters and mates in the employ of the Commission to familiarize themselves with the Canal channel between Gatun and Gamboa. Launch will leave Gatun at 9 a. m., and Gamboa (Tower R) at 1 p. m. The number of passengers for these trips will be limited to six. Passes may be secured from W. G. Comber, resident engineer, Balboa, Canal Zone.

W. G. COMBER,
Resident Engineer.

Cashier, Disbursing Office.

EMPIRE, C. Z., September 6, 1913.

Effective this date, Mr. Robt. W. Glaw is appointed cashier, Disbursing Office, vice Mr. C. E. Gilmore, resigned. The cashier, in addition to duties heretofore performed, will have charge of all pay roll work; and telephone inquiries relating to time vouchers, pay tickets, or pay rolls after they reach this office should be made of him.

JOHN H. MCLEAN,
Disbursing Officer.

Supplies for the Canal.

The following steamers with supplies for the Isthmian Canal Commission and Panama Railroad Company, arrived at the ports of Colon and Cristobal during the week ending September 6:

Panama, September 1, from New York, with 260 drums paint, for stock; 60 boxes incandescent lamps, for Mechanical Division; eight barrels electric fixtures,

for Panama railroad; 100 bales oakum, 90 bags tie plugs, 13 cases water coolers, for stock; nine cases electrical machinery, for emergency dams; 20 boxes screen doors and sashes, 15 crates screen doors and sashes, for stock; 33 castings, 33 boxes tackle blocks, 176 bundles steel, for fortifications; 13 barrels iron pipe-fittings, for stock; 195 barrels asphaltum, for McClintic-Marshall Construction Company; 22 cases packing, for stock; 179 pieces castings, for Mechanical Division; 22 barrels copper sulphate, for Panama railroad; 2,300 pieces hollow tile, for Second Division; 802 bundles tie plates, 130 pieces switches, 98 bundles switch parts, for stock; and a miscellaneous cargo, the whole consisting of 5,485 packages, weighing 501 tons.

Almirante, September 3, from New York, with 17 barrels iron pipe-fittings, 50 bales hose, for stock.

Abangare, September 4, from New Orleans, with 3,894 pieces lumber, for stock and Mechanical Division; 520 sacks feed, 14 boxes paste, for stock.

Nestorian, September 6, from Liverpool, with seven pieces parts for dredges, for Sixth Division.

Family Quarters.

Applications for married quarters on file on August 31, were, as follows:

DISTRICT.	List No. 1.	List No. 2.

COMMISSION CLUBHOUSES.

Activities of the Young Men's Christian Association.

GENERAL.

The moving picture schedule for the week September 22 to 27 is, as follows: Monday, Gatun; Tuesday, Corozal; Wednesday, Cristobal; Thursday, Culebra; Friday, Empire and Porto Bello; Saturday, Cristobal. Pictures to be shown this week include the following: "Saved from court martial," "An aeroplane love affair," "The live wire," "The deceivers," "The cub reporter," "Tom's sister," "The sheriff's prisoner." Pictures to be shown next week include: "Along the River Nile," "Queen of the kitchen," "Pathe's weekly," "The darling of the C. S. A.," "The line at Hogan's," "A 10-karat hero," "The Government test," "Three to one," and "His armless wonder—the detective's desperate chance."

Delegates from the various clubhouses and Camp Elliott met at the Cristobal clubhouse on September 14 for the purpose of electing officers and deciding on rules for the Isthmian tenpin bowling league. Mr. Frank Dougherty of Culebra was chosen chairman of the league, and Mr. Taylor of Corozal, official scorer and secretary. The league will open on October 4.

COROZAL.

Forty new library books have just been received from the United States.

The Empire basketball team defeated the local team by a score of 35 to 26 on Saturday night, September 13.

Some of the members of the boys' department "hiked" to Arraijan on Saturday, September 13.

CULEBRA.

Mr. J. F. Warner led the song service on Sunday evening, September 14.

The high scores in tenpins for the past week were: Cornthwaite, 202; Finley, 200.

The local two-man bowling tournament will close on Tuesday, September 23. It is requested that all having games yet to roll will do so at once.

Mr. D. V. Stratton will give a lecture, illustrated with slides and moving pictures, on Thursday, September 18, describing the Sacramento Valley and the Panama-Pacific Exposition. Admission will be free to all.

EMPIRE.

The results of the bowling games rolled at Empire on Saturday, September 13, between Corozal and Empire were: Corozal, 930, 790, 816; Empire, 896, 855, 946.

In the local howling league the team composed of Giavelli, Arnold, and F. Whaler won first place. The medals for high score and high average were won by Gustavson.

On Friday evening, September 19, a meeting of all men interested in the formation of a discussion and debating club will be held at the clubhouse for the purpose of organizing.

Basketball is holding interest for many of the men. The largest squad of players ever interested in this sport at Empire can be found any basketball night on the floor, practicing the game. Already 27 men are enrolled in the local basketball league. This squad is divided into four teams under the captaincy of Johnson, Sawyer, Miller, and Huldquist.

GATUN.

Gatun defeated Culebra in a game of basketball at Gatun on Wednesday evening, September 10, by the score of 22 to 17. The lineups were, as follows: Whiston..... R. F. ... Cushing and Belcher Huber..... L. F. R. Purchase Wright..... C. F. Purchase Conley..... R. G. Hepler Fitzpatrick..... L. G. Koperski Referee, Christopherson; timekeeper, Ben Jenkins; scorer, Fomon. Attendance, 200.

An illustrated talk on Louisiana will be given on Thursday evening, September 25.

Cristobal defeated Gatun two out of three games of tenpins on Saturday evening, September 13.

Mrs. Fostrom and Mrs. McLeod furnished violin and piano music for the motion picture entertainment on September 8.

The executive council met on Friday evening, September 12. Those present were: Mr. W. C. Gayer, Mr. W. B. Childers, Dr. Farmer, and Mr. Ben Jenkins. Mr. Robert M. Gamble, a charter member of the association, and for the past two years a member of the executive council, has resigned on account of leaving Gatun.

The results of the bowling contests held on "Ladies night," September 12, were:

Open contest—First prize, Mr. Humphrey and Mrs. Crosscup; second prize, Mr. Coleman and Mrs. Nolan. Married folks—First prize, Mr. and Mrs. Chas. C. G. Wurster; second prize, Mr. and Mrs. Grover.

A set of "Library of natural history" and a set of "The world's best music" have been added to the library during the past week.

Mr. W. F. Bennyhoff will give a lecture on the Canal

work on Tuesday, September 16, illustrated with slides.

The standing of the "Popular" handicap pool tournament, on Saturday evening, September 13 was, as follows:

Name.	Won.	Lost.	P. C.
Dewey.....	5	0	1.000
Townsend.....	3	0	1.000
Keruish.....	3	1	.750
Von.....	4	2	.666
Pettitt.....	2	1	.666
Bailey.....	3	2	.600
O'Hara.....	3	2	.600
Carkeet.....	2	2	.500
Johnson.....	1	1	.500
C. Gray.....	4	5	.444
Reisner.....	2	3	.400
Mitchell.....	1	3	.250
Dennis.....	1	3	.250
Bradley.....	1	5	.166
Wall.....	0	5	.000

CRISTOBAL.

The stringed orchestra of the steamship *Prinz Joachim*, gave a concert on Monday night, September 8, from 8 to 10 o'clock.

Mr. T. A. Wehmeier has issued a challenge to all pool players to play for the championship of the Isthmus. Mr. Wehmeier proposes to play 150 points on the home tables of each man who accepts his challenge, and 150 points on the Cristobal tables.

Mr. W. F. Barnum rolled highest score in tenpins on the Cristobal alleys for the month of August, with 235 points, and received a box of cigars as a prize.

Messrs. Luce and Weller, members of the old Cristobal basketball team, are coaching the players until the arrival of the new physical director.

"What shall we do with the Monroe Doctrine?" is the theme for consideration at the discussion meeting on Thursday night, September 18. Messrs. H. J. Wempe and F. B. Freeland will lead the discussion.

Mr. J. Frank Harbert, representing the Louisiana State Board of Immigration, gave an illustrated lecture on Louisiana, on Tuesday night, September 16.

Interest is being displayed in the chess tournament now in progress. The present standing of the contestants is in the following order: Ogden, Taylor, Hurt, Wilson, Salzburg, Vermer, McQueen, Tuttle, Wechsler, Gill, Rattiner, Martin.

Misdirected Letters.

The following, insufficiently addressed letters, originating in the United States and its possessions, have been received in the office of the Director of Posts, and may be procured upon request of the addressee:

Cummings, C. C.	Henderson, Mrs. George
Davidson, Miss Edith	Heng, Chris
Dunleavy, J. A.	Hyder, Frank
Durbin, C. A.	Joy, Sylvester
Fernandez, José	McGuire, Mrs. E.

Tug Service to Porto Bello and Toro Point.

Following is a revised schedule of Atlantic Division tugs in the service between Docks 13 and 16, and Porto Bello; and Docks 13 and 16, and Toro Point:

PORTO BELLO.

Mondays, Tuesdays, Wednesdays, Thursdays, and Fridays—Leave Dock 13 at 5 p. m., arrive Porto Bello 10 p. m.; returning, leave Porto Bello 11 p. m., arrive Dock 13 about 6 a. m.

Saturdays—Leave Dock 13 at 9 a. m., arrive Porto Bello at 11 a. m.; returning, leave Porto Bello 3.45 p. m., arrive pier No. 4, Colon, 5.45 p. m.

Every Saturday—Leave Dock 13 at 6 p. m., arrive Porto Bello at 11 p. m.; returning, leave Porto Bello 12 midnight, arrive Dock 13 about 6 a. m.

Every Sunday—Leave Pier 16 at 7 p. m., arrive Porto Bello 9 p. m.; returning, leave Porto Bello 9 p. m., arrive Pier 16 at 11 p. m.

TORO POINT.

Mondays, Tuesdays, Wednesdays, Thursdays, and Fridays. Sailing No. 1—Leave Dock 13 at 6.30 a. m., arrive Toro Point 7 a. m.; returning, leave Toro Point 8 a. m., arrive Dock 13 at 8.30 a. m. Sailing No. 2—Leave Dock 13 at 5 p. m., arrive Toro Point 5.30 p. m.

Special, Wednesdays only—Leave Dock 13 at 12 noon, arrive Toro Point 12.30 p. m.; returning, leave Toro Point 12.30 p. m., arrive Dock 13 at 1 p. m.

Saturdays. Sailing No. 1—Leave Dock 13 at 6.30 a. m., arrive Toro Point 7 a. m.; returning, leave Toro Point 8 a. m., arrive Dock 13 at 8.30 a. m. Sailing No. 2—Leave Dock 13 at 5 p. m., arrive Toro Point 5.30 p. m.; leave Dock 13 at 5.30 p. m., arrive Dock 13 at 6 p. m.

Sundays. Sailing No. 1—Leave Dock 13 at 9.30 a. m., arrive Toro Point 10 a. m.; returning, leave Toro Point at 10.30 a. m., arrive Dock 13 at 11 a. m. Sailing No. 2—Leave Pier 16 at 4.30 p. m., arrive Toro Point 5 p. m.; returning, leave Toro Point 5 p. m., arrive Pier 16 at 5.30 p. m.

MOVEMENT OF OCEAN VESSELS.

The Canal Record

Published weekly under the authority and supervision of the Isthmian Canal Commission.

The Canal Record is published free of charge, one copy each to all employees of the Commission and Panama Railroad Company whose names are on the gold roll. Extra copies and back numbers can be obtained from the new stands of the Panama Railroad Company for five cents each.

Address all Communications,

THE CANAL RECORD,

Ancon, Canal Zone,

Isthmus of Panama.

No communication, either for publication or requesting information will receive attention unless signed with the full name and address of the writer.

NOTES OF PROGRESS.

Reservation Established.

The land between Gatun and Gamboa, extending from the Canal on the west to the Canal Zone boundary line on the east, has been declared a reservation within the meaning of the Executive Order of April 17, 1912, and notices will be posted against trespassing on same. In addition, the chief of police has been instructed to have the people living at Frijoles and Monte Lirio notified verbally that the reservation has been created, and that they will not be permitted to continue the cultivation of land within this area. Practically all the privately owned land in this section has been adjudicated, and is now the property of the United States. The towns of Frijoles and Monte Lirio will not be included within the reservation at this time.

Track Connection Removed from Center Wall of Gatun Locks.

Forces of the Atlantic Division began on September 4 the removal of the trestle across the west side of the upper approach to the Gatun Locks, by which railway connection had been maintained with the center wall. The wall is thus left in traffic isolation, except for the portage of materials across the tops of completed lock gates, or from vessels which may come alongside the approach walls, extending out from the center wall at the upper and lower ends of the locks, or from the cableways across the lower approach wall. A locomotive crane of 35 tons capacity has been left on the center wall, and is able to travel the length of the locks, traversing the inclines between levels under the control of block and tackle. The present use of the crane is in the completion of the lamp post erection, placing of machinery, handling cable, etc. The placing of the trusses for the roof of the control house began on September 4, and cement, sand, rock, and vitreous roofing tile have been stored on the top of the center wall in quantities sufficient for the com-

pletion of the building. The heavy operating machinery for the center wall is all in place, with the exception of some of the chain fender equipment, and the towing locomotives. All the lamp posts for the center approach walls have been erected, not more than 10 of the 207 lamp posts required for all three walls of the locks at Gatun remaining to be placed.

Changes at Pedro Miguel Yard.

The south end of the railroad yard at Pedro Miguel will be flooded when the water in Miraflores Lake reaches elevation 27 feet above sealevel, in view of which, the work of taking up all unnecessary trackage was begun on August 30. The old car repair shop, opposite the engine house, which is within the area to be inundated, will be moved to Balboa, and a new system of car repair tracks, using old material, will be installed.

The engine house will be dismantled also, and the removal of the machines therein was begun on September 11. The mechanical work heretofore performed there has been transferred to the Empire shops. The engines formerly hosted at Pedro Miguel will hereafter be apportioned between a yard on the east bank of the Canal, and Balboa.

Sale of Towboat "Exotic."

Bids for the purchase of the steel hull, stern wheel towboat *Exotic* were opened at the office of the Depot Quartermaster on Tuesday, September 2. Three offers were received, as follows: Chicago House Wrecking Company, \$1,000; N. Chr. Hansen, \$2,000; and A. Van Sciver, \$3,500. Award was made to Mr. Van Sciver of Pearl Lagoon, Nicaragua. The vessel is of 150 gross tons, was built by Pusey and Jones of Wilmington, Del., and was shipped to the Isthmus knocked down, arriving here on December 29, 1908. It was erected at the dry dock shops and cost complete, about \$40,000. In the service of the Canal Commission, it was used principally as a towboat in the French canal between Cristobal and Gatun.

Erection of Track-span Bridges for Transmission Line.

The first of the track span bridges, to be erected along the main line of the Panama railroad, from Cristobal to Balboa, to support the transmission line from the Gatun hydroelectric station, was set on its concrete pedestals on September 22. This bridge is situated on the relocated line of the railroad, above Paraiso Junction, at about mile post 39. Erection of other bridges is to proceed as rapidly as they are put together by the forces of the United States Steel Products Company. The foundation piers have been installed along the line between Pedro Miguel and Frijoles.

The low area lying between the new administration building and the Central Division dump tracks, near East Balboa, will be filled in by the Central Division forces.

PERMANENT BUILDINGS.

Family Quarters on Sosa Hill will be First to be Erected.

The preparation of plans for permanent family quarters for gold employees at the new town of Balboa will be begun shortly in the office of the Canal Commission architect. The family quarters to be considered first will probably be those for employees whose salaries are under \$200 a month; afterwards, those for employees receiving about \$200 a month, and lastly those for employees whose salaries are from \$200 to \$400 a month. The types will be based upon one and two-family houses.

It is the present plan to begin the construction of permanent family quarters on the northeast slope of Sosa Hill as soon as practicable, and the landscape architect is now engaged in laying out roads in this area. It is not intended to encroach for the present on the labor camp in this locality, but eventually some of the laborers' barracks, namely, those that are in good condition will be moved to the new silver camp at La Boca. The new family quarters on Sosa Hill are primarily designed to take care of the employees at the Balboa shops and terminal.

Permanent buildings cannot be erected on the area recently filled in between Sosa and Ancon Hills for some time to come. In the meantime, grading will be done and permanent roads and walks laid out in this area, as well as on the slope of Ancon Hill in the rear of the new administration building. The employees in the administration building, now under construction, will be cared for indefinitely in existing quarters at Ancon, and in Corozal. It is not proposed to erect permanent quarters for gold bachelorette employees at the present time, as the houses recently reconstructed at East Balboa will be available for their use during the next few years.

The hotel at East Balboa will take care of the bachelor employees quartered in that vicinity indefinitely. A permanent hotel, however, may be erected later, and space will be reserved for it. The East Balboa commissary will be continued in use, but a permanent commissary building will probably be among the first of the miscellaneous buildings to be erected. It is expected that provision will have to be made for a police station and office of district judge, as well as a fire station and schoolhouse, as soon as it is safe to erect buildings on the filled ground. The building recently reerected at East Balboa for a post-office will serve for some time, and the present office and storehouse of the district quartermaster may remain indefinitely, although space will be reserved for a permanent building in the new town. A permanent dispensary will probably be required by the Sanitary Department, as well as accommodations for the local sanitary inspector. The larvacide factory, now at Ancon, will remain where it is for the present. Provision will be made for a clubhouse, but it is

not yet known whether the new clubhouse will be of a permanent type of construction, or whether the one at Empire will be available.

The settlement at Ancon will be continued indefinitely. There are 94 buildings in that district available for the permanent force, not including quarters in the Ancon Hospital grounds, French houses now used as quarters, or undesirable types, but including nine houses of the official type. These houses will provide quarters for 161 families and 130 bachelors, counting one man to a room. At East Balboa, there is a total of 19 buildings accommodating 28 families and 188 bachelors. With two exceptions, all of these buildings are within the limits of the proposed Marine Corps reservation, and as the site of the reservation is probably permanently fixed, the houses will have to be moved. No additional buildings will be moved to East Balboa from towns along the Canal at present.

ORGANIZATION FOR PERMANENT BUILDINGS.

The organization for the construction of the permanent Canal buildings has been approved and is, as follows:

PLANS AND DRAWINGS.

Gold organization—One architect, one architect's superintendent, one structural draftsman, six designers and draftsmen, four draftsmen, one junior draftsman. Total, 14.

CEMENT TILE MANUFACTURE.

Gold organization—One general foreman, two foremen. Total, 3.

Silver organization—Two foremen, one engineer, one mixer, 20 machine operators, 30 laborers. Total, 54.

CONSTRUCTION.

Gold organization—One resident engineer, four superintendents, two transitmen or junior engineers, two rodmen, one general property clerk, four assistant property clerks, three clerks, one general mason foreman, one general carpenter foreman, two general plumbing foremen, one general electrical foreman, one general sheet metal foreman, one general roofing foreman, one general plaster and stucco foreman, one general metal lath foreman, one general foreman painter, one general steel erecting foreman, one general marble and tile setting foreman; five foremen on mason work, 10 on carpenter work, three on electrical work, two on sheet metal work, five on roofing work, five on plaster and stucco work, three on metal lath work, three on painting, five on marble and tile setting work, 20 plumbers, 30 electricians, 10 sheet metal workers, five hoisting engineers, two blacksmiths. Total, 135.

Silver organization—One hundred masons, 200 carpenters, 60 roofers, 100 plasterers, 30 metal lathers, 30 painters, 20 tile setters, 20 plumbers, 30 electrical helpers, four blacksmith helpers, 30 steel erectors, five hoisting engineers, three clerks, 260 laborers. Total, 892. Grand total, 1,068.

The above force will be under the Quartermaster's Department, but will not be employed for some time to come, as plans for the permanent quarters and miscellaneous buildings have not yet been prepared.

Change in Porto Bello Tug Service.

Effective September 21, the Sunday tug from Cristobal to Porto Bello will leave Dock 16 at 5.30 p. m., instead of 7 p. m., and arrive at Porto Bello at 7.30 p. m. Returning, it will leave Porto Bello at 7.30 p. m., and arrive at Dock 16 at 9.30 p. m.

JOINT LAND COMMISSION.

Additional Awards.

The following additional awards have been made by the Joint Land Commission:

Award No. 30—In the matter of the claim of Las Cascadas Estates Company, Ltd., for the property designated as Bohio Soldado y Buena Vista—An award is hereby made against the United States of America for the estate of Bohio Soldado y Buena Vista, said award to include all right, title, and interest of any persons to the entire estate not heretofore acquired by the United States, together with all claims for improvements of whatsoever nature on the part of the owners of said estate, and all rights claimed by them, in the sum of \$3,500.

This award shall be paid to the claimant hereinafter named, in the amount herein specified, on or before the second day of October, 1913, and if payment or tender of payment of this award is not made on or before that date, said award shall thereafter bear interest at the rate of six per centum per annum until paid.

To the Las Cascadas Estates Company, Limited, of London, England, for all of their right, claim, and interest in the estate of Bohio Soldado y Buena Vista not heretofore acquired by the United States, together with all improvements which are claimed by the said company, the sum of \$3,500.

(Signed) FEDERICO BOYD, ROLAND P. FALKNER, SAMUEL LEWIS, L. S. ROWE, Commissioners.

September 2, 1913.

Award No. 31—In the matter of the claim of Jacob Kowalski for buildings in the town of Gorgona—On April 7, 1913, Jacob Kowalski filed with the Joint Land Commission a claim (Docket No. 121) for certain buildings in the town of Gorgona. The evidence submitted to the Commission shows that pursuant to a petition filed by the claimant in this case, the municipality of Gorgona, under date of January 26, 1907, passed the following resolution:

GORGONA.

Resolution No. 17 of 1907.

"By which authority is granted for the lease of municipal lands for building purposes within the municipality of Gorgona.

"The mayor and municipal council of the municipality of Gorgona, in view of the petition of Jacob Kowalski for the lease of 3,000 square feet of vacant municipal land in the town of Gorgona for the purpose of erecting a dwelling, the lot of land bounded, as follows: On the north by the old French canal line, east, house owned by James Bailey, south, house owned by William Wood, west, open land and Juan Grande labor camps.

"It is resolved that the above application be granted subject to the approval of ordinance No. 5 of 1905.

Approved January 26, 1907.

(Signed) E. M. ROBINSON,

Mayor of Gorgona.

Approved February 1, 1907.

Executive Secretary."

Counsel for the United States laid emphasis on the fact that no document leasing this land was issued to the claimant. The evidence before the Commission clearly indicates that the municipality of Gorgona at no time issued such documents and that the established practice was to regard the occupancy of the land in pursuance of the passage of a municipal ordinance as sufficient to establish the relationship of landlord and tenant. In the answer of the United States to this claim, much stress was also laid on the fact that the claimant after the passage of this ordinance made inquiries of the Executive Secretary at Ancon with reference to the number of years that he would probably be permitted to occupy this land, in view of the ultimate flooding of the town of Gorgona by the rising of the waters of Lake Gatun. These inquiries in no way affected the acceptance of the lease, and the fact that the claimant proceeded with the erection of the building shortly after the passage of the ordinance is conclusive on this point.

In January, 1908, the claimant was required to sign a new lease issued in the name of Governor Blackburn, then Head of the Department of Civil Administration. This lease was made to run from July, 1907 to July, 1908, and contained a revocation clause usual to Isthmian Canal Commission leases. This lease was renewed on November 10, 1908, by E. M. Robinson, tax collector of Gorgona, and was to run for a period of three years from July 1, 1908.

In 1910, the Chairman and Chief Engineer of the Isthmian Canal Commission decided that the land upon which the building of the present claimant was erected, was required for purposes of Canal construction, and notice was sent to Kowalski to remove his building. A mass of correspondence has been submitted to the Commission, involving certain offers made by the Isthmian Canal Commission to the claimant, to take down his house and transport the material to

Gatun. It is not necessary to give further consideration to this correspondence, as its throws no light upon the main question under consideration, namely, whether this claimant had acquired any right to compensation for the value of his building, and whether this right was ignored at the time of the removal of the building.

This case is governed by the principles formulated by this Commission in the opinion on the demurrer of the jurisdiction of the Commission in the matter of the claim of Juan Sotillo. This claimant became a tenant of the municipality of Gorgona by operation of resolution No. 17, dated January 26, 1907, and, acting under the rights granted to him by this resolution, immediately proceeded to the erection of a building. These facts clearly entitle him to the protection of Article 5 of Law No. 50, dated November 6, 1894. In forming its conclusion as to the amount of the award to be made in this case, the Commission estimated the value of the building before its removal, and deducted therefrom the value of the material which was subsequently turned over to Mr. Kowalski.

In accordance with the evidence submitted in this case, and with the principles formulated in this opinion, an award is hereby made against the United States of America to Jacob Kowalski for the settlement of all right, title, and interest in the buildings in the town of Gorgona erected by the claimant on lot leased to the said claimant by resolution No. 17 of the municipality of Gorgona, dated January 26, 1907, together with all claims for improvements of whatsoever nature, in the sum of \$6,000.

This award shall be paid to the said Jacob Kowalski on or before the third day of October, 1913, and if payment, or tender of payment, is not made on or before that date, the amount of this award shall thereafter bear interest at the rate of six per centum per annum until paid.

(Signed) FEDERICO BOYD, ROLAND P. FALKNER, SAMUEL LEWIS, L. S. ROWE, Commissioners.

September 4, 1913.

Ancon Crusher.

The following is a statement of rock crushed at Ancon quarry during the two weeks ending September 20:

The purchase of a 30,000-pound double-cylinder road-roller for the use of the Division of Municipal Engineering has been authorized.

SOCIAL HISTORY OF GORGONA.

Settlement Early Took the Lead in Recreation and Amusements.

With the passing of the village of Gorgona one of the most active settlements in the Canal Zone, from a social standpoint, has ceased to exist. When the Americans took possession of the Canal Zone in 1904, there were 40 French houses in the village. To this number the Commission added 51 dwellings of the various authorized types, together with office buildings, until the village in 1912 attained a population of about 3,500.

In 1905, when there were not 20 American families in Gorgona, an association of men and women was organized under the title of the House to House Social Club. This club met at the homes of the members for a social evening once a week. As its membership increased, a gramophone was purchased to supply music for dancing, and the organization resolved itself into a dancing club. The meetings were then held in the social hall over the hotel every Saturday evening. Religious services, conducted by the Reverend J. L. Wise, Baptist preacher, who was one of the earliest residents of the village, were held in the old French court house, which was situated near the railroad. In 1907, the Commission clubhouse was erected on the elevation just back of the site of the courthouse.

On Thanksgiving Day, 1905, a Sunday school was organized, its membership being composed of young men and women; there were no children of school age in the village at that time. On Christmas Day, 1906, the American children of the village enjoyed the novelty of having a fruit-bearing orange tree as a Christmas tree. The entertainment was held in the French courthouse and all the people in the village took part. Gifts were presented to each child present and the evening was spent in singing "home" songs and hymns. This was the first community Christmas in Gorgona. It was followed by others each year which were held in the Commission clubhouse. These community celebrations in which the Young Men's Christian Association, the woman's club, the Sunday school, and church organizations united, were noteworthy through the hearty cooperation of the social forces of the village. More than 1,500 children participated in the entertainments and over \$1,000 was expended by the people of the community in the purchase of Christmas trees and ornaments, presents for the children, and their entertainment.

In 1906, the young people of the church organized a Christian Endeavor society which constituted an important part of the social life of the village for three years. The society, besides its own meetings on Sunday evenings, contributed to the public entertainment by holding a "social" once a month to which all the people of the village were invited.

The idea of the woman's club movement in the Canal Zone originated in Gorgona, and from that village came the suggestion to the United States Government to authorize the organization of women's clubs as social centers for American women in the Canal Zone. In June, 1907, a social club of women was formed, the first woman's club in the Canal Zone.

The Isthmian Canal Chapter, No. 1, Daughters of Rebekah, was organized in Gorgona in 1907, its membership being composed of

women from the various villages along the line of the Panama railroad. In April, 1913, the order had 90 members. The Odd Fellows celebrated their anniversaries in Gorgona with much success, the people of the village preparing for the entertainments. In 1911, Orchid Chapter, No. 1, Order of the Eastern Star, was organized in Gorgona, headquarters being held there until early in the spring of 1913, when it moved to Empire. It had 87 members.

In 1910, a representative of the National Anti-Cigarette League, with headquarters in Chicago, visited the Isthmus and organized a branch at Gorgona, which maintained a membership of 30 until it was disbanded. The Boy Scout movement followed as an outcome of it, and, led by the physical director of the Young Men's Christian Association, Gorgona had the largest membership in the Boy Scouts of any patrol in the Canal Zone organization. There was also an active chapter of the Canal Zone Red Cross.

In 1909 and 1910, Gorgona had a dramatic company which gave plays in the local clubhouse, and traveled through the clubhouse circuit with much success, giving also a comedy in the National Theatre, Panama, as a benefit performance.

In bowling and basketball, Gorgona's teams played an active part in all interclubhouse tournaments. The bowling team of 1908 won a handsome silver cup through its skill. In the 1911 games the basketball team was the strongest and fastest in the league. In indoor baseball, the Gorgona team was a pennant winner for several seasons, and for several years the town had a team in the Isthmian baseball league.

There were three functions in which the entire village took part; the first was a banquet by Gorgona Texans in 1907; the second was a farewell Fourth of July banquet held on July 3, 1912; and the third was a reunion held in the clubhouse on July 25, 1913, which was attended by the largest number of people ever gathered there.

Church Notes.

The sixth anniversary of the opening of the Baptist Church in Culebra was celebrated by special services on Sunday and Monday, September 14 and 15. The pastor was assisted in the services on Monday evening by the Rev. Carl H. Elliott of Cristobal, and the Rev. Stephen Witt of Gatun.

Father James McDonald, a priest of the Order of St. Vincent, from the community house at Germantown, Pennsylvania, has been appointed to be assistant priest in the parish of St. Ferdinand, Empire. Father McDonald has arrived on the Isthmus and taken up his duties. He visited the Isthmus several years ago as a missionary and organized the Woman's Altar Guild of St. Ferdinand's Church.

Prize Essays.

The second in the series of prize contests for the best essay of 150 words by boys and girls under 16 years of age is announced in the *Union Church Work* of Cristobal, the bulletin which is published weekly by the pastor of the church. The subject is "What would you do with \$10,000,000 if it were given to you to invest in philanthropic or religious enterprises?" The prize offered is a hand-

somely bound book. The first contest was won by Miss Sarah Widener of Gatun.

Playgrounds in Permanent Towns.

Suitable playgrounds for children will be provided in the permanent towns of Balboa, Pedro Miguel, Gatun, and Cristobal, and Mr. A. B. Dickson, Mr. Frank P. Wagg, and Mr. William L. Phillips have been appointed a committee to submit a report, together with their recommendations, relative thereto.

PERSONAL.

Dr. L. S. Rowe, one of the two American members of the Joint Land Commission appointed to settle claims against the United States arising out of the construction of the Panama Canal, sailed for New York, on Tuesday, September 23, on the United Fruit Company's steamer *Pastores*, having resigned from the Commission, effective upon his arrival in the United States. He was appointed by Executive Order of the President on January 24, 1913, with the understanding that he would not be required to remain on the Isthmus for a longer period than six months. He expects to return to his professorship in the University of Pennsylvania.

Mr. Frank P. Wagg, superintendent of schools, returned on the *Advance* on Tuesday, September 16 from his annual leave of absence.

Colored Clubhouse Converted to Other Uses.

The one-story building in Culebra, formerly used as a clubhouse for colored men, has been converted into offices for the district sanitary inspector and the municipal engineers. The building was opened for the colored men on November 3, 1911, and its use for that purpose was continued until the spring of 1913.

High School Entrance Examinations.

High school entrance examinations will be held at the Ancon white school building on Monday, September 29, at 8.30 a. m. Eighth grade pupils who failed to pass last June will have an opportunity at this time to take another examination in the subjects in which they failed.

FRANK P. WAGG,
Superintendent of Schools.

Association of Panama Canal Builders.

In making application for membership in the Association of Panama Canal Builders, the secretary-treasurer requests that, in addition to forwarding the \$5 initiation fee, the following information be invariably furnished: 1. Name. 2. Metal check number. 3. Gang number. 4. Division, department, or Panama Railroad Company. 5. Room number. 6. House number. 7. Location of work. 8. Post-office address. 9. Address in United States. 10. Isthmian address.

Sojourners Lodge.

The meeting of Sojourners Lodge, A. F. and A. M., Cristobal, called for Wednesday evening, September 24, has been postponed until Saturday, September 27.

Almost 9,000,000 feet of lumber were received on the Isthmus during the month of August. This is the largest amount of lumber received in any one month during the entire history of the Canal.

An informal dance will be held at the Strangers Club on Thursday, September 25.

FOUR YEARS OF LOCK WORK.

Locks Almost Ready for Use.—Operating Mechanism Correspondingly Complete.

The placing of concrete in the locks of the Canal has covered a period of approximately four years. It began on August 24, 1909, at Gatun; on September 1, 1909, at Pedro Miguel; and, with the exception of 102 cubic yards laid in 1909, at Miraflores in July, 1910. The end of the fourth year sees the concrete work at all locks practically completed.

Mass masonry at Gatun and Miraflores Locks was completed in the latter part of May, 1913, and at Pedro Miguel Lock, several months earlier.

The work at Gatun since September 1, 1912, has comprised building the lower wing and approach walls, and completing the upper approach wall, which was within three per cent of completion a year ago.

At Pedro Miguel, during the same period the approach and wing walls at the upper end and the east wing wall at the lower end, were built, and the lower approach wall was extended about 300 feet.

At Miraflores, the lower lock, which was about half done on September 1, 1912, was brought to completion, and the wing and approach walls at both entrances were begun and completed.

Recent and future concrete work at the locks embraces a multitude of relatively small finishing operations around machinery and tracks, etc. Portable mixers are being used in the remaining construction. All of the large mixing and placing plants have been closed and are being dismantled. The two berm and four chamber cranes employed at Pedro Miguel Locks, from April, 1910, were transferred to Miraflores Locks, upon the completion of the heavy masonry in the lock proper, and of the filling of the center wall; and the permanent mixing plant was dismantled after the approach and flare walls had been built. All of the berm and chamber cranes used at Pedro Miguel were transferred to Miraflores Locks and placed in service there between April, 1911, and March 26, 1912; two other berm cranes, used first at Miraflores, began work in April, 1911. Final dismantling of these cranes began the latter part of July, 1913, and is still under way. The auxiliary concrete mixing plant at Gatun Locks, in service from December 31, 1909, to March 11, 1912, and the permanent plant, operated from August 24, 1909, until August 16, 1913, were dismantled immediately after being closed.

The progress of masonry construction at all locks, from its beginning to September 1, 1913, is indicated by this summary of monthly placements

LOCK GATES.

Over half of the material in the lock gates was erected during the past 12 months. On September 1, 1912, the total quantity erected at all locks was 24,787 tons, or 42 per cent of the required 58,000 tons; today, the lack of completeness of erection is designated by fractions of one per cent. Since September 20, the gates of the west flight at Gatun, and the east flight at Pedro Miguel, have been ready for the passage of vessels, and the west flight at Miraflores Locks is to be similarly completed by the end of the month. All gates at Gatun and Pedro Miguel are to be mechanically completed by January 1, and at Miraflores by March 1, 1914.

Gate work at the locks began on March 21, 1911, in preparing the bearings for the upper guard gates at Gatun. The erection of these leaves began on May 17, 1911, and they were the first to be swung closed. This occurred on August 4, 1912, and the footwalk over them was completed in September, 1912. A year ago, all the leaves in the upper and intermediate levels at Gatun had been erected to full height, and work had just begun on the safety gates in the lower level and the lower guard gates. The first girders for these eight leaves were placed on August 29, 30, and 31, 1912; the lower guard gates were closed, and sea water admitted against them, on June 14, 1913. On September 1, 1913, erection, reaming, and riveting for the gates of Gatun Locks were all within less than one-half of one per cent of completion.

At Pedro Miguel, gate work began at the upper guard gates, on August 7, 1911. On September 1, 1912, these gates had just been closed, the skeletons of all leaves were at full height, and those in the upper level had been sheathed. Today, erection and reaming for all gates are within one per cent of completion, and the finishing work is over 80 per cent completed.

At Miraflores Locks, work on the gates began first on the upper guard gates and the safety gates of the upper level, in August, 1912. The upper guard gates were closed about the middle of June, 1913, and the lower guard gates on August 20, 1913. At present, all 28 leaves have been erected to full height, reaming is 98.5 per cent completed, riveting, 90 per cent, and finishing, about 65 per cent completed.

The local force of the McClintic-Marshall Construction Company, the contractor for the fabrication and erection of the lock gates, was 134 men in May, 1911, at the beginning of erection. It attained a maximum of about 5,300 men, 625 of whom were gold employes, during the months of March, April, and May, 1913. The force on September 22,

1913, was 1,940 men, 225 of whom were gold employes.

EMERGENCY DAMS.

The emergency dams are to be held in reserve for exigencies if the lock gates should get beyond control and allow a rush of water through the flight. The floating caisson dams are for use only when the water is under control, and are not attached to the lock structures; the first of these is now under fabrication at the Union Iron Works at San Francisco, and will be towed to the Isthmus when completed.

The placing of steel in the emergency dams began in August, 1912, with the laying of the circular track and pivotal base for the east dam at Gatun. Erection of superstructure proceeded directly thereafter and the dam was completed, except for final painting, in May, 1913. The contractor, the United States Steel Products Company, began the final operating tests on May 20, under supervision of testing engineers of the Canal Commission. Erection of the west dam at Gatun began about the middle of November, 1912, and tests were completed on August 15, 1913. This dam was swung across the chamber, and its wickets and gates dropped into place, in 35 minutes. Trained operators will be able to do this in 30 minutes, or less.

At Pedro Miguel, erection of the west dam was undertaken first, beginning on February 1, 1913. This structure was first swung across the approach chamber on September 2, and is now under test. Erection of the east dam, which began on April 1, is about 98 per cent completed, and the structure will be ready for testing by the time the tests on the west dam are completed.

The Miraflores east dam erection began on June 1, and that for the west dam on July 1. All material for all of the dams, weighing a total of 13,400 tons, had arrived on the Isthmus by August 1, and erection was 80 per cent completed on September 1, being practically confined to the two dams at Miraflores. These are slightly lighter than those at Gatun and Pedro Miguel, because of the lower head of water against which they will be used; each of them weighs approximately 1,987 tons, as compared with 2,305 tons at Pedro Miguel and Gatun Locks. The east dam at Miraflores will be finished the latter part of October, and the west dam in November. The emergency dams were described in THE CANAL RECORD of March 8, 1911.

OPERATING MACHINERY.

In addition to the masonry, gates, and emergency dams there is a great amount of auxiliary machinery contained within the machinery rooms and operating galleries of the walls or in the culverts. This apparatus

Grand totals to September 1, 1913: Gatun, 2,067,073 cubic yards; Pedro Miguel, 930,090 cubic yards; Miraflores, 1,493,600 cubic yards.

embraces the rising stem gate valves, which control the flow of water in the 18-foot culverts at the bottoms of the side and center walls; the cylindrical valves, controlling the 6-foot culverts which run laterally from the wall culverts and pass water to the lock chambers, through the floors; the auxiliary culvert valve machines, which control the flow through a short auxiliary culvert designed to maintain the water at the same elevation on both sides of the upper guard gates; the guard valves and machines, controlling the intake of water into the side wall culverts at the upper end of the locks; the miter gate moving machines, to swing the leaves of the gates; the miter forcing machines, to draw the leaves tightly together when closed, and prevent leakage; the mechanisms which cause the handrails on top of the leaves to fold down when the leaves are swung back into their recesses in the walls; the pumps for unwatering sumps in the miter gate leaves, and in the pits of the fender chain machinery rooms; the machinery for actuating the fender chains, at all upper and lower guard gates, and at the intermediate and safety gates in Pedro Miguel Lock and upper chambers of Gatun and Miraflores Locks; the tracks and conductors for the towing locomotives; and the posts for the illumination of the locks.

Ancillary to the foregoing is an elaborate system of electrical generation and transmission to the transformer rooms in the lock walls, from which power is distributed to the various motors, and the interior and exterior lights. The operating motors number 334 at Gatun Locks, 206 at Pedro Miguel, and 252 at Miraflores; and at each set of locks their operation will be managed from a central control house.

All of this work, as well as the installation of operating machinery in the spillways for Gatun and Miraflores Locks, controlling 22 Stoney gates, each 47 feet long by 19 feet high, has been carried on by the erection subdivision of the First Division of the Office of the Chief Engineer. The subdivision was organized on September 11, 1911, and began work immediately at Gatun. In January, 1912, a supervisor was transferred to Pedro Miguel Lock, and a force assembled to carry on the erection work there and, subsequently, at Miraflores Locks and Spillway.

In connection with erection, this division has mixed and laid approximately 25,000 cubic yards of reinforced concrete at Gatun Locks, and will have placed about 50,000 cubic yards in the Pacific locks. The condition of the principal machines necessary to the operation of the locks on September 1, 1913, is indicated in the following table:

MACHINERY.	GATUN.			PEDRO MIGUEL.			MIRAFLORES.		
	Per cent completion.			Per cent completed.			Per cent completed.		
	No.	Mechanical.	Electrical.	No.	Mechanical.	Electrical.	No.	Mechanical.	Electrical.
Cylindrical valve machines.....	60	100	42	20	100	87	40	100	38
Rising stem valve machines.....	56	99	56	24	100	71	36	86	26
Miter gate moving machines.....	40	93	28	24	90	58	28	83	4
Auxiliary culvert valve machines..	4	100	72	4	100	62	4	100	45
Spillway gate machines.....	14	71	5				8	0	0
Guard valve machines.....	6	100	40				6	33	0
Miter forcing machines.....	20	39	46	12	36	5	14	1	7
Chain fender machines.....	16	43	5	16	35	0	16	30	0
Handrail operating mechanism....	36	70	54	20	0	16	24	0	8
Miter gate sump pumps.....	40	69	44	24	67	0	28	43	0
Chain fender sump pumps.....	16	33	0	16	0	0	16	0	0
Transforming stations.....	16		67	8		55	12		38

The table of percentages of completion indicates a large amount of work yet to be done, especially in the electrical part; but this

organization has carried its work forward as rapidly as the arrival of material or the advances of precurent work have allowed. Today, as far as operating machinery is concerned, connections could be made in half a day which would allow the passage of a vessel through the sides of the locks for which the gates are ready, at Gatun and Pedro Miguel, the work is proportionately as well advanced at Miraflores. Preparations are being made for a test of valves controlling the flow of water into the west flight of Gatun Locks, as in conditions of operation. The force of the erection subdivision, on September 1, 1913, numbered 344 gold and 2,076 silver employees.

Pardons for Houston and Pilson.

By direction of the Secretary of War, the Chairman of the Isthmian Canal Commission, on Friday, September 19, approved a pardon for J. Frank Houston, who was found guilty of murder in the second degree in the court of the Third Judicial Circuit at Cristobal on May 8, and sentenced to 10 years in the Canal Zone penitentiary. Houston shot and killed Harry Stern, an employe in the commissary at Gatun, on February 8. A proclamation was issued through the Department of Civil Administration on Saturday, September 20, placing October 11 as the effective date of the pardon.

F. K. Pilson, a former employe at the Cristobal post-office, who was convicted of embezzlement in the court of the Third Judicial Circuit at Cristobal on October 12, 1912, and sentenced to 18 months' imprisonment in the Canal Zone penitentiary, was pardoned, effective Saturday, September 20, on the ground of physical disability.

Commercial Service at Naval Radio Stations.

Beginning September 1, the radio stations of the United States Navy at Colon and Balboa are handling special classes of commercial radiograms, heretofore prohibited, as follows:

1. Reply paid messages (where both message and answer can be prepaid by the sender.)
2. Messages calling for repetition of messages (for verification only.) Charge for repeating back is one-fourth the charge for the original message.
3. Radiograms to be delivered by mail. (If received from a ship, these will be mailed from the radio station. "Ocean letters" will be mailed by the ship at the first port of call, or at any port of call designated.)
4. Multiple radiograms. These are messages addressed either to several persons at same address, or to same person at several addresses served by the same radio station. These messages when received from sea will be separated and sent as so many individual messages over the land wire.
5. Radiograms calling for acknowledgment of receipt. (Such acknowledgment is restricted to notification of date and hour at which the coast station delivered the radiogram to ship addressed, and may be

sent by either mail or telegraph.)

6. Paid service notices. (Sent in order to correct address or text, to cancel a message, etc.)

Both stations, Colon and Balboa, are

connected by direct wire with the Panama railroad telephone system and radiograms can be filed at any local office. Attention is invited to the fact that no collect messages are handled, and no commercial messages are handled between stations which are connected by cable or telegraph, as, for instance, to Key West or Port Limon.

The time of arrival of all Panama railroad boats is given to the telephone central at Colon as soon as received, and can be obtained there upon request without calling the radio station at Colon.

Teachers' Meeting.

The first meetings will be held on Tuesday, September 30, in the Ancon white school building. The white teachers will meet at 8.30 in the morning, and the colored teachers at 2.40 in the afternoon.

FRANK P. WAGG,
Superintendent of Schools.

Concrete Work in Locks and Spillways.

Concrete work in the Canal locks is nearly completed, the aggregate amount in place at the close of work on September 20, being 4,480,234 cubic yards.

A statement of the concrete laid in the three sets of locks for the Canal, and in Gatun and Miraflores spillways, as of September 20, follows:

GATUN LOCKS.

The last concrete for the locks proper, as distinguished from that necessary to finishing work by the First Division, was mixed and placed on August 16, 1913. At the close of work on that day the total amount of concrete placed by the Atlantic Division amounted to 2,045,485 cubic yards.

MIRAFLORES SPILLWAY.

The total of concrete at Miraflores spillway—75,610 cubic yards—remained unchanged, no concrete having been laid during the fortnight ending September 20.

*Includes hydroelectric station.

COMMISSION CLUBHOUSES.

Activities of the Young Men's Christian Association.

GENERAL.

Moving picture schedule for the week September 29 to October 4, is, as follows: Tuesday, Cristobal; Wednesday, Gatun; Thursday, Culebra; Friday, Empire and Porto Bello; Saturday, Corozal.

COROZAL.

The Corozal basketball team defeated the Marines of Camp Elliott on the former's floor on Tuesday night, September 15. Score, 21 to 19. The line-up of the teams, was, as follows: Corozal—McEachern, Bessy, Sperber, forwards; Carr, center; Schaeffer, Kenny, guards. Camp Elliott—Schell, Smith, forwards; Murray, center; Harper, Hay, guards.

The Gatun team will play at Corozal Saturday night. Mr. R. W. Karchner took charge of the second chair in the barber shop on September 18, and from 6 o'clock until 10 each week night two barbers will be in attendance.

The standing in the local 3-men tenpin tournament on September 20, was, as follows:

No. Team.	Won.	Lost.
4.....	7	2
6.....	4	2
7.....	3	3
3.....	3	3
5.....	6	6
2.....	2	4
8.....	2	4
1.....	3	6

The following 200 or over, scores were bowled during the week: Sims, 204; Edwards, 200, 223, 216; Ziller, 220, 242, 214; Beall, 224; Sybolt, 201.

The Culebra bowling team will bowl at Corozal next Saturday night.

CULEBRA.

High scores for the week in tenpins were, as follows: Herrington, 206; DeCora, 201.

The Tenth Infantry Band will give a concert in front of the schoolhouse on Sunday night, September 28, at 7 p. m. All are invited to attend.

A new supply of pool cues has been received.

EMPIRE.

On Monday evening, September 15, the Empire chess club entertained the Culebra club. There were seven men on each team, and each man played two games with his opponent. Culebra won 7½ and lost 6½ games. Empire won 6½ and lost 7½ games.

The standing of the local basketball league is, as follows:

Team.	Won.	Lost.
Reds.....	1	0
Whites.....	1	0
Blues.....	1	0
Greens.....	0	2

Four games are scheduled for each week. The public is invited to attend these games.

The Camp Elliott basketball team played the Empire team on Friday, September 19, and was defeated by a score of 36 to 21.

The Culebra bowling team howled the Empire team on the Empire alleys on Saturday, September 20, Empire winning three games. Scores, Empire, 847, 863, 908. Culebra, 764, 724, 487.

The Empire Literary and Debating Society, after having a vacation for over a year, resumed its meetings on Friday evening, September 19, when plans were discussed for the future. The regular meeting night will be on Fridays unless other activities interfere, when another night will be advertised. An invitation to all is extended to attend this activity.

The Y. M. C. A. secured the Tenth Infantry Band to give an open air concert on Sunday, September 21 at 3.30 p. m. The program, under the direction of Bandmaster Coe, was enjoyed.

GATUN.

The "Open house" held on Saturday evening, September 20, drew a large number of people. Punch and cake were served in the lobby, and David Roswell Homer played several piano selections during the evening. The feature of the evening was the basketball game between Camp Elliott and Gatun. Gatun won by a score of 27 to 22. The line-up was, as follows:

Gatun.	Camp Elliott.
Whiston and Bruce.....	R.F. Schell.
Huber.....	L.F. Smith.
Wright.....	C. Murray.
Fitzpatrick.....	R.G. McElroy and Harper.
Mitchell, Lee.....	L.G. Day and McDonald.
Fouls, Gatun 0, Camp Elliott 6. Referee, Hughes of Cristobal. Timer, Ben Jenkins. Scorer, Foman. Attendance, 200.	

A number of the members met on Wednesday evening, September 17, and formed the Gatun Y. M. C. A. chess club. W. H. Brown was elected president of the club. Those interested are Messrs. Dashiell, Logan, Carson, Farley, Byrne, Marguard, Brown, Sherrard,

Morgan, Flege, Honer, and Kuehnle. A local tournament is being arranged. Any member of the Y. M. C. A. may enter.

The tenpin match between Camp Elliott and Gatun resulted in Gatun's taking two out of three games. The scores were, as follows:

Gatun.	Marines.
Jenkins.....	148 152 156
Darnell.....	156..... 138
Wells.....	146 202 151
Messle.....	154 193 99
Thompson.....	221 148.....
Heppner.....	174 159
Grover.....	202 168.....
Sherrard.....	145 198 200
Tucker.....	154 174 197
Wall.....	131 184 185
McCauley.....	110.....
Barthe.....	169 165
Dennis.....	88

Totals..... 825 867 703 742 893 855
Cristobal won ten and Gatun four games in the chess match. The players were:

Cristobal.	Gatun.
Taylor.....	2 Flege.....
Ogden.....	0 Logan.....
Tuttle.....	2 Marguard.....
Verner.....	2 Carson.....
Hurt.....	1 Byrne.....
Wechsler.....	2 Dashiell.....
Wilson.....	1 Brown.....

Totals..... 10 4
Members of other associations now living at Gatun are cordially invited to transfer their memberships to the local clubhouse.

Michael Conley and Edward Walsh scored 161 and 163, respectively, in duckpins during the week ending September 20.

Dewey still leads the "Popular" handicap pool tournament, having won every game so far. The standing follows:

Name.	Won.	Lost.	P. C.
Dewey.....	8	0	1.000
Townesley.....	3	1	.750
Pettit.....	3	1	.750
Von.....	5	3	.625
Kernish.....	3	2	.600
Bailey.....	4	3	.571
Johnson.....	1	1	.500
Gray.....	4	4	.500
O'Hara.....	2	3	.400
Reisner.....	2	4	.333
Bradley.....	2	6	.250
Mitchell.....	1	3	.250
Dennis.....	0	3	.000
Wall.....	0	4	.000

"Louisiana" is the subject of a lecture to be given by J. Frank Harbert on Thursday, September 25. Colored slides will be shown.

A stringed orchestra is being organized at the Y. M. C. A. All who play an instrument are cordially invited to join.

CRISTOBAL.

Messrs. King, Riley, and McMann furnished a number of duets and solos for the moving picture entertainment Saturday night, September 20. The Saturday night moving pictures are meeting with marked favor, and the attendance averages 200 per night.

The Corozal team defeated Cristobal at basketball on Saturday, September 20, by the score of 20 to 14. The playing of the Cristobal team, considering the little practice they have had was a surprise to the spectators.

On Thursday, September 25, Mr. W. F. Bennyhoff will exhibit stereopticon slides of the Panama Canal under the auspices of the Discussion Club.

The Discussion Club meeting on October 2 will be in charge of Mr. S. P. Verner. Subject, "Possibilities of increased trade relations with South American countries after the completion of the Panama Canal."

The Gatun tenpin team will bowl at Cristobal on Saturday night, September 27.

The team for the All-Isthmian tournament will be selected Thursday night of this week.

PORTO BELLO.

There was a large attendance at the clubhouse on Sunday night, September 21, to see the moving pictures entitled "From the Manger to the Cross."

The handicap pool tournament is nearly ended. The results to date are:

Bucklin.....	12	1	.923
Bowen.....	11	2	.846
Smith.....	10	2	.833
Neil.....	9	3	.750
Murray.....	6	4	.600
Cummings.....	7	5	.583
Colberg.....	7	6	.538
Keene.....	6	6	.500
J. D. Sherrard.....	4	8	.333
Doyle.....	4	8	.333
Chase.....	4	9	.307
Thompson.....	1	7	.125
Englebrecht.....	1	11	.083
T. W. Sherrard.....	1	11	.083

Mr. J. W. Sandrock, the Culebra barber, will come

over to Porto Bello every Monday and take charge of the barber shop. He made his first visit Monday, September 15. It is several months since there has been a barber here.

Mr. J. J. Fitzpatrick, who is acting quartermaster during the illness of Mr. Morgan, joined the Porto Bello association recently. As Mr. Fitzpatrick is one of the best basketball players on the Isthmus, interest in the game has been revived, and a team will be organized to play occasional games.

A "Smoker" is to be held on Saturday evening, September 27 at the clubhouse.

The piano is being tuned and the piano player has been sent to the Cristobal shops for repairs.

A reception was held in the clubhouse on Friday evening, September 19, after the moving picture show, under the auspices of the Union Sunday school, to bid farewell to the scholars who are departing for the United States. Silver pins were presented to Mary Fisher, Elizabeth Fisher, and Melva Baker. Ice cream and cake were served.

The big swimming float has been taken up to the dock and is being overhauled. New tar-coated barrels will be placed underneath.

Rainfall, Sept. 1 to Sept. 20, 1913, Inclusive.

Notice of Shutting off of Water.

GATUN, C. Z., September 23, 1913.

To All Concerned—The water will be shut off at a points south of Miraflores station and north of Panama City from 7 a. m., to 3 p. m., Sunday, September 28.

The water will be shut off at all points south of Corozal from 9 a. m., to 3 p. m., Sunday, September 28, 1913, with the exception of the Hotel Tivoli and Ancon Hospital, which will be supplied with water from the Ancon high service reservoir.

GEO. M. WELLS,
Resident Engineer.

Married.

MILLETT-NORCROSS—On September 18, at the home of the bride's parents in Pedro Miguel, Miss Eunice Norcross to Mr. Ray E. Millett of Corozal, the Rev. Carl H. Elliott officiating. Canal Zone residence, Corozal.

PARMALEE-DANIELS—At Christ Church, Colon on September 23, Miss Helen La Verne Daniels of Canton, O., to Edward Hosmer Parmalee of Indianapolis, Ind., the Rev. Father Cooper officiating. Isthmian residence, Colon.

OFFICIAL CIRCULARS.

Additional Information Relative to Transfer of Artisans to Classified Service in the United States.

CULEBRA, C. Z., September 20, 1913.

To All Concerned—There appears to be some misunderstanding of the provisions of Circular No. 482, dated March 19, 1913, publishing the Executive Order which authorized the transfer to the classified service in the United States, without examination, of artisans within three years from their discharge by the Commission. The following information is furnished in explanation of and supplementary to the circular; it does not modify the circular in any way:

1. Section 1, paragraph 2, states that the employee must be specifically recommended for transfer to a corresponding position. Therefore, a machinist will be eligible to apply for a position as machinist only, a blacksmith will be eligible to apply for a position as blacksmith only, and so forth. An artisan in any one trade can not obtain a transfer to any other trade, or to a clerical or other position in the classified service.

2. No list is made up from which offers of employment are tendered to artisans separated from the service. To obtain a position in the States of the kind covered by Circular No. 482, an ex-employee recommended for transfer must himself apply in person or by letter to the official in charge of the establishment or establishments at which he desires employment, giving all the details necessary when applying for employment, and stating that he has been recommended by the Isthmian Canal Commission for transfer to the position without examination, and he should request the official in charge to make request on the Washington office of the Isthmian Canal Commission for his transfer.

3. Circular No. 482 does not constitute a promise of transfer without examination; to obtain a position, a vacancy must exist and the ex-employee must locate it and apply for it.

Please post a copy of this letter in a conspicuous place in the shops.

Respectfully,

GEO. W. GOETHALS,
Chairman and Chief Engineer.

Preservation of Retired Equipment.

CULEBRA, C. Z., September 12, 1913.

CIRCULAR No. 323-E:

In connection with Paragraph 2, Circular 323-B, providing that the Mechanical Division will report to the Quartermaster's Department the approximate cost of repairs required to put retired equipment and machinery in serviceable condition, the following additional instructions will become effective with the date of this circular:

1. All equipment working south of Gatun should be sent to Empire shops and all equipment at Gatun and north of Gatun should be sent to Gatun engine house, after disposition has been given on same by the surveying officer as to its final disposition. On receipt of equipment at shops, an inspection will be made, defects noted, and proper action taken to preserve same, as noted below. Inspections should show general condition of stay bolts, flues, boilers, machinery, and other detail that might be of interest to intending purchasers. There should also be furnished a rough estimate of the cost that would be necessary to put equipment in working condition. Result of such inspections and estimated cost of repairs to be sent to the Chief Quartermaster, and the chairman of the Board of Survey and Appraisal.

(a) *Locomotives*—Boilers should be emptied and thoroughly cleaned of all scale and foreign matter. Boiler should then be filled with water, leaving space enough for at least two barrels of crude oil or a sufficient amount of crude oil to cover the internal surfaces of boiler and tubes. This oil should be put in at dome, then blow-off cock should be opened up and boiler drained. The same instructions apply to locomotive tanks as to boilers. The front end of locomotives and fire boxes of all boilers should be thoroughly cleaned and brushed off with wire brush and given a coat of tar paint. This paint can be put on with a spray. The coal space on all locomotive tanks should be thoroughly cleaned and scaled and surface given a coat of tar paint. All exterior surfaces of equipment should be painted if necessary, using the standard grade of paint which is commonly used for that purpose. The jackets on all boilers should be given a coat of white lead and tallow. Smoke stacks should be covered with sheet-iron covering made specially for this purpose. Main rods of locomotives should be disconnected and all bearing and bright surfaces receive a coat of white lead and tallow. Eccentric straps and blades should be removed from locomotives and placed with main rods in the cabs, and cabs boarded up. The steam chest cover should be lifted, cylinder heads removed, and all surfaces treated with a coating of white lead and tallow. It will be necessary to remove the valves and pull pistons in order to get at the parts, which should be replaced, steam chest and cylinders closed, and the crossheads blocked in order to

eliminate the moving of the pistons in cylinders. The air pumps and the feed pumps on all equipment should be opened up and surfaces treated with a coat of white lead and tallow. The cap on engineer's brake valve on locomotives should be lifted and the surfaces of the valves, etc., slushed with vaseline. All exterior surfaces of cab fittings should be given either a coat of white lead and tallow or vaseline. Interior surfaces of triple valves and injectors need not be treated, as they are brass. Journal box cellars on all drivers and engine truck wheels should be well packed, also journal boxes on tanks.

(b) *Steamshovels*—The same general rules for the care of locomotives will apply to steamshovels. All engine pistons, valves, rods, eccentric straps, "A" frame collar and swing circle to be removed; shafts lifted from bearings, wearing surfaces cleaned, doped with white lead and replaced. Boilers should be stripped with lagging, and cleaned as outlined for locomotive boilers. Water tanks should be taken off shovels, inspected, and if found in bad condition they should be scrapped and no tanks put on unless shovel is to be put in service, as there is a surplus of these tanks in Q. M. D. stock. Roofs should be painted with tar paint; also coal platfoms and dippers. Other parts now covered with oil or grease can be protected with a coat of crude oil, which will be sufficient protection.

(c) *Unloaders, cranes, spreaders, hoisting engines, trackshifters, and piledrivers*—Machinery should be gone over and given a coat of white lead and tallow, as outlined for steamshovels.

(d) *Miscellaneous machinery, including shop's machinery and tools*—Air pumps and feed pumps on all equipment should be opened up and surfaces treated with a coating of white lead and tallow. All bearings, journals, and bright surfaces of all machinery and equipment should be given a coat of white lead and tallow.

2. The Quartermaster's Department will notify the Mechanical Division whenever any equipment or machinery which has been turned over to them shows any signs whatever of deterioration, so that same can be given proper attention.

GEO. W. GOETHALS,
Chairman and Chief Engineer.

Disposition of Equipment No Longer Required.

CULEBRA, C. Z., September 12, 1913.

CIRCULAR No. 323-F:

In order to facilitate the handling of equipment no longer needed and to be turned over to the Quartermaster's Department, the following disposition of same will be made, effective upon the abandonment of the high line dump between Gamboa and dump No. 7, which time is estimated by the Central Division as about September 15:

(a) All rolling equipment will be assembled in each division at points to be designated by division engineers. The necessary survey papers will be made up and the surveying officer notified of the location of any articles to be submitted for his action.

(b) After approved action by the surveying officer, the equipment will be sent to storage, as follows:

1. Steamshovels, to Tracks 1 to 7, inclusive, Gamboa yard.
2. Plows and unloaders, to dump No. 6.
3. Unserviceable Western dump cars, to dump No. 4, right and left.
4. Unserviceable Oliver dump cars, to dump No. 5, right and left.
5. Unserviceable Lidgetwoods to dump No. No. 7, using the left, old left, elevated, and right dumps.
6. Serviceable cars of all classes will be stored on yards, as follows: Dump No. 4, dump No. 5, rip yard.

(c) Ties as taken up in compliance with instructions of August 22, 1913, from the Chairman and Chief Engineer, will be stored on dump right No. 5. Fastenings to be sent to Mount Hope.

(d) All switching will be done by the Central Division.

(e) The storekeeper at Empire will be notified by the divisions concerned of each shipment to storage, as indicated above. He will accomplish all survey and other papers covering retired equipment, and maintain such check and records as may be required by the Chief Quartermaster.

(f) Such shovels, plows, unloaders, and cars as have been or may be retired from service prior to September 15, will be sent to storage as above indicated, by the Central Division.

(g) Equipment retired and ordered to be turned over to the Quartermaster's Department for storage will be prepared for storage, after survey has been approved, in accordance with Circular No. 323-E.

GEO. W. GOETHALS,
Chairman and Chief Engineer.

Waste of Coal Unloaded on Ground.

CULEBRA, C. Z., September 12, 1913.

HEADS OF DEPARTMENTS AND DIVISIONS:

Your attention is invited to Circular No. 402, of

August 23, 1911, relative to waste of coal resulting from unloading it directly on the ground, etc., which is being disregarded.

You are directed to see that this order is carried out by providing suitable means to guard against loss, and have all fuel utilized as the work proceeds.

GEO. W. GOETHALS,
Chairman, Isthmian Canal Commission,
President, Panama Railroad Company.

Cleaning Coal from Ends of Cars.

CULEBRA, C. Z., September 12, 1913.

HEADS OF DEPARTMENTS AND DIVISIONS:

My attention has been invited to the fact that Circular No. 405, of August 25, 1911, relative to cleaning coal from the ends of cars before returning to the Panama railroad, is being disregarded.

You are directed to take immediate steps to have the practice discontinued, and see that this order is enforced.

GEO. W. GOETHALS,
Chairman, Isthmian Canal Commission,
President, Panama Railroad Company.

Assistant to Chief Quartermaster.

CULEBRA, C. Z., September 20, 1913.

CIRCULAR No. 500:

Effective October 1, 1913, Mr. Robert K. Morris will be appointed assistant to the Chief Quartermaster, Quartermaster's Department.

GEO. W. GOETHALS,
Chairman and Chief Engineer.

Notaries Public at Gatun.

ANCON, C. Z., September 13, 1913.

To All Concerned—On September 10, 1913, Mr. C. D. Thaxton, postmaster at Gatun, was appointed by me a notary public with jurisdiction throughout the Third Judicial Circuit of the Canal Zone, and took the oath of office on September 12 before Judge Thomas E. Brown, Jr., at Cristobal. Sergt. Lawrence C. Callaway, of the Division of Police and Prisons, who was appointed a notary public on July 30, 1910, has returned to his station at Gatun. This makes two notaries public at Gatun now, available at almost any time, so that there should be no inconvenience caused any one at that point desiring to have papers acknowledged.

RICHARD L. METCALFE,
Head of Department of Civil Administration.

Acting Superintendent, Southern District, Division of Municipal Engineering.

GATUN, C. Z., September 13, 1913.

To All Concerned—Effective September 14, 1913, and during the absence on leave of Mr. D. E. Wright, superintendent of southern district, Division of Municipal Engineering, Mr. E. H. Chandler is designated acting superintendent of southern district.

GEO. M. WELLS,
Resident Engineer, in charge of
Division of Municipal Engineering.

Approved:

GEO. W. GOETHALS,
Chairman and Chief Engineer.

Appointment of Local Auditor, P. R. R.

PANAMA RAILROAD COMPANY,
OFFICE OF GENERAL SUPERINTENDENT.

COLON, R. P., September 20, 1913.

CIRCULAR No. 102:

All Concerned—Effective at once, Mr. F. B. Clements is appointed local auditor of the Panama Railroad Company, with headquarters at Colon, Republic of Panama, vice Mr. R. W. Hart.

J. D. PATTERSON,
General Superintendent.

Approved:

GEO. W. GOETHALS,
President.

Modification of Rule 2, P. R. R. Time Table No. 15.

PANAMA RAILROAD COMPANY,
OFFICE OF GENERAL SUPERINTENDENT,
COLON, R. P., September 15, 1913.

GENERAL ORDER No. 11:

That part of rule No. 2, timetable No. 15, designating Gatun as a register station for all trains, is hereby modified to the extent that Gatun will be a register station for first and second-class trains only.

JOHN D. PATTERSON,
General Superintendent.

Sailing of the "Cristobal."

CIRCULAR No. 207:

To All Concerned—The sailing date of the steamship Cristobal has been set for Saturday, September 27, at 3 p. m., from Pier 11, Cristobal.

JOHN D. PATTERSON,
General Superintendent.

COMMISSARY DEPARTMENT.

Retail prices of cold storage provisions for the week beginning September 21, 1913:

FRESH MEATS.		Price.
Mutton—Stewing, per pound.	6	
Shoulder, neck trimmed off (4 pounds and over), per pound.	9	
Entire, forequarter (not trimmed, 10 pounds and over), per pound.	17	
Legs (8 to 10 pounds), per pound.	18	
Cutlets, per pound.	20	
Short cut chops, per pound.	6	
Lamb—Stewing, per pound.	9	
Entire forequarter, neck trimmed off, per pound.	20	
Legs (5 to 8 pounds), per pound.	24	
Chops, per pound.	24	
Cutlets, per pound.	10	
Veal—Stewing, per pound.	12½	
Shoulder, for roasting, not under 4 pounds, per pound.	17	
Chops, shoulder, per pound.	26	
Chops, per pound.	26	
Loins, for roasting.	30	
Cutlets, per pound.	2	
Beef—Suet, per pound.	5	
Soup, per pound.	8	
Stew, per pound.	9	
Plate, per pound.	14	
Corned, No. 1, per pound.	12	
Corned, No. 2, per pound.	12	
Chuck roast, 3 lbs., and over, per pound.	12	
Rib roast, second cut (not under 3½ pounds), per pound.	16	
Rib roast, first cut (not under 3 pounds), per pound.	18	
Pot roast, per pound.	19	
Rump roast, per pound.	19	
Porterhouse roast, per pound.	20	
Steak, Chuck, per pound.	12½	
Round, per pound.	13	
Rib, per pound.	18	
Sirloin, per pound.	19	
Rump, per pound.	19	
Porterhouse (not less than 1½ pounds), per pound.	20	
Tenderloin (Western), per pound.	30	
Pork—Loins chops or roast, per pound.	17	
Hams, fresh, per pound.	20	
Shoulders, fresh, per pound.	21	
Spare ribs, per pound.	15	
Backbones, per pound.	15	
Pigs' feet, each.	7	
Pigs' head, ½-head.	60	
Sausage, home made, per pound.	20	
MISCELLANEOUS.		
Livers—Beef, per pound.	11	
Calf, each.	60	
Half, each.	30	
Steak, Hamburger, package.	13	
Sausage—Bologna, per pound.	13	
Frankfurter, per pound.	13	
Lieberwurst, per pound.	13	
Devonshire Farm, per pound.	20	
Sweetbread, beef, per pound.	34	
Eggs, fresh, dozen.	34	
one-half dozen only.	17	
Bluefish, per pound.	12	
Halibut, fresh, per pound.	15	
Salmon, per pound.	15

*Indicates reduction from last list.
 **Indicates 5 cents allowed for return of bottle.
 †Indicates advance on last list.
 ‡Fowls weigh each, about as follows: 3, 3½, 4, 4½, and 5 pounds. Prices are based accordingly; when size ordered is not in stock, next lightest weight is supplied and refund note sent for difference.
 ‡Sold only from commissaries; no order taken for delivery.
 §Not less than half of a fresh ham or shoulder will be sold.

Supplies for the Canal.

The following steamers with supplies for the Isthmian Canal Commission and Panama Railroad Company, arrived at the ports of Balboa, Colon, and Cristobal, during the week ending September 13:

Carrillo, September 7, from New York, with 300 cases linseed oil, eight bales life preservers, for stock; 246 cases electrical material, for First Division; 20 cases electrical material, 399 bundles structural material, for Mechanical Division.

Colon, September 8, from New York, with four cases electrical material, for Panama Railroad Company; nine boxes car seals, for stock; 41 packages medical supplies, three cases surgical instruments, 14 bundles baskets, for Sanitary Department; 64 boxes paper napkins, for stock; six boxes blue print paper, for various departments; two boxes cancelling machines, for Canal Zone Government; four cases photographic material, for Chief Engineer; 11 crates tile machines, for Mechanical Division; three cases electrical material, for Sixth Division; three cases drawing material, for stock; 296 pieces pipe, for First Division; 38 boxes ink, 15 cases varnish, for stock; 16 truck wheels, for Mechanical Division; 31 cases castings, for First Division; 30 bundles shovels, 80 bales oakum, for stock; 160 pieces car castings, for Mechanical Division; 664 pieces pipe, for stock; 317 kegs and 10 boxes bolts and rivets, for coaling plant, Cristobal; 500 tower knuckles, 15 boxes incandescent lamps, for Mechanical Division; 17 boxes incandescent lamps, for Light-house division; 242 pieces pipe, for First Division; 66 kegs iron washers, for stock; 43 casks tile, for First Division; 312 pieces pipe, for stock; 75 pieces castings, for Mechanical Division; 158 pieces pipe, for Second Division; and a miscellaneous cargo, the whole consisting of 3,524 packages, weighing 551 tons.

Heredia, September 8, from New Orleans, with 1,325 pieces lumber, for Mechanical Division; 212 pieces lumber, 435 bales straw, 200 pieces pipe, 260 barrels fire clay, for stock; 1,679 sacks creosoted blocks, for Second Division; 1,321 barrels paving brick, for Panama Railroad Company.

Prinz Joachim, September 8, from New York, with 54,228 pounds bolts and screws, for stock; 76 packages furnace material, 248 barrels building brick, for Mechanical Division.

Lyra, September 9, from San Francisco, with two spud timbers, 30 bales dredging sleeves, 47 packages oil burning equipment, for Sixth Division; 2,100 cases dynamite, for stock.

Santa Marta, September 10, from New York, with 33 pieces chain, 39 bundles sheet steel, 50 carboys muriatic acid, for stock; 327 pieces structural material, for First Division.

Atenas, September 11, from New Orleans, with 829 bales straw, 351 bales hay, 500 kegs white lead, for stock; 2,693 sacks creosoted blocks, for Second Division; 1,885 pieces lumber, for stock.

Joseph J. Cuneo, September 11, from Baltimore, with 10,000 cases dynamite, for stock.

THE CANAL RECORD,

Ancon, Canal Zone,

Isthmus of Panama.

No communication either for publication or requesting information, will receive attention unless signed with the full name and address of the writer.

NOTES OF PROGRESS.

Water Admitted Into Culebra Cut.

Water was admitted into Culebra Cut through the four 24-inch pipes extending into the lake underneath Gamboa dike, at 9 a. m., on Wednesday, October 1. It is calculated that the velocity of the flow is about 24.1 feet per second, and that the discharge amounts to about 354 cubic feet per second, which will fill the Canal as far as Cucaracha slide at the rate of 1.6 feet a day. At this rate by the morning of October 10, when it is planned to destroy the dike, the depth of water in this section of the Cut will not be far from 15 feet. The slide at Cucaracha has completely closed the Cut, in one place to the 73-foot level, therefore, the water discharged into the Canal by means of the pipes between October 1 and 10 will be wholly confined to the section between the slide and the dike. To overtop the slide, it will be necessary for the water in the lake to reach a level of 73 feet above mean sealevel. The lake will probably reach not to exceed 68 feet by October 10. A ditch will be cut through Cucaracha slide to start the water through and, it is expected that a great deal of the slide material will be washed into the drainage ditch between the slide and Pedro Miguel Locks.

The drainage pumps in the Cut near the dike was shut down on Wednesday, September 24; all the machinery was removed and the building which housed it was razed. Sufficient water had collected in the Cut on October 1, from seepage and surface drainage to cover the bottom between Cucaracha slide and the dike.

Spillway Ready for Further Rise of Gatun Lake.

The mechanical installation of the operating machinery for the regulating gates at the spillway of Gatun Dam was completed on September 25. The 14 gates are now in place, surmounting the crest of the ogee, at 69 feet above sealevel, and ready to maintain the rise of the lake above that elevation. Tempo-

rary electrical connections were made, in order to test and operate the machinery, and the installation of the permanent cables and control equipment is now under way. The operating machinery and the gate itself, were made to do service in grinding true the fixed irons set in the supporting piers between which the gates will operate; a cutting tool attached to the side of the gate made of it a sort of vertical shaper when the gate was lowered. Afterward, the irons were smoothed by hand to a maximum variation of .005 inch. The horizontal seats on the crest of the ogee were babbitted after the lower edge of the gate had been milled to a true horizontal surface.

Progress in Cable Installation at Gatun Locks.

On September 13, the cable pulling gang of the First Division at Gatun pulled 12,121 feet of control cable and 2,200 feet of No. 0000 3-conductor power cable into the shafts and tunnel running under the lock floors in the vicinity of the control house.

The control cable was drawn down a shaft in the west wall, through the tunnel and up a shaft to the operating tunnel in the center wall. The power cable was drawn down a shaft in the west wall, through the tunnel under the center wall and both lock chambers to the east wall, and up through the shaft. The tunnel under the locks at this point is approximately 125 feet below the coping level, so that each cable had to be supported at the upper ends of the vertical shafts to prevent its slipping down into the duct. When the installation is completed, the cable will be supported in the ducts by a combined action of friction between the cable and duct, and by a curved duct at the bottom taking the thrust. Each of the control cables was 380 feet long, and each of the power cables was 550 feet in length.

Formal Opening of Tramways.

The street railway system of Panama, in service since August 1, was formally inaugurated on Saturday, September 27, when the Municipal Council of the city and a number of officials and prominent business men were the guests of the Panama Tramways Company, and R. W. Hebard and Company, Inc., the constructor of the system, in a special trip to the end of the line at Las Sabanas police station, and a luncheon at the bathing pavilion on the beach of the Bella Vista Estate. Two special cars, decorated in the national colors of the United States and Panama, carried the party. At the luncheon, short addresses, bearing on the development of Panama, were made by Canal Commissioner R. L. Metcalfe, Don Ramón F. Acevedo, secretary of public works of Panama, Mr. W. L. Black, superintendent of the tramways company, Mr. R. W. Hebard, and others.

FIRST LOCK OPERATION.

Tug Successfully Passed Through the West Flight at Gatun Locks on September 26.

Gatun Locks were operated for the first time on Friday, September 26, when the sea-going tug *Gatun*, now in the service of the Sixth Division, was passed through the west flight from the Atlantic channel to Gatun Lake. This date was chosen, because of the approaching departure from the Isthmus of Maj. James P. Jervy, who had charge of the masonry construction of the locks, and of Maj. George M. Hoffman, who had charge of the building of Gatun Dam, under Lieut.-Col. Sibert. The operation was entirely successful and was witnessed by a large number of people.

The first step in the filling of the locks was to fill the space between the upper guard and upper operating gates. This was done through the 60-inch auxiliary culvert valve in the west wall. This operation was started at 9.07 a. m., on Thursday, September 25, and continued to about 3.30 p. m., it being necessary to close the valve twice during this period to clear vegetation away from the trash screen at the intake.

The second step was also on Thursday, and consisted in the filling of the culvert in the center wall as a test of the valves and bulkheads, as well as the culvert itself. The upper section only was filled, and after shutting off the rising stem valve at the upper end, this water was used to test successively the center culverts of three levels, being finally deposited into the lower lock by opening the cylindrical valves in that level.

To remove the bulkheads from the upper end of the west culvert, it was necessary to equalize to some extent the pressure of the lake by pressure on the lower side of the bulkhead. It was originally intended to do this by accumulating the leakage through the bulkheads in the culvert, between the upper rising stem valves and the bulkheads. The leakage of the bulkheads was, however, so slight that it was decided to introduce water into the upper end of the upper lock which communicates with the rear side of the bulkheads through the west culvert. This was done, and the bulkhead removed at 10 a. m., on Friday, September 26. At 11.20 a. m., water was admitted to the upper end of the upper lock from the west culvert through the upper rising stem valves and the water brought up to lake level. The upper rising stem valves were then closed and this water was passed down the flight of three locks as a preliminary test of the valves and culverts of the west wall. Water was then locked down, step by step, from the lake to the lower lock, which was also being filled by the two 14-inch sea valves in the lower guard gates.

The filling of the lower lock was completed about 4.45 p. m., when the sea gate was opened,

and the *Gatun*, with flags flying and whistle blowing steamed into the lower lock, accompanied by the cheers of the assembled spectators. The lower operating gates were closed, and the tug came to a stop alongside the center wall to which it was moored. The process was repeated in the middle lock, and at 6.15 o'clock, just as dusk was falling, the vessel entered the upper lock for the last lift. This was accomplished at 6.45 o'clock, when the two last gates were swung, and the tug passed out into Gatun Lake, the entire passage occupying approximately one hour and 51 minutes. In order to save time on the ascent, the short length of lock was used. The filling of the lock chambers occupied a longer time than normally, because of the small displacement of the tug; in the case of a large vessel, much less water would have been used. The total lift was approximately 64.70 feet, divided between the three locks, about as follows: Lower lock, 11.2 feet; middle lock, 23.7 feet; upper lock, 29.8 feet.

During this operation of the locks, all of the operating devices were operated from local control, that is, each machine was operated from the panel in the same room with the machine. This made it necessary for the operator to move from machine to machine for the various operations, whereas, when the plant is completed, the entire flight will be controlled from the central control tower, from which point the machines will be operated and an indication received as each operation occurs.

The opening and closing of the gates, and the operation of the culvert valve and lock operating machinery during the tests, and the lockage of the vessel, were under the immediate supervision of Col. H. F. Hodges, the designer of the locks, their equipment and operating machinery, and the regulating works of the Canal. In this he was aided by Mr. Edward Schildhauer, the electrical and mechanical engineer of the Commission, and the inventor of the bull wheel which opens and closes the lock gates, and Mr. E. E. Lee, superintendent of erection; Mr. F. C. Clark, assistant superintendent of erection; Mr. C. P. Fortney, superintendent of mechanical installation; Mr. S. H. Grauten, testing engineer, and Mr. Geo. F. Gynn, inspector of lock gates and protective devices.

The *Gatun*, formerly the *H. B. Chamberlain*, is a steel seagoing tugboat, with a length of 101 feet, beam 22 feet, and a load line draft of 12½ feet. It was built by the firm of Neafe and Levy of Philadelphia in 1902, and was purchased by the Canal Commission for the use of the Atlantic Division in 1906, arriving at Colon on June 25 of that year. It is commanded by Capt. F. F. Stewart, and its navigation through the locks was in personal charge of Mr. W. G. Comber. The vessel had among its passengers on this initial trip, Col. H. F. Hodges, Lieut.-Col. William L. Sibert and family, Maj. James P. Jervy, and Mrs. Jervy, Maj. George M. Hoffman, Lieut. Geo. R. Goethals, and Mrs. Goethals, Mr. Henry Goldmark, Captain Corning of the steamer *Panama*, Mrs. Edward Schildhauer, and Mrs. E. E. Lee.

On Saturday forenoon, September 27, the tug was returned to the Atlantic channel, the record of its progress being, as follows:

8.27—Opened rising stem valves Nos. 254 and 255 to equalize water in both ends of upper lock.
8.34—Water equalized at 29 feet over sill.
8.35—Opened rising stem valve No. 260 to lake.

8.46—Opened intermediate gates Nos. 31 and 32.
8.47—Second rising stem valve No. 261 to lake opened four feet.
8.50—Opened upper guard gates Nos. 39 and 40.
8.55—Water equalized in upper end of lake at 28.4 feet over upper sill.

FIRST LOCKAGE.

8.58—Opened upper operating gates Nos. 35 and 36 for entry of tug.
9.00—Closed rising stem valves Nos. 260 and 261 to lake.
9.00—Closed upper operating gates Nos. 35 and 36.
9.05—Closed upper guard gates Nos. 39 and 40.
Opened rising stem valves Nos. 248 and 249 to middle lock. Opened gates Nos. 19 and 20, and 27 and 28, lower safety gates of upper lock.
9.26—Water equalized in middle and upper locks at 39.8 feet over sill.
9.26—Opened gates Nos. 23 and 24, operating. Tug passed to middle lock.

SECOND LOCKAGE.

9.27—Closed gates Nos. 27 and 28, safety gates, behind tug.
9.30—Closed gates Nos. 23 and 24, operating gates, behind tug. Closed rising stem valves Nos. 248 and 249, between upper and middle lock.
9.30—Water in middle lock 59 feet over sill. Water in lower lock about elevation plus 0.5 feet.
9.45—Opened rising stem valves Nos. 232 and 233, middle to lower lock.
10.04—Opened gates Nos. 15 and 16, between middle and lower lock.
10.05—Tug passed to lower lock.
10.06—Closed gates Nos. 15 and 16.

THIRD LOCKAGE.

10.00—Opened rising stem valve No. 216, between middle and lower lock; water in lower at 66 feet; water on sea gauge at elevation 1 plus 0.5 feet.
10.28 (est.)—Water equalized at seal level at elevation plus 0.5 feet.
10.30—Opened gates Nos. 7 and 8, lower operating gates.
10.35—The *Gatun* passed out to sealevel. Closed Nos. 7 and 8; and 3 and 4, lower operating and lower guard gates. Lockage completed. Time 1 hour 37 minutes.
On lockage down, the entire 1,000-foot lock was used as for the passage of a ship of maximum capacity.

Work on Panama's Exposition Begun.

The corner stone of the administration building to be erected on the site of the national exposition, which Panama proposes to hold in 1914-15 in commemoration of the four hundredth anniversary of the discovery of the Pacific Ocean by Vasco Nuñez de Balboa, was laid on Thursday, September 25, by President Porras. The sites allotted for the different buildings were blessed by the Bishop of Panama, Dr. William Rojas, and the plans were exhibited by Mr. Alejandro Bermudez, the director of the exposition. Following the laying of the corner stone, Dr. Ramón F. Acevedo, secretary of public works, made an address. The day was made a public holiday in Panama, partly on account of the corner stone ceremonies, and partly, because September 25, under the old calendar, was the date in 1513 when Balboa first saw the Pacific. It is planned to open the exposition on November 1, 1914, to continue six months, and for carrying out the project the Panama National Assembly has voted a preliminary credit of \$150,000. The United States, Spain, and several of the neighboring Latin-American republics have been invited to participate. The grounds front the road to Las Sabanas, about opposite the orphan asylum, and cover an area of about 35 acres.

Civil Service Examinations.

Examination will be held probably on October 26 for the positions of stenographer and typewriter, Isthmian Canal Service; stenographer and typewriter, Philippine Service; and typewriter, Isthmian Canal Service. Applications will not be received after October 8; this date may be changed if necessary. Persons interested should re-

quest a copy of Form 1424, which contains information in regard to the abovenamed examinations.

Competitors in the abovenamed examinations must bring their own typewriting machines to the examination room.

The examinations will be held probably in the Commission clubhouse at Empire, but the place and date should be omitted in applications.

A card of admission will be sent to those found eligible to be admitted, just before the examination.

In answer to questions as to residence, applicants must show residence in a State or Territory of the United States, and county thereof, up to the time of filing application.

ISTHMIAN CIVIL SERVICE BOARD.

Culebra, C. Z., September 29, 1913.

Concrete Work in Locks and Spillways.

Concrete work in the Canal locks is nearly completed, the aggregate amount in place at the close of work on September 27, being 4,480,983 cubic yards.

A statement of the concrete laid in Pedro Miguel and Miraflores Locks, and in Gatun and Miraflores spillways, as of September 27, follows:

GATUN LOCKS.

The last concrete for the locks proper, as distinguished from that necessary to finishing work by the First Division, was mixed and placed on August 16, 1913. At the close of work on that day the total amount of concrete placed by the Atlantic Division amounted to 2,045,485 cubic yards.

The total of concrete at Miraflores spillway—75,610 cubic yards—remained unchanged, no concrete having been laid during the week ending September 27.

*Includes hydroelectric station.

Time Table Changes.

On account of new timetable No. 16 taking effect Monday, October 6, at 12.01 a. m., train No. 72, scheduled to leave Panama for Bas Obispo at 12.20 a. m., Monday, on timetable No. 15, will not run. The last train leaving Panama Sunday night, October 5, for Bas Obispo, is train No. 58, leaving at 10 p. m. The first train leaving Panama for Bas Obispo, Monday, October 6, will be at 6 a. m. Owing to the demand on the part of the public for an opportunity to inspect the locks, the Gatun shuttle train service has been extended to include Sundays. Parlor cars will be run on trains numbered 2, 3, 4, 5, 6, and 7, daily.

Additional Precautions in Case of Fires in Panama.

In order to avoid any delay or misinterpretation of requests when an increased water pressure is desired in case of a fire in the city of Panama, the gong in the Ancon pumping station will be connected with the new Gamewell automatic fire alarm system, which has been recently installed in Panama, and is now ready for service. The Panama fire brigade has been furnished with a copy of the printed fire alarm signals in effect in the

Canal Zone, so that they may be translated into Spanish and adopted for use by the Panama fire companies.

Numbering of Machines in Balboa Shops.

All machines transferred from other shops to Balboa shops, and all new machines purchased and installed at that point, will be numbered consecutively from one upward. All machine tools, whether stationary or portable, including overhead cranes, jib cranes, air

compressors, furnaces, forges, boilers, blowers, fans, etc., will be carried on one list, and numbered consecutively. A separate list of motors, generators, switchboards, etc., will be kept, and the articles thereon will be numbered consecutively also, beginning with one. When an article on any one of these lists is condemned or sold, its number will be left vacant, and will not again be assigned. A record will be kept of the old serial numbers of the machines that are renumbered.

SOCIAL LIFE OF THE ZONE.

Ancon Study Club.

The Ancon Study Club held a reception in honor of its retiring president, Mrs. H. W. Shick, at the home of Mrs. Mark White on Monday afternoon, September 29. Invitations had been issued to many of Mrs. Shick's friends and there were about 25 present. Mrs. Shick is leaving the Isthmus for Vancouver, and the reception was in the nature of a farewell from her friends and associates. Mrs. Shick has been prominent in the woman's club work since its beginning. She was the first secretary of the Pedro Miguel Woman's Club, and later was its president. She was one of the founders of the Ancon Study Club, and has been the president of the organization since January, 1913. The club presented her with a piece of carved ivory as a souvenir of her Isthmian residence.

The membership of the Ancon Study Club will be limited to 18. This action has been taken with a view to keeping the club small enough to continue to meet in the home of Mrs. White, where the library is installed, and to prevent the introduction of any outside interest other than the study for which the club was formed. A waiting list will be kept and those registered will be voted in, in order of their application, as vacancies occur. At its meeting on September 11, the club voted \$5 toward the playground of the Methodist mission school in Panama.

Church Notes.

The Sunday school of the Methodist Episcopal Church on the sea wall, Panama, will hold its annual rally on Sunday morning, October 5, at 10 o'clock. The regular official program issued by the Methodist church in the United States will be used. This consists of hymns, recitations, and speeches. The pastor, the Rev. Harry Compton, will deliver an address on Sunday school work. The program will be repeated in Spanish in the evening at 7.30 o'clock for the benefit of the Spanish-speaking members of the church.

The regular monthly meeting of the Woman's Foreign Missionary Society of the Methodist church will be held in the church rooms on Saturday afternoon, October 4, at 2.30 o'clock. At this meeting it is requested that delegates from other societies of church workers in the Canal Zone be present as the nature of the permanent organization for the centralization of the work will be discussed at this time and some definite plan will be adopted. The outlook is for a Canal Zone society, which will unite the women in Christian effort, to be composed of different societies, each working on independent lines, denominational or otherwise, but the central society will be undenominational. All women interested in this plan are invited to be present.

The junior Sunday school class of the Church of the Sacred Heart, Ancon Hospital, is preparing for first communion and confirmation, which will be held on Sunday, December 7. The class meets for instruction at 4 o'clock on Monday, Wednesday, and Friday afternoons of each week at the home of Mrs. M. H. Fowler, Ancon. The parents of these children are earnestly requested to see that their attendance at the meetings is punctual and regular.

The Rev. Father Ferdinand Allot, priest

of St. Ferdinand's Church, Empire, sailed for New York on the *Panama* on Monday, September 29. He will sail from there to France where he will spend his vacation of two months. The Rev. Father McDonald will be in charge of the work of the church and parish during the absence of Father Allot.

A series of organ recitals is arranged to be held at Christ Church, Colon, on the second Sunday evening in each month. The first number of the series was given on Sunday, September 14, when a program of Schubert's music was played. Recitals of the works of other composers will follow. In each case the program is introduced by a short biographical sketch of the composer whose works are to be played. The concerts follow immediately after evensong, which begins at 7.30 o'clock.

Record of 1/2-Yard Cube Mixer at Battery Parke.

The following table shows consecutive three weeks' concrete output from a 1/2-yard mixer, working in connection with the construction of Battery Parke, at Naos Island:

September 13.....	8	209	
Total.....	53	1,329	25.07
Grand total..	150	3,780	25.20

The mixer worked nine hours a day, except Saturdays, when it worked eight hours. It was fed from the storage piles nearby, by wheelbarrows, using elevating hopper for feeding the mixer drum and dumping into wooden chutes, which carried the concrete to the forms. Mr. R. Brewerton was the foreman in charge of mixer.

Afternoon Hearings by Joint Land Commission Discontinued.

The Joint Land Commission will discontinue the afternoon hearings, which have been held by individual members of the Commission on Mondays, Wednesdays, Fridays, and Saturdays of each week for the purpose of hearing claims of landholders, in view of the departure of Dr. Rowe, leaving but three members on the Commission.

Due notice will be given when further hearings of this kind are to be resumed.

Yom Kippur Services.

Yom Kippur services will be conducted in the synagogue at Third and F streets, Colon, on Friday evening, October 10, beginning at 6.30, and on Saturday, October 11, beginning at 8.30 a. m.

All Israelites in the Canal Zone are cordially invited.

V. C. PINTO, Secretary,
KAAL KADOSH YANGACOB.

END OF OLD P. R. R. STATION.

Has Served as Panama Passenger Terminal for Twenty-seven Years.

The last portions of the old railroad station, which has served the Panama Railroad Company as a passenger terminal in Panama for a period of over 27 years, were removed on Wednesday, September 24, in furtherance of the work of improving the ground about the new terminal building. Prior to 1884, the railroad company's passenger trains ran into the ancient station in the vicinity of the American wharf. The company's annual report for 1884 states:

"The large increase of passenger business has rendered additional accommodations for that department indispensable, and the passenger depot has been removed from its old location to a point near the bridge and adjoining the Savanna road. A temporary house and platform have been erected there, and are now being used for passenger accommodations pending the arrival of material to build a new depot, which has been ordered for some time."

Although the report states that the material had been ordered for some time, it was exceedingly slow in coming, for the report of 1885 reiterates:

"The great need, however, at this station (Panama), as well as at Aspinwall (Colon) is a new depot with enclosures, so that the ticket system may be put into effect at once. Your company has land at both places in desirable locations."

During the year 1885, extensive repairs were made to the Panama wharves; the English wharf was extended and the shed over the American wharf rebuilt. The report for 1886 announced the erection of a new iron station, the one that has just been torn down, as well as an iron station in Colon, which formerly stood at the head of Front street and was razed when the new terminal was completed on July 23, 1909, in the following words:

"These stations were contracted for in New York by your company in May, 1886, and have been sent out and erected during the year. They will be ready for occupation on the 15th of March the present year (1887). The ticket system spoken of in the report for 1885 will then be put into effect, as all the arrangements for inaugurating this system are now perfected."

The old depot, near the American wharf, the first building erected by the Panama Railroad Company in Panama, was demolished in 1886 on account of its age and general insanitary condition. After the removal of the passenger business to temporary quarters on the site of the recent iron station in 1884, the upper floor of the old station was used as quarters for employees, and the lower floor as a transportation office for the French canal company. Two wooden buildings were immediately erected on its site, with suitable enclosures and a garden between, one for the engineers and mechanical department, and the other for the conductors and the clerks in the freight station. There was also constructed the same year, in the Panama railroad yard, a two-story wooden house of eight rooms, which furnished quarters at that time for the assistant roadmaster, section master, yardmaster, and assistant. These men formerly roomed in the town at a cost to the company for commutation of 100 soles (about \$95) a month. Two of the buildings above referred to are still standing, and in service.

Mr. George A. Burt was general superintendent of the railroad in 1884, but was succeeded during the following year by Mr. Frank G. Ward, who, in turn, in 1887, gave way to Mr. A. L. Rives. The president of the company at this period was Mr. J. G. McCullough.

CANAL WORK IN AUGUST.

Monthly Report of the Chairman and Chief Engineer to the Secretary of War.

CULEBRA, C. Z., September 21, 1913.

The Honorable the Secretary of War,
Washington, D. C.

SIR: I have the honor to submit the following report of operations on the Isthmus for the month of August, 1913:

Effective August 9, 1913, Richard L. Metcalfe was appointed a member of the Isthmian Canal Commission and on that day entered upon his duties as Head of the Department of Civil Administration.

Department of Construction and Engineering.

The following table summarizes the principal items of work accomplished by the construction divisions during the month:

ITEM.	Unit.	Atlantic.	Central.	2d Div.	5th Div.	6th Div.	Total.
Work excavation, dry.	Cubic yds...	2,161	810,100	90,134	103,014	1,005,409
Work excavation, wet.	Cubic yds...	512,089	*83,200	†286,127	726,256	1,607,672
Total work excavation	Cubic yds...	514,250	893,300	376,261	103,014	726,256	2,613,081
Plant excavation, dry.	Cubic yds...	33,600	12,104	45,704
Total Canal excavation.....	Cubic yds...	514,250	926,900	388,365	103,014	726,256	2,658,785
Material placed in dams	Cubic yds...	73,797	18,350	92,147
Concrete placed, locks, dams, and spillways.	Cubic yds...	8,680	8,058	16,738
Explosives used.....	Tons (Gross)	13.18	81.14	14.39	22.65	45.00	176.36
Rock drilled.....	Feet	12,075	195,422	44,734	40,522	14,787	307,540
Tracks removed.....	Miles	1.22	9.35	4.45	15.02
New track laid.....	Miles	1.34	6.79	0.65	8.78
Rock crushed.....	Cubic yds.	43,850	43,850
Cement used.....	Barrels.....	13,944	50	8,129	7,479	21	29,623
New roads built.....	Miles
Water mains laid.....	Feet.....	920	920
Sewers laid.....	Feet.....
Open drains and ditches dug.....	Feet.....	4,850	4,850
Average daily force.....	3,111	6,301	2,993	4,130	2,336	18,871
Average rainfall.....	Inches.....	15.11	11.82	6.74	5.46	6.74	11.28

*Removed by Fifth Division for Central Division.

†Removed by Sixth Division for the Second Division.

First Division—Office of the Chief Engineer.

LOCK GATE AND PROTECTIVE DEVICES.

All material for the 92 leaves has been completed and shipped, as well as that for the spare parts.

The status of the work in the several locks may be summarized, as follows:

Gatun—Work was in progress on all the leaves, 40 in number: Erection, 99.7 per cent completed; reaming, 99.9 per cent completed; riveting, 99.5 per cent completed; finishing, 84.27 per cent completed.

Pedro Miguel—Work was in progress on the entire 24 leaves: Erection, 99 per cent completed; reaming, 99.7 per cent completed; riveting, 97 per cent completed; finishing, 80.21 per cent completed.

Miraflores—Work was in progress on all of the 28 leaves: Erection, 97 per cent completed; reaming, 98.5 per cent completed; riveting, 90 per cent completed; finishing, 63.7 per cent completed.

ERECTION.

On September 1st, 99.2 per cent of the total tonnage of lock gate material in all locks had been erected. There are still to be erected 44 tons at Gatun, 52 tons at Pedro Miguel, and 546 tons at Miraflores.

LOCK ENTRANCE CAISSON.

On August 20, award was made to the Union Iron Works, for the construction of one lock entrance caisson at \$330,760, de-

livered at the port of Ancon.

INSPECTION AND ERECTION OF OPERATING MACHINERY AND ELECTRICAL EQUIPMENT.

Valve machines—The present status of the mechanical erection is, as follows: Rising stem valve machines, 95 per cent completed; cylindrical valve machines, 100 per cent completed; auxiliary culvert valve machines, 100 per cent completed. The electrical installation of the above machines is 50 per cent complete for the rising stem valve, 50 per cent complete for the cylindrical valve, and 65 per cent complete for the auxiliary culvert valve machines. The mechanical erection of the 18 guard valve machines is 77 per cent complete, and the electrical installation for these machines is 15 per cent complete.

Miter gate moving machines—Eighty-nine per cent of the mechanical, and 29 per cent of the electrical installation, is completed.

placed in concrete. The control house at Gatun is ready to receive the roof. Construction of the control house at Pedro Miguel has progressed to about the same point.

Illumination—At Gatun, the erection of the lamp posts, with cross-arms, is 75 per cent complete. At Pedro Miguel, 32 poles, without cross-arms, have been set.

Transmission line—Surveys were made from Mile 19 to Mile 26, inclusive, for the location of track-span bridges, and stakes were set for the alignment of concrete forms between Miles 40 and 41. During the month, 92 foundations for track-span bridges were placed to carry the transmission line, making a total of 161 foundations set to the close of the month.

EMERGENCY DAMS.

Gatun east dam—This dam has been completed, tested, and accepted.

Gatun west dam—This dam has been completed, tested, and accepted. The final tests of this dam were made during the month. The actual operating time of the various machines was practically the same as for the east dam at Gatun, as reported for the month of June.

Pedro Miguel west dam—All material has been delivered at the site. The pouring of concrete for the operator's house is finished. On August 28, this dam was swung across the lock for the purpose of making necessary adjustments. Riveting is complete. Painting of the dam continued during the month.

Pedro Miguel east dam—All material has been delivered at the site. During the month, a total of 14 tons of turning and wedging machinery was assembled and bolted in place. The switchboard house was completed. Installation of gate and girder hoisting machinery continued during the month. Riveting is complete. Painting continued during the month.

Miraflores west dam—A total of 1,890 tons of material was delivered at the site.

Miraflores east dam—All material has been delivered at the site. During the month, a total of 412 tons of turning and wedging machinery was assembled and bolted in place. Riveting is about 15 per cent complete.

AIDS TO NAVIGATION.

During the month, work was in progress erecting tower No. 10, Gatun Lake section, water stage registers at Gamboa, delivering material for the construction of beacon foundation at Bohio, and water stage register at the Gatun spillway; casting lamp bracket arms, lifting sockets in drain covers for chain fender pits, and beacon tops at the pile casting platform in Gatun; constructing transmission line across the Cut at Gamboa, clearing land for the Sixth Division, and making the necessary surveys and reconnaissances in connection with the construction of range towers, targets, beacons, etc.

Second Division—Office of the Chief Engineer.

SHOPS.

The designing and preparation of drawings for machine foundations, motorizing of machines, installation of machines, shafting, and motors for group drives were continued. The incorporation of architectural features in the designs of the general storehouse and of the oxygen-acetylene gas building was completed. The design and layout in pencil of the electrical power distribution systems in the machine and erecting shop, the forge shop, and the boiler and shipfitter shop were

completed, including the switchboard, transformers, and motor-generator sets to be installed in the machine shop for supplying direct current for variable-speed motors. The design and general layout of the illumination systems in the administration building, machine and erecting shop, and the forge shop were completed, and requisition submitted for the material to be imbedded in concrete walls of the administration building. The layout of piping and plumbing systems in the administration building was completed, and requisition for the material submitted. During the month, requisitions were submitted for all pipe and fittings to be installed in the pipe and conductor tunnel; for the transformers, switchboards, wiring, conduit, reflectors, etc., for the power and illumination systems in the foundry and planing mill; for the steel rolling doors for closing the ends of the machine and erecting shop, the forge shop, the boiler shop, and the foundry, and for the structural steel for the shop office building. Award was made for the slate stalls for nine toilet buildings, for six 5-ton cranes for the forge shop, and for one 500-ton forging press. The delivery on the Isthmus of all structural steel for Buildings 1 to 26, inclusive, and for the shafting supports in the machine and erecting shop was completed. The cement tile roofing is complete on the oxy-acetylene building, and 70 per cent complete on the machine and erecting shop. The pattern shop and foundry were transferred from Gorgona to Balboa. The first pour of bronze was made on August 14, and of iron, on August 20.

EXCAVATION AND CONSTRUCTION.

On the site of the coaling plant, dry dock No. 1, and the entrance basin, there were 72,006 cubic yards of earth, and 30,232 cubic yards of rock excavated, of which 90,134 cubic yards were work excavation and 12,104 cubic yards were plant excavation, a total of 102,238 cubic yards. For fill and embankment in preparation of site, cofferdam, railroad yard tracks, construction tracks, shop tunnel, dikes, etc., there were 107,044 cubic yards of excavation, of which 53,158 cubic yards were work excavation and 53,886 cubic yards were plant excavation. Six thousand, three hundred and sixty cubic yards of concrete were placed, in connection with shop foundations, shops, tunnel, caissons, quay walls, etc., which involved the use of 527,786 pounds of reinforcing steel. A total of 27,912 feet of piles was driven for shops and machinery foundations, operating tunnel, cofferdam, trestles, and alteration to sand dock, which consisted of 20,430 linear feet of wooden piles, 6,540 linear feet of sheet piling, and 942 linear feet of pipe piles. The total amount of track laid was 35,892 feet, and 23,495 feet of track were removed. The following work was performed on the quay walls and pier: Seventy-three linear feet of superstructure completed, 2,848 linear feet of caisson manufactured, and 39 piers were sunk to rock; 2,597.5 linear feet of caisson were sunk to rock, which is the largest amount of caisson work ever performed on the Isthmus in one month.

Fifth Division—Office of the Chief Engineer.

DISTRICT NO. 1—LOCKS, DAMS, AND DRY EXCAVATION.

Excavation—The total excavation amounted to 103,014 cubic yards, of which 72,904 cubic

yards were classified as rock, and 30,110 cubic yards as earth.

Filling and embankment—Dry filling in the prism of the west dam at Pedro Miguel was increased by 1,750 cubic yards, making the total amount of material used for this purpose 699,518 cubic yards. The backfill at Pedro Miguel was increased by 3,710 cubic yards, the total quantity in place at the close of the month being 1,023,913 cubic yards. At Miraflores, dry filling in the west dam was increased by 16,600 cubic yards, making the total quantities of dry and hydraulic filling in place at the close of the month 1,684,949 cubic yards and 661,048 cubic yards, respectively. The backfill at Miraflores was increased by 79,021 cubic yards, the total quantity in place on August 31 being 1,900,759 cubic yards.

Pedro Miguel Lock—Work consisted principally in loading out obsolete tracks and materials no longer needed, cleaning up, and grading off the backfill. Installation of the wooden fenders on the ends of the north and south guide walls was continued. The control house was made ready for the installation of the roof trusses.

OPERATION OF THE AUXILIARY CONCRETE CONSTRUCTION PLANT AT PEDRO MIGUEL.

Length of working day (hours).....	8.00
Average number of hours per day worked laying concrete, actual working time....	2.28
Average number of mixers per day.....	.35
Average hourly output per mixer, actual working time (cubic yards).....	7.81
Concrete laid (cubic yards).....	1,308.00

One ½-yard mixer was in service intermittently.

Miraflores Lock—Work in the locks proper was confined chiefly to the dismantling of berm cranes G and H, loading out of obsolete tracks and material, and general cleaning up. Chamber cranes Nos. 1 and 3 were dismantled by the contractors. Backfilling of the northeast and northwest wing walls was continued, and the filling of the middle and guide walls completed. Steamshovels continued to remove the dikes and high ground in the forebay of the locks and the excavation of the west forebay was finished. At the close of the month, the concrete work of the Miraflores spillway was completed, except for the opening left in the dam; the piers had been brought to grade; the footbridges were in position; the steel gates were in place in front of the openings, and four of them were in final position. Dry excavation in the prism south of the locks was practically completed, all equipment was removed, and the waters of the Rio Grande diverted into the prism between the locks and the dike. When the water in the prism reached elevation minus 29, the dike was blown up and, with the admission of the sea water, the prism was soon completely filled.

OPERATION OF THE PERMANENT AND AUXILIARY CONCRETE CONSTRUCTION PLANTS AT MIRAFLORES.

	Permanent Plant.	Auxiliary Plant.
Length of working day (hours).....	8.00	8.00
Average number of hours per day worked laying concrete, actual working time.....	.35	1.58
Average number of mixers per day.....	2.00	.23
Average hourly output per mixer, actual working time (cubic yards).....	19.23	7.63
Average amount of concrete laid per hour per berm or chamber crane, actual working time (cubic yards).....	39.11
Total concrete laid (cubic yards).....	2,844.00	3,180.00

Permanent plant—One berm and one chamber crane. **Auxiliary plant**—One ½-yard mixer, one 1-yard mixer, and locomotive cranes and derricks averaging 1.73 units per day.

DISTRICT NO. 4—ANCON QUARRY.

PERFORMANCE OF ROCK CRUSHER PLANT.

Length of working day (hours).....	8.00, 12.00
Average number of hours per day, actual working time.....	6.95
Average number of cubic yards crushed per hour per working day.....	171.96
Average number of cubic yards crushed per working hour.....	242.84
Total output for the month (cubic yards)...	43,850.00

12-hour day from 11th to 18th, inclusive.

DISTRICT NO. 5—GOLD HILL SLUICING PLANT.

Excavation during the month totaled 83,181 cubic yards; this unfavorable showing was due to pump troubles, line breakages, and the necessity of cutting through heavy rock, in order to extend the flume on proper grade into the area of active slides.

Sixth Division—Office of the Chief Engineer.

PACIFIC END.

Seven dredges were engaged in channel and inner harbor excavation at Balboa, removing 465,457 cubic yards of earth and 260,799 cubic yards of rock from the Canal prism, and 286,127 cubic yards of earth from the inner harbor and terminal basin site, a total of 1,012,383 cubic yards. At the close of the month, there remained to be removed from the Canal prism, not including fill, 2,564,838 cubic yards. The French ladder dredge *Gopher*, engaged in sand excavation at Punta Chamé during the entire month, removed 16,100 cubic yards.

ATLANTIC END.

Nine dredges were in operation during the month, removing 487,600 cubic yards of earth and 24,489 cubic yards of rock from the Canal prism. On August 31, there remained to be excavated 1,023,651 cubic yards. In addition to prism excavation, 171,851 cubic yards of coral sand from Margarita Bay, 6,651 cubic yards of earth from between piers Nos. 2 and 3 at Colon, 3,500 cubic yards of earth and coal from the coal dock slip, 21,564 cubic yards of coral sand from along the south side of pier No. 17, and 8,139 cubic yards of earth and 2,850 cubic yards of coral from around the corners of piers Nos. 15 and 16 and along the face of pier No. 15, were taken out. At the close of the month, 40 feet of water could be carried from zero to zero plus, 2,100 feet; 35 feet to mile post 6, plus 2,300 feet; 30 feet to mile post 6, plus 2,320 feet; 20 feet to mile post 6, plus 2,350 feet; 10 feet to mile post 6, plus 2,800 feet, at the barrier across the Canal.

Division of Municipal Engineering—Office of the Chief Engineer.

NORTHERN DISTRICT.

The construction of the new Colon waterworks progressed satisfactorily. During the month, the main floor of the filter building was finished, work in the sedimentation basin practically completed, and in the aeration basin all concrete was in place except the lamp posts. The Colon improvements were practically completed, with the exception of a small amount of curb and gutter on the west side of G street. The usual maintenance of the streets, sewers, and water system was carried on in Cristobal, Gatun, and New Gatun.

SOUTHERN DISTRICT.

At Balboa, the construction of the storm sewer in the new American townsite, and work on the West Indian townsite were continued. The usual maintenance work on sewer and water systems, streets, and roads was performed.

New Panama waterworks—Work was con-

tinued on excavation for the building and pump sump of Miraflores pump station No. 1. The concrete foundation for the intake house was completed and work on the walls was well under way at the end of the month. Excavation in connection with the Miraflores filtration plant was continued and the site for the wash water tank was cleared. On August 5, work was commenced on the Ancon high service reservoir.

Atlantic Division.

GATUN LOCKS.

The month's excavation totaled 18,543 cubic yards. The backfill placed during August amounted to 18,608 cubic yards; at the close of the month, the backfill was 97.08 per cent completed.

Receiving and issuing material—The issues of rock amounted to 8,927 cubic yards. Sand receipts amounted to 2,582 cubic yards, the issues to 3,398 cubic yards. Cement receipts totaled 8,414½ barrels, and the issues amounted to 8,904½ barrels.

Concrete work—A total of 200 cubic yards of concrete was laid, distributed, as follows: Upper locks, 24 cubic yards; lower locks, 176 cubic yards. The locks masonry is practically completed.

OPERATION OF CONCRETE CONSTRUCTION PLANT.

Length of working day (hours).....	8.00
Average number of hours per day worked, per strand of cableway, laying concrete, actual working time.....	0 296
Average number of mixers per day.....	2.00
Average hourly output per mixer, actual working time (cubic yards).....	60.00
Average amount of concrete laid per hour, per strand of cableway, actual working time (cubic yards).....	29.42
Concrete laid (cu. yds.), cableways.....	1,813
Concrete laid (cu. yds.), portable mixers.....	318
Concrete laid (cu. yds.), hand mixed.....	103
Concrete laid (cu. yds.) transmission duct line.....	197
Total amount of concrete laid (cu. yds.)....	2,431.00

GATUN DAM.

Construction during the month increased the total fill, as determined by car measurement, 78,795 cubic yards, making the total amount in place 21,962,362 cubic yards. On September 1, the dam was 99.83 per cent completed. Additions to the dry fill amounted to 73,797 cubic yards, which were placed on the north and south toes of the dam, east and west of the spillway, making the total dry fill in place 11,743,950 cubic yards.

GATUN SPILLWAY.

Concrete laid during the month amounted to 2,104 cubic yards, making the total quantity in place 227,749 cubic yards. Concrete work was 99.45 per cent completed at the close of the month.

Hydroelectric plant—The total excavation reported for July was not increased. During the month, 924 cubic yards of concrete were placed, making a total of 6,675 cubic yards.

WEST BREAKWATER—COLON.

Out of a total of 24,026 cubic yards of Porto Bello rock placed on the breakwater during August, 8,247 cubic yards were unloaded by cranes and 15,799 cubic yards by derrick barges. The total amount placed upon the breakwater to September 1 was 296,693 cubic yards.

Central Division.

The total amount of material excavated during the month was 843,700 cubic yards, of which 185,441 cubic yards were classified as earth and 658,259 cubic yards as rock. The entire amount was removed by steamshovels, 810,100 cubic yards being classified

as primary excavation and 33,600 cubic yards as plant excavation. Of the total primary excavation, 245,000 cubic yards were taken from within the lines of the Canal prism, and 648,300 cubic yards from without the Canal prism, the latter amount being excavated from slides, and from high levels as a preventive measure against slides.

The daily average number of steamshovels at work was 34.65, and the total number of shovel days was 901, as compared with 40.74 shovels at work and 1,018 shovel days in July. For comparison with the work done by steamshovels during the corresponding month of the previous year, the following table is presented:

Period	Excavated by shovels.	Classification of material.		Av. No. of shovels at work.	Wkg. days.	Av. yards per shovel day.
		Rock.	Earth.			
1912: Aug.	Cu. Yds. 1,094,132	Cu. Yds. 596,535	Cu. Yds. 197,597	34.11	27	C. Y. 1,187.93
1913: Aug.	843,700	658,259	185,441	34.65	26	936.00

Rainfall at Empire: 1912, 10.53 ins.; 1913, 10.46 ins.

The estimated amount of material removed and to be removed, according to the revision of July 1, 1913, is 115,696,455 cubic yards. Up to September 1, 1913, 108,931,355 cubic yards had been removed, leaving 6,765,100 cubic yards to be removed, in order to complete all excavation in this division. At the close of the month, 94.15 per cent of all excavation was completed. On August 31, the status of the work in the two sections which compose this division was, as follows:

	CULEBRA CUT.	Cubic yards.
Dry excavation accomplished.....	96,546,700	
Excavation to be accomplished.....	6,615,100	

CHAGRES SECTION.

Dry excavation completed.....	12,384,655
Wet excavation to be accomplished.....	150,000

Material dumped from the Naos Island trestle during the month totaled 31,557 cubic yards.

The daily average number of laborers at work was 5,738, while the average number of gold men working was 563.

Quartermaster's Department.

LABOR.

The force report of August 27 showed 39,962 men actually working for the Commission and the Panama Railroad Company. The actual working forces of the several contractors totaled 2,923 men. There was a surplus of labor throughout the month. Reports show an excess of emigration over immigration during the month of about 1,700.

BUILDINGS.

The work performed by the building division was greater in amount than for any previous month since building work was taken over by this department; it was practically all rush work. The number of men employed was greater than in any single month since the erection of quarters for American employes in the early days of the work; a great deal of overtime was put in. The amount of maintenance and repair work on Panama railroad buildings, taken over on August 1, exceeded anticipations. On February 14, it was estimated that 12 gangs of 40 men each, working continuously from March 1 to September 1, would complete the demolition and removal of all American buildings used as married and bachelor quarters in Gorgona. An average of only eight gangs was used and, in addition to work on Ameri-

can quarters, eight French buildings were moved and three of them reerected, all shop buildings were demolished and two of them moved and reerected, and the work was completed on the date set.

QUARTERS.

Save at Ancon and Balboa there is no congestion in bachelor quarters. The transfer of families from Gorgona was completed, and the regular assignment lists in all districts, closed in March last in order that the residents of Gorgona might be taken care of, were opened. The lists of applications for married quarters at Cristobal and Colon were consolidated, and the rules governing assignments to railroad and Commission quarters were made uniform. There was a decrease in the total number of applications.

MATERIAL AND SUPPLIES.

The value of material received was \$913,142.13. This material came forward in 37 steamers having a total weight of cargo, exclusive of lumber, piling, and ties, of 15,942 tons. Nine million feet of lumber were received during the month; this is the largest amount received in any one month during the American occupation.

Subsistence Department.

The Hotel Tivoli was operated at a profit of \$5,621.91. The operation of the line hotels, laborers' messes, and restaurants resulted in a net profit of \$1,725.70. The total net profit on subsistence operations during the month was \$7,347.61.

Department of Civil Administration.

COURTS.

During the month, 53 civil and 50 criminal cases were disposed of in the circuit courts, and 72 civil and 470 criminal cases in the district courts.

POSTS, CUSTOMS, AND REVENUES.

Money order sales amounted to \$402,985.80, and the fees to \$1,890.38. Receipts from stamp and card sales and newspaper postage aggregated \$8,214.22. The total collection of revenues was \$15,169.18, and the collections on account of court fines, costs, and fees, \$2,755.61. A total of \$164,968 was deposited in postal savings accounts, and a total of \$155,489 was withdrawn. At the port of Ancon, 20 vessels entered and 21 cleared; at the port of Cristobal, 19 entered and 21 cleared.

POLICE AND PRISONS.

The total number of persons arrested was 484, of whom 412 were men and 72 women. Fifteen convicts were committed to the penitentiary and 10 were discharged, leaving 143 convicts in confinement at the close of the month. The cost of guarding and subsisting these prisoners was \$2,466.25, and the value of the work performed by them on the roads of the Canal Zone was \$2,569.10.

FIRE PROTECTION.

Ten fires were reported in the Canal Zone. The property involved was estimated to be worth \$35,112. The damage occasioned was \$60.

Department of Sanitation.

The total number of deaths from all causes among employes was 39 divided, as follows: From disease 21, and from violence 18, giving an annual average per thousand of 4.31 and 3.69, respectively. The annual death rate per thousand among employes for the month of August, 1912, was 10.01.

The annual average death rate per thou-

sand in the Canal Zone, and in the cities of Panama and Colon, including both employees and nonemployees, was 24.23. This rate is based upon a population in the Canal Zone of 62,810, according to the census of February, 1912, and populations in Panama and Colon, respectively, of 47,172 and 20,232, as estimated by the Department of Sanitation. The annual average death rate per thousand among the same classes of population for the month of August, 1912, was 25.69.

Segregating the whites from the blacks, the annual average death rate per thousand from disease among employees was: Whites, 2.91; blacks, 4.69, giving a general average for disease of 4.31. For the same month during 1911, the annual death rate per thousand from disease among whites was 6.45; blacks, 6.23, giving a general average of 6.27; and for the same month in 1912: Whites, 6.91; blacks, 7.86, giving a general average of 7.63.

Among employees, deaths from the principal diseases were: Lobar pneumonia, four; malaria fever, E. A., three; tuberculosis of the lungs, three; abscess of the liver, entamoebic, two, leaving nine deaths from all other diseases and 18 deaths from external violence. No cases of yellow fever, smallpox, or plague originated on, or was brought to the Isthmus, during the month.

Respectfully,
GEO. W. GOETHALS,
Chairman and Chief Engineer.

Red Cross Finances

A statement of the finances of the Canal Zone Chapter, American National Red Cross, for the month of August, 1913, follows:

RECEIPTS:		
August 1, On hand.....	\$2,101.21	
August 12, Refund for meals furnished at Cristobal hotel.....	2.35	
August 31, Membership dues.....	1.00	
August 31, Interest credited at bank.....	7.10	
		\$2,111.96
DISBURSEMENTS:		
August 5, Deportation of destitute wife of ex-employee.....	\$25.00	
August 5, Postage.....	2.00	
August 8, Relief of American unable to get work.....	25.00	
August 19, Relief of destitute American, Cristobal.....	1.75	
August 25, Deportation of American lady, Ancon.....	30.00	
August 26, Making cat for advertising ball.....	10.60	
		\$93.75
August 31, Balance on hand.....	\$2,018.21	
JOHN L. PHILLIPS,		Treasurer.
Approved: LDW. SCHLOHAWER,		Chairman.

Missing Men.

Any one having information regarding the whereabouts of Mr. George Albert Grant, who is supposed to be on the Isthmus, is requested to communicate with the American Consulate General, Panama.

Any one having information regarding the whereabouts of Mr. Leslie Crawford, who is supposed to be on the Isthmus, is requested to communicate with Mr. Wm. O. Beckel, Box 18, Cristobal.

Any one having information regarding the whereabouts of Mr. J. S. Singer, who is supposed to be on the Isthmus, is requested to communicate with Mr. G. C. Singer, Hotel Veranda, Norristown, Pa.

Any one having information regarding the

whereabouts of Mr. John Ryner, who is supposed to be on the Isthmus, is requested to communicate with THE CANAL RECORD, Ancon.

Examinations by Board of Local Inspectors.

The Board of Local Inspectors will conduct examinations at the Administration Building, Ancon, on Wednesday, October 8, 1913, beginning promptly at 2 p. m., for persons de-

siring to procure the following classes of licenses: Pilots, masters, mates, marine engineers, chauffeurs, and navigators of motor boats. All applicants for licenses must procure from the Executive Office, Ancon, form of application and information respecting the filling out of same, at least one day before the examination. Applicants for chauffeurs' licenses must also bring automobiles.

LABOR FORCE AND QUARTERS IN AUGUST.

The force report for August 27 shows the actual working force of the Canal Commission to be 35,005; of the Panama railroad, 4,957, and of the contractors, 2,923, a total effective working force of 42,885 men, an increase of 401, as compared with the statement for July. The gold force on the Canal work, composed almost exclusively of white Americans, was 4,087, a reduction of 86, as compared with the previous month. A statement of the Canal force by divisions, follows:

DEPARTMENT OR DIVISION.	SILVER EMPLOYES*												Total silver.	Total gold.	Grand total.	
	Artisans.					European laborers.		West Indian laborers.

(1) Includes Sabanas police station, Taboga Island, Culebra Island, Palo Seco and Ninos Island. (2) Includes 74 Panamanians. (3) Includes nine East Indians. (4) Includes 54 Panamanians. (5) Includes Colon Beach, and Colon Hospital. (6) Includes 41 East Indians, 9 American citizens and, 59 Panamanians. (7) Includes 23 Asiatics. Gold force of contractors (included above), 31 families, and 481 bachelors.

CHANGE IN ORGANIZATION.

Central Division to be Abolished—Work Apportioned Among Other Departments.

The Central Division will be abolished at the close of business on Friday, October 10, the date set for the blowing up of Gamboa dike. It was first organized on July 1, 1909, succeeding the Department of Excavation and Dredging, and was assigned the Canal territory extending from the south toe of Gatun Dam to the north end of the lock site at Pedro Miguel, a distance along the axis of the Canal of 31.69 miles. It embraced the entire extent of the former Culebra and Chagres Divisions, which have since been known as the Culebra and Chagres sections of the Central Division. Its scope of operations also included the construction of the Naos Island breakwater, the clearing of timber from the channel in the lake section, and such municipal, sanitary, and building work as was included within its territorial limits. The Canal work was divided into five construction districts, and was placed in charge of Lieut.-Col. D. D. Gaillard, as division engineer, with the following assistants: Mr. Earl A. Bronk, chief clerk; Mr. Louis K. Rourke, assistant division engineer; Mr. A. S. Zinn, resident engineer; Mr. Mark W. Tenny, Mr. R. W. Hebard, Mr. W. L. Thompson, and Mr. George H. Ruggles, assistant engineers. Of the division engineer's assistants at that time, only two, Messrs. Zinn and Tenny, are now connected with the organization.

With the resignation of Mr. Rourke on May 1, 1910, a reorganization of the work was effected. The position of assistant division engineer was abolished, and that of general superintendent of construction created. The five construction districts were consolidated into four, as follows: The Chagres River district, extending from Gatun to the Chagres River, at Gamboa; the Empire district, extending from Gamboa to the Empire suspension bridge; the Culebra district extending from the suspension bridge to the railroad crossing north of Pedro Miguel Locks, and the Pedro Miguel district embracing the excavation between the railroad crossing and the locks, the dumps south of Pedro Miguel, and the construction of the Naos Island breakwater. At the beginning of the dry season in 1909, the clearing, grubbing, and burning of trees and brush in the Gatun Lake channel was begun, and a total of 950.4 acres was cleared up to June 30, 1910.

On May 10, 1911, the engineering branch of the division was reorganized. Previous to this time, the field and office work had been handled by the resident engineer at Empire, with offices in charge of assistant engineers at Las Cascadas and Paraiso. The two latter offices were abolished, and their work transferred to the office of the resident engineer at Empire. Slides became troublesome during 1910-11, but the movement at Cucaracha, with which both the French and the Americans have had to deal, ceased temporarily, the last steamshovel cut at this point having been made in the early part of June, 1911, on the permanent berm at the 95-foot level. The slide at Culebra began to assume a formidable aspect at this stage. Clearing in the Gatun Lake section, embracing a total area of about 1,132 acres, was completed during the fiscal year 1910-11.

During the fiscal year 1911-12, it was de-

cided to continue the plan of decreasing the pressure on the Canal banks at all places where breaks were likely to occur, by removing the material above, and this arrangement has continued without interruption until the present time. A board was appointed and submitted a report on the Naos Island breakwater, which had been giving trouble for some time, due to the sliding of the bottom under pressure caused by the weight of stone dumped from the trestle. The board recommended the building of a double trestle, which permitted of dumping on either side, thereby spreading the fill, and the plan was carried out.

The Chagres district of the division was abolished on August 19, 1912, and the title of it changed to the Relocation Dumps. On October 1, 1912, the Empire district was extended from the Chagres River to Station 17-60 the Culebra district from Station 1760 to Pedro Miguel Locks, and the Pedro Miguel district was changed to comprise the Central Division tracks south from a point opposite the north face of the northeast wing wall of Pedro Miguel locks, and the Miraflores and Balboa dumps. On September 26, 1912, the Empire district was made to include the slide on the west bank at Culebra. On November 16, 1912, the timekeeping of the Culebra and Empire districts was concentrated in the office of the division engineer, and on January 15, 1913, the same action was taken with respect to the relocation dumps. On July 1, 1912, the Empire shops, formerly under the division, and the Las Cascadas wrecking outfit, were transferred to the Mechanical Division.

The Naos Island dike, 3.29 miles long, continued to give trouble during the fiscal year 1912-13, and it has proved one of the most difficult pieces of engineering the division has had to contend with. Up to June 30, 1913, the trestle had been entirely completed, and filled with the exception of a stretch about 600 feet long. The settlement continued, and in one locality, the vertical movement was as much as 50 feet. Not a single foot of the trestle constructed during the past three years remains at present under the track for which it was intended, having moved to one side laterally as much as 100 feet. So large has been this movement that actual observations in recent months have shown that the quantity of stone required to complete the dike up to its present height was at least ten times the theoretical quantity which would have been required had the bottom been unyielding. The dike has nearly always slid out when the surface of the water is at the lowest elevation, at which time, the pressure on the bottom of the dike is maximum.

The distribution of the work after the division is abolished is outlined in an official circular printed on another page of this issue of THE CANAL RECORD. Lieut.-Col. Gaillard, division engineer, on account of ill health, was compelled to return to the United States on August 9, 1913.

The total amount of explosives used in this territory since the beginning of work by the Americans is approximately 38,729,000 pounds.

The total amount of material removed from the territory of the Central Division from May 4, 1904 until September 10, 1913, the date steamshovel operations were permanently suspended, including all accessory work, with

the exception of sluicing back of Gold Hill, is, as follows:

Fisc. yr. ending June 30	Earth.	Rock.	Total.	Per cent rock.
1904....	24,024	36,083	60,107	60.03
1905....	397,043	344,601	741,644	46.46
1906....	764,327	742,235	1,506,562	49.27
1907....	2,429,720	3,338,204	5,768,014	57.88
1908....	5,383,160	8,456,102	13,839,262	61.10
1909....	6,443,897	12,622,880	19,066,777	66.29
1910....	4,630,425	13,235,383	17,865,808	74.08
1911....	4,583,719	13,968,925	18,552,644	75.29
1912....	2,799,665	14,343,402	17,143,067	83.67
1913 (July & Aug.)	2,732,563	10,098,099	12,830,662	78.80
Total..	394,272	1,393,728	1,788,000	77.95
Total..	30,583,815	78,579,732	109,163,547	72.98

The yardage for September 1st to 10th inclusive, as shown by car measurement, was 136,627 cubic yards.

Of the above total, 105,743,176 cubic yards were removed from the Canal prism; 1,360,673 cubic yards from the Obispo Diversion, while 271,698 cubic yards consisted of outside work.

Of the three great construction divisions organized on July 1, 1908—Atlantic, Central, and Pacific—only one, the Atlantic remains in existence. The Pacific Division was abolished upon the resignation of Mr. S. B. Williamson, its division engineer, on January 1, 1913.

PERSONAL.

Lieut.-Col. Eugene T. Wilson returned from leave of absence on the United Fruit Company's steamer *Abangarez*, from New Orleans, on Thursday, September 25.

Maj. James Postell Jervey, Corps of Engineers, U. S. A., resident engineer in the Atlantic Division, has been transferred from the Canal Commission service, and, accompanied by his family, sailed for New York on the *Cristobal* on September 27. He arrived on the Isthmus on July 24, 1908, and was assistant engineer in the Atlantic Division until September 15 of that year. Upon the reorganization of that division, he was made resident engineer and placed in charge of the masonry construction of Gatun Locks, which is now completed. Major Jervey was graduated from West Point, with a commission of second lieutenant, Corps of Engineers, on June 11, 1892, and attained his present rank of major on February 28, 1908. His army career includes service in the Philippines; from February to September, 1906, he was engineer of the Moro province, and from that time until July of the following year, he was both engineer and secretary. In addition to his other army duties, he has served as instructor of engineering at West Point, and at the Engineer School at Washington. On October 15, Major Jervey will relieve Major F. W. Altstaetter, Corps of Engineers, of duties on the Ohio River pertaining to the Wheeling district.

Maj. George M. Hoffman, Corps of Engineers, U. S. A., resident engineer in the Atlantic Division, with headquarters at Gatun, has been transferred from the Canal Commission service, and sailed for New York on the *Panama* on Monday, September 29. He arrived on the Isthmus on January 10, 1908, and was made assistant division engineer of the old Chagres Division. With the beginning of operations on Gatun Dam and Spillway, he was placed in charge of this work by Lieut.-Col. Sibert, and leaves with both projects practically completed. He was made resident engineer on August 1,

1910. Major Hoffman entered the United States Military Academy at West Point on June 15, 1892, and upon his graduation in 1896, was made a second lieutenant in the Corps of Engineers. He was promoted to First Lieutenant on July 5, 1898; to Captain on April 23, 1904, and to Major on December 3, 1909. He has been transferred to the Mississippi River improvement service, with headquarters at Rock Island, Ill.

Mr. Arthur Sessions, superintendent of transportation in the Central Division, has resigned, effective October 15. He has accepted the position of general superintendent of transportation for the Bocas Division of the United Fruit Company, with headquarters at Bocas del Toro, Panama. He came to the Isthmus on May 10 1905, entering the service of the Canal Commission as trainmaster. He was appointed assistant superintendent of transportation in the old Culebra division on July 1, 1906, and was promoted to his present position on August 22, 1908.

Judge H. A. Gudger sailed for New York on the *Panama*, on Monday, September 29, on his annual leave of absence.

Gov. O. B. Colquit, Mrs. Colquit, and Miss Mary C. Colquit of Austin Tex.; Mr. and Mrs. J. N. Graves of Oklahoma City, Okla.; Mr. and Mrs. J. H. Bonner, Miss Garland Bonner, and J. S. Bonner, Jr., of Houston, Tex., and Mrs. W. E. Fitzgerald of Austin, were members of a party that arrived from New Orleans on the *Parissima* on Monday, September 29, on a sightseeing trip to the Canal.

Falling Off in Immigration.

According to the figures of the quarantine service the number of steamship passengers, who embarked at Colon for foreign ports during August, was greatly in excess of the number who landed; the total was 4,267, consisting of 1,935 cabin, and 2,332 steerage passengers. The number of persons who landed from foreign ports was 2,403, consisting of 1,189 cabin, and 1,214 steerage passengers. The number of persons who embarked over those who landed was 1,860. The immigration from the West India islands consisted of 135 cabin, and 858 steerage passengers. This is a falling off of 665 in the number of steerage passengers, as compared with the month of July, and shows that the information, which was recently disseminated throughout the islands to the effect that no more employment with the Isthmian Canal Commission is to be had, has been of benefit. Apart from the West Indies, the country sending the most steerage passengers to the Isthmus of late is Colombia. The number of steerage passengers from Colombian ports in August was 103, as compared with 139 in July. There were only 53 steerage passengers from Europe during the entire month. The number of persons arriving "in transit," practically all tourists, was 2,407, as compared with 2,306 in July, an increase of 101.

The number of persons who landed at the ports of Panama and Ancon during the month from foreign ports was 570, consisting of 453 cabin, and 117 steerage passengers. The number of persons who embarked for foreign ports was 554, consisting of 382 cabin, and 172 steerage passengers. The number who landed over those who embarked was 16. The net emigration from the Isthmus during August was 1,844.

COMMISSION CLUBHOUSES.

Activities of the Young Men's Christian Association.

GENERAL.

The moving picture schedule for the week October 6 to 11, is, as follows: Monday, Cristobal; Tuesday, Empire; Wednesday, Corozal; Thursday, Gatun; Friday, Culebra and Porto Bello.

On September 28, a meeting of the representatives of the Y. M. C. A. chess clubs was held at the Cristobal clubhouse, when it was decided to hold an all-Isthmian chess tournament, to begin on Saturday, October 4. Rules and regulations for the tournament were adopted and forwarded to the various clubhouses.

Through special arrangement with Mr. R. A. Linton, who has secured sole right to exhibit Taos, A. Edison's recently invented kinetophone (talking moving pictures), in several South American countries, these pictures are being exhibited at the Zone clubhouses during the current week. This is the first time that talking moving pictures have been exhibited on the Zone.

COROZAL.

Corozal defeated Gatun at basketball on Saturday evening, September 27, by a score of 23 to 14.

There was a large attendance at the "Smoker" held on Thursday evening, September 25. The program consisted of a baritone solo by Mr. Case; selections by the Tenth Infantry orchestra; violin solos by Mr. Whitehead; blackboard sketches by "Steve;" recital of an Irish poem by "Dick" Roberts; the "Canal digger's dream," by Mr. Biedermann; moving pictures; and two wrestling matches, one between Messrs. Howe and Grimm, won by Howe; in two minutes; and the other, between Christy and Martinoff, resulting in a draw after 10 minutes work. Cigars and refreshments were served.

Edison's invention, the kinetophone, or talking moving picture machine, will be at the clubhouse on Friday night of this week.

The Culebra basketball team is scheduled to play the Corozal team on Thursday night, October 2.

Culebra won three games in bowling from the Corozal players on Saturday evening, September 27.

CULEBRA.

The concert given by the Tenth Infantry band on Sunday evening was attended by over 300 people.

For the benefit of those who were unable to attend the first entertainment, Mr. D. V. Stratton repeated his lecture on the Sacramento Valley and the Panama-Pacific Exposition, illustrated by slides and moving pictures, on Monday night, September 29.

The regular moving picture show will be given Friday night, October 3, instead of Thursday night.

The Sunday night song service will be held on October 5, at 7.30 p. m. All are invited to attend.

EMPIRE.

Four games of basketball were played in the local league during the past week, at the close of which the league standing was, as follows:

	Won.	Lost.
Reds.....	3	1
Blues.....	3	1
Whites.....	2	2
Greens.....	0	4

The opening game for Empire in the Isthmian basketball league will be played at Cristobal.

The Empire tenpin bowling team defeated the Camp Elliott team three games on Tuesday evening, September 23, on the Empire alleys.

The opening game of the Isthmian tenpin bowling tournament will be between Empire and Camp Elliott, at Empire, on Saturday evening, October 4.

About 50 new books have been added to the library, and can be drawn.

A public debate will be held on Friday evening, October 3, to which all are invited to attend. Subject, "Resolved, that the United States should take military steps to pacify Mexico." Speakers for the affirmative will be Messrs. F. G. Swanson and W. F. Morrison; for the negative, Messrs. J. H. Beckmeyer and W. H. Dougherty. Mr. Watson will be chairman of the meeting, and Mr. Barrett, secretary.

GATUN.

President Brown extends a cordial invitation to all members of the Y. M. C. A. to join in the local chess club. In addition to the local tournament, Gatun will be represented in the interassociation chess tournament.

The standing of the local tournament on Saturday evening, September 27, was, as follows:

Name.	Won.	Lost.	P. C.
Logan.....	5	0	1.000
Marquand.....	8	2	.800
Farley.....	1	1	.500
Byrne.....	2	3	.400
Brown.....	2	4	.333
Carson.....	2	6	.250
Fiege.....	0	1	.000
Dashiell.....	0	3	.000

H. E. Dewey of Gatun has accepted the challenge

of Chas. Wehmler of Cristobal for a series of two matches of 150 balls each, to decide the pool championship of the Isthmus. The first match was played at Gatun on Tuesday evening, September 23, and resulted in a victory for Mr. Dewey, the score being 161 to 139. The second match to complete the 300 balls will be played at Cristobal in the near future.

The standing of the "Popular" handicap pool tournament on Saturday evening, September 27 was, as follows:

Name.	Won.	Lost.	P. C.
Dewey.....	8	0	1.000
Pettitt.....	4	1	.800
Townsend.....	3	1	.750
Von.....	5	3	.625
Bailey.....	4	3	.571
Kernish.....	3	3	.500
Johnson.....	1	1	.500
Gray.....	3	4	.450
O'Hara.....	2	3	.400
Bradley.....	1	6	.250
Reisner.....	1	4	.200
Dennis.....	0	3	.000
Wall.....	0	4	.000

Mrs. J. J. Walsh holds the duckpin record for ladies, having scored 136 during the month of September.

The following have joined the Gatun Y. M. C. A. orchestra: Messrs. McNeeley, Giddings, Fatland, Smith, Whistoun, and Lutz, Mr. and Mrs. D. R. Walker, and Mrs. McLeod. Others are welcome to join at any time.

CRISTOBAL.

A concert was given by the string orchestra of the steamship *Prinz August Wilhelm*, on Tuesday night, September 23. Gatun defeated Cristobal the same night at basketball; score 19 to 8.

"President Woodrow Wilson's Mexican policy" will be considered by Messrs. Hipp and Daly at the discussion club meeting on October 9. On the following Thursday night, Dr. C. C. Pierce, superintendent of Colon Hospital, will speak on "Sex hygiene." The public is invited to attend these meetings.

Members of the boys' department made the trip to Gatun Friday afternoon, September 26, to witness the passage of the first boat through the locks.

In a closely contested game, the Marines defeated the Cristobal team at basketball on Saturday night, September 27, by a score of 22 to 20.

On Saturday night, September 27, the Cristobal team took two out of three games at tenpins from Gatun by the following scores:

Gatun.	Cristobal.
O'Meara.... 168 130 162	Barrett..... 130 143 171
Wall..... 187 208 145	Buser..... 181 155 180
Sherrard.... 155 166 178	Collins..... 162 171 158
McCalley.... 167 158 118	Russell..... 161 176 167
Humphreys.. 187 179 198	Bullard..... 171 201 170
Totals.... 864 841 801	805 846 846

The opening games in the annual Isthmian tenpin league will be rolled on Saturday night, October 4. The members of the Cristobal team that will contend for the championship of the Isthmus in interassociation bowling for what will probably be the last time will be, as follows: J. W. Barrett, W. F. Barnum, H. C. Collins, Geo. Barte, C. M. Bullard, and W. G. H. Russell. The Cristobal association won the championship in 1907, and since that year the Empire association has won each series. Mr. Barte was a member of the Cristobal team in 1907, but for the past three years has been bowling with Gatun. Messrs. Barrett, Collins, and Bullard will enter on the fifth year as members of this team. Messrs. Barnum and Russell are new members of the team.

OFFICIAL CIRCULARS.

Central Division Abolished.

CULEBRA, C. Z., September 27, 1913.

CIRCULAR No. 183-z-1.

Effective October 1, 1913, the timekeeping and cost-keeping for the Central Division and the cost-keeping for the Quartermaster's Department will be transferred to the Chairman and Chief Engineer's Office, together with the personnel necessary to take care of the work.

Effective at the close of business October 10, 1913, the Central Division will be abolished. The following changes in organization will be made, effective October 11, 1913:

All surveying work will be transferred to Mr. W. G. Comber, resident engineer, Sixth Division, under whose supervision excavation in the wetted prism will be completed by dredging.

Transportation forces will be transferred to the Second Division of the Chief Engineer's Office, under the supervision of the superintendent of transportation, who will also have supervision of transportation in the First Division, the Fifth Division, and the transportation forces of the Fortifications Division on the Pacific side.

The steamshovel and other construction work of the Central Division outside the wetted prism will be transferred to this office, Mr. A. S. Ziun, resident engineer, reporting to the Chief Engineer. The force under Mr. Ziun will be carried on the rolls of this office.

The property accountability, now carried by the Central Division, will be transferred to the office of the Chief Quartermaster, where it will be maintained for account of this office. The Chief Quartermaster will issue the necessary instructions to consummate the transfer and see that proper memorandum receipts are secured.

Transfers of force will be authorized as soon as the several new organizations are approved and employees to be retained determined.

GEO. W. GOETHALS,
Chairman and Chief Engineer.

Issuance of Commissary Coupon Books.

CULEBRA, C. Z., September 26, 1913.

CIRCULAR No. 256-M:

Effective October 10, 1913, the following instructions relative to issuing coupon books will be observed by all concerned:

1. No \$2.50 commissary books will be issued. Issues will be limited to \$5 and \$15 books. (The \$2.50 books on hand will be used up by issuing to silver employees two books on each \$5 request until the stock is exhausted.)

2. Gold employees are instructed to use the facilities provided for purchasing books for cash, wherever practicable.

3. Employees who cannot supply themselves with books by purchase for cash are directed to order, between the 10th and 25th of each month, sufficient books to last one month, unless they expect to sooner leave the service.

4. Requests for books received before the 10th or after the 25th of the month will be honored for new employees, or in the case of an unforeseen emergency. Foremen or other officials who approve requests for coupon books will be held responsible for the proper observance of this rule.

5. All employees are instructed to submit no requests for coupon books to be issued against pay roll deductions prior to the day on which an amount sufficient to cover the total value of all the books ordered shall have been earned. Meal tickets issued must be charged against the amount earned before coupon books can be issued.

6. Requests for books must in all cases be fully and carefully filled out. The form of request has been revised (new No. C. E. 145-2). The revised form will be used exclusively after October 10. The old forms will be destroyed.

7. Foremen and others whose duty it is to approve and forward employees' requests for books will promptly forward them to the time offices daily, if the requests are in order.

8. Books will be delivered by the timekeeping office within two days after the request is made, or the employee will be notified of the reason for nonissuance. Failure to receive an acknowledgment of a request within two days should be reported immediately in writing to the Chief Clerk, Chairman's Office, Culebra, with a duplicate of the request.

GEO. W. GOETHALS,
Chairman and Chief Engineer.

Shipments of Employees' Household Goods Out of New York.

CULEBRA, C. Z., September 29, 1913.

CIRCULAR No. 186-G.

The attention of employees is directed to the fact that on shipments of household goods to the States the

railroads running out of New York City require that freight charges must be prepaid and that shipments must be forwarded in cases, not trunks. If the goods are shipped in trunks, the trunks must be crated. It would, therefore, be advisable for employees to ship household goods by the steamer preceding the one on which they take passage, in order that arrangements may be made to prepay charges when the employee arrives in New York City; otherwise, a delay may result or it may be necessary to forward the shipment by express, as this is the only way a shipment can be forwarded C. O. D. It is not possible to make arrangements to prepay all charges on the Isthmus when the shipment is destined for a point beyond New York City.

GEO. W. GOETHALS,
Chairman.

Use of Hand Shovels.

CULEBRA, C. Z., September 20, 1913.

HEADS OF DEPARTMENTS AND DIVISIONS:

Until further notice, hand shovels on construction work shall be used, as follows:

(1) For handling of earth; No. 2 round point, short handle, malleable iron "D" handle shovel.

(2) For general railroad construction and ordinary tamping in connection therewith; No. 2 round point, short handle shovel.

(3) For railroad maintenance work; No. 2 square point, short handle shovel for tamping, and No. 2 round point, short handle shovel for ditching, weed cutting, etc.

(4) For shoveling concrete material from boards, including sand, gravel, and broken stone; No. 2 square point, short handle shovel.

(5) For mixing and placing concrete; No. 2 square point, short handle shovel.

(6) No. 2 long handle, square point and round point shovels, respectively, shall be used whenever material is to be raised to such an elevation as will render their use economical.

GEO. W. GOETHALS,
Chairman and Chief Engineer.

Termination of Service Papers.

CULEBRA, C. Z., September 24, 1913.

HEADS OF DEPARTMENTS AND DIVISIONS:

In addition to termination of service papers, Form 171-1 C. E., at present being forwarded to this office, it is directed that an extra copy be sent direct to the superintendent of Ancon and Colon Hospitals.

It is also directed that these termination papers be prepared and forwarded as soon as possible after an employee has tendered his resignation, or his services are otherwise terminated.

GEO. W. GOETHALS,
Chairman and Chief Engineer.

Acting Purchasing Agent.

CULEBRA, C. Z., September 5, 1913.

CIRCULAR No. 501:

Effective September 6, 1913, and during the absence on leave of Capt. Courtland Nixon, Mr. Charles L. Parker, assistant depot quartermaster, will perform the duties of purchasing agent on the Isthmus.

GEO. W. GOETHALS,
Chairman.

Acting Depot Quartermaster.

OFFICE OF CHIEF QUARTERMASTER,

CULEBRA, C. Z., September 12, 1913.

Effective September 6, and during the absence on leave of Capt. Courtland Nixon, Mr. Charles L. Parker will act as depot quartermaster. He is authorized to receive and receipt for supplies for the Isthmian Canal Commission consigned to Capt. R. E. Wood, or the Chief Quartermaster, Isthmian Canal Commission, to accomplish bills of lading, to certify invoices for payment as to quantity and quality of supplies shown on such invoices; and, in general, to perform such duties as properly belong to the position of depot quartermaster.

R. E. WOOD,
Chief Quartermaster.

Change in Circular Number.

PANAMA RAILROAD COMPANY,

OFFICE OF GENERAL SUPERINTENDENT,

COLON, R. P., September 24, 1913.

CIRCULAR No. 216:

*Amended schedule, resulting from temporary withdrawal of the *Albama* for repairs.

Panama Railroad Company's steamers sail from Pier 11, Cristobal, at 3 p. m.

Royal Mail steamers leave for New York on alternate Tuesdays at 1 p. m.; for Southampton on alternate Tuesdays at 10 a. m.

United Fruit Company's ships for New Orleans direct, leave on Thursdays and Saturdays at 3 p. m.; ships for New York via Kingston, on Tuesdays at 1.30 p. m. and Thursdays at 1.30 p. m., for Bocas del Toro on Mondays at 5 p. m.; for Limon, via Bocas del Toro, on Tuesdays at 5 p. m.; and for Limon direct, Tuesdays at 3 p. m.

Hamburg-American steamers sail for New York, via Kingston and Santiago de Cuba, on Tuesdays; the *Prinz Joachim* and *Prinz August Wilhelm* at 10 a. m. and the *Emil L. Boas* and *Carl Schurz* at 2 p. m.

CANAL

RECORD

Volume VII.

ANCON, CANAL ZONE, WEDNESDAY, OCTOBER 8, 1913.

No. 7.

The Canal Record

Published weekly under the authority and supervision of the Isthmian Canal Commission.

The Canal Record is published free of charge, one copy each to all employees of the Commission and Panama Railroad Company whose names are on the gold roll. Extra copies and back numbers can be obtained from the news stands of the Panama Railroad Company for five cents each.

Address all Communications,

THE CANAL RECORD.

Ancon, Canal Zone,

Isthmus of Panama.

No communication either for publication or requesting information, will receive attention unless signed with the full name and address of the writer.

NOTES OF PROGRESS.

Destruction of Gamboa Diike.

The dynamiting of Gamboa dike will take place at 9 a. m., on Friday, October 10. The drilling of holes was completed on Wednesday, October 8, and the work of loading them was begun the day before. Over 1,000 holes, extending over every part of the barrier, have been drilled to an average depth of 35 feet. Owing to the fact that the 24-inch discharge pipes leading from the lake into the Cut has been increased by two from the number first planned, making six in all, the Cut between the dike and Cucaracha slide is filling rapidly, and it is estimated that by the morning of the 10th, the water will be within about five feet of the lake level. On Tuesday, October 7, the stage of water in the lake was 67.2 feet, and that in the Cut at 57.6 feet above sea-level. It is the present plan to ditch through the slide at Cucaracha on the day before the dike is destroyed. Work on the dredge landing and pontoon bridge approach at Paraiso has been advanced in anticipation of this event, and on Saturday night, the steamshovels completed the work of excavating the recess in the east bank of the Canal. It is necessary to build a concrete pier for the east bridge approach, and this work had reached the point on Tuesday where the concrete could be poured. This work is expected to be so far completed by Friday as to be entirely out of the way of the water when it enters this part of the channel.

Seismic Disturbances.

An earthquake shock, which, in intensity, has not been equalled since the establishment of the Ancon seismograph station, occurred at 11.25 p. m., on Wednesday, October 1. The needles on the Ancon seismograph were thrown off the paper, and the amplitude of the shock was only recorded to 75 millimeters. Its duration so far as the perceptibility of individuals is concerned is estimated to be

about 25 seconds. A second pronounced shock of less violence than the first occurred at 11.43 p. m., October 1. The seismograph recorded vibrations for a period of one hour and 16 minutes after the movement first began. The direction as indicated by the record was from southwest to northeast, and the approximate distance of the epicenter of the disturbance was 115 miles. The intensity was Force VI on the Rossi-Forrel scale, I to X.

The above shock was only one of a series, which began at 1.48 p. m., on Wednesday, October 1. All appear to be related and to have a common point of origin, thought to be southwest of Panama city in the province of Los Santos. From 11.25, Wednesday night, until 5.18 the following morning, eleven distinct movements were recorded, and up to and including Monday, October 6, there had been 24, three only of which could be classed as pronounced. The third shock to be plainly felt occurred at 5.06 p. m., on Saturday, October 4, but it was little more than half the intensity of the first severe disturbance and lasted not more than seven seconds.

Advices received by the Panama Government from points in the interior, and wireless messages to the United Fruit Company from Bocas del Toro and Port Limon, indicate that Wednesday night's shock was not experienced in Costa Rica; that while noticeable at Bocas del Toro, and at David, in the province of Chiriqui, it was not strong enough to do any damage, and that its effect so far as known was greatest in the province of Los Santos about 110 miles distant from Panama City. In the village of Los Santos, the tower of the church, destroyed by the earthquake of September 7, 1882, was again toppled over; the government building was wrecked; the walls of the police station cracked, and two or three dwellings damaged. In Macaracas, in the same province, the church tower fell, and at Las Tablas some damage was done to buildings. Late advices received by the Panamanian Government indicate that probably the heaviest damage was done in the vicinity of Tonosí, in the province of Los Santos. No fatalities have been reported aside from the death of a woman from fright in Penónome, province of Coclé. In Panama City, there was no damage of importance. Wednesday night's shock caused slight cracks to develop in the walls of some three-story stone buildings on Twelfth street, near Santa Ana Plaza, and the one on Saturday afternoon had a similar effect on a stone building on lower Central avenue. There has been no damage whatever to any part of the Canal work.

Mr. D. F. McDonald, the Commission geologist, and Mr. W. C. Johnston, assistant chief engineer of the Republic of Panama, left on the Panama Steamship Company's *Panama* on Tuesday, October 7, to study the effect of the disturbances in Los Santos province.

DREDGES FOR CULEBRA CUT.

Will be Raised from Atlantic and Pacific Entrances to Complete Channel.

It is purposed to pass a portion of the Atlantic entrance dredging fleet through Gatun Locks during the forenoon of Thursday, October 9, for the excavation of Gamboa dike. Fourteen vessels will be lifted to the level of Gatun Lake and towed through the Canal channel to the vicinity of Gamboa, where they will lie ready to begin operations as soon as the blowing up of the dike has been completed. The equipment will be handled as three groups, the pieces in each group being lashed together and towed by a tug. The French ladder dredges No. 1 and No. 5, with two dump scows of 400-cubic yards capacity, will compose one group; a second group will be two dump scows, a 75-ton coal scow, and a coal hoist; and the third group will be one 600-ton coal barge and two former cement lighters, adapted to hauling coal. It is believed that the groups can be so arranged and handled as to be put through the locks together, necessitating only one filling of each lift. After the groups have been conveyed across the lake, two of the tugs will return to the Atlantic entrance, leaving one to handle the barges from the dredges and for general service in the dredging operations. Forces of the Sixth Division have staked off areas in the old channel of the Chagres River, opposite Gorgona, for the disposition of the spoil. The dumping grounds will be indicated by flags on stakes, and at night, by lights.

By the time the two ladder dredges have cleared the entrance to Culebra Cut, pipeline suction dredges No. 4 and No. 86 will have been brought up from the Atlantic entrance. They will be towed along the Cut through the completed channel to the foot of Cucaracha slide, which is about six and a half miles from the north end of the Cut. Since steamshovel excavation was discontinued at the slide it has pushed across the channel, and is now blocking the flow of water from Gatun Lake. The first work at the slide will be to cut a trench to let the water through to the remainder of the Cut, about two and a half miles to Pedro Miguel Locks. Water can then be passed through the wall culverts of the lock, if desired, to hasten the filling of Miraflores Lake and allow the passage of dredging vessels from the Pacific side. When this has been accomplished, pipeline dredge No. 85, an oil barge, a small lighter, a steam launch, and a barge to handle the removable span in the railroad bridge across the Cut at Paraiso, will be detached from service in the Pacific entrance and raised through Miraflores and Pedro Miguel Locks to the south end of the Cut, and towed to the south side of Cucaracha slide. After the channel has been cleared, this dredge will be returned to the Pacific entrance.

Two pipeline suction dredges will then

be available for service at the bottom of the slide. As the normal monthly output for each of these is approximately 200,000 cubic yards, it is expected that the two will be able to handle this excavation without difficulty. The laying of discharge pipes and the installation of two relay stations for handling the spoil up the west bank of the Canal and over into the Rio Grande valley is sufficiently advanced to be ready for service as soon as needed.

One of the pipeline dredges, No. 4, to be used on this work, came from the dry dock at Mount Hope on September 26, after extensive overhauling and adaptation to the service required of it. Pontoons, five feet three inches wide by nine feet six inches deep were fitted on either side of the hull, extending its entire length, 112 feet six inches, to provide storage for 400 barrels of fuel oil. This will make the dredge relatively independent of oil barges and allow it greater freedom of movement. Moreover, the addition, by increasing the beam of the vessel from 29 feet six inches to 40 feet, enlarges its displacement and effects a desirable increase of freeboard. Additions will be made to the superstructure to provide quarters for the silver, as well as the gold members of the crew.

Dredge No. 85 is only used on the south side of Cucuracha, until a channel is cut through allowing Nos. 4 and 86 to pass through the Cut, to station on south side of slide when No. 85 returns to the terminals at Balboa.

Permanent Water Stage Registers.

Forces of the Lighthouse Subdivision are engaged in erecting, for the Second Division, four concrete towers for permanent water stage registers to record the elevation of the surfaces of Gatun and Miraflores Lakes when the Canal is in operation. One of these is situated at Gatun, between the Panama railroad and the present edge of the lake, and about 200 feet south of the concrete wharf for small vessels. The base of this tower is 72 feet above sealevel and the floor of the gage-recording room is at elevation plus 92. At the upper end of the lake and north end of Culebra Cut, is a second tower, situated on the east bank of the Chagres River, about 300 feet upstream from the Gamboa bridge of the Panama railroad. The base and floor of this tower are at elevations 72 and 100 feet, respectively. The higher level than at Gatun is for the purpose of better recording the rises in the river.

Two other towers are at the upper and lower ends of Pedro Miguel Lock. The one at the outer end of the northeast wing wall will record the levels at the extreme southern end of Culebra Cut. It is set at the same level as the tower at Gatun. The other, at the end of the southeast wing wall, will gage the surface of Miraflores Lake. Its base is 38 feet above sealevel, and the floor, 68 feet.

A fifth tower will be constructed below the Gatun Dam spillway. Part of the material for it has been delivered at the site, and erection will begin shortly.

In construction, these are modified forms of what has been designated locally as the Atlantic and Pacific type of range tower. The concrete was placed between collapsible steel forms which were used for the erection of the lighthouses along the two entrance

channels. The roof has been extended, the interior stairway omitted, and a bridge footwalk added, at the level of the floor. The foundation bases of the towers are concrete slabs, octagonal in plan, having inscribed diameters of from 16 to 18 feet, according to the depth of water in which the towers are built. The inside of the shaft is circular, seven feet 10 inches in diameter, and the wall varies in thickness from four inches at the top to 15 inches at the base. The towers are designed to withstand any shock of wave action to which they may be subjected.

All of the towers will be equipped with automatic water stage registers, and those at Gamboa and Pedro Miguel will each, in addition, be equipped with an anemometer, anemoscope, and meteorograph.

Order Retaining Lieut.-Col. D. D. Gaillard as a Member of the Canal Commission.

WAR DEPARTMENT,
WASHINGTON, D. C.

Lieut.-Col. D. DuB. Gaillard, Corps of Engineers, U. S. A., Member of the Isthmian Canal Commission now on leave of absence, will be retained as a member of the Isthmian Canal Commission and is hereby granted leave of absence with full pay on status of sick leave, until further notice.

By direction of the President.

LINDLEY M. GARRISON,
Secretary of War.

September 20, 1913.

Concrete Work in Locks and Spillways.

Concrete work in the Canal locks is nearly completed, the aggregate amount in place at the close of work on October 4, being 4,480,728 cubic yards.

A statement of the concrete laid in the three sets of locks for the Canal, and in Gatun and Miraflores spillways, as of October 4, follows:

GATUN LOCKS.
The last concrete for the locks proper, as distinguished from that necessary to finishing work by the First Division, was mixed and placed on August 16, 1913. At the close of work on that day the total amount of concrete placed by the Atlantic Division amounted to 2,045,485 cubic yards.

CANAL ZONE SCHOOLS.

Reopened October 1, With an Increased First Day Enrollment of White Children.

The Canal Zone schools were opened on Wednesday, October 1, with an increased enrollment over the first day last year in the schools for white children, of 54. There are 11 grade schools for white children, and high schools at Ancon, Empire, and Gatun. The first day's enrollment by schools, follows: Ancon (grades), 175; Corozal, 103; Pedro Miguel, 61; Paraiso, 28; Culebra, 30; Empire, 161; Las Cascadas (church building), 25, (hotel building) 23; Gatun, 98; Cristobal, 188; Porto Bello, nine; high schools, Ancon, 23; Empire, 18; Gatun, 21; Total 963.

To this total should be added 13 children living at Bas Obispo, assigned to school at Las Cascadas, who were not enrolled on the first day, because transportation was not provided for them. Forty-three regular teachers and two substitute teachers are employed in the white schools.

In 10 schools for colored children there were 550 children enrolled on the first day. This number does not include the enrollment in the school for native children at Majagual, the report of which has not been received. Following is the enrollment by schools: Ancon, 92; Paraiso, 25; Cucaracha, 20; Culebra, 80; Empire, 85; Mandingo, 25; Gatun, 39; Mount Hope, 11; Cristobal, 173. Twenty-five colored teachers are employed in these schools.

The assignment of white teachers is, as follows:

Ancon-Empire high schools—Albert R. Lang, principal, N. F. Petersen, Frederika Hine, Dorothy Riedesel, Amelia C. deLassus.

Ancon—Bertha H. Mallory, principal, Shellie M. Dunn, Sara D. Elwell, Mallye A. DeCamp, Jessie Wilson Clark, Etta Reed.

Corozal—Mary M. Shea, principal, Anna Mosteller, Anna R. Young, Edna M. Spencer, Mary Edmonds.

Pedro Miguel—Ida O. Erickson, principal, Clelia Crespi Calhoun, Florence Cruson.

Paraiso—Mary F. Adams.

Culebra—Jennie D. Perkins, principal, Ida Keys Lawlor.

Empire—Elise Cage, principal, Natalie Hine Humphrey, Lucy Nichols, Dove L. Prather, Jeannette McClure, Ida B. Potts.

Las Cascadas—Hotel building, Marie Birmingham; church building, Charlotte Carter.

Gatun—Jessie E. Daniels, principal and high school, Archie Pratt, high school, Shirley C. Dorsey, Annie E. Stone, Ezoa Smith, Cora E. Sessions.

Cristobal—Emma M. Cobban, principal, Wenonah Whiting Dillon, Edith McIntyre McCarthy, Florence M. Dildine, Helen Daniels Parmelee, Leah A. Zook.

Porto Bello—Verna M. Sawtelle.

Substitute teachers—Grace E. McCray, primary grades; Georgia T. Munroe, upper grades.

Accidental Drowning.

John F. Stanton, a private in Company A, Tenth Infantry, at Camp Otis, was accidentally drowned in the Canal, at a point about opposite the camp, about noon on Sunday, September 28. He was born in Philadelphia a little over 21 years ago, was unmarried, and had been on the Isthmus since May 13, 1913. A friend, Charles Landas, lives at No. 512 North Eleventh street, Philadelphia.

MIRAFLORES LAKE.

Rise Began October 1, to Provide Passage Between Pedro Miguel and Miraflores Locks.

The formation of Miraflores Lake began on October 1, when a timber bulkhead was placed across the drainage culvert in the spillway dam, which, with its bottom at 5.33 feet above sealevel, was the final diversion of the Rio Grande and its tributaries, the Pedro Miguel, Caimitillo, Camerón, Cocoli, and Dominica Rivers, during the construction of the spillway. The opening is being filled with concrete.

It is estimated by the hydrographic office that the normal run-off, calculated from 22 years' rainfall measurements, from the 55.5 square miles of lake watershed will raise the lake surface to elevation 35.8 feet above sealevel by the end of October; to elevation 38.67, level with the top of the ogee of the spillway dam, on November 4; and to the

The location and outlines of Miraflores Lake are indicated in the accompanying sketch. The purpose of the lake is to avoid the excavation which would have been required for a sealevel channel from the site of Miraflores Locks to Pedro Miguel, approximately 15,000,000 cubic yards. The bottom of the channel across the lake, between the two locks, is 10 feet above sealevel, which is 55 feet higher than that of the sealevel section on the Pacific side. A part of the channel through Miraflores Lake is naturally at or below elevation plus 10, and some excavation was made by the French in this area. An old ladder dredge, abandoned in the channel it was cutting through this area, has recently been set afloat, after repairs to its hull, by the rising waters of the lake. A secondary use of the lake will be as a source of water supply for the Canal villages on the southern slope of the continental divide, and for

the T-culvert in the east wall at the south end of Pedro Miguel Locks, at about 12.50 p. m., on Thursday, October 2. Both ends of the culvert had been dammed by bags of sand to prevent the inflow of water while the men, nine in number, were at work. The barrier at the south end gave way, and caught two men before they could escape. The other five workmen succeeded in reaching a place of safety.

Joseph Brown, a Jamaican, check No. 19,907, employed as a carpenter in the Division of Municipal Engineering, was struck on the head by a rock from a "doby" blast at the site of the new reservoir on Ancon Hill, at about 4 p. m., on Friday, October 3, sustaining injuries from which he died less than an hour later.

Wilford Walkin, a native of Fortune Island, check No. 8922, employed by the Panama railroad, was drowned at Balboa at about 4.25 p. m., on Saturday, October 4. He attempted to board I. C. C. engine No. 533, but missed his footing and fell between a wooden trestle into the water. The body was recovered.

Obituary.

Mrs. J. F. Hern, residing at Ancon, died at Ancon Hospital on Monday, September 29. She was 34 years of age, had been on the Isthmus seven years, and is survived by her husband, an employee of the Fifth Division at Balboa.

Samuel Jackson, an American in the employ of the United States Steel Products Company, with residence at Balboa, died at Ancon Hospital on Wednesday, October 1. He was 24 years of age, was unmarried, and had been on the Isthmus four months.

Word has been received of the death of William T. Reynolds, formerly a superintendent of construction in the Central Division, who resigned on September 13, 1913, and left for the United States on the *Colon* on September 14. He died at a hospital in New York City soon after the steamer docked. He entered the service of the Canal Commission on October 15, 1906, and was continuously in the employ of the old Culebra Division, and later the Central Division, up to the time of his resignation. He was a native of Maryland, 40 years of age, and was unmarried.

Columbus Day Exercises.

The exercises under the auspices of the Knights of Columbus, in observance of Columbus Day, will be held this year at Panama, on Sunday, October 12. At 9.15 a. m., or as soon thereafter as the arrival of the first train from Colon will permit, high mass will be sung at the Cathedral; lunch at Hotel Central at 12 noon; regular meeting of Panama Council and election of officers for ensuing year, 1 p. m.; exemplification of the first and second degrees, Ancon Hall, 2 p. m.; banquet, Hotel Tivoli, 9 p. m. Special trains will leave for both Bas Obispo and Colon directly after the banquet. Rooms will be provided at the Hotel Tivoli for rest and dressing. All Catholics, irrespective of affiliation with the Knights of Columbus, are extended an invitation to participate at the mass, lunch, and banquet.

Married.

CRITCHLOW-MOHLER—At the home of the bride's parents in Ithaca, N. Y., on Wednesday, September 24, Miss Grace Isabel Mohler to Mr. Howard Thompson Critchlow, of Prospect, Pa. Canal Zone residence, Culebra.

MIRAFLORES LAKE.

Showing relation to Pedro Miguel and Miraflores Locks, Panama railroad, tributary streams, etc.

normal operating level of 55 feet above the sea, by December 4.

Should it be desired to fill the lake earlier, however, water may be drawn from the high level of Gatun Lake and Culebra Cut, through the culverts of Pedro Miguel Locks. To fill Miraflores Lake completely, from dry land to proposed normal level, would lower the surface of Gatun Lake, from its present elevation of about 67 feet, not more than .35 foot. Filling Culebra Cut will lower Gatun Lake about .118 foot. Hence, to fill both Cut and Miraflores Lake would lower Gatun Lake from its present level less than six inches, which is equivalent to retarding its rise about three days. Further comparison of the two lakes is shown herewith:

	Miraflores,	Gatun.
Elevation of surface, ft.	55	85
Area watershed, sq. miles	55.5	1,320
Area surface, sq. miles	1.88	163.4
Capacity, million cu. feet	11.2	183,136.2
Canal channel, miles	1.4	*31
Width of channel, feet	500	300 to 1,000
Elevation, bottom of channel, ft.	10	40

*Including nine miles in Culebra Cut.

Panama, for which a pumping and filtration plant, capable of handling about 15,000,000 gallons daily, is under construction on the east side of the lake.

The northeast section of the lake area is crossed by the relocated line of the Panama railroad, between Miraflores tunnel and Pedro Miguel. Filling is now in progress to increase the area available for Pedro Miguel village, east of the railroad, and a depressed area between the track and Pedro Miguel Locks is also to be raised above the 55-foot contour. The Canal village of Miraflores is being removed, and the native houses in the lake area have been demolished or burned. The Sanitary Department has cleared the area of trees and brush below the 55-foot level, in order to prevent as far as possible the breeding of mosquitoes.

Fatal Accidents.

George C. Gunthorpe, an Antigua, check No. 165861, employed as a carpenter in the Fifth Division, and William Elliott, a native of the island of Nevis, check No. 161764, employed as a laborer in the same division, were accidentally drowned while working in

EAST BREAKWATER.

Construction Contemplated as a Preventive Against Silting in Atlantic Channel.

The construction of an east breakwater in Limon Bay is contemplated, and some preliminary work has been authorized. The Toro Point, or west breakwater, now nearly completed, with the exception of the armored portion, is designed for the protection of the Colon and Cristobal harbors and the shelter of vessels against "Northers," and its line of direction is normal to the prevailing wind during these storms. It was not built to afford protection against wave action produced by the "Trades," which prevail almost constantly in these latitudes during the dry season, and which generally come from the north or northeast. The trade winds will not endanger the safety of vessels using the Canal, and, therefore, do not on this account enter into the necessity for an east breakwater.

Another factor, however, has developed, one which has an important bearing on the cost of maintaining the Atlantic channel. Soundings and surveys that have been made from time to time show that the trade winds wash the shores of Limon Bay in the vicinity of the Canal entrance, and a survey made in March, 1913, showed that the channel in the vicinity of the Canal entrance, previously excavated to its full depth of 41 feet, had filled, so that a depth of but 27 feet was available, and this only in the middle of the channel. During the 12 months previous to this time it was estimated that the accumulation of silt in the channel amounted to 2,213,082 cubic yards. An investigation of this condition led to the belief that this silting was in a large measure due to the trade winds, which, upon disturbing the soft material in the bottom of the bay into a state of suspension, later deposited it again, during cessation of the winds, a large part settling in the deeper channel. The soundings showed that the deposit was generally uniform in the channel, with the exception of that part near the shores of the bay.

During the visit of the Atlantic Fleet to the Canal about nine months ago, it lay at anchor under the lee of the west breakwater, and it was a difficult matter at times, due to the strong "Trades" blowing, for small boats to reach the ships. As a result of this condition, the General Board of the Navy recommended the construction of a detached breakwater for the protection of the anchorage area, which would afford security to small

boats, and to barges engaged in coaling, while lying alongside a ship.

It is proposed to extend the new breakwater out from Coco Solo Point on the east side of the Bay of Manzanillo, and authority has been granted for the construction of a railroad track to Coco Solo Point, leading off from the Mount Hope-Margarita Point line, thereby establishing a track connection with the Panama railroad main line at the Cristobal yards. The length of the new track will be about 3,500 feet. A quantity of piling for building the breakwater trestle has been ordered, together with a new piledriver. Investigations have been conducted in the endeavor to find a quarry more accessible than the one at Porto Bello. A rock deposit near Mile Post 24½, north of Caimito, was explored, but it is doubtful if sufficiently large rock can be procured for the armor of the breakwater. It is probable that rock for the interior will be quarried at this locality.

Transfer of Masonic Temple to Panama Railroad.

The Masonic lodge has relinquished all of its rights and equities in its partly finished temple at Colon, including the original contract with the McClintic-Marshall Construction Company, to the Panama railroad, and has also released the McClintic-Marshall Company from its contractual obligations; the railroad, therefore, now owns the building, and has recovered possession of the land on which it stands through cancellation of the lease. The Masonic lodge has reserved the right to purchase the building from the railroad within five years at the full cost price, plus eight per cent interest.

The restoration of the foundations was undertaken by the Panama railroad, and involved a much greater amount of work than was first anticipated. Diamond drill borings made over the site of the structure showed that the foundations rested on filled ground, consisting of earth and rock, superimposed on a bed of decomposed coral rock and soft mud. This had very little supporting power, as demonstrated by the fact that the rate of progress in drilling was, in some cases, as high as 60 feet an hour. The lowest point was found to be in the northeast corner of the building, where the foundations had settled 1.53 feet. The place of least settlement was at the southwest corner. It was found that the Eleventh street side had settled more than the remaining portion, and as the entire structure was considerably out of plumb, it was determined to adjust the side walls and

the interior foundations to agree with some given point. The Eleventh street side was accordingly selected as the base to work from, and it was decided to settle the west and south sides to make their foundations agree with those on the Eleventh street side. The plan adopted was to drive untreated piling entirely around the exterior of the building; to sink 10 and 12-inch wrought iron pipe, filled with concrete, along the inside walls; to install new foundations of 16 and 20-inch pipe, filled with concrete, for nine individual columns in the center of the building, and to put in a number of reinforced concrete footings.

PERSONAL.

William Jennings Price, the new American Minister at Panama, arrived on the Isthmus on the *Colon*, on October 3. He made a formal call upon Col. Goethals at Culebra on October 6, presented his credentials to the Minister of Foreign Affairs of the Panama republic on October 7, and entered upon his duties as Minister, after calling officially upon President Porras, on October 9. Mr. Price is a resident of Danville, Ky., and is a lawyer by profession. He has held no public office previous to his present position.

Mr. W. W. Warwick, Assistant Comptroller of the Treasury, accompanied by Mrs. Warwick, and their son, arrived on the Isthmus on the *Ancon*, on Thursday, October 2. He was called here to confer with local Canal Commission officials relative to a permanent system of accounting.

Lieut. Frederick Mears, accompanied by his family, returned from leave of absence, on the *Ancon*, on Thursday, October 2.

Colonel Gorgas and Assistants to Investigate Sanitary Conditions in South Africa.

Col. W. C. Gorgas, accompanied by Mrs. Gorgas, will sail on the United Fruit Company's steamer *Carrillo* for New York on Tuesday, October 14. Col. Gorgas has been granted four months special leave of absence, and, together with Maj. Robert E. Noble and Dr. S. T. Darling, will leave New York about November 1 for Johannesburg, South Africa. At Johannesburg, they will make investigations and recommendations regarding the sanitation of the district of the consolidated mines of the Rand, at the request of the companies in the consolidation, which employ about 200,000 men.

Commissary Cold Storage.

No changes are reported in the list of cold storage supplies sold at the commissaries published in *THE CANAL RECORD* of October 1.

CLASSIFIED EXPENDITURES—ISTHMIAN CANAL COMMISSION.

A statement of classified expenditures of the Isthmian Canal Commission to June 30, 1913, follows:

PERIODS.	Department of Civil Administration.	Department of Law.	Department of Sanitation.	Department of Construction and Engineering	General Items.	Fortifications.	Total.
Total to June 30, 1909.....	3 427,090 29		9,673,539.28	69,622,561.42	78,022,606.10		160,745,797.09

EXECUTIVE ORDER.

To Provide Maritime Quarantine Regulations for the Canal Zone and the Harbors of the Cities of Panama and Colon, Republic of Panama.

Whereas the official opening of the Panama Canal will require a revision of the maritime quarantine regulations of the Canal Zone and the harbors of the cities of Panama and Colon, Republic of Panama, and

Whereas the Government of the United States and the authorities of the Canal Zone are authorized to establish such rules and regulations for the ports and harbors of said cities, by virtue of the second paragraph of Article VII of the Treaty between the United States and the Republic of Panama for the construction of the Isthmian Canal, signed November 18, 1903, which paragraph reads, as follows:

"The Republic of Panama agrees that the cities of Panama and Colon shall comply in perpetuity with the sanitary ordinances whether of a preventive or curative character, prescribed by the United States and in case the Government of Panama is unable or fails in its duty to enforce this compliance by the cities of Panama and Colon with the sanitary ordinances of the United States the Republic of Panama grants to the United States the right and authority to enforce the same."

and Section 6 of the Executive Order of December 3, 1904, known as the Taft Agreement made between the Secretary of War of the United States and the Chief Executive of the Republic of Panama, which section reads, as follows:

"Section 6. This Order also shall be inoperative unless the proper Governmental authorities of the Republic of Panama shall grant power to the authorities of the Canal Zone to exercise immediate and complete jurisdiction in matters of sanitation and quarantine in the maritime waters of the ports of Panama and Colon."

and Article I of Decree No. 66 of December 6, 1904, issued by the President of Panama, agreeably to said Executive Order, and published in the Official Gazette, No. 70, of 1904, which article reads, as follows:

"Article I. The authorities of the Canal Zone are empowered to exercise freely, immediate and complete jurisdiction in all matters of sanitation and quarantine in the waters of the ports of Panama and Colon. In consequence, the authorities of the Republic shall proceed in conformity with the provisions of this decree to the end that these may be strictly complied with."

By virtue of the authority vested in me and in conformity with the foregoing treaty provision and the Executive Order and Presidential Decree above mentioned, I hereby establish the following maritime quarantine regulations for the Canal Zone and for the harbors of the cities of Panama and Colon, Republic of Panama:

BILLS OF HEALTH.

Section 1.—Masters of vessels clearing from any foreign port or from any port in the possessions or other dependencies of the United States for a port in the Canal Zone or for the ports of Panama or Colon, Republic of Panama, must obtain an original bill of health in duplicate from the officer or officers authorized by the quarantine laws and regulations of the United States to sign such

certificates for vessels entering the ports of the United States.

The following form is prescribed for such bills of health:

Form No. ———.

CANAL ZONE.

Original Bill of Health.

I, ——— (the person authorized to issue the bill, at the port of ———), do hereby state that the vessel hereinafter named clears from the port of ——— under the following circumstances:

Name of vessel, ———. Nationality, ———. Rig, ———. Master, ———. Tonnage, gross, ———; net, ———. Iron or wood, ———. Number of compartments for cargo, ———; For steerage passengers, ———. For crew, ———.

Name of medical officer, ———.

Number of officers, ———; of crew, including petty officers, ———; of passengers, first cabin, ———; second cabin, ———; steerage, ———. Officers' families, ———. Total number of persons on board, ———.

Passengers destined for the Canal Zone or the city of Panama or Colon, ——— first cabin, ——— second cabin, ——— steerage.

Previous port, ———.

Number of cases of sickness, and character of same, during last voyage, ———.

Number of cases of sickness and character of same, while vessel was in this port, ———.

Vessel engaged in ——— trade, and plies between ——— and ———.

Nature, sanitary history, and condition of cargo ———.

Source and wholesomeness of water supply, ———.

Source and wholesomeness of food supply, ———.

Sanitary history and health of officers and crew, ———.

Sanitary history and health of passengers, cabin, ———.

Sanitary history and health of passengers, steerage, ———.

Sanitary history and condition of their effects, ———.

Location of vessel while in port—wharf, ———; open bay, ———; distance from shore, ———.

Time vessel was in port, ———.

Character of communication with shore, ———.

Sanitary condition of vessel, ———.

Sanitary measures, if any, adopted while in port, ———.

Sanitary condition of port and vicinity, ———.

Prevailing diseases at port and vicinity, ———.

Malaria, ——— deaths during month of ———.

Number of cases and deaths from the following-named diseases during the past two weeks, ending ———.

DISEASES.	No. of cases.	No. of deaths.
Yellow fever.....
Asiatic cholera.....
Cholera nostras, or cholerae.....
Smallpox.....
Typhus fever.....
Plague.....
Leprosy.....

REMARKS.

Any condition affecting the public health existing in the port of departure or vicinity to be here stated.

When there are no cases or deaths, entry to that effect must be made.

I certify that the vessel has complied with the quarantine rules and regulations made under the Act of February 15, 1893, and that the vessel leaves this port bound for ———, Canal Zone, or ———, Republic of Panama, via ———.

Given under my hand and seal this ———, day of ———, 191.....

(Signature of consular officer) ———.

(SEAL) ———.

Section 2.—Vessels clearing from any foreign port or from any port in the possessions or other dependencies of the United States for a port in the Canal Zone or for the port of Panama or Colon, Republic of Panama, and entering or calling at intermediate ports, must procure at all said ports a supplemental bill of health in duplicate, from the officer or officers authorized by the quarantine laws and regulations of the United States to sign such certificates for vessels entering the ports of the United States. If a quarantinable disease has appeared on board the vessel after leaving the original port of departure, or other circumstances presumably render the vessel infected, the supplemental bill of health should be withheld until such sanitary measures have been taken as are necessary.

The following form is prescribed for supplemental bills of health:

CANAL ZONE.

Supplemental Bill of Health.

Port of ———. Vessel ———, bound from ——— to ———, Canal Zone, or ———, Republic of Panama.

Sanitary condition of port and vicinity, ———.

Prevailing diseases at port and vicinity, ———.

Malaria, ——— deaths during month of ———.

Number of cases and deaths from the following-named diseases during the past two weeks, ending ———.

DISEASES.	No. of cases.	No. of deaths.	Remarks.*
Yellow fever.....
Asiatic cholera.....
Cholera nostras, or cholerae.....
Smallpox.....
Typhus fever.....
Plague.....
Leprosy.....

*Any condition affecting the public health existing in the port to be stated here. When there are no cases, or deaths, entry to that effect must be made.

Number and sanitary condition of passengers and crew landed at this port:

First cabin, No. ———; sanitary history and condition, ———.

Second cabin, No. ———; sanitary history and condition ———.

Steerage, No. ———; sanitary history and condition ———.

Crew, No. ———; sanitary condition and history ———.

NOTE—If any passenger or member of crew disembarked on account of sickness, state disease.

Number and sanitary condition of passengers and crew taken on at this port, and sanitary condition of effects:

First cabin, No. ———; sanitary condition and history, ———.

Second cabin, No. ———; sanitary condition and history, ———.

Steerage, No. —; sanitary condition and history, —.

Number of passengers for Canal Zone: — first cabin, — second cabin, — steerage.

Number of passengers for Republic of Panama: — first cabin, — second cabin, — steerage.

Crew, No. —; sanitary condition and history, —.

Sanitary condition of effects, —.

Total passengers on board, —; total crew on board, —.

Sanitary measures, if any, adopted while in port, —.

Location of vessel while in port—wharf, —; open bay, —; distance from shore, —.

Time vessel was in port, —.

Character of communication with shore, —.

Nature, sanitary history, and condition of cargo taken on at this port, —.

(Cancel Form A, B, or C, as the case requires.) Form.

(Form A will be used at intermediate ports where the vessel does not enter.)

A—To the best of my knowledge and belief—

B—I have satisfied myself that—

C—Since leaving —, the following quarantinable disease has appeared on board —, and I certify that the necessary sanitary measures have been taken.

I certify also that with reference to the passengers, effects, and cargo taken on at this port, the vessel has complied with the rules and regulations made under the Act of February 15, 1893.

Given under my hand and seal this — day of — 191—.

(Signature of consular officer:)

(SEAL)

Section 3.—The master of a vessel entering the ports of the Canal Zone or the ports of Panama and Colon, Republic of Panama, from any port of the United States, must present to the Quarantine Officer and to the Customs Officer of the Canal Zone, or his authorized agent, each a bill of health signed by the customs officer of the port of the United States from which said vessel sails.

FOREIGN REGULATIONS.

Inspection of Vessels from Foreign Ports and Ports in the Dependencies of the United States.

Section 4.—The officer issuing the bill of health shall satisfy himself, by inspection if necessary, that the conditions certified to therein are true, and is authorized to withhold the bill of health or the supplemental bill of health until he is satisfied that the vessel, the passengers, the crew, and the cargo have complied with these regulations.

Section 5.—Inspection is required of:

(a) All vessels from ports in which cholera, yellow fever, or plague in men or rodents prevails, or at which smallpox or typhus fever prevails in epidemic form, and at which a medical officer is detailed.

(b) All vessels carrying steerage passengers; but need only include the inspection of such

passengers and their living apartments, if sailing from a healthful port.

(c) Inspection of the vessel is such an examination of the vessel, cargo, passengers, crew, personal effects of same, including examination of manifests and other papers, food and water supply, the ascertainment of its relations with the shore, the manner of loading and possibilities of invasion by rats and insects as will enable the inspecting officer to determine if these regulations have been complied with.

(d) When an inspection is required, it should be made by daylight, as late as practicable before sailing. The vessel should be inspected before the passengers go aboard, the passengers just before embarkation, and the crew on deck, and no communication should be had with the vessel after such inspection except by permission of the officer issuing the bill of health.

GENERAL REQUIREMENTS.

Section 6.—Vessels, prior to stowing cargo or receiving passengers, should be mechanically clean in all parts, especially the hold, forecabin, and steerage.

Section 7.—Any portions of the vessel liable to have been infected by any communicable disease should be disinfected before the issuance of the bill of health.

Section 8.—Street sweepings, city cleanings, or anything containing organic refuse should not be taken as ballast from any port.

Section 9.—Bedding, upholstered furniture, soiled wearing apparel, personal effects, and second-hand articles of a similar nature, coming from a district known to be infected with cholera, smallpox, typhus fever, or as to the origin of which no positive evidence can be obtained, and which the consular or medical officer has reason to believe are infected, should be disinfected prior to shipment. In the case of typhus fever, the destruction of vermin should be assured. Articles similar to the abovementioned, if from a district infected by plague, should be inspected, and, if necessary, disinfected and treated to destroy vermin.

Section 10.—Articles from an uninfected district shipped through an infected port may be accepted without restriction if not exposed to infection in transit.

Section 11.—Any article shipped from or through an infected port or place, and which the consul or medical officer has reason to believe infected, should be disinfected.

Section 12.—Any article presumably infected, which cannot be disinfected, should not be shipped.

Section 13.—Passengers, for the purpose of these regulations, are divided into two classes, cabin and steerage. (a)

Section 14.—So far as possible passengers should avoid embarking at a port where quarantinable disease prevails, and communication between the vessel and the shore should be reduced to a minimum. In such a port the personnel of the vessel should remain on board during their stay.

Vessels carrying passengers from any port where quarantinable disease prevails in epidemic form should have a medical officer.

Section 15.—No person suffering from a

(a) The sanitary measures applicable to second cabin passengers will be those designated for first cabin passengers or for steerage passengers, according as the arrangements of their quarters and accommodations aboard, both sanitary and for association, class them in the opinion of the inspecting officer with the first cabin or steerage.

quarantinable disease, or scarlet fever, measles, diphtheria, or other communicable disease, should be allowed to ship.

Section 16.—All baggage of steerage passengers destined for the Canal Zone, or the ports of Panama or Colon, Republic of Panama, should be labeled. If the baggage is in good sanitary condition, the label shall be a red label bearing the name of the port, the vessel on which the baggage is to be carried, the word "Passed" in large type, the date of inspection, and the seal or stamp of the consular or medical officer of the United States. All baggage that has been disinfected shall bear a yellow label, upon which shall be printed the name of the port, the vessel upon which the baggage is to be carried, the word "Disinfected" in large type, the date of disinfection, and the seal or stamp of the consular or medical officer of the United States. It is understood, and it will be so printed on the blank, that the label is not valid unless bearing the consular or medical officer's stamp or seal.

Section 17.—Each steerage passenger shall be furnished with an inspection card, as follows. This card, stamped by the consular or medical officer, is to be issued to every member of a family as well as to the head thereof, and shall be in the following form:

INSPECTION CARD.

(Immigrants and Steerage Passengers.)

Port of departure —. Date of departure —.

Name of ship —. Last permanent residence —.

Name of immigrant —.

Inspected and passed at (Seal or stamp of consular or medical officer)	Passed at quarantine, port of Canal Zone (or) Republic of Panama (Date)	Vaccinated (Signature or stamp)
---	--	------------------------------------

(The following to be filled in by ship's surgeon or agent prior to or after embarkation.)

Ship's list or manifest —. No. on ship's list or manifest —.

Berth No.	Steamship inspection.	To be punched by ship's surgeon at daily inspection.
	Days.	
.....	1st, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14.	

Section 18.—Passengers and crews, merchandise and baggage, prior to shipment at a noninfected port, but coming from an infected locality, should be subject to the same restrictions as are imposed at an infected port.

LOCAL INSPECTION OF VESSELS.

Section 19.—Vessels arriving at any of the ports of the Canal Zone or the cities of Panama and Colon, Republic of Panama, under the following conditions, shall be inspected by the quarantine officer of the port prior to entry:

(a) Vessels from the United States; (b) Vessels from foreign ports; (c) Vessels with sickness aboard; (d) Vessels from Panamanian ports where any quarantinable disease prevails; (e) Vessels from Panamanian ports carrying passengers or articles suspected by the quarantine officer as being capable of conveying the infection of a transmissible disease.

Section 20.—The limits of anchorage of vessels awaiting inspection and of vessels

undergoing quarantine, shall be fixed from time to time by the Chief Sanitary Officer of the Canal Zone.

Section 21.—Every vessel subject to quarantine inspection shall be considered in quarantine until granted free pratique, and such vessels shall fly a yellow flag from the foremast head from sunrise to sunset and shall observe all the other requirements of vessels actually quarantined.

Section 22.—The captain or master of a vessel in quarantine shall allow no communication with his vessel except as provided for in these regulations, nor shall any water craft approach within 200 meters of any such vessel.

Section 23.—No person or article shall be allowed to leave a vessel in quarantine without written authority from the quarantine officer.

Section 24.—Towboats, or any vessel or boat having had communication with a vessel in quarantine shall be submitted, with their personnel, to such measures of sanitation as the quarantine officer may judge to be necessary.

Section 25.—No person, except such officers of the port as are required to do so by the nature of their duties, and the agent of the vessel, if such agent has the consent of the quarantine officer, shall go aboard any vessel subject to quarantine until such vessel has been granted free pratique. Any person going aboard prior to the issuance of free pratique shall be subject to the same restrictions as the personnel of the vessel, if, in the opinion of the quarantine officer, this is necessary for the protection of the public health.

Section 26.—The quarantine officer, after his inspection of the vessel and its documents, shall decide whether said vessel, or its personnel, or passengers, or any article aboard said vessel is liable to convey any of the following diseases: Plague, yellow fever, cholera, small-pox, typhus fever, or leprosy; and if so, such vessel shall be placed in quarantine and forbidden entry until the period of incubation of such diseases is past, and he shall take such measures in respect to the vessel, its passengers or personnel or cargo as, in his judgment, may be required to prevent the entry of such diseases into the Canal Zone or the cities of Panama or Colon, Republic of Panama.

Section 27.—Passengers boarding vessels from ports subject to quarantine will be required, in the discretion of the Chief Sanitary Officer of the Canal Zone, to present personal certificates from the officer authorized by these regulations to sign bills of health, certifying to their sanitary history and condition, provided due notice has been issued to the agents of the steamship companies on the Isthmus of Panama.

Section 28.—Every case of sickness aboard any vessel in the harbor shall be immediately reported by the master of the vessel to the quarantine officer, who shall see the case and take such sanitary measures as may be necessary.

Section 29.—The Chief Quarantine Officer shall have charge of the sanitation of the harbors and vessels lying therein and shall see that such measures are enforced as are necessary for the proper hygiene of vessels, their cargoes, and their personnel, whether in port or en route, and to prevent the vessels from being a source of danger to other vessels

or to the port, and he is authorized to certify bills of health to vessels clearing from ports under his jurisdiction, setting forth in such bill of health the conditions of the port, vessel, cargo, passengers, and crew; and is authorized at the request of the master of any vessel to disinfect and otherwise place such vessel in a sanitary condition so that it may leave the port in free pratique and be able to make entry at the port of destination without further disinfection or detention in quarantine.

Section 30.—The quarantine officer shall make such charges for the disinfection of vessels and their cargoes, and for the transportation and subsistence of passengers while in quarantine as may be fixed from time to time by the Governor of the Canal Zone.

Section 31.—A certificate from the quarantine officer that a vessel has complied with all the quarantine regulations shall be required of every vessel subject to inspection, as a pre-requisite for customs entry or passage through the Canal.

Section 32.—Quarantine stations shall be established and maintained at such places as may be decided upon by the Chief Sanitary Officer of the Canal Zone, with the approval of the Governor.

Persons detained in quarantine under these regulations shall not be permitted to go outside the limits of the quarantine station until discharged therefrom by the quarantine officer and if any such person shall leave the quarantine station without being duly discharged therefrom he may be taken into custody by the quarantine officers wherever found and returned to the quarantine station and, in addition, he may be punished as hereinafter described.

No person except the Chief Sanitary Officer of the Panama Canal or his representative, the quarantine officers and employes and personnel of the station shall be permitted to enter in or upon a quarantine station without permission from the Chief Sanitary Officer or the Chief Quarantine Officer of the Panama Canal.

Section 33.—The Governor of the Panama Canal may establish from time to time such rules and regulations as he may deem necessary to execute this Order.

Section 34.—Any person violating any of the provisions of these regulations shall be punished by a fine not exceeding \$500, or by imprisonment in jail not exceeding 90 days, or both, at the discretion of the Court.

Section 35.—The medical officers of the Canal Zone, duly clothed with authority to act as quarantine officers at any port or place within the Canal Zone and the ports of the cities of Panama and Colon, Republic of Panama, and when performing the said duties, are hereby authorized to administer oaths and take declarations thereunder in matters relating to the administration of the quarantine laws and regulations of the Canal Zone Government.

Section 36.—These regulations shall take effect from and after the date upon which the Panama Canal is officially and formally opened for use and operation, by proclamation of the President of the United States.

WOODROW WILSON.

THE WHITE HOUSE,

April 15, 1913.

[No. 1761.]

JOINT LAND COMMISSION.

Additional Awards.

The following additional awards have been made by the Joint Land Commission:

Award No. 32.—In the matter of certain houses in Gorgona.—The evidence before the Commission shows that the persons hereinafter named received the houses herein referred to under the will of Juliana Miranda de Leon, who died in 1909, and who became the owner of the houses before she accepted a lease from the Isthmian Canal Commission. In no case did the persons hereinafter named make any claim to the ownership of the land.

In conformity with the principles formulated in the opinion of July 25, 1913, on the demurrer of counsel of the United States to the jurisdiction of the Commission in the matter of the claim of Juan Sotillo, and in accordance with the evidence submitted to the Commission, an award is hereby made against the United States of America for certain buildings hereinafter identified by the respective tax numbers, the said award to include all rights, claims, and interests of any persons in the said buildings, together with all claims for improvements of whatsoever nature on the part of any persons hereinafter named, and all rights claimed by them, in the sum of \$2,450.

This award shall be paid to the respective persons named hereinafter, in the amounts hereinafter specified, on or before the 8th day of October, 1913, and if payment or tender of payment of any of the items of this award is not made on or before that date, such items shall thereafter bear interest at the rate of six per centum per annum until paid.

To José L. Larrea, docket No. 496, for House 823, the sum of \$450. To the owners of House 771, the sum of \$2,000, to be divided among the owners for their respective portions of the said house, as follows: Juana Miranda V. de Sayas, docket No. 1,630, the sum of \$1,350; Mercedes Larrea de Bernard, the sum of \$650. Total, \$2,450.

(Signed) FEDERICO BOYD, ROLAND P. FALKNER, SAMUEL LEWIS, L. S. ROWE, Commissioners.
September 9, 1913.

Award No. 33.—In the matter of the claim of Alfred Cadet, and the estate of George Andrade, deceased, for improvements located on the lands of Juan Grande.—The evidence in this case shows that the property occupied by the late George Andrade and Alfred Cadet on the lands of Juan Grande was purchased by them from D. T. McLean, and that McLean entered upon these lands under a lease granted by the Isthmian Canal Commission, by the terms of which lease no compensation could be claimed from the United States of America on the cancellation of the same.

The evidence shows, however, that a certain portion of the improvements made by Andrade and Cadet were not on the public lands of the United States, but upon the land owned by Luz Espinosa, and it is for this portion of the improvements that the award of the Commission is made. The evidence before the Commission shows that the late George Andrade was the owner of two-thirds of the property, and that Alfred Cadet was the owner of one-third.

On the basis of the evidence presented, an award is hereby made against the United States of America in favor of the persons hereinafter named for the settlement of all rights, claims, or other interests in all growing crops, fruit trees, buildings, and all other improvements of whatever kind, and all rights claimed by them on the estate of Juan Grande, in the sum of \$400.

The conditions of the award are:

First—This award shall be paid to the respective claimants hereinafter named in the amounts hereinafter specified on or before the 15th day of October, 1913, and if payment or tender of payment of any of the items of this award is not made on or before that date such items shall thereafter bear interest at the rate of six per centum per annum from date until paid.

Second—The above mentioned award shall be distributed among the claimants hereinafter named, and the amounts to be received by each shall be, as follows:

Name.	Amount.
Alfred Cadet,.....	\$133.33
W. H. Carrington, as administrator of the estate of George Andrade, deceased	\$266.67

(Signed) FEDERICO BOYD, ROLAND P. FALKNER, SAMUEL LEWIS, L. S. ROWE, Commissioners.
September 13, 1913.

Award No. 34.—In the matter of houses Nos. 713, 719, 808, and 813 in the town of Gorgona.—On July 19, 1913, Maria T. de Bosque filed with the Joint Commission a claim (Docket 1,460) for a certain interest in Houses 713, 719, 808, and 813 in the town of Gorgona, which houses appear in the various records pertaining thereto as the property of Hilario V. Seixas. Subsequently, on July 24, 1913, Seixas filed a claim,

(Docket 1,550) for the value of these houses. In a letter of the attorney of Seixas to the Collector of Revenues, dated February 1, 1908, the location and history of these houses is given, as follows:

"House No. 51, situated on lot No. 5, block No. 2, consists of a two-story frame and corrugated iron roof building, measuring 10 by 10 meters, the upper floor of which is occupied by the owner, H. V. Seixas, as his domicile and the first floor by the Panama Banking Company, at an annual rental of \$600 U. S. currency. This house was originally built in 1887 and was purchased by the present owner in 1894. It is bounded on the east by a government building, on the west by the main street, on the north by a building of one Garido, and on the south by July's building.

House No. 55, situated on lot No. 2, block No. 6, consists of a two-story frame and corrugated iron roof building, 16 by 17 meters, and is occupied at an annual rental of \$840 U. S. currency. This property has been in the continuous possession of the present owner since 1886, and is bounded on the east by the main street, on the west by a building belonging to Seixas, on the north by the house of a Chinaman, and on the south by a similar building.

House No. 70, situated on lot No. 7, block No. 5, consists of a two-story frame and corrugated iron roof building, measuring 12 by 15 meters. This lot was obtained from the municipality of Gorgona in 1906 for the purpose of erecting a building, and was purchased by the present owner in 1907. It is now occupied at an annual rental of \$1,030 U. S. currency, and is bounded on the east by the street, on the west by a vacant lot, on the north by the house of one McCalla, and on the south by the building of N. Barsallo.

House No. 73, situated on lot No. 18, block No. 6, consists of a two-story frame and corrugated iron roof building, measuring 12 by 12 meters, and is occupied at an annual rental of \$900 U. S. currency. This property has been in the continuous possession of the present owner since 1886 and the building was erected in 1905. It is bounded on the east by a house belonging to Seixas, on the west by a building of one Passaje Miranda, on the north by the property of the owner, and on the south by the street."

It seems that Seixas refused to sign the lease issued by the Isthmian Canal Commission. On January 7, 1908, the Collector of Revenues, in a letter to H. V. Seixas, made the following statement:

"You are in possession and occupying certain lots in the town of Gorgona, which are the property of the Isthmian Canal Commission. I am advised by Mr. Robinson, district tax collector, that you have refused to sign leases for this property. I have therefore to advise you, if it is not your intention to sign leases as provided for by the Government of the Canal Zone for property that you are occupying it will be necessary for me to take steps at once to have you evicted from the property referred to."

No further action was taken until July 12, 1909, when the assistant attorney for the Isthmian Canal Commission wrote the following letter to Seixas:

"Ancon, July 12, 1909.

Dear Sir:

On April 2, 1909, Mr. Grover C. Bradford, district tax collector, wrote you relative to the four lots occupied by you in Gorgona, Canal Zone, upon which is situated houses Nos. 51, 55, 70, and 73. He notified you that unless you signed leases to these lots on or before the 10th of April, it would be necessary for the Canal Zone Government to bring suit for the possession of these lots.

This is to further notify you that unless you sign leases to these lots on the regular forms required by the Government of the Canal Zone on or before the 25th day of July, 1909, and pay the back land rent, the Government of the Canal Zone will take such steps as may be necessary to secure possession of these lots and to collect the back land rent due thereon since April 15, 1907, up to April 15, 1909, as follows: Lot No. 73, \$26.40 per annum, 2 years, \$52.80; lot No. 70, \$32.25 per annum, 2 years, \$64.50; lot No. 55, \$35.75 per annum, 2 years, \$71.50; lot No. 51, \$19.12 per annum, 2 years, \$38.24. Total, \$227.04.

Very truly yours,

(Signed) W. K. JACKSON,
Assistant Attorney for I. C. C."

Under date of July 29, 1909, the district tax collector, Mr. Grover C. Bradford, in writing to the attorney of Seixas, makes the following statements:

"The form of lease enclosed is the one that was used at the time the municipalities were abolished, and have been in use ever since that time, and it seems to me that the case of Mr. Seixas should be governed in accordance with the existing circumstances at the time the above mentioned form was put in use, which was about April 1, 1907. I know that you will say that you want a contract wherein something is promised or agreed to by the Government in the way of a compensation, should the lands be required for Canal purposes, but in all previous cases of this nature these matters have been placed before a commission to decide on what the property owner should receive as a compensation, and I believe that this same procedure will be followed in the future and that the Government will consider any just claim."

The continued refusal of Seixas to sign any leases led to the institution of a suit for unlawful detainer on

August 14, 1909, in the District Court of the District of Gorgona. Judgment was rendered by the District Court in favor of the United States. The further proceedings in the case are fully described in the answer of the United States to the claim of Hilario Seixas filed July 26, 1913, as follows:

"Judgment was rendered by said District Court in favor of the United States of America; that an appeal was taken therefrom by the defendant Seixas to the Circuit Court of the Second Judicial Circuit of the Canal Zone at Empire; that upon a trial *de novo* of all the issues involved in said action on December 21, 1909, a judgment was rendered by the judge of that Court in favor of the United States of America for the sum of \$263.67 and costs and directed that a writ of restitution issue for the lots or parcels of land in the Administrative District of Gorgona occupied by the said Seixas; that thereafter said Seixas prayed a writ of certiorari from the Supreme Court of the Canal Zone in order that the judgment of the Circuit Court of the Canal Zone might be reviewed and reversed; that the Supreme Court of the Canal Zone on September 7, 1910, rendered an opinion refusing to issue the writ of certiorari prayed for; that thereafter Seixas secured an alternative writ of mandamus from the Supreme Court of the Canal Zone, directing that cause be shown why the full record and judgment of the Circuit Court of the Second Judicial Circuit of the Canal Zone should not be sent to the Supreme Court for their review and reversal; that upon motion to quash the alternative writ of mandamus issued by the Supreme Court, in an opinion filed at the November term of the Supreme Court of the Canal Zone, it was directed that the alternative writ be quashed and the petition for mandamus dismissed, with the costs against said Seixas; that the decision of the Supreme Court of the Canal Zone was duly certified to the Circuit Court of the Second Judicial Circuit of the Canal Zone and that on January 9, 1912, a writ of possession was issued from said Circuit Court and possession of the said four building lots and houses thereon within the town of Gorgona given to the United States of America by the marshal of the Canal Zone in accordance with said writ of restitution and order of the Second Judicial Circuit of the Canal Zone."

It appears, therefore, that Seixas remained in possession of the property until January 9, 1912, when the writ of possession was finally issued by the Circuit Court, and possession taken by the marshal of the Canal Zone.

The evidence before the Commission clearly shows that Seixas was in possession of these lots many years prior to American occupation. In accordance with the rule laid down by the Commission in the opinion on the demurrer to the jurisdiction of the Commission in the case of Juan Sotillo, the claimant was entitled to the protection of Article 5 of Law No. 50 of 1894, and neither the acceptance of an Isthmian Canal Commission lease or license nor the refusal to accept the same deprived him of this right. The conclusion reached by the Commission in this case does not in any way affect or question the validity of the judgments of the District Court of the Administrative District of Gorgona, the Circuit Court of the Second Judicial Circuit, or the Supreme Court of the Canal Zone. These judgments relate exclusively to the right of the United States of America to obtain possession of lands when a tenant thereon refuses to pay rental. In none of these proceedings was the question of the right of Seixas to compensation for the value of his houses presented to the court.

On October 12, 1909, the following judgment was entered by the District Court of the District of Gorgona, to wit:

"That the plaintiff do have and recover of and from the defendant, the possession of lots Nos. 51, 55, 70, and 73 situated in the town of Gorgona, Canal Zone, and that the plaintiff also do have and recover of and from the defendant the sum of \$288.72, and the costs fixed at \$6.30, United States currency."

This judgment included arrears of rentals due to June 30, 1909, inclusive.

In view of the fact that Seixas remained in possession of these houses until January, 1912, but has paid no rental for the lots since the 1st of July, 1907, the Commission decrees that from the total amount of the award the following sums be deducted:

First—The sum of \$295.02, representing the amount of judgment entered against the said Hilario V. Seixas for arrears of rental to June 30, 1909, inclusive, together with costs,..... \$295.02.

Second—Arrears of rental on lots Nos.

51, 55, 70, and 73, from July 1, 1909 to January 1, 1912, a period of 2½ years, to-wit:

(a) Rent on lot No. 51, from July 1, 1909, to January 1, 1912, 2½ years, at \$19.60 per year..... \$49.00

(b) Rent on lot No. 55, from July 1, 1909, to January 1, 1912, 2½ years, at \$47.70 per year..... \$119.25

(c) Rent on lot No. 70, from July 1, 1909, to January 1, 1912, 2½ years, at \$33.22 per year..... \$83.05

(d) Rent on lot No. 73, from July 1, 1909, to January 1, 1912, 2½ years, at \$27.80 per year..... \$69.50

\$615.82

The valuation made by the Commission for the four houses for which claim has been made, is, as follows:

1. House No. 55, tax No. 713, \$1,200. 2. House No. 51, tax No. 719, \$450. 3. House No. 70, tax No. 813, \$1,300. 4. House No. 73, tax No. 808, \$1,100. Total, \$4,050.

From this total the following sums shall be deducted, to-wit:

1. The sum of \$295.02 in full satisfaction of the judgment entered against said Hilario V. Seixas for arrears of rentals to June 30, 1909, inclusive, together with costs, \$295.02.

2. For arrears of rental on lots Nos. 51, 55, 70, and 73, from July 1, 1909, to January 1, 1912, \$615.82.

In accordance with the principles herein formulated and with the evidence submitted to the Commission, an award is hereby made against the United States of America to the owner of certain buildings identified by the tax Nos. 713, 719, 808, and 813, the said awards to include all right, title, and interest in the said buildings, together with all claims for improvements of whatsoever nature, in the sum of \$3,434.18 United States currency.

This award shall be paid into the Circuit Court of the Second Judicial Circuit of the Canal Zone for distribution among the owners of said buildings as their interests may appear, on or before the 20th day of October, 1913, and if not so paid before that date it shall thereafter bear interest at the rate of six per centum per annum until paid.

(Signed) FEDERICO BOYD, ROLAND P. FALKNER,
SAMUEL LEWIS, L. S. ROWE, Commissioners.

September 20, 1913.

Award No. 36—In the matter of the claim of Leopoldo Cantoral for property located at Chagresito, near old Frijoles, docket No. 128.—The claim of Leopoldo Cantoral is divided into two parts; the first part refers to damages alleged to have been caused by the operations of the Canal authorities in 1905; the second to damages caused by the rising of the waters of Lake Gatun in 1912.

After careful consideration of all the evidence submitted, the Commission has reached the conclusion that such evidence does not support any claim for damages alleged to have been suffered in 1905.

With reference to the claim for damages suffered by reason of the rising of the waters of Lake Gatun. The evidence submitted in this case shows that the claimant, Cantoral, was for many years a tenant of the French Canal Company. All the leases issued by the French Canal Company contained the following clause:

"In case the Company sells the land herewith leased, or requires it for any purpose of the Company, no matter what such purpose may be, this contract shall be deemed rescinded. Notice of one month shall be sufficient, and shall be given to all lessees."

It is evident, therefore, that upon the sale of the property of the French Canal Company to the United States, the relationship of landlord and tenant established between the French Canal Company and this claimant was terminated. It is true that the evidence submitted shows that there was a payment made in August, 1905, apparently under a mistaken impression that the contract of lease which had expired by reason of the sale of the property by the French Canal Company to the United States of America, was still in existence.

From 1905 to 1912, the claimant remained in undisturbed possession of the property without the payment of any rental to the United States, and no attempt was at any time made to establish the relation of landlord and tenant.

It is evident that this claimant became an occupier of public lands. The rights of such occupiers have been fully set forth by the Commission in an opinion dated July 25, 1913. Under the terms of this opinion such occupiers are entitled to the value of the cultivation on the land occupied by him.

The Commission has, therefore, reached the conclusion that this claimant is entitled to compensation for damages inflicted, and that the measure of such compensation is governed by Article V of Law No. 48 of 1882, and Article 739 of the Civil Code.

An award is therefore made against the United States of America to Leopoldo Cantoral for the settlement of all rights, claims, or other interests in all growing crops, fruit trees, and buildings, and all other improvements of every kind, situated in or near Chagresito, in the sum of \$1,500 United States currency. This award shall be paid to the aforementioned claimant in the amount specified, on or before the 20th day of October, 1913, and if payment or tender of payment is not made on or before that date this item shall

thereafter bear interest at the rate of six per centum per annum until paid.

(Sgd.) FEDERICO BOYD, SAMUEL LEWIS, L. S. ROWE, Commissioners, Commissioned FALKNER dissenting.
September 20, 1913.

Award No. 37—In the matter of sundry claims, docket No. 1,240-A, etc.—An award is hereby made against the United States of America, in favor of the persons hereinafter named, in the sum of \$6,785 U. S. currency. This award shall be paid to the respective claimants hereinafter named in the amounts hereinafter specified on or before the 20th day of October, 1913, and if payment or tender of payment of any of the items of this award is not made on or before that date, such items shall thereafter bear interest at the rate of six per centum per annum until paid:

Amaguer, Mauricio, for all rights, claims, and other interests in growing crops, fruit trees, house tax No. 873 and any other buildings, and any other improvements which the said Mauricio Amaguer may possess or may have possessed on the lands of Juan Grande (Waterloo), the sum of \$60 U. S. currency.

Alvarez, José, deceased, Estate of, docket No. 380, for all rights, claims and other interests in growing crops, fruit trees, buildings, and any other improvements which the said Alvarez may have possessed on the west side of the Chagres River on the lands known as Caño Quebrado, in the sum of \$175 U. S. currency. This award is subject to such equities, if any, as may be possessed by José Perdz or any other person claiming an interest in the said property, and it is directed that the said award be paid into the Circuit Court of the Second Judicial District of the Canal Zone for distribution in accordance with the terms of this award.

Alveo, José de Carmen, for all rights, claims, and other interests in growing crops, fruit trees, buildings, and any other improvements which the said Alveo may possess or may have possessed at Gambi Hill, near the headwaters of the Bailamonos River, on public lands of the United States, the sum of \$45 U. S. currency.

Alveo, Manuel, docket No. 1,294, for all rights, claims, and other interests in growing crops, fruit trees, buildings, and any other improvements which the said Alveo may possess or may have possessed at Balboa Hill, near the headwaters of the River Maquenque, the said property being distinct from that located at Bailamonos Arriba, for which an award was made by the Joint Commission to another claimant of the same name, the sum of \$125 U. S. currency.

Alveo, Manuel, for all rights, claims, and other interests in growing crops, fruit trees, buildings, and any other improvements which the said Alveo may possess or may have possessed in the region known as Bailamonos Arriba, the said property being distinct from that located at Balboa Hill, for which an award was made by the Joint Commission to another claimant of the same name, the sum of \$290 U. S. currency.

Ayarza, Nicolas, docket No. 1,607, for all rights, claims, and other interests in growing crops, fruit trees, house tax No. 914, and any other buildings and any other improvements which the said Ayarza may possess or may have possessed on the lands of Juan Grande (Waterloo), and not including claims of said Ayarza for property said to be covered by Dump 4, the sum of \$25 U. S. currency.

Batista, R. Manuel, dockets Nos. 376 and 377, for all rights, claims, and other interests in growing crops, fruit trees, buildings, and any other improvements which the said Batista may possess or may have possessed in lands lying between the rivers Agua Salud and Aujeta, and which the said Batista may have possessed in the region designated as Juan Maria, near Tabernilla, the property covered by this award being distinct from that owned by another person by the name of Manuel Batista, located at La Loma, Frijoles, and purchased by the United States, in the sum of \$300 U. S. currency.

Betancourt, Damaso, dockets Nos. 1,638 and 1,639, for all rights, claims, and other interests in growing crops, fruit trees, buildings, and any other improvements which the said Betancourt may possess in two properties located near the headwaters of the river Maquenque, in the sum of \$120 U. S. currency.

Bilorio, José, for all rights, claims, and other interests in growing crops, fruit trees, buildings, and any other improvements which the said Bilorio may possess or may have possessed at points west of Mile 23½ and Mile 24½, respectively, on the Panama railroad line on the lands of Barbacoas, the sum of \$75 U. S. currency.

Bolano, Roman, for all rights, claims, and other interests in growing crops, fruit trees, buildings,

and any other improvements which the said Bolano may possess or may have possessed at Baldo Espino on the lands of Tabernilla, together with any claims for property destroyed in 1907 on the lands of Tabernilla by the making of Tabernilla dump and the overflowing of the land, the sum of \$300 U. S. currency.

Caballero, José Modesto, docket No. 786, for all rights, claims, and other interests in growing crops, fruit trees, buildings, and any other improvements which the said Caballero may possess or may have possessed on the lands of Caño Quebrado, the sum of \$600 U. S. currency.

Concepcion (Concession), Pedro, in docket No. 1,444 for all rights, claims, and other interests in growing crops, fruit trees, buildings, and any other improvements which the said Concepcion may possess or may have possessed on lands located above the 87-foot contour line, on the lower waters of the River Caño Quebrado on the lands of Caño Quebrado, this property being distinct from that lying below the 87-foot contour line in the same locality, which was purchased from Concepcion by the United States in December, 1911, and being distinct also from property on the upper waters of the River Caño Quebrado, for which an award was made by the Joint Commission, the sum of \$20 U. S. currency.

Concepcion (Concession), Pedro, in docket No. 1,444, for all rights, claims, and other interests in growing crops, fruit trees, buildings, and other improvements which the said Concepcion may possess on lands located above the 87-foot contour line on the upper waters of the River Caño Quebrado on the lands of Caño Quebrado, this property being distinct from that on the lower waters of the Caño Quebrado, of which the part lying below the 87-foot contour line was purchased by the United States in December, 1911, and of which the part lying above the 87-foot contour line is included in an award made by the Joint Commission, the sum of \$50 U. S. currency.

Dennis, Edward, docket No. 1,531, for all rights, claims, and other interests in growing crops, fruit trees, house tax No. 1,871, and any other buildings, and any other improvements which the said Dennis may possess or may have possessed at Caimito, the sum of \$100 U. S. currency.

Doxey, Pascual, docket No. 1,089, for all rights, claims, and other interests in growing crops, fruit trees, buildings, and any other improvements which the said Doxey may possess on lands lying on both banks of the Quebrado Pico, and located partly within the estate of Juan Grande (east bank of the Chagres River) and partly within the estate of Mamey y Culo Seco, the sum of \$105 U. S. currency.

Fernandez, Juan Galeano, for all rights, claims, and other interests in growing crops, fruit trees, house tax No. 878, and any other buildings, and any other improvements which the said Fernandez may possess or may have possessed on the lands of Juan Grande (Waterloo), the sum of \$50 U. S. currency.

Flores, Pablo, docket No. 1,366, for all rights, claims, and other interests in growing crops, fruit trees, buildings, and any other improvements which the said Flores may possess or may have possessed on the lands of San Pablo and Caño Quebrado above the 87-foot contour line (this property being distinct from that lying below the 87-foot level, which was purchased from the claimant by the United States in 1911), the sum of \$215 U. S. currency.

Garcia, Santiago, docket No. 1,513, for all rights, claims, and other interests in growing crops, fruit trees, buildings, and any other improvements which the said Garcia may possess or may have possessed on the lands of Caño Quebrado above the 87-foot contour line (this property being distinct from that located below the 87-foot contour line, which was purchased from the claimant by the United States in 1911), the sum of \$30 U. S. currency.

Gutierrez, Martin, for all rights, claims, and other interests in growing crops, fruit trees, buildings, and any other improvements which the said Gutierrez may possess or may have possessed on the lands of Juan Grande (Waterloo), the sum of \$85 U. S. currency.

Herrera, Cornelio, docket No. 1,629, for all rights, claims, and other interests in growing crops, fruit trees, buildings, and any other improvements which the said Herrera may possess or may have possessed on the lands of Caño Quebrado above the 87-foot contour line (this property being distinct from that below the 87-foot contour line which was purchased from the claimant by the United States in 1911), the sum of \$10 U. S. currency.

Huie, J. R., docket No. 346, for all rights, claims,

and other interests in growing crops, fruit trees, buildings, and any other improvements which the said Huie may possess or may have possessed at Agua Salud, including any claim for property which may have been destroyed at Baldo Espino in the work of constructing the relocated line of the Panama railroad, the said property being distinct from that located at Buena Vista, which was said to have been in the name of the mother of claimant, E. Campbell, and which was purchased by the United States, the sum of \$135 U. S. currency.

Jaramillo, Juan, for all rights, claims, and other interests in growing crops, fruit trees, buildings, and any other improvements which the said Jaramillo may possess or may have possessed at two places on or near the River Paja, on the lands of Caño Quebrado, the sum of \$60 U. S. currency.

Lam, Lee, docket Nos. 882 and 1408, for all rights, claims and other interests in growing crops, fruit trees, houses tax Nos. 882 and 1793, and any other buildings and any other improvements which the said Lam may possess or may have possessed on the lands of Juan Grande (Waterloo) the sum of \$500 U. S. currency.

Marties, Damien, docket No. 241, for all rights, claims and other interests in growing crops, fruit trees, buildings, and any other improvements which the said Marties may possess or may have possessed on the lands of San Pablo near Quebrado Macho, in the sum of \$170 U. S. currency.

Modest, James, for all rights, claims and other interests in growing crops, fruit trees, buildings, and any other improvements which the said Modest may possess or may have possessed, on the public lands of the United States near Mile Post 19½ of the Panama railroad, the sum of \$100 U. S. currency.

Moran, Eliseo, for all rights, claims and other interests in growing crops, fruit trees, house tax No. 1798, and any other buildings, and any other improvements which the said Moran may possess or may have possessed in the lands of Juan Grande (Waterloo) and not including claim of said Moran for property said to be covered by Dump 4, the sum of \$40 U. S. currency.

Moran, Fermin, docket No. 1512, for all rights, claims and other interests in growing crops, fruit trees, buildings, and any other improvements which the said Moran may possess or may have possessed near the Rio Canito on the public lands adjoining the lands of Caño Quebrado and San Pablo, the sum of \$450 U. S. currency.

Moran, Isidoro, docket No. 1514, for all rights, claims and other interests in growing crops, fruit trees, buildings, and any other improvements which the said Moran may possess or may have possessed near the Quebrado Macho and the Rio Paja on the lands of San Pablo, the sum of \$80 U. S. currency.

Moreno, Eufemio (Efigenio), docket No. 1509, for all rights, claims and other interests in growing crops, fruit trees, buildings, and any other improvements which the said Moreno may possess or may have possessed near the Rio Canito on public lands of the United States adjoining the lands of Caño Quebrado and San Pablo, the sum of \$180 U. S. currency.

Muñoz, Gervacio, in docket No. 747, for all rights, claims and other interests in growing crops, fruit trees, buildings, and any other improvements which the said Muñoz may possess or may have possessed on the Rio Paja, in the lands known as San Pablo and Caño Quebrado, the said property being distinct from that at Quebrado Macho, for which an award was made by the Joint Land Commission, the sum of \$20 U. S. currency.

Muñoz, Gervacio, in docket No. 747, for all rights, claims and other interests in growing crops, fruit trees, buildings, and any other improvements which the said Muñoz may possess or may have possessed on the Quebrado Macho in the lands known as San Pablo and Caño Quebrado, the said property being distinct from that at Rio Paja, for which an award was made by the Joint Land Commission, the sum of \$45 U. S. currency.

Muñoz, Manuel, docket No. 348, for all rights, claims and other interests in growing crops, fruit trees, buildings, and any other improvements which the said Muñoz may possess or may have possessed at various places on the lands of Caño Quebrado above the 87-foot contour line (this property being distinct from that below the 87-foot contour line within the lake area which was purchased from Muñoz by the United States in 1911, and which property was included by the claimant in his statement before the Commission, but excluded by the Commission in making its award), in the sum of \$155 U. S. currency.

(To be Continued.)

SOCIAL LIFE OF THE ZONE.

Annual Meeting of the Cristobal Woman's Club.

The Cristobal Woman's Club began its seventh year at an adjourned annual meeting held at the Commission clubhouse on Wednesday afternoon, October 1. The annual meeting of the club was held on April 23, but at that time it was found impossible to elect officers, or to decide upon the question as to whether or not the club should continue for another year, so an adjournment was taken. At the meeting on October 1, the following officers were chosen:

President, Mrs. Thomas Edwin Brown, Jr.; first vice-president, Mrs. Frederick Mears; second vice-president, Mrs. William Harrison; recording secretary, Mrs. John J. Murray; corresponding secretary, Mrs. G. E. Whitney; treasurer, Mrs. Webster Morris.

The program committee is composed of Mrs. William Harrison, chairman; Mrs. Frederick Mears, and Mrs. Charles Butters. Mrs. George Armiger is chairman of the house and social committee. The club will not be divided into departments this year, but will work on a more concentrated and general plan. The meetings will be held on the first and third Wednesdays in each month. For the first meeting in each month there will be a formal program, with a paper or lecture; the second meeting will be rather informal in character, with a program composed of short papers on topics of general interest, and the reading of these will be followed by a general discussion. The club will hold a social meeting as a welcome to the new members and officers on Wednesday afternoon, October 15.

Proposed Federation of Canal Zone Christian Societies.

The question of the organization of a federation of women engaged in Christian work was the principal topic of discussion at the monthly meeting of the Woman's Foreign Missionary Society of the Methodist Episcopal Church held in the church parlors on Saturday afternoon, October 4. The society adopted a resolution in favor of an

undenominational organization the chief purpose of which will be the discussion of religious issues, cooperative planning of future efforts, and the study of missionary work in all fields and by all denominations. There are 10 church societies of women in the Canal Zone, Panama, and Colon, with an approximate total membership of 200. Should such a federation as is proposed be formed it would result in a strong permanent organization of American women for Christian effort. It is hoped that plans will be perfected, so that the meeting for organization may be held in November at the time of the annual visitation of Bishop Stuntz, the Methodist bishop in charge of the work in Central and South America.

The missionary society elected officers for 1913-1914 at its meeting on October 4, as follows: President, Mrs. Harry Compton; vice-president, Mrs. J. H. Stokoe; secretary, Mrs. C. H. Ports; treasurer, Mrs. Townsend. The committee on federation is composed of Mrs. Compton, Mrs. Stokoe, Mrs. Keyser, and Mrs. Ports.

Miscellaneous Church Notes.

The Cristobal Young Peoples' Society, in connection with the Union Church, has issued a card announcing the schedule of its meetings, with the subject of each program and the name of the leader, from September to December 28. The meetings are held in the church every Sunday evening, beginning at 7 o'clock. The public is cordially invited to attend. The following is the program for the next three months.

October 12, favorite verses in the Epistles; leaders, Ruth Wilkins, Ruth Farrell, Julia Nielsen, Mary Verner.

October 19, "How to make this the best year in our society's history;" leader, Mr. Irwin DeLong.

October 26, missionary essentials; leaders, Clara Matthews, William Fraser.

November 2, "The ideal Christian;" leader, Mrs. M. F. Harrison.

November 9, "Christian home life;" leader, Mr. B. L. Larcom.

November 16, temperance facts and figures;

leaders, Swift Carpenter and W. T. Donohue.

November 23, (Thanksgiving) "Discontent or praise;" leader, Mrs. Wm. Harrison.

November 30, "The church at work for our country;" leader, F. F. Zundel.

December 7, "The ideal Christian" (paper No. 2); leader, Mr. W. H. Fredericks.

December 14, lessons from the men and women of the Bible; leaders, Arthur Farrell and Sara Harrison.

December 21, "The Christian spirit and how it may prevail;" leader, Mr. A. J. Bowers.

December 28, "The church at work for the world;" leaders, Minot Cotton, Etha Bevington, Ray Appleton, Elizabeth Ragsdale.

The Woman's Altar Society and the Men's Catholic Club of St. Ferdinand's Church, Empire, combined in giving a reception at the parish house on Saturday evening, September 27, in honor of the Reverend Father J. McDonald, C. M., who is to take charge of the parish and church work during the absence on vacation leave of the Reverend Father Allot. The reception was also a farewell to Father Allot who sailed on September 29.

Farewell Banquet of Pedro Miguel Masonic Club.

The Pedro Miguel Masonic Club held a disbanding banquet on October 4 in the Pedro Miguel hotel. The president, John Kane, was toastmaster. There were addresses by John A. Walker, M. L. French, Alma White, F. H. Whitney, J. W. Sweeney, and Dr. Curney.

The club numbers among its members, Masons from 92 different lodges and 24 states, as well as from England, Ireland, Scotland, Canada, Mexico, Costa Rica, and Alaska.

E. P. Matter represented Alexandria-Washington, No. 22, the lodge where "The Father of his Country" presided as master.

One of the features of the evening was an address by Frank H. Whitney on "Forty-five years a Mason."

The club was organized on June 8, 1909, being a continuation of the Paraiso Sojourners Club, and had always maintained a good membership, even after the advent of the various Masonic bodies on the Isthmus.

The last officers were: President, John Kane; secretary, Ira M. Showers; treasurer, F. R. Curney; chaplain, Frank H. Whitney.

Dances.

The regular dance of the Cristobal Dancing Club will be held on Saturday, October 11 at the clubhouse. Invitations or membership cards must be presented at the door.

A dance will be held at the Gatun clubhouse on October 11 under the auspices of Lock City Lodge, No. 5, Knights of Pythias, similar to the one held in August. A charge will be made to cover the expenses.

Fund for Providing an Artificial Leg.

The subscribers to the fund raised for the purchase of an artificial leg for one Pablo Abello, employed as switchtender by the Fifth Division at Miraflores, are advised that the amount collected (\$80) has been turned over to the superintendent of Ancon Hospital and the leg will be fitted as soon as received from the manufacturers.

In the list of the diplomatic and consular corps accredited to the Republic of Panama, published in THE CANAL RECORD of September 10, the name of Mr. Daniel Rojas P., the Consul for Costa Rica at Colon was inadvertently omitted.

Southward trains will have preference over northward trains.

Trains stop at all stations, except No. 106.

Baggage for Balboa steamship connections will be handled as far as possible by trains Nos. 87, 91, and 97.

A labor train will leave Panama at 10.50 p. m., arrive Balboa Dock 11.05 p. m., returning, leave Balboa Dock 11.15 p. m., arrive at Panama 11.30 p. m., on nights when there is work at Balboa Dock.

All trains daily, except 83, 90, 93, and 100, which are discontinued Sundays.

OFFICIAL CIRCULARS.

Appointment of Timekeeping Inspector.

CULEBRA, C. Z., October 6, 1913.

HEADS OF DEPARTMENTS AND DIVISIONS:

Mr. H. T. Bosse has been appointed timekeeping inspector, Fourth Division, and will be charged with the inspection of timekeeping work and the investigation of complaints and errors.

He will be given any necessary cooperation by officials and employees.

By direction of the Chairman.

C. A. McILVAINE,
Chief Clerk.

Sunday Trips for Masters and Mates Through Culebra Cut.

CRISTOBAL, C. Z., October 6, 1913.

TO ALL MASTERS AND MATES:

The launch *Margaret* will be run through Culebra Cut from Gamboa dike to Cucaracha slide and return every Sunday (commencing October 12, 1913, if possible to put launch in Cut by that date), to afford masters and mates an opportunity to go over the course before dredging operations are started in that locality.

The launch will leave Gamboa dike at 9 a. m., returning in time for those from the Atlantic side to catch the 5.49 train to Colon, and those from the Pacific side the 5.57 train to Panama. Passes for this trip may be procured from W. G. Comber, resident engineer, Balboa, C. Z.

W. G. COMBER,
Resident Engineer.

Sailing of the "Ancon."

PANAMA RAILROAD COMPANY,
OFFICE OF GENERAL SUPERINTENDENT,
COLON, R. P., October 6, 1913.

CIRCULAR No. 226:

All concerned—The sailing date of the steamer *Ancon* has been set for Monday, October 13, 1913, at 3 p. m., from Pier 11, Cristobal, C. Z.

J. D. PATTERSON,
General Superintendent.

Special Train.

PANAMA RAILROAD COMPANY,
FREIGHT AND PASSENGER DEPARTMENT,
COLON, R. P., October 2, 1913.

To All Concerned—For the benefit of those desiring to witness the performances of the Morton Opera Company, special train will leave Panama 11.55 p. m., Tuesdays and Thursdays, October 7, 9, 14, and 16, taking first-class passengers only for stations between Panama and Bas Obispo.

J. C. ANGEL,
Freight and Passenger Agent.

Labor Train Changes.

EMPIRE, C. Z., October 1, 1913.

To All Concerned—Effective on the morning of October 6, the Bas Obispo-Balboa labor train and the Empire-Miraflores labor train will be consolidated; leaving Bas Obispo at 5.20 a. m. running over the Panama railroad main line to Balboa, making the necessary stops for the accommodation of men.

Passes will not be required on this train as are required at present on the Bas Obispo-Balboa labor train.

On the same day, the short labor train which leaves Pedro Miguel at 5.47 a. m. for Balboa over the Panama railroad will be taken off and the labor train which leaves Paraiso at 6 a. m. and runs to Corozal only,

will leave Paraiso at 5.45 a. m. and run through to Balboa.

A. SESSIONS,
Superintendent of Transportation.

Painting Retired Steel Dump Cars.

CULEBRA, C. Z., October 1, 1913.

To All Concerned—The Chairman has approved recommendation that good order steel dump cars, retired from service and turned over to the Quartermaster's Department for sale, be cleaned and given a coat of tar-cement paint, same to be applied with the paint-spray machine.

The above in addition to provisions covered by Circular 323-E, as regards other classes of equipment.

H. S. FARISH,
Surveying Officer.

Misdirected Letters.

ANCON, C. Z., October 8, 1913.

The following insufficiently addressed letters, originating in the United States and its possessions, have been received in the office of the Director of Posts, and may be secured upon request of the addressees:

Allen, Walter (papers)	Hallin, F. W.

Married.

COOK-HOWELL—At the Union Church, Cristobal, on October 3, Miss Viola Elizabeth Howell of Round Hill, Va., to Mr. George Farnham Cook of Palmyra, Me., the Reverend Carl H. Elliott officiating. Canal Zone residence, Las Cascadas.

WEATHER CONDITIONS, CANAL ZONE, SEPTEMBER, 1913.

The rainfall for the month was deficient at all stations except Ancon, Balboa, Empire, Monte Lirio, Gatun, and Brazos Brook. The monthly totals ranged from 6.75 inches at Camacho to 14.12 inches at Monte Lirio. The maximum precipitation recorded in one day was 3.26 inches at Monte Lirio on the 5th.

Approximately normal conditions of temperature, relative humidity, and atmospheric pressure prevailed during the month, while the cloudiness and wind movement were generally above normal.

The usual conditions of night and early morning foginess prevailed at the interior stations. The average number of nights with fog was 17. Forty-five per cent of the fogs observed were dissipated by 6.30 a. m., 92 per cent by 7.30 a. m., and 100 per cent by 8.30 a. m.

The following table summarizes the weather conditions for the month:

COMMISSION CLUBHOUSES.

Activities of the Young Men's Christian Association.

GENERAL.

The schedule for the regular moving picture exhibitions for the week October 13 to 18 is, as follows: Monday, Corozal; Tuesday, Cristobal; Thursday, Empire; Friday, Culebra and Porto Bello; Saturday, Gatun.

Additional moving picture exhibitions this week and Monday of next, are, as follows: Monday, Gatun; Tuesday, Culebra; Thursday, Corozal; Friday, Cristobal; Monday, Empire. The films to be shown are three reels of the Panama Canal by Edward H. Kemp of San Francisco, who has made several trips to the Isthmus for this purpose; also one reel of the Grand Canyon of Arizona by Mr. Kemp, and a multiple of three reels of "The wreck of the steamer *Aurora*". Regular rates of admission will be charged.

The standing of the various teams in the Isthmian tournaments at the close of the week ending October 4, follows:

BASKETBALL LEAGUE.

	Won	Lost	Total.

COROZAL.

The first basketball game of the Isthmian league was played with the Culebra team Wednesday night, October 1, with the following results:

First half, Culebra 17, Corozal 11; second half, Culebra 0, Corozal 6; extra period, Culebra 2, Corozal 0; final score, Culebra 19, Corozal 17.

Culebra's team was composed of the following players: R. Purchase, forward and guard; Porter, forward; F. Purchase, center; Helper, guard and center; Koperski, guard; Cushing, forward. Corozal's team was, as follows: Sperber, forward; Carr, forward and center; Sonnenberg, center; Bessy, center and forward; Schaeffer, guard; Kenny, guard. Referee, Edwards. The games this week are with Camp Elliott on Wednesday night, October 8, and with Empire on Saturday, October 11.

Corozal won two out of three games of tenpins in their first game of the Isthmian bowling league on Saturday, October 4, by the following scores:

Culebra.....	823	831	866
Corozal.....	811	866	970

The 200, or over, scores last week were made by Ziller, 222; King, 245 and 204; Davis, 243; Parkis, 216.

The Corozal bowlers go to Cristobal on Saturday, October 11.

The Corozal chess club has completed the tournament to decide the championship of Corozal. The results were:

	Won	Lost	P. C.
Sherrard.....	12	2	.857
Morehead.....	10	4	.714
Shehan.....	9½	4½	.672
Fields.....	8½	5½	.607
Mills.....	7	7	.500
Kingsbury.....	6	8	.428
Kyte.....	3	11	.214
Whitehead.....	0	14	.000

CULEBRA.

The winners of the local tenpin bowling tournament recently closed were: First place, J. Guy DeCora and E. Paul Case; total pinfall for two games, 758. The high average and high score medals were won by F. F. Dougherty; high score, 267.

The Empire bowling team will bowl the local team at Culebra on Saturday, October 11.

The Culebra basketball team will play the Gatun team at Empire on Saturday night, October 11.

Twenty-seven new books have been received and added to the library.

The following high scores in duckpins were made recently: Silver, 103; R. Koperski, 136; Kiernan, 100, 117, 101, 107, 106; Regan, 103, 106, 103; Palmer, 101, 109; Case, 109; Cornthwaite, 113; Herrington, F. E., 119; Fitzpatrick, 103, 110.

EMPIRE.

At the meeting of the Empire debating club held

Friday, October 3, the subject was: "Resolved, that the United States should use military force to pacify Mexico." The speakers for the affirmative were Messrs. Morrison and Swanson; for the negative, Messrs. Beckmeyer and Dougherty. The judges decided in favor of the negative, after which the subject was open for discussion. The next meeting will be held on Friday, October 17, subject to be announced later.

The opening game of tenpins between Empire and Camp Elliott was won by Empire. Scores: Empire..... 862..... 779..... 907
Camp Elliott..... 744..... 679..... 736

The basketball game played between Empire and Camp Elliott on Wednesday, October 1, was won by Empire by a score of 48 to 20. On Saturday, October 11, Gatun will play Culebra basketball at Empire.

Prizes have been offered for the one making high score in tenpins and duckpins during the month of October.

GATUN.

The "Saturday night open house" held at Gatun clubhouse on October 4, was a success. Punch and cakes were served from a table in the center of the lobby and Menecey, the pianist, entertained during the evening. The chief feature was the basketball game between Corozal and Gatun, which resulted in a victory for the home team; score, 20 to 15.

The line-ups were, as follows: *Gatun*—Huber, forward; Whiston, forward; Fitzpatrick and Wright, centers; Mitchell and Fitzpatrick, guards; Conley, guard. *Corozal*—Sperber, forward; Bessy, forward; Carr, center; Shafer, guard; Kenney, guard. Fouls: Gatun, 6; Corozal, 3. Referee, Swanson of Empire. Timer, Ben Jenkins. Scorers, Foman, Gatun; Dwelle, Corozal.

The result of the chess match, follows:

	Gatun	Cristobal
Brown.....	1	Hurt..... 1
Byrne.....	0	Taylor..... 1
Logan.....	1	Tuttle..... 2
Marquard.....	1	Wilson..... 1
Total.....	3	5

Gatun lost all three games of bowling with Cristobal. The feature of the evening was C. V. Omeara's game of 253 pins:

	Gatun	Cristobal
Omeara.....	208 164 253	Barrett..... 151 167 213
Wall.....	162 182 153	Barnum..... 174 150 171
Hodges.....	144 148 127	Collins..... 123 154 187
McCauley.....	165 166 179	Barte..... 193 190 182
Humphrey.....	159 172 166	Bullard..... 198 214 170

Totals..... 838 832 878 839 875 923

A special motion picture entertainment was held on Monday, October 6, when three reels showing the work on the Panama Canal were featured.

Mrs. Wm. Trickey now holds high score in duckpins, with 147 points.

A medal will be given to H. E. Dewey for having won the pool match for the championship of the Isthmus.

The Gatun basketball team has elected John J. Fitzpatrick captain for the season of 1913.

C. V. Omeara will be given a silver medal for having won the largest number of 200, or over, games of tenpins during the month of September.

Gatun's basketball team will play with Culebra at Empire on Saturday, October 11.

More new library books were ordered during the past week.

CRISTOBAL.

Mr. T. A. Welmeier, representing Cristobal, was defeated by Mr. Dewey of Gatun in a pool match, on Tuesday, September 30, by the score of 247 to 300.

The opening game of the all-Isthmian basketball tournament on Wednesday, October 1, resulted in a victory for Gatun by the score of 28 to 8. Gatun was represented by Messrs. Huber, Whiston, Fitzgerald, Connelly, and L. Mitchell; Cristobal, by Messrs. Barcroft, Weller, Fraser, Simons, and Luce.

Dr. J. B. Ruffo, chief surgeon of the Mexican Army under President Madero gave a talk on the present conditions in Mexico at the discussion club meeting on Thursday, October 2.

The Empire basketball team defeated Cristobal by the score of 46 to 8 on Saturday night, October 4. The line-up was, as follows: *Empire*—Messrs. Sawyer, Johnson, Holdquist, Miller, Plank, Bartholomew, and Stevens; *Cristobal*—Messrs. Moons, Simons, Anderson, Winters, Barcroft, W. Fraser and D. Raymond.

By bowling 237 pins, Mr. H. A. Collins received as prize, a box of cigars for the highest score at tenpins on the Cristobal alleys for the month of September.

A married folks duckpin tournament was held on Tuesday, October 7, in honor of Mrs. J. W. Landers, who sails for the United States shortly.

Corozal bowls at Cristobal on Saturday, October 11.

The Culebra Y. M. C. A. chess team will play the Cristobal team in the All-Isthmian chess tournament at Cristobal on Saturday evening, October 11. All interested in chess are invited to attend and witness the game.

MOVEMENT OF OCEAN VESSELS.

CANAL

RECORD

Volume VII.

ANCON, CANAL ZONE, WEDNESDAY, OCTOBER 15, 1913.

No. 8.

The Canal Record

Published weekly under the authority and supervision of the Isthmian Canal Commission.

The Canal Record is published free of charge, one copy each to all employees of the Commission and Panama Railroad Company whose names are on the gold roll. Extra copies and back numbers can be obtained from the news stands of the Panama Railroad Company for five cents each.

Address all Communications,

THE CANAL RECORD,

Ancon, Canal Zone,

Isthmus of Panama.

No communication either for publication or requesting information, will receive attention unless signed with the full name and address of the writer.

NOTES OF PROGRESS.

First Lockage at Pacific End.

The first lockage at the Pacific end of the Canal was effected on Tuesday, October 14, when clapet No. 6, the tug *Miraflores* with three barges, and the steam launch *Birdera*, were raised together through the west flight of Miraflores Locks, from the Pacific entrance channel to the surface of Miraflores Lake, which was at elevation plus 36.82 feet at 8 a. m., on that date.

The lockage was made without hitch of any kind, the gates, valves, controlling machines, and motors operating with the precision that has been obtained in the operations at Gatun Locks. The passage of the vessels was begun at 11.11 a. m.; they entered the lower level at 11.15 a. m., were raised to the elevation of the upper level at 12.15 p. m., and passed beyond the upper guard gates at 12.41 p. m. The entire operation consumed one hour and 30 minutes.

The gates and machinery of the east flight at Pedro Miguel Locks were in readiness to effect the lift to Culebra Cut on the same day, though it was impracticable to do so, because of insufficient depth of water in the Cut south of Cucaracha slide. The tug, clapet, and launch returned to Balboa, the return lockage occupying 45 minutes in time. When the water in the south end of the Cut is sufficiently deep to allow the passage of the vessels to Cucaracha slide, pipeline suction dredge No. 85 will be brought from its work at the Balboa terminal through Miraflores Locks and be passed through the single lift at Pedro Miguel Locks to Culebra Cut. The barges now in the lake are loaded with trusses and other materials to be used in the removal of the portable span recently installed in bridge No. 57½ of the Panama railroad, across the Cut at Paraiso, when it is desired to pass vessels through the bridge.

Transfer of Atlantic Division Electrical Work.

Effective October 15, the Gatun power plant, all electrical work heretofore under

the supervision of the division engineer of the Atlantic Division, and the installation, maintenance, and operation of sump pumps, in Gatun Locks, spillway, and hydroelectric station, were transferred to the Mechanical Division, together with the necessary number of operatives and workmen. The power plants at Gatun and Miraflores will be consolidated, and the records at both stations will hereafter be kept in the office of Mr. Hartley Rowe, electrical superintendent of the Mechanical Division, at Empire. The account "Operation of Gatun power plant," will be continued as a separate account.

Thirteen Vessels Raised Together Through Gatun Locks.

The west flight of Gatun Locks was used for the second time on October 9, when three groups of dredging vessels and a floating pile-driver, in tow of tugs, a total of 13 vessels, were lifted together from the Atlantic entrance channel to the surface of Gatun Lake. This performance, using the entire 1,000-foot length of each chamber, more nearly tested the capacity of the locks in commercial and naval use than the passage of the lone tug *Gatun* on September 26. Because of the care required in handling the groups, which filled the chambers with relatively slight clearance at the gates, the time of passage exceeded that of the *Gatun*, which was one hour and 51 minutes. The first group of dredging vessels entered the lower level at 9.50 a. m., and the rear group passed beyond the upper guard gate at 12.40 p. m.

The first group was composed of the tug *Bohio*, with a 600-ton barge loaded with piles and 500 tons of coal, and two old cement barges loaded with 250 tons of coal each. The second group was the *Gatun*, with pipeline suction dredge No. 86, several pontoons, and a fuel oil barge. The third group was the tug *Empire*, with the French ladder dredge No. 5, two dump scows, and a floating pile-driver. A motor launch and several pangas were towed in the rear. Upon reaching the lake level, the groups were towed beyond the end of the upper approach wall, then across to the edge of the lake, several hundred feet east of the Gatun station of the Panama railroad, to allow disembarking the passengers who had taken the opportunity to go through the locks. Shortly afterward, the tugs *Gatun* and *Empire* returned to the west approach, and were passed down the flight to the ocean in one hour and 35 minutes. The *Bohio* then took the three barges containing 1,000 tons of coal in tow to Gamboa, returning the next day for the dredges, and will remain there as auxiliary in the dredging operations in the vicinity, and in Culebra Cut.

DESTRUCTION OF LAST DIKE.

Water in Gatun Lake and Culebra Cut at Gamboa Equalized on October 10.

A section of Gamboa dike was dynamited at 2.02 p. m., on Friday, October 10, making practically a clear opening 125 feet wide, through which water from Gatun Lake flowed in sufficient volume to complete the filling of Culebra Cut from the dike to Cucaracha slide in about two hours' time. Water was first admitted to this section of the Cut on October 1, and by the 10th, it had risen to elevation 61.7 feet, or about six feet below the level of the lake. The shot was not a large one, as compared with some of the previous blasts in connection with the Canal work, but it did perfect execution.

In accordance with an arrangement made two or three days beforehand, the blast was fired by President Woodrow Wilson at Washington. This was effected by using the land telegraph to Galveston, Texas, and connecting it there with the Central and South American Cable Company's submarine cable, and land lines which, by employing the company's transisthmian cable, furnished a connection to a local circuit in the vicinity of the dike. When the President depressed the lever, the current was relayed from point to point along the route, and was eventually transmitted to the local circuit, closing it and tripping a weight attached to the handle of a switch. The weight threw the switch setting off the blast.

The event was witnessed by a large number of spectators, who lined the banks of the Canal, or occupied advantageous positions on nearby hills. The zone of danger was marked by stakes, and the people were kept back of this line. A special train was run from Panama, and some extra coaches were attached to the regular passenger train out of Colon. Half an hour or more after the dike was broken, a cayuco, or native canoe, made the passage through, followed shortly by three launches.

The accompanying plan and cross section of the dike shows its general characteristics, and its position relative to the east and west lines of the Canal. The dike was originally about 600 feet long, 78.2 feet above sealevel at its highest part, 150 feet wide at the base, and contained about 90,000 cubic yards of material. In the section that was destroyed, 400 holes had been drilled from 20 to 35 feet in depth. The total number of holes in the dike was 1,277; 200 of these were made with tripod drills, and the remainder by churn drills. The length of all the holes if placed end to end would equal 41,166 lineal feet, or 7.79 miles. In charging the well drill holes, 25,700 feet of 4-inch galvanized iron pipe were used.

The remainder of the dike, east of the opening, will probably be dynamited about October 17. It includes a hard rock sec-

tion where the end of the dike abuts on the east side of the Canal. What is left of the west end of the dike is composed of relatively soft material, and will be removed by dredge without any more blasting.

Dredges No. 86 and No. 5, which were passed through Gatun Locks on October 9, have begun operations near the dike. No. 86 is assisting No. 82 in the work of cleaning the channel north of the dike of material silted in, and No. 5 is excavating at the west end of

A force of 200 men with shovels has been engaged in keeping the trench clear, and, with the assistance of the flowing water, making it deeper and wider. By 4 p. m., Sunday, pipe connections had been made with a water tank on the south side of Contractor's Hill and the work of the men with shovels was augmented by sluicing with a 3-inch hose along the lower side of the barrier. During the forenoon of Monday, October 13, a 2-cylinder air-driven pump and connecting

feet, separated by a small lagoon, about 300 feet across, enclosed between elevations of the toe of the slide. The material now in the Cut from the slide amounts to about 600,000 cubic yards.

The trench through Cucaracha slide has been deepened about a foot and a half, and widened slightly, since beginning of sluicing at the upper end, on Monday afternoon, but the flow of water has increased only slightly. The surface of the water in the south end of the Cut was at +3.1 feet above sealevel at 8 o'clock in the morning of October 15, giving about a 4-foot depth in that part of the Canal. On October 14, it stood at +42.85. On the north side of the slide the surface of the water was at 68.96 feet above sealevel on October 15, at 10.30 a. m.

By evening of October 15 the flow had increased to 60 cubic feet per second, and it is believed that by Tuesday, October 21, the water south of slide will be of sufficient depth to float a dredge.

The last Culebra slide, immediately north of Gold Hill, made a movement across the channel on Saturday and Sunday, but sufficient clearance remains to allow passage of dredging vessels. The material at the foot of this slide is mostly rock, and it is possible that ladder and dipper dredges will be brought from the Atlantic entrance to work on it.

Surveyors from the Sixth Division are engaged in placing water-gage rods and range markers, showing center line of Canal channel and liners 150 feet each side of center, in preparation for beginning of dredging. Final adjustments are being made at the twin pump relay station south of Contractor's Hill, and at the electric transformer station, for supplying it with power, diagonally across from it, on the 95-foot berm along the east bank. Discharge pipe and pontoons for supporting it on the water, have been distributed along the west side for a distance of about 1,000 feet, between the relay station and the foot of Cucaracha slide.

Donation of Books for Zone Penitentiary.

Messrs. Hurst and Company, publishers, of New York City, have donated to the Commission for use at the Canal Zone penitentiary 533 bound volumes of miscellaneous literature.

the dike. The material excavated by ladder dredge No. 5 is being towed by the tug *Bohio* and dumped into an arm of the lake, north of the old site of Mamci.

CUTTING THROUGH CUCARACHA SLIDE.

After the blowing up of Gamboa dike, the southern end of the Canal, beyond Gold Hill, was separated from the waters of the lake by the foot of Cucaracha slide. Beginning October 6, forces of the Central Division had been engaged in digging a trench through the top of this barrier to allow the passage of the water from the north side. Successive downward movements of the slide, however, kept closing the trench, and it was decided to blow a gap in the barrier in the hope that the water would rush through it. A ton and a half of dynamite was placed in the toe, just opposite Contractor's Hill and exploded at 4.15 p. m., October 10. The explosion threw a great mass of earth and rock high into the air, and stones were hurled as far as 1,500 feet on either side, but the clay of the slide slumped back into place and closed the break before any considerable amount of water had passed through. Later blasts produced similar results, and the effort to clear the barrier in this manner was abandoned on Saturday, October 11. Trenching with pick and shovel was resumed that morning, and water began to pass through to the south side of the slide at 3.43 in the afternoon. During Saturday night, a movement of the slide closed the trench. It was opened again by 11 a. m., Sunday, October 12, and has remained open since.

pipe and 4-inch hose were brought from Empire and installed on the north side of the slide. At 2.50 p. m., this outfit began supplying water at 150 pounds pressure for sluicing the northern, or upper, part of the trench. This so facilitated the work that by 4 p. m., the water was flowing over the slide at the rate of about 40 cubic feet a second, in a stream from six to eight feet wide and approximately a foot deep, moving about six feet a second. It is believed that this method

CROSS SECTION OF GAMBOA DIKE.

will so increase the flow as to fill the south end of the Cut within a convenient period, though all calculations may be upset by further movements of the slide. The material of the slide is a dense, adhesive clay, intermixed with stones up to two feet in diameter, and does not yield easily to the flow of water.

The trench through the slide is parallel to the axis of the Canal and about 20 feet from the west bank. Its intake is at elevation 66.5 feet above sealevel, and its discharge at the level of water in the southern part of the Cut, which was at elevation plus 43.4 early in the evening of October 13. The trench is in two sections, with a total length of 600

The books have been received at the penitentiary and are now being classified and listed in the catalogue of the library. The volumes donated consist of a large assortment of fiction, some historical and scientific works, poems and poetical works, and dictionaries—French and English, German and English, and Spanish and English. The chief of police in reporting the receipt of the books states, as follows:

"The books are new, and except for flaws in binding, or damages resulting from handling, etc., (which do not affect their value to the penitentiary at all) they are in splendid condition, and form a very important and much appreciated addition to the prison library."

GENERAL PLAN OF GAMBOA DIKE.
(Hatched section blown up October 10.)

EXECUTIVE ORDER.

To Punish Deported Persons Who Return to the Canal Zone.

By virtue of the authority vested in me I hereby establish the following Order for the Canal Zone:

SECTION 1. Any person who, after having served a sentence of imprisonment in the Canal Zone and after being deported therefrom, returns to the Canal Zone shall be deemed guilty of felony and punished by imprisonment in the penitentiary for a term of not less than six months nor more than two years, and upon the completion of his sentence he shall be removed from the Canal Zone in accordance with the laws and orders relating to deportation. An entry into the Canal Zone, for any purpose, shall be sufficient to constitute a return to the Zone within the meaning of this Order; provided, however, that in case of necessity the Chief Executive of the Canal Zone, in his discretion, may grant a permit to any such person to return to the Canal Zone temporarily, but should he remain in the Canal Zone after the time specified in the permit he shall be deemed guilty of a violation of this Order and punished as therein provided.

SECTION 2. The Executive Order of May 2, 1911, providing a punishment for deported persons who return to the Canal Zone is hereby repealed.

SECTION 3. This Order shall take effect thirty days from and after its publication in THE CANAL RECORD.

WOODROW WILSON.

THE WHITE HOUSE,

September 25, 1913.

[No. 1832.]

Canal Excavation in September.

The grand total of Canal excavation to October 1 was 211,048,198 cubic yards, leaving to be excavated under the revised estimate of July 1, 1913, 21,304,802 cubic yards.

The total excavation for the month of September was 1,922,713 cubic yards. The wet excavation for the month was 1,425,964 cubic yards, and the dry excavation 496,749 cubic yards.

In the Atlantic section, the total excavation for September was 516,118 cubic yards. Of this amount, all but 1,091 cubic yards was wet excavation and consisted of material dredged from the Atlantic entrance to the Canal, and the Cristobal terminal, by forces of the Sixth Division.

The total excavation in the Central Division was 519,800 cubic yards, 150,400 cubic yards of which consisted of material removed in sluicing back of Gold Hill, by forces of the Fifth Division. Central Division steamshovels working in the Cut were permanently suspended on September 10, and up to an including that date, a total of 297,800 cubic yards had been removed, not including 71,600 cubic yards taken out from the banks of the Canal to relieve pressure in the zone of slides.

In the Pacific and Central sections, operations by the Sixth Division resulted in the removal by dredges of 760,537 cubic yards, 581,958 cubic yards from the Pacific entrance, and 178,579 cubic yards from the terminal basin. Dry excavation amounted to 126,258 cubic yards, 85,188 cubic yards from the terminal site, and 41,070 cubic yards from the

Canal prism. Of the dry excavation, 20,945 cubic yards were charged to "Plant."

A detailed statement of excavation, and a summary of the work on the locks and dams, follow:

ATLANTIC DIVISION.

Mean rainfall along Canal (nine stations), 9.66 inches.
By "Work" excavation is meant excavation actually made for one of the constituent parts of the Canal, such as prism, diversions, or locks, etc., that is, it represents material taken from the area to be occupied by the Canal and constitutes excavation useful for the completed Canal.

By "Plant" excavation is meant excavation outside any of the constituent parts of the Canal, such as prism, diversions, or locks, etc. It includes material necessary to be excavated for construction purposes only, and is chargeable against the particular plant item for which it is performed, such as prism, diversions, locks, etc.

PERSONAL.

Lieut-Col. William L. Sibert sailed for New York on the *Ancon* on Monday, October 13, on his annual leave of absence.

Col. William C. Gorgas, accompanied by Mrs. Gorgas, sailed for New York on the *Ancon*, on Monday, October 13, instead of on the *Carrillo*, on October 14, as first planned, Maj. Robert E. Noble and Dr. S. T. Darling, who are to go to South Africa with Colonel Gorgas, will sail for the United States on Thursday, October 16. They expect to

arrive in Johannesburg about the middle of December.

Mr. John D. Patterson sailed for New Orleans on the United Fruit Company's steamer *Sixiola* on Monday, October 13, on special leave of absence.

M. Philippe Bunau-Varilla, accompanied by his daughter, Vicomtesse de Rancougne, and son-in-law, the Vicomte de Rancougne, arrived on the Isthmus on the *Turrialba* from New Orleans, on Thursday, October 9. They visited every part of the Canal work, saw the operation of Gatun Locks and the destruction of Gamboa dike, and sailed for Costa Rica on Tuesday, October 14.

Examination by Board of Local Inspectors.

The Board of Local Inspectors will conduct examinations at the Administration Building, Ancon, on Wednesday, October 22, 1913, beginning promptly at 2 p. m., for persons desiring to procure the following classes of licenses: Pilots, masters, mates, marine engineers, chauffeurs, and navigators of motor boats. All applicants for licenses must procure from the Executive Office, Ancon, forms of application and information respecting the filling out of same, at least one day before the examination. Applicants for chauffeurs' licenses must also bring automobiles.

Concrete Work in Locks and Spillways.

Concrete work in the Canal locks is nearly completed, the aggregate amount in place at the close of work on October 11, being 4,480,773 cubic yards.

A statement of the concrete laid in the three sets of locks for the Canal, and in Gatun and Miraflores spillways, as of October 11, follows:

GATUN LOCKS.

The last concrete for the locks proper, as distinguished from that necessary to finishing work by the First Division, was mixed and placed on August 16, 1913. At the close of work on that day the total amount of concrete placed by the Atlantic Division amounted to 2,045,485 cubic yards.

JOINT LAND COMMISSION.

Awards.

(Continued from last week.)

Murray, Thomas, docket No. 1410, for all rights, claims and other interests in growing crops, fruit trees, houses, tax Nos. 1030 and 1033, and any other buildings and any other improvements which the said Murray may possess or may have possessed upon the lands of Caimito Mulato, the sum \$375 U. S. currency.

Polencia, Fidelino, docket No. 776, for all rights, claims and other interests in growing crops, fruit trees, house, tax No. 915, and any other buildings, and any other improvements which the said Polencia may possess or may have possessed on the lands of Juan Grande (Waterloo), the sum of \$40 U. S. currency.

Park, David, docket Nos. 352 and 1,323, for all rights, claims and other interests in growing crops, fruit trees, buildings, and any other improvements which the said Park may possess or may have possessed on lands lying above the 87-foot level near the Frijol Grande River on the lands of Tabernilla, not including claim for house formerly occupied by William Thomas, which is hereby dismissed, and not including further the property on La Loma de Tabernilla, which was purchased from Park by the United States in January, 1912 by Voucher 18510 for house, tax No. 1,163 and other improvements near Tabernilla, the sum of \$90 U. S. currency.

Ramos, Gregorio, docket No. 374, for all rights, claims and other interests in growing crops, fruit trees, buildings, and any other improvements which the said Ramos may have possessed near the Frijoles River on the lands of Tabernilla, before this was flooded by back water from the Frijoles River when the dump at Tabernilla partially closed the outlet for the water, the sum of \$100 U. S. currency.

Ramos, María Raimundo, docket No. 1,606, for all rights, claims and other interests in growing crops, fruit trees, buildings, and any other improvements which the said María Raimundo Ramos may possess or may have possessed near Cerro Viejo at the headwaters of the River Bailamoonos, the sum of \$75 U. S. currency.

Ramos, Pedro, docket No. 965, for all rights, claims and other interests in growing crops, fruit trees, buildings, and any other improvements which the said Ramos may possess or may have possessed in the region known as Agua Salud above the 87-foot contour line (this property being distinct from that below the 87-foot contour line purchased by the United States in July, 1911, by Voucher 15925 for house, tax No. 1435 and improvements near Buenavista), the sum of \$90 U. S. currency.

Rivas, Miguel, docket No. 347, for all rights, claims and other interests in growing crops, fruit trees, buildings, and any other improvements which the said Rivas may possess or may have possessed on the lands designated as Baldo Espino, and in land now covered by the Tabernilla dump, but excluding any claim for property located at Loma Frijoles, which the said Rivas may have held as a tenant of Margaret Rose Smith, the sum of \$75 U. S. currency.

Rodriguez, Timoteo, docket No. 1,449, for all rights, claims and other interests in growing crops, fruit trees, buildings, and any other improvements which the said Rodriguez may possess or may have possessed on the lands of Caño Quebrado above the 87-foot contour line (this property being distinct from that lying below the 87-foot contour line, which was purchased from Rodriguez by the United States in 1911), the sum of \$70 U. S. currency.

Salazar, Manuel, Estate of, docket No. 432, for all rights, claims and other interests in growing crops, fruit trees, buildings, and any other improvements which the said Salazar may have possessed in the region denominated Agua Salud and all improvements which were claimed by the said Salazar in the Canal Zone, the sum of \$250 U. S. currency, and it is directed that this award be paid into the Circuit Court of the Second Judicial Circuit of the Canal Zone for payment to the proper representatives of Manuel Salazar, deceased.

Salvador de Leon, Manuel, docket No. 1,017, for all rights, claims and other interests in growing crops, fruit trees, buildings, and other improvements which the said Salvador de Leon may possess or may have possessed near the River Caño Quebrado on the lands of Caño Quebrado the sum of \$200 U. S. currency.

Spalding, Edward, docket No. 845, for all rights, claims and other interests in growing crops, fruit trees, buildings, and any other improvements which the said Spalding may possess on the lands designated as Cansaloma and Waterloo (the said property being distinct from that located on the estate of Juan Grande on the west bank of the Chagres River, for which an award was made to Spalding under date of June 24, 1913 by the Joint Land Commission), the sum of \$60 U. S. currency.

Teran, Cotelino, docket No. 1,102, for all rights, claims and other interests in growing crops, fruit trees, house, tax No. 885, and any other buildings, and any other improvements which the said Teran may possess or may have possessed at various points on the lands of Juan Grande (Waterloo), the sum of \$250 U. S. currency.

Teran, David, docket No. 494, for all rights, claims and other interests in growing crops, fruit trees, house, tax No. 892, and any other buildings, and any other improvements which the said Teran may possess or may have possessed on the lands of Juan Grande (Waterloo), but not including claim of said Teran docket No. 1,414 for property said to be covered by Dump 4, the sum of \$100 U. S. currency.

Vassol, William, docket No. 1,342, for all rights, claims and other interests in growing crops, fruit trees, buildings, and any other improvements which the said Vassol may possess or may have possessed on the lands of Caimito Mulato, exclusive of the value of Houses 1036 and 1039 and improvements upon one hectare of land surrounding House 1039, the excluded properties having been held by Vassol under leases from the I. C. Co., and for which consequently no award can be made, in the sum of \$225 U. S. currency.

Williams, David, for all rights, claims and other interests in growing crops, fruit trees, house, tax No. 1034, and any other buildings, and any other improvements which the said Williams may possess or may have possessed on the lands of Caimito, the sum of \$70 U. S. currency. Total, \$6,785.

(Signed) FEDERICO BOYD, ROLAND P. FALKNER, SAMUEL LEWIS, L. S. ROWE, Commissioners.
September 20, 1913.

Award No. 35—In the matter of the estate of Cuatro Calles, docket No. 382. A claim was submitted to the Joint Commission for the estate of Cuatro Calles, in which Arturo, Carlos W. and Josefina Muller are stated to have a two-thirds interest, and the firm of Pinel Hermanos a one-third interest.

The evidence shows that the Muller family acquired their interest in these lands by a purchase on February 27, 1904 from Julio Poylo, and that the firm of Pinel Hermanos acquired their interest by a purchase from the said Julio Poylo on December 3, 1904.

The history of the land shows that Poylo acquired his interest in the same by purchase on February 24, 1904 from Narciso Barsallo. As evidence of the title of the Barsallo family in this land there were submitted certain declarations taken before the municipal judge of Gorgona in 1904 to the effect that in 1864 Segundo Rodriguez sold the land by deed, which has since been lost, to Evaristo Barsallo, who bought the same for his children, Narciso and others. These declarations further stated that the Barsallo family had been in peaceable possession of the land after the sale, and that occupiers of the land recognized the Barsallo family as owners. The accuracy of these declarations was drawn in question by Counsel for the United States, but in the opinion of the Commission, the evidence was not of a character to justify the Commission in repudiating the sale in 1864. Accepting the fact of a sale to Evaristo Barsallo in 1864 and taking into consideration the fact that the possession of these lands by the Barsallo family, after that date, was not questioned, it is not necessary for the Commission to trace the steps whereby Rodriguez acquired title to the property. In making a purchase from the claimants in 1909 the United States impliedly recognized title, and the Commission has reached the conclusion that the validity of such title as may be held by the present claimants ought not to be disputed by the Commission.

It appeared in the evidence before the Commission, and by the ocular inspection of the property that a large portion of the property was heavily wooded, and it appeared to the satisfaction of the Commission that the contention of the claimants that the property contained valuable timber was in some degree sustained. In appraising the value of the said property this element was taken into consideration by the Commission.

On the basis of the evidence presented an award is hereby made against the United States of America for the entire estate of Cuatro Calles, said award to include all right, title and interest of any persons to the entire estate, not heretofore acquired by the United States, together with all claims for improvements of whatsoever nature on the part of the owners of said estate, and of all rights claimed by them, in the sum of \$3,000 U. S. currency.

The conditions of this award are:

First.—This award shall be paid to the respective claimants hereinafter named in the amounts hereinafter specified on or before the 20th day of October, 1913, and if payment or tender of payment of any of the items of this award is not made on or before that date such items shall thereafter bear interest at the rate of six per centum per annum until paid.

Second.—The above award shall be distributed to the claimants hereinafter named, and the amount to

be received by each is, as follows: Arturo, Carlos W., and Josefina Muller, \$2,000. Pinel Hermanos \$1,000. (Signed) FEDERICO BOYD, ROLAND P. FALKNER, SAMUEL LEWIS, L. S. ROWE, Commissioners.
September 20, 1913.

Award No. 38—In the matter of sundry claims in the valley of the Trinidad River, Docket 1,244-A, etc.—An award is hereby made against the United States of America, in favor of the claimants hereinafter named, in the sum of \$2,575 U. S. currency.

This award shall be paid to the respective claimants hereinafter named, in the amounts hereinafter specified, on or before the 20th day of October, 1913, and if payment or tender of payment of any of the items of this award is not made on or before that date, such items shall thereafter bear interest at the rate of six per centum per annum until paid:

Benitez, Felipe, docket No. 191, for all rights, claims and other interests in growing crops, fruit trees, buildings, and any other improvements which the said Benitez may possess or may have possessed in the valley of the Rio Trinidad below the 100-foot contour line beyond the limits of the Canal Zone, but subject to the jurisdiction of the Canal Zone at Siricito, the sum of \$300 U. S. currency.

Costillo, Desideria, docket No. 177, for all rights, claims and other interests in growing crops, fruit trees, buildings or any other improvements which the said Desideria Castillo may possess or may have possessed in the valley of the Rio Trinidad below the 100-foot contour line beyond the limits of the Canal Zone, but subject to the jurisdiction of the Canal Zone at Siricito, the sum of \$600 U. S. currency.

Diaz, Feliciano, docket No. 182, for all rights, claims and other interests in growing crops, fruit trees, buildings or any other improvements which the said Diaz may possess or may have possessed in the valley of the Rio Trinidad below the 100-foot contour line beyond the limits of the Canal Zone, but subject to the jurisdiction of the Canal Zone at Las Cruces, the sum of \$25 U. S. currency.

Labarca, Ascension, docket No. 196, for all rights, claims and other interests in growing crops, fruit trees, buildings or any other improvements which the said Labarca may possess or may have possessed in the valley of the Rio Trinidad below the 100-foot contour line beyond the limits of the Canal Zone, but subject to the jurisdiction of the Canal Zone at Siricito, the sum of \$300 U. S. currency.

Labarca, Hilario, docket No. 190, for all rights, claims and other interests in growing crops, fruit trees, buildings or any other improvements which the said Labarca may possess or may have possessed in the valley of the Rio Trinidad below the 100-foot contour line beyond the limits of the Canal Zone, but subject to the jurisdiction of the Canal Zone at Siricito, the sum of \$150 U. S. currency.

Rivera, Reyes, docket No. 203, for all rights, claims and other interests in growing crops, fruit trees, buildings or any other improvements which the said Rivera may possess or may have possessed in the valley of the Rio Trinidad below the 100-foot contour line beyond the limits of the Canal Zone, but subject to the jurisdiction of the Canal Zone at Siricito, the said improvements being above the 87-foot contour line, and being distinct from the property lying below the 87-foot contour line which was purchased from the claimant by the United States in May, 1911, by Voucher 15190, the sum of \$400 U. S. currency.

Rodriguez, Domingo, docket No. 192, for all rights, claims and other interests in growing crops, fruit trees, buildings or any other improvements which the said Rodriguez may possess or may have possessed in the valley of the Rio Trinidad below the 100-foot contour line beyond the limits of the Canal Zone, but subject to the jurisdiction of the Canal Zone at Siricito, the sum of \$40 U. S. currency.

Rodriguez, Juan, docket No. 199, for all rights, claims and other interests in growing crops, fruit trees, buildings, or any other improvements which the said Rodriguez may possess or may have possessed in the valley of the Rio Trinidad below the 100-foot contour line beyond the limits of the Canal Zone, but subject to the jurisdiction of the Canal Zone at Siricito, the said improvements being above the 87-foot contour line, and being distinct from the property lying below the 87-foot contour line which was purchased from the claimant by the United States, the sum of \$90 U. S. currency.

Sanchez, Nicolas, docket No. 187, for all rights, claims and other interests in growing crops, fruit trees, buildings or any other improvements which the said Sanchez may possess or may have possessed in the valley of the Rio Trinidad below the 100-foot contour line beyond the limits of the Canal Zone, but subject to the jurisdiction of the Canal Zone at Las Cruces, the sum of \$50 U. S. currency.

Soto, Pedro, docket No. 189, for all rights, claims and other interests in growing crops, fruit trees, buildings or any other improvements which the said Soto may

possess or may have possessed in the valley of the Rio Trinidad below the 100-foot contour line beyond the limits of the Canal Zone, but subject to the jurisdiction of the Canal Zone at Siricito, the sum of \$180 U. S. currency.

Troyer, Luciano, docket No. 178, for all rights, claims, and other interests in growing crops, fruit trees, buildings, or any other improvements which the said Luciana Troyer may possess or may have possessed in the valley of the Rio Trinidad below the 100-foot contour line beyond the limits of the Canal Zone, but subject to the jurisdiction of the Canal Zone at Siricito, the sum of \$130 U. S. currency.

Valdez, Demetrio, docket No. 205, for all rights, claims and other interests in growing crops, fruit trees, buildings, or any other improvements which the said Valdez may possess or may have possessed in the valley of the Rio Trinidad below the 100-foot contour line beyond the limits of the Canal Zone, but subject to the jurisdiction of the Canal Zone at Siri Grande, the said improvements being above the 87-foot contour line, and being distinct from the property lying below the 87-foot contour line which was purchased from the claimant by the United States, the sum of \$35 U. S. currency.

Valasquez, Gregorio, docket No. 183, for all rights, claims, and other interests in growing crops, fruit trees, buildings, or any other improvements which the said Valasquez may possess or may have possessed in the valley of the Rio Trinidad below the 100-foot contour line beyond the limits of the Canal Zone, but subject to the jurisdiction of the Canal Zone at Siri Grande, the said improvements being above the 87-foot contour line, and being distinct from the property lying below the 87-foot contour line which was purchased from claimant by the United States in April, 1911 by Voucher 14790, the sum of \$275 U. S. currency. Total, \$2,575 U. S. currency.

(Signed) FEDERICO BOYD, ROLAND P. FALKNER, SAMUEL LEWIS, L. S. ROWE, Commissioners.
September 20, 1913.

Award No. 39—In the matter of sundry claims at Matachin, Docket 618-A, etc.—An award is hereby made against the United States of America in favor of the persons hereinafter named, who are occupiers of that portion of the original estate of Matachin, which was purchased by the French Canal Company and subsequently became the property of the United States of America, in the sum of \$670 U. S. currency.

This award shall be paid to the respective claimants hereinafter named in the amounts hereinafter specified on or before the 20th day of October, 1913, and if payment or tender of payment of any of the items of this award is not made on or before that date, such items shall thereafter bear interest at the rate of six per centum per annum until paid.

Alexander, Joseph, for all rights, claims and other interests in growing crops, fruit trees, house, tax No. 352, and any other buildings and any other improvements which the said Alexander may possess on the lands of Matachin, the sum of \$50 U. S. currency.

Briset, Samuel, docket No. 137, for all rights, claims and other interests in growing crops, fruit trees, house, tax No. 117, and any other buildings and any other improvements which the said Briset may possess on the lands of Matachin, the sum of \$65 U. S. currency.

Cesaire, Boula, in docket No. 930, for all rights, claims and other interests in growing crops, fruit trees, house, tax No. 650, and any other improvements which the said Cesaire may possess on the lands of Matachin, the sum of \$65 U. S. currency.

Cleron, Felix, in docket No. 931, for all rights, claims and other interests in growing crops, fruit trees, house, tax No. 593, and any other buildings and any other improvements which the said Cleron may possess on the lands of Matachin, the sum of \$200 U. S. currency.

Graham, Edward, docket No. 1,076, for all rights, claims and other interests in growing crops, fruit trees, houses, tax Nos. 354 and 355, and any other buildings and any other improvements which the said Graham may possess on the lands of Matachin, the sum of \$70 U. S. currency.

Johnson, J. R., docket No. 1,068, for all rights claims and other interests in growing crops, fruit trees, house, tax No. 651, and any other buildings and any other improvements which the said Johnson may possess on the lands of Matachin, the sum of \$150 U. S. currency.

Jolly, James, for all rights, claims and other interests in growing crops, fruit trees, house, tax No. 395, and any other buildings and any other improvements which the said Jolly may possess on the lands of Matachin, the sum of \$70 U. S. currency. Total, \$670 U. S. currency.

(Signed) FEDERICO BOYD, ROLAND P. FALKNER, SAMUEL LEWIS, L. S. ROWE, Commissioners.
September 20, 1913.

Award No. 40—In the matter of the claim of Gabriel Jolly for houses in the town of Gorgona, docket No.

1,250-A, and 870.—With respect to the houses in the town of Gorgona claimed by Gabriel Jolly, the evidence before the Commission shows that he was the owner of the property hereinafter referred to before he accepted any leases from the Isthmian Canal Commission. In his hearing before the Commission the claimant stated that he was the owner of the land upon which some of the houses were erected. The evidence submitted to the Commission does not sustain this contention, and in making its award to Gabriel Jolly it is to be understood that the Commission dismisses without award any claims presented by him for ownership in the land.

In conformity with the principles formulated in the opinion of July 25, 1913 on the demurrer of Counsel for the United States to the jurisdiction of the Commission in the matter of the claim of Juan Sotillo, and in accordance with the evidence submitted to the Commission:

An award is hereby made against the United States of America in favor of Gabriel Jolly for certain buildings hereinafter identified by their respective tax numbers, the said award to include all rights, claims and interests of any persons in the said building, together with all claims for improvements of whatsoever nature on the part of the said Gabriel Jolly and all rights claimed by him, in the sum of \$2,205 U. S. currency.

The foregoing award is made up of awards for individual houses, as follows:

Tax No.	Award	Tax No.	Award.
704.....	\$360	759.....	\$220
705.....	625	814.....	110
720.....	265	825.....	130
748.....	365	856.....	130

(Tax No. 856 was destroyed by the Canal Zone Government in 1911.)

This award shall be paid to the said Gabriel Jolly on or before the 20th day of October, 1913, and if payment or tender of payment of any of the items of this award is not made on or before that date, such items shall thereafter bear interest at the rate of six per centum per annum until paid.

(Signed) FEDERICO BOYD, ROLAND P. FALKNER, SAMUEL LEWIS, L. S. ROWE, Commissioners.
September 20, 1913.

Award No. 41—In the matter of certain claims for houses in the town of Gorgona, docket No. 1,250-A, etc.—The evidence before the Commission shows that the persons hereinafter named were the owners of the properties hereinafter referred to before they accepted any leases from the Isthmian Canal Commission. In no case did the persons hereinafter named make any claim to the ownership of the land.

In conformity with the principles formulated in the opinion of July 25, 1913, on the demurrer of Counsel of the United States to the jurisdiction of the Commission in the matter of the claim of Juan Sotillo, and in accordance with the evidence submitted to the Commission, an award is hereby made against the United States of America for certain buildings hereinafter identified by the respective tax numbers, the said award to include all rights, claims and interests of any persons in the said buildings, together with all claims for improvements of whatsoever nature on the part of any persons hereinafter named, and all rights claimed by them in the sum of \$3,585 U. S. currency.

This award shall be paid to the respective persons named hereinafter, in the amounts hereinafter specified, on or before the 20th day of October, 1913, and if payment or tender of payment of any of the items of this award is not made on or before that date such items shall thereafter bear interest at the rate of six per centum per annum until paid.

To the owners of buildings, for the settlement of all rights, claims or other interests which they may have in the same, together with any other improvements located on the lots with houses designated by their tax numbers, as follows:

Amos George, in docket Nos. 588 and 1,620, tax No. 844, \$100. (The property above described, is distinct from that of Juan Grande, for which an award was made by the Joint Land Commission under date of June 24, 1913.)
Destard, Emile, tax No. 860, \$160. *Jolly, Edward*, tax No. 869, \$40. *Serlan (Corlan), Thermae*, tax No. 781, \$40. *Tillman, Marie*, a total of \$1,520, for individual houses, as follows: Tax No. 707, \$850; tax No. 756, \$340; tax No. 757, \$330. *Wier, Alfred, Estate of, docket No. 1,320*, a total of \$525, for individual houses, as follows: Tax No. 810, \$200; tax No. 818, \$145; tax No. 845, \$180; and it is directed that the foregoing award in favor of the estate of Alfred Wier be paid into the Circuit Court of the Second Judicial Circuit of the Canal Zone for payment to the duly qualified representative of said estate. The owners of house, tax No. 704, docket No. 497, a total of \$1,200, to be divided among the owners for their respective interests, as follows: Barsallo, Saturnina, \$300; Posada, Carmen, \$450; Posada, Elvira, \$450. Grand total \$3,585 U. S. currency.

(Signed) FEDERICO BOYD, ROLAND P. FALKNER, SAMUEL LEWIS, L. S. ROWE, Commissioners.
September 20, 1913.

Award No. 42—In the matter of the claim of B. Moncherie, for house, tax No. 864 at Gorgona, docket No. 1,250-A.—Claim was entered by B. Moncherie for the value of house No. 864 located at New Town, Gorgona. The evidence in this case showed that the claimant purchased the house from G. Francis, and that at no time was any lease issued by the Isthmian Canal Commission for the land occupied by this house. The claimant, therefore, has the status of an occupier of public lands, and in accordance with the principles formulated by the Commission with respect to such occupiers, and the evidence in the case:

An award is hereby made against the United States in favor of B. Moncherie for all rights, claims or other interests which he may have in house No. 864 in the town of Gorgona, together with any other improvements on the lot occupied by this house, in the sum of \$25 U. S. currency.

This award shall be paid to the claimant in the amount specified on or before the 20th day of October, 1913, and if payment or tender of payment of this award is not made on or before that date it shall thereafter bear interest at the rate of six per centum per annum until paid.

(Signed) FEDERICO BOYD, ROLAND P. FALKNER, SAMUEL LEWIS, L. S. ROWE, Commissioners.
September 20, 1913.

Award No. 43—In the matter of the estate of Motochin, docket Nos. 618 and 722.—The evidence before the Commission shows that portions of the original estate of Matachin were purchased from the owners by the French Canal Company, and subsequently became the property of the United States of America.

In 1909, some of the members of the Bosque family sold to the United States the land lying below the 87-foot level. The property sold included two houses in the town of Matachin which belonged to the Bosque family. One of the members of the family, Angelica Bosque, refused to join in this sale. Her interest was shown by the evidence to be a one-ten undivided interest in the entire estate. Angelica Bosque died after this conveyance was made, and her estate is now represented by her husband, Hilario V. Seixas, who claims as administrator of the estate of Angelica Maria Bosque de Seixas, deceased, the amount of her interest in the lands included in this conveyance. In the award hereafter made to Hilario V. Seixas, as administrator of the estate of Angelica Maria Bosque de Seixas, deceased, the amount of this interest is included.

For the remainder of the estate claim is entered as the owners thereof by Maria E. J. de Bosque, Domitila Carmen Bosque de Paredes, and Hilario V. Seixas as administrator of the estate of Angelica Maria Bosque de Seixas, deceased. These persons were also claimants for damages alleged to have been suffered by the actions of the Isthmian Canal Commission.

The history of the case shows that at one time the estate was divided into two equal parts, one of which belonged to the present claimants, and certain others now deceased, as heirs of Cruz Bosque, and the other to General Buenaventura Correoso. Subsequently, one of the claimants, Domitila Carmen Bosque de Paredes, purchased the interest of General Buenaventura Correoso, and became entitled to one-half interest in the estate, in addition to that which she possessed as one of the heirs of Cruz Bosque.

A further claim was made for the loss of passes on the Panama railroad, but the Commission made no allowance for such claims for the reasons set forth in a separate opinion. No allowance was made by the Commission for the cost of a survey and maps used by the claimants in presenting their case before the Commission, and for which claim was made.

Further claims for damages alleged to have been caused by the clearing of the Carabali watershed, and consequent loss of rentals, by the issue by the Isthmian Canal Commission of leases to certain lands which were not the property of the United States, but were the property of the claimants, and the consequent loss of rentals, and by the construction of a road by the Isthmian Canal Commission through the property claimed by the Bosque family, and a claim for the value of two houses in the village of Matachin on lands conveyed to the United States by deed of May 3, 1909, were considered by the Commission, and in so far as such claims were deemed to be justified an allowance therefor was made and was included in the award of the Commission.

It is further in evidence that two of the claimants, Maria E. Jaramillo de Bosque, and Domitila Carmen Bosque de Paredes have each of them executed mortgages against their interest in the lands of Matachin, which mortgages are still in existence.

On the basis of the evidence submitted to the

Commission, an award is hereby made against the United States of America in favor of the persons hereinafter named for the entire estate of Matachín, not heretofore acquired by the United States, the said award to include all right, title and interest of any of the persons hereinafter named to the said estate of Matachín, including any improvements thereon which may be claimed by them, and including the right, title and interest as any of them may possess in the lands conveyed to the United States in 1909, together with all claims for damages which any of the persons hereinafter named have presented or may present against the Isthmian Canal Commission, by reason of any action of the said Isthmian Canal Commission or its agents, in the sum of \$20,260 U. S. currency.

This award shall be paid as hereinafter specified on or before the 22d day of October, 1913, and if payment or tender of payment of any of the items of this award be not made on or before the said date, such items shall thereafter bear interest at six per centum per annum until paid.

This award shall be distributed, as follows:

Maria E. Jaramillo de Bosque, \$6,000. This award is subject to such equities, if any, as may exist in favor of third parties, and it is directed that the said award be paid into the Circuit Court of the Second Judicial Circuit of the Canal Zone for distribution according to the terms of this award.

Domitila Carmen Bosque de Paredes, \$12,000. This award is subject to such equities, if any, as may exist in favor of third parties, and it is directed that the said award be paid into the Circuit Court of the Second Judicial Circuit of the Canal Zone for distribution according to the terms of this award.

Hilario V. Seixas, administrator of the estate of Angelica Maria Bosque de Seixas, deceased, \$2,260. Total, \$20,260 U. S. currency.

(Signed) FEDERICO BOYD, ROLAND P. FALKNER, SAMUEL LEWIS, L. S. ROWE, Commissioners.
September 22, 1913.

Award No. 44—In the matter of sundry claims for improvements on the lands of Matachín, docket No. 618-A, etc.—In the cases of the claims of the persons hereinafter named for the properties herein referred to, the evidence before the Commission showed that the properties in question were located above the 87-foot contour line upon the property claimed by the Bosque family, and that for the greater number, if not all, of these properties, rent was paid to the Bosque family.

In conformity with the principles formulated by the Commission in the opinion of September 20, 1913, on the right to compensation of tenants of the Bosque family above the 87-foot contour line, and the evidence in each case:

An award is hereby made against the United States of America in favor of the persons hereinafter named, for their interest in improvements on the lands above the 87-foot contour line which are claimed by the Bosque family, the said award to include all rights, claims, and other interests of the persons hereinafter named in growing crops, fruit trees, the houses designated by their respective tax numbers and any other improvements claimed by them on lands above the 87-foot contour line claimed by the Bosque family in the sum of \$3,255 U. S. currency.

The conditions of this award are:

First.—This award shall be paid to the respective claimants hereinafter named in the amounts hereinafter specified, on or before the 22d day of October, 1913, and if payment or tender of payment of any of the items of this award is not made on or before that date, such items shall thereafter bear interest at the rate of six per centum per annum until paid.

Second.—This award shall be distributed among the persons hereinafter named whose properties are identified by the tax numbers of the houses, if any, which are included in their claims, in the amounts hereinafter specified, as follows:

September 22, 1913.

Award No. 45—In the matter of sundry claims for improvements on the lands of Matachín, docket No. 618-A, etc.—In the cases of the claims of the persons hereinafter named for the properties herein referred to, the evidence before the Commission showed that the properties were located on that portion of the lands of Matachín below the 87-foot contour line, which was conveyed to the United States by deed of May 3, 1909, and that for these properties rent was paid to the Bosque family.

In conformity with the principles formulated by the Commission in its opinion of September 16, 1913, on the right to compensation of tenants below the 87-foot contour line on the lands of Matachín conveyed to the United States by deed of May 3, 1909, and the evidence in each case:

An award is hereby made against the United States of America in favor of the persons hereinafter named for their interest in improvements on the lands of Matachín below the 87-foot contour line which were conveyed to the United States by deed of May 3, 1909, the said award to include all rights, claims, and other interests of the persons hereinafter named in growing crops, fruit trees, the houses designated by their respective tax numbers and any other improvements claimed by them, on the said portion of the lands of Matachín, in the sum of \$9,910 U. S. currency.

The conditions of this award are:

First.—This award shall be paid to the respective claimants hereinafter named, in the amounts hereinafter specified, on or before the 22d day of October, 1913, and if payment or tender of payment of any of the items of this award is not made on or before that date, such items shall thereafter bear interest at the rate of six per centum per annum until paid.

Second.—This award shall be distributed among the persons hereinafter named, whose properties are designated by the tax numbers of the houses which are included in their claims, in the amounts hereinafter specified, as follows:

September 22, 1913.

Award No. 46—In the matter of sundry claims for improvements located near the Mandingo River, docket No. 618-A, etc.—An award is hereby made against the United States in favor of the persons hereinafter named, in the sum of \$4,400 U. S. currency.

This award shall be paid to the respective claimants hereinafter named in the amounts hereinafter specified, on or before the 22d day of October, 1913, and if payment or tender of payment of any of the items of this award is not made on or before that date, such items shall thereafter bear interest at the rate of six per centum per annum until paid.

Miranda, Victor, docket No. 1,592. for all rights, claims and other interests in growing crops, fruit trees, house, tax No. 1,565, and any other buildings and any other improvements which the said Miranda may possess on lands located near the Mandingo River, about three miles west of Bas Obispo, the sum of \$800 U. S. currency.

To the owners of house No. 1,564, etc., docket No. 1,593. for all rights, claims and other interests in growing crops, fruit trees, house tax, No. 1,564, and any other buildings and any other improvements which these persons may possess on lands located near the Mandingo River about two and one-half miles west of Bas Obispo, the sum of \$3,600 U. S. currency.

The foregoing award shall be paid to the owners of the property in equal shares, as follows: Catalino Miranda, \$900; Juan Miranda, \$900; Maria Miranda, \$900; Telefora Miranda, \$900. Total, \$4,400 U. S. currency.

(Signed) FEDERICO BOYD, ROLAND P. FALKNER, SAMUEL LEWIS, L. S. ROWE, Commissioners.
September 22, 1913.

Award No. 47—In the matter of the claim of Benjamin Forbes, for improvements at Matachín, docket No. 618-A and 731.—An award is hereby made against the United States of America in favor of Benjamin Forbes for all rights, claims, and other interests in growing crops, fruit trees, houses, Nos. 526, 527, and 528, and any other buildings or other improvements claimed by the said Forbes on the lands of Matachín in the sum of \$230 U. S. currency.

The foregoing award is made for two distinct properties, as follows:

First.—For crops and thatched houses situated near the road leading from Gorgona to Empire on land above the 87-foot level, claimed by the Bosque family, in the amount of \$125 U. S. currency.

Second.—For houses, tax numbers 526, 527, and 528 in the village of Matachín on lands lying below the 87-foot level, which were conveyed to the United States by deed of May 3, 1909, the sum of \$105 U. S. currency.

This award shall be paid on or before the 22d day of October, 1913, and if payment or tender of payment of any of the items of this award be not made on or before that date, it shall thereafter bear interest at the rate of six per centum per annum until paid.

(Signed) FEDERICO BOYD, ROLAND P. FALKNER, SAMUEL LEWIS, L. S. ROWE, Commissioners.
September 22, 1913.

Award No. 48—In the matter of the claim of Dan Cameron for improvements on lands of Juan Grande docket Nos. 532-A and 139.—The evidence in the case of Dan Cameron showed that he occupied a piece of ground in the lands of Juan Grande in that portion of the estate which was purchased by the French Canal Company and subsequently became the property of the United States. For the occupancy of these lands he had a permit from the Colombian municipality

of Gorgona. It is in evidence that such permits were granted somewhat indiscriminately by the old municipality and were frequently issued for lands in private ownership. Such permits conveyed no title to the land.

Later, the United States sought to place Cameron under a lease, but such lease Cameron refused to sign, because of the clauses therein which provided that in case the property were taken for public use no compensation would be made to him for his improvements. The United States did not dispossess Cameron, but suffered him to remain on the land. The refusal to sign the lease, involved a refusal or neglect to pay to the United States rent for the land occupied, and the Commission finds that Cameron is indebted to the United States for the arrears of rent upon the property. In making this award, due allowance has been made for the fact of such indebtedness.

Certain parts of the improvements of Cameron were destroyed by the operations of the Isthmian Canal Commission and for this he was paid.

In conformity with the principles formulated by the Commission with respect to the right of occupiers on the public land to receive compensation for their improvements and the evidence in the case:

An award is hereby made against the United States of America in favor of Dan Cameron for improvements near Gorgona, the said award to include all rights, claims or other interests in growing crops, fruit trees, buildings or any other improvements claimed by the said Cameron on any land near the Carabali River, or on any part of the original estate of Juan Grande, together with all claims of whatsoever nature on account of damages alleged to have been suffered by the operations of the Isthmian Canal Commission or the Panama Railroad Company, this property being distinct from that purchased from the claimant by the United States in October, 1909, by voucher No. 8007, in the sum of \$300, U. S. currency.

This award shall be paid on or before the 22d day of October, 1913, and if payment or tender of payment is not made on or before that date, it shall bear interest at the rate of six per centum per annum until paid.

(Signed) FEDERICO BOYD, ROLAND P. FALKNER, SAMUEL LEWIS, L. S. ROWE, Commissioners.
September 22, 1913.

Rules of Dismissal.

In the matter of sundry claims located as below designated docket 1,240-A, etc.—A number of claims have been presented to the Commission for property included between Gatun and Gamboa, for improvements below the 87-foot level, some of which are already submerged or partly submerged. In preparing for the creation of Lake Gatun, many persons were removed from time to time from their holdings and with many of them settlements were made. Other settlements have been made within this area at a more recent date.

A careful examination has been made of all cases in which a payment has been reported, and where there was any uncertainty in regard to the property covered by the previous payment, the claimant has been given the benefit of every reasonable doubt. In the following cases, the Commission has reached the conclusion that the claimants have no property for which an award could be sought from this Commission which is not covered by the previous payments hereinafter noted:

Bell, James William, Docket 1,441—The property included in this claim was covered by the payment in February, 1912, by Voucher 18695, in favor of William Bell, for the purchase of house, tax No. 8 and all other improvements of every kind in or near Bohio, Canal Zone.

Campbell, Joseph, Docket 1,438—The property included in this claim was covered by the payment in December, 1911, by Voucher 17754, for the purchase of all growing crops, fruit trees and farm house with that roof, tax No. 108, and all other improvements, situated in the valley of the Chagres River.

In view of the payments herein noted, no claim against the United States of America can be recognized by the Joint Commission, and these claims are hereby dismissed.

(Signed) FEDERICO BOYD, ROLAND P. FALKNER, SAMUEL LEWIS, L. S. ROWE, Commissioners.
August 30, 1913.

In the matter of sundry claims, docket 1,240-A, etc.—With respect to the persons hereinafter named, whose claims have been before the Joint Land Commission for consideration, the evidence shows that they have signed contracts with the Isthmian Canal Commission for the sale of the properties claimed by them. The names of such persons, the docket numbers of their claims, and a description of the property included in such claims, follow:

Campbell, Albert—Docket 1,066, claim for house, tax No. 274 and other improvements at Gamboa Hill.
Cotes, Emilio—Docket 362, claim for house, tax No. 266 and other improvements at Santa Cruz.

Jedron, Ambrose (also known as Ambrosio, Gideon, and Ambrose, Gideon)—Docket 745, claim for house, tax No. 1,836 and other improvements at Caimito.

Sandiford, Hubert—Claim for house, tax No. 1,835 and other improvements at Caimito.

In view of the agreements before noted, these claims call for no further action by the Joint Commission, and they are accordingly dismissed.

(Signed) FEDERICO BOYD, ROLAND P. FALKNER, SAMUEL LEWIS, L. S. ROWE, Commissioners.

September 10, 1913.

In the matter of sundry claims in the lands of Matachin docket No. 618-A, etc.—With respect to the occupiers on the lands of Matachin hereinafter named, who for the greater part have their improvements on that portion of the original estate of Matachin which was purchased by the French canal company, and subsequently became the property of the United States, the evidence before the Commission is that they have signed contracts with the Isthmian Canal Commission for the sale of the houses herein designated by their tax numbers, together with all their other improvements situated on the said lands. The names of such persons, the docket numbers of their claims, and the tax numbers of their houses, follow:

September 11, 1913.

In the matter of sundry claims, within the lake area, docket No. 1,240-A.—A number of claims have been presented for property in the lake area between Gatun and Gamboa for properties below the 87-foot level, some of which are already submerged or partially submerged.

In preparing for the creation of Gatun Lake, many persons were removed from time to time from their holdings and with many of them settlements were made.

In February and March, 1912, the Government made an examination of this region and an inspection of all occupiers. Subsequently, settlements were made with a large number of such persons, who executed releases and received payments for their houses and all improvements in the lake area.

A careful examination has been made of all cases in which payment has been reported, and the claimant given the benefit of every reasonable doubt. In the following cases we have reached the conclusion that the claimants have no property which is not covered by the previous payment or payments hereinafter noted:

Aimable, Isidore, docket No. 1,431, the property now claimed is covered by the payment in January, 1912, by Voucher 18478, for houses, tax Nos. 1,151, 1,159, 1,171 and 1,890, and all other improvements in or near the town of Tabernilla.

Busto, Juan, docket No. 1,351, the property now claimed is covered by the payment in April, 1912, by Voucher 19563, for two houses and other improvements near Limon, Gatun River.

Curbelo, Josefa, docket No. 171, the property now claimed is covered by the payments in November, 1910, by the Panama Railroad Company, for improvements on Lot 3 belonging to the Panama Railroad Company, and in February, 1912, by the Isthmian Canal Commission for improvements at Palo Horqueta y Matias.

McKenzie, Charles, docket No. 1,440, the property now claimed is covered by the payment in December, 1911, by Voucher 17748 to Charles McKenzie and Manuela Echeverria, for house, tax No. 98 and other improvements in the valley of the Chagres.

Medina, Juana Josefa, the property now claimed is covered by the payment in January, 1912, by Voucher 18207, for houses, tax Nos. 145 and 149 and other improvements near Bohio.

Muñoz, Manuel, docket No. 1,329, the property now claimed is covered by the payment in November, 1911, by the Panama Railroad Company, for all improvements in the area below the 87-foot contour line.

Pascero, Matea, docket No. 857, the property now claimed is covered by the payment in December, 1911, to James McKenzie, husband of the claimant, for houses and other improvements on the lands of Caño Quebrado.

Racine (Racini), Damian, docket No. 525, the property now claimed is covered by the purchase by the United States of certain improvements in the Canal prism, near Tabernilla, in December, 1909.

Rosemont, Touissant, docket No. 1,457, the property now claimed is covered by the payment in January, 1912, by Voucher 18289, for houses, tax Nos. 61, 75, 141, 142, and 160, and other improvements in or near the town of Bohio.

In view of the payments herein noted, no claim against the United States can be recognized by the Joint Land Commission, and these claims are hereby dismissed.

(Signed) FEDERICO BOYD, ROLAND P. FALKNER, SAMUEL LEWIS, L. S. ROWE, Commissioners.
September 22, 1913.

In the matter of sundry claims, in the valley of the Trinidad River, docket No. 1,244-A, etc.—A number of claims have been presented to the Commission for properties below the 87-foot level, some of which are already submerged or partly submerged. In preparing for the creation of Gatun Lake, many persons were removed from time to time from their holdings, and with many of them settlements were made. Other settlements have been made within this area at a more recent date.

A careful examination has been made of all cases in which a payment has been reported, and where there was any uncertainty in regard to the property covered by the previous payment, the claimant has been given the benefit of every reasonable doubt. In the following cases the Commission has reached the conclusion that the claimant has no property for which an award could be sought from this Commission, which is not covered by the previous payments hereinafter noted:

Chausing, Ramon, docket No. 164, the property included in this claim was covered by payment in November, 1910, by the Panama Railroad Company for his improvements in the valley of the Trinidad River.

Esperadeau, Julio, docket No. 1,115, the property included in this claim was covered by the payment in April, 1911, by the Panama Railroad Company for house and other improvements in the valley of the Trinidad River.

Rodriguez, J. S. de los Santos, docket No. 176, the property included in this claim is below the 87-foot level and is covered by a purchase made by the United States in making settlement for improvements in the valley of the Trinidad River.

Torres, Pedro, docket No. 189, the property included in this claim was covered by the payment in October, 1911, by Voucher 16972 for fruit trees and other improvements in the valley of the Trinidad River.

In view of the payments herein noted, no claim against the United States can be recognized by the Joint Land Commission, and these claims are hereby dismissed.

September 16, 1913.

PASSING OF HISTORIC TOWN.

Cruces, One of the Oldest Settlements on the Isthmus, Abandoned

The village of Cruces, situated on the south bank of the Chagres River, a little above Gamboa, will be abandoned, and the Division of Police and Prisons has been instructed to destroy the buildings, when the town has been depopulated. Most of the buildings, which are built after the native style, bamboo walls, with roofs of thatch, are below the 87-foot contour. The number of houses in the village, according to the tax records of 1910 was 60, not including the church and schoolhouse, but some of these were burned in the fire of 1912. The Canal Zone census of 1912 showed 169 people living there, consisting of 132 colored persons, 36 of mixed blood, and one white.

Cruces is one of the oldest settlements on the Isthmus, and in earlier times was known as Venta Cruz. One of the contemporary books on the Canal and the Isthmus describes its origin, as follows:

"The first transit route across the Isthmus, for the transportation of gold, silver, and merchandise from the various Spanish colonies on the Pacific to Spain, ran from the city of Panama to Nombre de Dios, on the shores of the Caribbean. It was cut through the forest and jungle, over mountain tops and across mountain streams, and was roughly paved with stones. It ran from Panama in a northeasterly direction for about 20 miles to a point on the Chagres River, which was given the name of Venta Cruz, afterward changed to Cruces. Thence it extended northward to Nombre de Dios. A line of posts was established along the route. It was put in use in 1519, and was the sole route between the two oceans until about 1535, when the Chagres between Venta Cruz and the Atlantic, a distance of about 36 miles, was made navigable for boats of light draft, and a water route was established between Venta Cruz and Nombre de Dios. The land route between these points was not abandoned, however, but continued to be used in connection with the water route. So well was the paving laid that parts of it remain in position today, and the entire trail from Panama City to Cruces is open, and is used by the natives as a highway for pack mules and ponies."

Dr. E. L. Auchenrieth in his book entitled *The Topography of the Isthmus*, published in 1851, speaks of the paved trail, as follows:

"It is stated that Francisco Pizarro, the conqueror of Peru, was the one that ordered the paving of the road, which was done with large, round stones sometimes a foot and a half in diameter."

A toll gate is said to have been set up at Cruces in the latter half of the eighteenth century, and all traffic between the two oceans passed the place. According to the report made by Bancroft on the fiscal regulations and commercial decline of the Spanish colonies, goods to the amount of 1,466,346 *pesos de oro* were registered as passing through the Casa at Cruces, while more than seven and one-half millions were smuggled across.

In their march from Fort San Lorenzo, at the mouth of the Chagres River, to attack Old Panama, Henry Morgan and his men ascended the river to Cruces. Esquemeling speaks of it, as follows:

"* * * Thus they proceeded on their journey till noon, at which time they arrived at a village called Cruz. * * * This village is seated in the latitude of nine degrees and two minutes north, being distant from the Port of Chagre 26 Spanish leagues, and eight from Panama. Moreover, it is the last place to which boats or canoes can come, for which reason they built here storehouses, wherein to keep all kinds of merchandise, which hence to and from Panama are transported upon the backs of mules."

Messrs. Sosa and Arce, local historians, note that the Chagres River was first explored from its mouth to the interior, probably to about where Cruces now is, by Capt. Hernando de la Serna, and the pilot Pablo Corzo, between April 3 and 10, 1527.

Following the construction of the Panama

railroad, Cruces entered upon a period of decadence, which has existed until this day. The Canal Commission has never instituted any changes there beyond including it within the Canal Zone school system. In May, 1906, arrangements were made to open a school in the old church, and the municipality of Gorgona was authorized to expend \$500 in improving the building. The church was 25 feet wide by 63 feet long, and it was estimated that it afforded sufficient accommodations for 100 children. School was opened in 1906, and has been continued ever since. On February 16, 1909, the citizens of the village addressed a memorial to the governor of the Canal Zone, asking him to cause the school to be removed to some other point in the village as the church was needed for religious purposes. This request was not acceded to, but the people were allowed to use the building on Sundays and feast days. In 1910, the church became unsafe, and on November 22 of that year a request was approved for a new schoolhouse, with a living room for the teacher. It was built on the highest knoll in the village, at elevation 101 feet, on land originally deeded to the French Canal Company. In the school year 1909-10, the highest enrollment was 20, and the average daily attendance 15.5. During the last school year the enrollment was 37, and the average daily attendance 13.9. The instruction has been in Spanish, although if the school had been continued another year, English would have been substituted.

Prior to 1911, the village had a historic curiosity in the shape of two wrought iron anchors. According to tradition, these anchors were brought up the Chagres River in boats for transport overland to Panama, but the plan was abandoned at Cruces. One of these anchors stood in the village about 300 yards from the river, and the other alongside the trail about 400 yards from the river. Each anchor has a 14-foot shank. The idea was conceived by Lieut. Walter D. Smith, formerly Constructing Quartermaster of the Canal Commission, to send these anchors to West Point. The anchors were placed on a raft, which subsequently broke loose from its moorings, and after floating down the river a short distance, collided with a log, breaking in two, and allowing the anchors to go to the bottom of the stream. They were recovered later, but before they could be placed on board a vessel, a cable message was received by the Chairman from the Secretary of War disapproving of the plan. The anchors are now in the yards of the general storehouse at Mount Hope.

Cruces also possesses another relic in three ancient church bells. These bells are of varying size, and from one of them a piece has been broken. The dates are indistinguishable, but they are known to be very old. After the transfer of the anchors, the inhabitants, becoming apprehensive that the bells also would be taken, had them removed and hidden. Later, when these fears were dispelled, they were returned to their old place.

Mr. Wolfred Nelson, the author of *Five Years at Panama*, published in 1889, records that the stone church at Cruces was destroyed in the earthquake of September 7, 1882.

Obituary.

Mary Jane, the five-year old daughter of Mr. and Mrs. Joseph Lenzen, residing at Ancon, died at Ancon Hospital on Thursday, October 9.

RULES AND REGULATIONS

Prohibiting the Passage or Presence of Floating Craft, except those belonging to the United States or the Panama Railroad, in that section of the Panama Canal known as Culebra Cut between Gamboa and Pedro Miguel Lock.

By authority of the President of the United States, as expressed in Executive Order of July 25, 1910, the following rules and regulations are adopted by the Isthmian Canal Commission for the purpose of facilitating work of excavation and Canal construction, and the same shall have the force and effect of law when approved by the Secretary of War.

SECTION 1. Without special permission in writing, signed by the Chairman of the Isthmian Canal Commission, no owner, master, or operator of any floating craft of any kind or character whatsoever, except such as may belong to or be chartered by the United States or the Panama Railroad Company, shall cause or permit such craft to enter, navigate, or be present within that portion of the Panama Canal known as the Culebra Cut, which lies between Gamboa and Pedro Miguel Lock.

SECTION 2. For the better enforcement of these rules and regulations the officers and agents of the United States and the assistant engineers, superintendents, and supervisors employed under them by the authority of the Isthmian Canal Commission, shall have power and authority to arrest and take into custody, with or without process, any person or persons who may commit any of the acts or offenses prohibited by Section 1 of these rules and regulations, or who may violate any of the provisions of the same.

SECTION 3. As ordered by the President of the United States, any person violating the provisions of these rules and regulations shall be guilty of a misdemeanor, and on conviction thereof shall be punished by a fine not to exceed five hundred dollars (\$500) or by imprisonment in the district jail for not more than six months, or by both such fine and imprisonment, in the discretion of the Court.

Approved:

LINDLEY M. GARRISON,
Secretary of War.

October 3, 1913.

More Tremors Recorded.

Up to Monday, October 13, there had been 32 movements recorded on the seismograph at the Ancon station in the present series of seismic disturbances. During the past week there has been only one pronounced shock, that which began at 7.46 p. m., on Saturday, October 11, the duration of which according to the average individual perceptibility was from five to seven seconds. The instrument registered a maximum amplitude of 45 millimeters, and the location, as indicated by the instruments, was the same as most of the others, namely, a point about 115 miles to the southwest.

The Central and South American Cable Company's cable repair ship *Guardian*, Captain Taylor, arrived off Panama on Sunday, October 12, having succeeded in repairing the cable which broke a few hours after the shock of Wednesday night, October 1. The trouble was located in the vicinity of the small islands known as Frailes del Norte and Frailes del Sur, about 15 miles off the coast of Los Santos province, and not far from the village of Tonosi. The cable at this point was down about 800 fathoms. It is believed that the break was caused by the earthquake

shock, as the company's records show that the cable has broken twice before in the same place, once during the severe shock of September 7, 1882. The splice that was made at that time was broken on this occasion. The recent shocks apparently disturbed the ocean bed in the vicinity of the break, for a section of the cable about half a mile long was found deeply imbedded in a mass of hard clay, and was extricated with considerable difficulty.

The Secretary of Public Works of the Republic of Panama has received the following telegram from Mr. D. F. McDonald, the Commission geologist, and Mr. W. C. Johnston, assistant chief engineer of the government, dated Tonosí, October 11:

"The greater part of the houses in Tonosí have been damaged, and many roofs have fallen in. Two distilleries have been destroyed, as well as the ovens in the bakeries. Fragile articles, such as crockery, glassware, etc., in stores and houses have been broken. There have been numerous slides in the neighboring mountains, and cracks have opened in the ground in all the valley of Tonosí. None of the hills, however, have sunk, and the area inundated by the rise in the rivers is not extensive. The inhabitants are alarmed, and are living in tents. Small shocks are experienced daily, accompanied by a rumbling like thunder. The present disturbances will probably result in a loss of crops, and an increase in sickness, on account of exposure and fright."

Another telegram sent by Messrs. McDonald and Johnston from Las Tablas on October 13 stated that on the 12th inst., at 5.30 in the afternoon three shocks were experienced in the same number of minutes. The people in that village have also resorted to the use of tents.

SOCIAL LIFE OF THE ZONE.

Church Notes.

The quarterly convention of the Isthmian Sunday School Association will be held at the Commission clubhouse in Corozal on Sunday afternoon, October 19, at 2.30 o'clock. The Reverend Carl H. Elliott, pastor of the Cristobal Union Church, will speak on the subject, "What is a good Sunday school?" There will also be addresses by Mrs. Harry Compton, head of the Methodist mission school in Panama, and Mr. H. S. Higgins of Culebra. The superintendent of each of the federated Sunday schools will speak five minutes on "How to keep a good Sunday school on the Isthmus." There will be special music. This is the first convention to be held under the new officers who are, as follows: President, J. M. Weaver; vice-president, J. F. Warner; secretary, W. F. Kromer; treasurer, W. E. Hoffman.

The American Woman's Altar Society of St. Ferdinand's Church, Empire, will hold a euchre party in the parish hall on Saturday evening, October 18. Prizes will be given. Tickets for admission are on sale at 50 cents gold.

Society of the Chagres.

In accordance with Article 16 of the constitution of the Society of the Chagres, nominations for officers to serve from the third Saturday in January, 1914, to the third Saturday in January, 1915, are now in order.

The attention of the members is directed to Article 5, which provides that no officer who has served one full term shall be eligible for reelection for the next ensuing term, with the exception of the secretary-treasurer. The present officers of the society are: President, Col. W. C. Gorgas; vice president, Mr. R. H. Wardlaw; secretary-treasurer, Mr. W. F. Shipley; members of executive committee,

Messrs. Dan E. Wright, H. S. Farish, Gerald D. Bliss, and Charles L. Parker.

ARTICLE 5. The officers of the society shall be a president, a vice-president, a secretary-treasurer, and an executive committee, consisting of the foregoing; and four other members. No salaries shall be paid to the officers, and, excepting the secretary-treasurer, no officer who has served one full term shall be eligible for reelection for the next ensuing term.

ARTICLE 16. Any ten members may nominate a fellow member for election to any of the offices of the society, but all such nominations must be submitted to the secretary-treasurer in writing not later than October 31. As soon as possible, but in any event not later than November 15, the secretary-treasurer shall prepare and mail to each member of the society a ballot containing the names of all candidates nominated for each office. At the annual meeting of the society, the vote cast by letter ballot shall be canvassed, and those candidates receiving a plurality of the votes shall be declared elected.

WILLIAM F. SHIPLEY,
Secretary-Treasurer.

CRISTOBAL, C. Z., October 13, 1913.

The New American Minister.

Mr. William Jennings Price, the new American minister, was officially received by President Porras in the yellow room at the Presidencia at 10 a. m., on Saturday, October 11, in the presence of the entire government cabinet. Mr. Price studied for the bar and was graduated from Centre College, Danville, Ky. In 1900, he was a Democratic presidential elector from that state, and was alternate delegate at large to the Denver convention in 1906. He was twice elected prosecuting attorney, and altogether has been elected to public office five different times. He was a member of the faculty of the College of Law of Central University, Danville, for several years, is a member of the bar of the United States Supreme Court, and is one of the proprietors of the *Kentucky Daily Advocate*. The appointment to his present post was unsolicited.

National Revolver and Pistol Match.

An open revolver and pistol championship match was held under the auspices of the Culebra Pistol Club at the range in Culebra, September 27 to October 5, both dates inclusive. The match was shot under the rules of the United States Revolver Association, and was held simultaneously with matches at different ranges in the United States. The standard American target with 8-inch bullseye was used. There were four events, all at 50 yards. The winners of the matches and scores were, as follows:

MATCH A.

(Fifty shots with any revolver; possible score 500)

First—Jacob Bernson, 435, gold and silver medal.
Second—M. W. Fox, 400, silver medal.
Third—M. E. Woodward, 386, bronze medal.

MATCH B.

(Fifty shots with any pistol; possible score 500)

First—Jacob Bernson, 439, gold and silver medal.
Second—M. W. Fox, 436, silver medal.
Third—M. E. Woodward, 408, bronze medal.

MATCH C.

(Rapid fire military revolver, 75 shots each, five shots in 15 seconds; possible score 750)

First—Jacob Bernson, 500, gold and silver medal.
Second—C. B. Larzelere, 448, silver medal.
Third—M. E. Woodward, 409, bronze medal.

MATCH F.

(Time fire, pocket revolver, 25 shots each, five shots in 30 seconds; possible score 250)

First—M. W. Fox, 179, gold and silver medal.
Second—Jacob Bernson, 173, silver medal.
Third—C. B. Larzelere, 170, bronze medal.

Missing Men.

Any one having information of the following named men, who are supposed to be on the Isthmus, are requested to communicate with the American Legation, Panama: Mr. William Stevenson, or W. L. Stevenson; Mr. Simon Weinfeld, and Mr. Lee Gordon.

COMMISSION CLUBHOUSES.

Activities of the Young Men's Christian Association.

GENERAL.

The moving picture schedule for the week October 20 to 25 is, as follows: Tuesday, Gatun; Wednesday, Cristobal; Thursday, Empire; Friday, Culebra and Porto Bello; Saturday, Corozal.

The standing of the ten high men in the bowling tournament for the first three games rolled October 4 is, as follows: O'Meara, King, Davis, Bullard, Cushing, Dougherty, Barte, Parkis, Peterson, Gustavson.

The standing of the teams in the chess tournament, October 11, was, as follows: Culebra, won 6 points; Cristobal, won 5 points; Gatun, won 3 points.

The standing of the teams in the basketball league, October 11, was, as follows:

Team.	Won.	Lost.	P. C.
Gatun.....	3	0	1.000
Empire.....	3	0	1.000
Camp Elliott.....	2	1	.666
Culebra.....	1	2	.333
Cristobal.....	0	3	.000
Corozal.....	0	3	.000

The standing of the teams in the bowling tournament was, as follows:

Team.	Won.	Lost.	P. C.
Cristobal.....	5	1	.833
Empire.....	4	2	.667
Culebra.....	3	3	.500
Corozal.....	3	3	.500
Camp Elliott.....	0	3	.000
Gatun.....	0	3	.000

COROZAL.

The following high scores were made on the local alleys: *Tenpins*—Taylor, 205, 204; Edwards, 235; Parkis, 233. *Duckpins*—Davis, 104, 101; Sammettinger, 110; Beall, 105, 102.

The Camp Elliott basketball team defeated the local team on Wednesday, October 8, by a score of 20 to 15.

Corozal lost to Empire Saturday night, October 11, in basketball, by the score of 58 to 14. Sperber, Corozal's forward was unable to play either of the above games, and Carr was unable to play in the game with Empire.

CULEBRA.

In the recent local bowling tournament the order of the high averages was, as follows: Dougherty, Anderson, Case, DeCorra, Hobbs, Tragsdorf, Cornthwaite, Hill, Herrington, Schmeck.

Recent high scores in *tenpins* were, as follows: Case, 205, 222, 201, 201, 207; Chadbourne, 202, 201; Ferguson, 200; Cornthwaite, 226; Tragsdorf, 207; Mengel 223.

In the league game with Empire on Friday night, in *tenpins*, the local team won two out of three games:

Empire.	Culebra.
Gustavson... 189 204 138	Cushing... 138 158 166
Potter..... 176 165 209	Cushing... 187 166 191
Peterson.... 148 151 193	Mengel... 166 223 133
Boeson..... 132 193 188	DeCorra... 170 125 139
Huson..... 177 137	Dougherty.. 183 180 188
Sims..... 177	

Totals.... 822 850 905

Gatun defeated the Culebra basketball team on the Empire floor on Saturday night, October 11, by the score of 34 to 17. The line-ups were:

Culebra—Hepler, Cushing, forwards; Chadbourne, center; Rose, Gassmann, guards.

Gatun—Huber, Wright, forwards; Fltz, center; Connolly, Mitchell, guards.

An "old-timer" after an absence of three years, gave a talk at the Sunday night service on "The men and religion" movement that has been in progress in the United States for the last two years.

Moving pictures will be shown on Saturday night, October 18.

Arrangements are being made for a "Smoker" to be held in the schoolhouse on Monday night, October 20. A wrestling match has been arranged, and an interesting program is promised. Refreshments will be served. All men are invited.

EMPIRE.

The Cristobal bowling team will bowl the local team on Saturday, October 18. On Wednesday, October 8, the Empire basketball team defeated the Culebra team by the score of 53 to 19 on the Empire floor. The Empire team will play at Gatun on Saturday, October 18.

The Empire debating club will meet on Tuesday evening, October 17. The subject is "Resolved that the unwritten law be not recognized by the courts." The speakers for the affirmative will be Messrs. Peterson and DeBarrows; for the negative, Messrs. Swanson and Morrison. The public is invited.

A special moving picture show was given on Monday October 13, for the benefit of the night men employed at Empire shops.

On the evening of Tuesday, October 21 a "Smoker" will be held at the Empire clubhouse. In addition to a

vaudeville program, Mr. W. W. Warwick, assistant comptroller of the United States Treasury, will make an address. The men of Empire are invited.

GATUN.

A pair of bowling shoes will be given as prize to the person obtaining the highest average in 15 consecutive games of tenpins between October 11 and November 1. The same prize will be offered the person obtaining the highest average in 15 consecutive games of duckpins. A ladies' bowling contest will be held on Wednesday, October 15. There will be two contests—"Open" and "Married."

Considerable interest is being taken in the local chess tournament.

The handicap pool tournament was brought to a close on Saturday evening, October 11. H. E. Dewey was awarded first prize, John Pettit, second prize, and L. Townley third prize.

Moving pictures will be shown at Gatun on Friday night, October 17.

Gatun meets the strong Empire team in basketball on the home floor on Saturday evening, October 18. Both teams have percentages of 1.090 in the league standing, and a closely contested game is expected. Members and their lady friends are invited.

CRISTOBAL.

Much interest in basketball is being manifested. A 6-team local league has been organized, captained by Messrs. Whitver, Wechsler, Ward, Barcroft, Luce, and Purvis. The first game was played on Monday, October 13.

Sixty-four books have been added to the library this month.

The results in the local chess tournament for the month of September are, as follows:

Player.	Games played.	Won.	Lost.	P. C.
Ogden.....	17	13½	3½	.794
Taylor.....	19	14	5	.737
Wilson.....	20	12	8	.600
Hurt.....	12	7	5	.583
McQueen.....	10	5	5	.500
Salzburg.....	20	9	11	.450
Verner.....	18	8	10	.444
Tuttle.....	14	6	8	.429
Rattiner.....	10	3½	6½	.350
Wechsler.....	13	4	9	.308
Martin.....	14	4	10	.286
Gill.....	2	0	2	.000

Cristobal took two out of three games from the Corozal tenpin team on Saturday, October 11. The scores follow:

Cristobal.				Corozal.			
Barrett.....	199	169	166	Davis.....	146	157	...
Barnum.....	180	158	131	Bordt.....	144
Collins.....	160	149	...	Parkis.....	204	145	187
Barte.....	201	165	211	Edwards.....	146	175	155
Bullard.....	166	180	178	King.....	149	169	161
Russell.....	Louch.....	...	155	182
				Ziller.....	185

Totals.... 906 821 831 789 801 870

Culebra took all games in the chess tournament on Saturday, October 11, as follows:

Cristobal.		Lost.	Culebra.		Won.
Hurt.....	2	Dubois.....	2		
Taylor.....	2	McClure.....	1		
Wilson.....	2	A. W. Warner.....	1		
		J. F. Warner.....	2		

Totals..... 6 6

Mr. and Mrs. Raymond Bell proved victors in the "Married folks" tournament in duckpins held on Monday, October 7, by the close margin of two pins. The totals were, as follows: Mr. and Mrs. R. Bell, 506; Mr. and Mrs. J. W. Landers, 504; Mr. and Mrs. Samuel Sloan, 478; Mr. and Mrs. G. C. Lucas, 467; Mr. and Mrs. C. Cotton, 438.

Tide Table.

The following table shows the time of high and low tide at Panama for week ending October 25, 1913:

DATE.	Low	High	Low	High
Oct. 19.....	A.M.	A.M.	P.M.	P.M.
Oct. 20.....	12.17	5.37	12.04	6.04
Oct. 21.....	12.59	6.14	12.45	6.44
Oct. 22.....	1.50	7.47	1.23	8.28
Oct. 23.....	2.53	8.49	3.28	9.40
Oct. 24.....	4.12	10.07	4.43	10.59
Oct. 25.....	5.28	11.30	5.56

75th meridian time.

Married.

HEARNE-SHRADER—On Friday, October 10, at the home of Dr. Matthew Hoey on Culebra Island, Panama Bay, Miss Ora E. Shrader of North Yakima, Wash., to Dr. Charles A. Hearne of Cristobal, Rev. C. W. Ports of the seaway Methodist Church, Panama, officiating. (Canal Zone residence, Cristobal, C. Z.)

OFFICIAL CIRCULARS.

Toro Point, to be a Military Reservation.

CULEBRA, C. Z., October 8, 1913.

CIRCULAR No. 435-A.

Effective October 20, 1913, the entire district of Toro Point is designated a military reservation.

No persons except employees of the Atlantic Division, the Fortification Division and their families now quartered at Toro Point, will be permitted to land there, except under the provisions of Circular No. 435, dated March 19, 1912.

Passes will be issued from the fortification office at Culebra, which will include transportation on the tugs, and will be signed only by the Chairman and Chief Engineer or by the assistant engineer in charge of fortifications. The issuing of passes by the Atlantic Division or by the Sixth Division for tug transportation will be discontinued.

Time inspectors, machinists, and other Commission employees who are obliged to visit Toro Point during working hours on official business will obtain transportation passes from the fortification office at Cristobal.

The chief of police will take such steps as may be required to enforce the above.

GEO. W. GOETHALS,
Chairman and Chief Engineer.

CULEBRA, C. Z., March 19, 1912.

CIRCULAR No. 435:

With a view of preventing, as far as practicable, visitors from obtaining information relative to the military defenses under construction on the Canal Zone, which might be communicated to a foreign power, the following regulations governing visitors to such defense reservations are hereby published, in accordance with Paragraph 358, Army Regulations:

1. Persons who are not employed in connection with fortification work will not be permitted to visit military defense reservations on which active construction operations have begun, except as provided in Paragraphs 2 and 3 hereof.

2. Officers of the U. S. Army, Navy and Marine Corps, who can conclusively prove their identity as such, will be permitted to visit such reservations.

3. Other American citizens will be permitted to visit such reservations only when provided with passes, which will, under exceptional circumstances be issued by the Chairman and Chief Engineer of the Isthmian Canal Commission, or by the assistant engineer in charge of the construction of fortifications.

4. Superintendents, assistant engineers, supervisors, foremen, and all other employees in charge of the several units and batteries under construction, are hereby directed to prevent the visits of all unauthorized persons and to treat such persons as trespassers.

H. F. HODGES,
Acting Chairman and Chief Engineer.

Transfer of Lock Work.

CULEBRA, C. Z., October 11, 1913.

CIRCULAR No. 504:

Effective October 15, 1913, the Gatun Locks, exclusive of the backfill, will be transferred from the Atlantic Division to the First Division, Chief Engineer's Office. On the same date the Pedro Miguel and Miraflores Locks, exclusive of the backfill, will be transferred from the Fifth Division to the First Division, Chief Engineer's Office.

GEO. W. GOETHALS,
Chairman and Chief Engineer.

Changes in Transportation Department.

CULEBRA, C. Z., October 7, 1913.

To All Concerned—Effective October 11, 1913, Mr. W. J. Holmes is appointed superintendent of transportation, as provided for by Circular 183-Z-1 of September 27, and Mr. W. T. Snyder is appointed assistant superintendent of transportation.

H. H. ROUSSEAU,
Assistant to the Chief Engineer.
GEO. W. GOETHALS,
Chairman and Chief Engineer.

Acting Division Engineer, Atlantic Division.

CULEBRA, C. Z., October 11, 1913.

CIRCULAR No. 502:

Effective October 13, 1913, and during the absence of Lieutenant-Colonel William L. Sihert on leave, Lieutenant-Colonel William V. Judson will act as division engineer of the Atlantic Division.

GEO. W. GOETHALS,
Chairman and Chief Engineer.

Acting General Superintendent, P. R. R.

CULEBRA, C. Z., October 13, 1913.

CIRCULAR No. 506:

Effective this date, Lieutenant F. Mears will act as

general superintendent during the absence of Mr. John D. Patterson on leave.

GEO. W. GOETHALS, President.

Acting Chief Sanitary Officer.

CULEBRA, C. Z., October 13, 1913.

CIRCULAR No. 508:

Effective this date, and during the absence of Colonel W. C. Gorgas on leave, Colonel John L. Phillips is designated as acting chief sanitary officer.

GEO. W. GOETHALS, Chairman.

Amendment to Timekeeping Rules.

EMPIRE, C. Z., September 29, 1913.

CIRCULAR No. 19:

Section 112-A—Effective October 1, 1913, time vouchers for silver employees prepared and signed by bonded timekeepers and approved by proper officers will be paid upon presentation direct to the Disbursing Officer at Empire, or at either of the two pay offices. The bonded timekeeper issuing a time voucher to a silver employee will complete it by filling in the receipt portion, and before delivery to the employee, it will be checked by another bonded employee if one is available, who will indicate that he has checked it by his signature under the word "Checked." Time vouchers presented for payment must not show alterations or erasures of any kind.

Section 112-B—A list in duplicate of silver time vouchers issued will be prepared daily and one copy forwarded to the Examiner of Accounts and the other to the Disbursing Officer immediately.

H. A. A. SMITH,
Examiner of Accounts.

Approved:

GEO. W. GOETHALS,
Chairman and Chief Engineer.

Supplies for the Canal.

The following steamers with supplies for the Isthmian Canal Commission and Panama Railroad Company, arrived at the ports of Balboa, Colon, and Cristobal, during the week ending October 4:

Alliance, September 28, from New York, with 844 pieces pipe, for Sixth Division; 13 cases fire brick, 40 pieces castings, 17 pieces castings, for Mechanical Division; 116 cases signal material, for Panama Railroad Company; 27 cases castings, 257 bundles steel, for First Division; 4,406 pieces lumber, 337 bundles lumber, 37 boxes harness, 350 drums lubricating oil, 30 kegs bolts, 57 bundles galvanized iron, for stock; and a miscellaneous cargo, consisting of 2,980 pieces, weighing 179 tons.

Emil L. Boas, September 28, from New York, with 158 crates fire brick, for Mechanical Division; 154 pieces pipe, 10 barrels salt, for stock.

Pleiades, September 29, from San Francisco, with six pieces spud timbers, 30 bales rubber hose, for Sixth Division; 2,100 cases dynamite, for stock.

Tenadores, September 28, from New York, with 283 pieces and two cases structural steel, for Panama Railroad Company; 274 steel plates, for Second Division; 207 steel plates, for Empire shops; 53 pieces, 10 bundles, three kegs steel, 165 I-beams, 10 crates electrical machinery, 5,400 pieces conduit, 104 pieces, and 285 bundles structural steel, for First Division; 12 cases copper nails, for Fifth Division.

Parismina, September 29, from New Orleans, with 98 pieces lumber, for Sixth Division; 3,463 sacks creosoted blocks, 1,132 barrels paving brick, for Second Division; 30 rolls fence wire, for Sanitary Department; 841 pieces lumber, 928 bales hay, for stock.

Auchencrag, October 1, from New York, with 10 cases ether, for Sanitary Department; 32,312 barrels cement, 189 drums gasoline, 10 cases benzine, for stock.

Ancon, October 2, from New York, with 500 bags white cement, for administration building; 10 boxes mining machinery for Empire shops; 809 pieces structural steel, 10 reels copper wire, 44 steel plates, 23 cases machinery, for First Division; 192 pieces steel piling, for Second Division; 74 pieces castings, etc. 241 bundles bar steel, for fortifications; 34 pieces pipe, for Fifth Division; 114 barrels leadite, 483 bundles bar steel, for Division of Municipal Engineering; 208 kegs rivets, for Mechanical Division; 20,999 barrels cement, 342 pieces pipe, 569 bundles galvanized sheets, 900 kegs wire nails, 62 kegs bolts, for stock; and a miscellaneous cargo, the whole consisting of 5,154 pieces, weighing 700 tons.

Colon, October 3, from New York, with 68 boxes lamps, 30 boxes forgings, for Mechanical Division; 37 boxes lamps, 1,145 pieces structural material, for First Division; 27 cases water meters, for Division of Municipal Engineering; 9,286 pieces hollow tile, for Second Division; 143 pieces signal material for Panama Railroad Company; 10 boxes varnish, 146 cases plumbing material, 40 cases paint, 50 cases varnish, for stock; and a miscellaneous cargo, the whole consisting of 11,259 pieces, weighing 283 tons.

Almirante, October 1, from New York with 124 pieces bridge iron, for First Division; 1,482 pieces steel plates, for Second Division; 20 bales hose, 12 cases pads, 14 cases paint, for stock.

Atenas, October 2, from New Orleans, with 2,376 sacks creosoted blocks, for Second Division; 390 sacks feed, 902 pieces lumber, for stock.

Sosua, October 2, from Port Bolivar, Texas, with 19,525 pieces lumber for stock.

COMMISSARY DEPARTMENT.

The commissary stores are open during the following hours:

Cristobal, 8 a. m., to 12.30 p. m., and 2 to 7 p. m.
Balboa, 8 a. m. to 12.30 p. m., and 2.30 to 7 p. m.
Ancon, 8 a. m. to 1 p. m., and 3 to 6 p. m.
All others, 8 a. m. to 1 p. m., and 3 to 7 p. m.

Retail prices of cold storage provisions effective October 11, 1913:

FRESH MEATS.	Price.

*Amended schedule, resulting from temporary withdrawal of the *Allianca* for repairs.

Panama Railroad Company's steamers sail from Pier 11, Cristobal, at 3 p. m.

Royal Mail steamers leave for New York on alternate Tuesdays at 1 p. m.; for Southampton on alternate Tuesdays at 10 a. m.

United Fruit Company's ships for New Orleans direct, leave on Thursdays and Saturdays at 3 p. m.; ships for New York via Kingston, on Tuesdays at 1.30 p. m. and Thursdays at 1.30 p. m.; for Bocas del Toro on Mondays at 5 p. m.; for Limon, via Bocas del Toro, on Tuesdays at 5 p. m.; and for Limon direct, Tuesdays at 3 p. m.

Hamburg-American steamers sail for New York, via Kingston and Santiago de Cuba, on Tuesdays; the *Prinz Joachim* and *Prinz August Wilhelm* at 10 a. m., and the *Emil L. Boas* and *Carl Schurz* at 2 p. m.

The Panamanian Steamship Company's *Panama* will sail from Panama for Aguadulce and Pedregal on October 16 and 26.

Sailing of the "Tivives."

OFFICE OF UNITED FRUIT COMPANY.
COLON, R. P., October 13, 1913.

To All Concerned—This is to advise that the steamship *Tivives*, scheduled to sail from Colon to New York, via Kingston, on October 28, will sail on October 27, at 1.30 p. m.

H. R. WILFORD,
General Agent.

CANAL

RECORD

Volume VII.

ANCON, CANAL ZONE, WEDNESDAY, OCTOBER 22, 1913.

No. 9.

The Canal Record

Published weekly under the authority and supervision of the Isthmian Canal Commission.

The Canal Record is published free of charge, one copy each to all employees of the Commission and Panama Railroad Company whose names are on the gold roll. Extra copies and back numbers can be obtained from the news stands of the Panama Railroad Company for five cents each.

Address all Communications,

THE CANAL RECORD,

Ancon, Canal Zone,

Isthmus of Panama.

No communication, either for publication or requesting information, will receive attention unless signed with the full name and address of the writer.

NOTES OF PROGRESS.

More Dredging Equipment Passed Through Gatun Locks.

Another division of the Atlantic dredging fleet was passed through the locks at Gatun from the sea channel to the surface of Gatun Lake on Wednesday, October 22. It consisted of the dipper dredges *Chagres* and *Mindi*, and three mud scows, in tow of the tug *Empire*; French ladder dredge No. 1, and four other mud scows in tow of the tug *Gatun*; and a coal hoist, fuel oil lighter, and loaded coal barge, in tow of the tug *DeLesseps*. The fleet began to enter the lower lock at about 9.27 a. m., and passed out into the lake at 1.30 p. m. All of the floating equipment passed through in this lockage will be held in the lake for use in dredging operations in Culebra Cut. This leaves only the seagoing suction dredge *Caribbean*, and the two pipeline suction dredges *Sandpiper* and No. 83, for work in the Atlantic entrance.

Submarine Cables for Lighthouse Transmission Line Across Culebra Cut.

Provision for electrical connection with the west side of the Canal has been made by the Lighthouse Subdivision, through ducts laid below the bottom of Culebra Cut near its north end, opposite Tower R on the main line of the Panama railroad. Four rectangular ducts of vitreous material, each four inches in interior diameter, have been laid with their bases at elevation 34.9 feet above sealevel, and all four encased together in an armor of concrete eight inches thick on all sides. The top of the armor is at elevation approximately 36 feet, or four feet below the bottom of the Canal channel. Where the duct line crosses the former drainage channel it was supported on a steel truss formed from a piece of scrap, which was once a part of an old French unloading crane at Balboa. The drainage channel was filled with rock to the level of the bottom of the Canal for 25 feet in either

direction, to protect the duct line from dredges operating in the Cut. The duct line is 520 feet in length, and at both ends, outside the Canal prism, are vertical shafts, built of reinforced concrete, reaching to elevation 95 feet, containing manholes, two feet by three feet six inches in plan, to allow access to the ends of the horizontal ducts. The manshafts are surmounted by 4-inch concrete slab covers, with ring bolts.

Through one of the four ducts has been drawn a cable, one inch and a half in diameter, for the use of the Lighthouse Subdivision in insuring continuous illumination of the 32 beacons to be installed along the 95-foot berm of Culebra Cut. Another duct is devoted to a cable containing 50 pairs of telephone and telegraph wires for the Panama railroad, while the two remaining ducts provide for future requirements.

The two ends of the cable wire will be connected with aerial transmission lines of 2,200 volts terminating at Pedro Miguel Locks, from which point all the fixed aids to navigation in Culebra Cut, and in the Pacific section, will be controlled.

Rafting Logs to Gamboa.

The Chilibre Land and Timber Company has entered into an arrangement with the Panama Railroad Company, whereby the former has been quoted a rate per hundred pounds on logs from Gamboa to New York. The timber company control a large tract of land on the Chilibre River, a small tributary of the Chagres which joins the main river near the village of Juan Mina. From this tract the company is engaged in cutting mahogany, cocobolo, and other hardwoods, hauling the logs to the Chilibre, and from there floating them down stream to Gamboa. A small house will be erected near the gravel pit, where the loading is done, for the accommodation of the company's employees during the period of loading on cars.

Tablet in Memory of John T. Morgan.

The Southern Commercial Congress has made formal application to the Secretary of War for permission to place at some prominent place in the Canal Zone a bronze tablet, about four by six feet in size, carrying a medallion life size bust of Senator John T. Morgan of Alabama, who died in 1907. It is also desired to have a legend inscribed on the tablet setting forth his relation to the Canal project. A number of delegates to the Congress are planning a cruise in Central American waters, and expect to arrive at Colon on November 4, on which date it is desired to dedicate the tablet. If the idea receives the approval of the Secretary of War, the tablet may be placed near Tower R, at Gamboa, at the northern entrance to Culebra Cut.

PASSING CUCARACHA SLIDE.

Efforts to Fill South End of Cut and Bring Dredges to Clear Channel.

The task of opening a way through Cucaracha slide to allow the filling of the two miles of the Cut between it and Pedro Miguel Lock, and thus make possible the bringing of dredges from the Pacific entrance to clean a navigable channel, has been carried on as rush work since the blowing up of the Gamboa dike.

On Wednesday morning, October 22, there were about 13 feet of water in the Cut south of the slide. A depth of 28 feet will be required for the passage of dredge No. 85, on account of the lifting barge being designed for elevation 68 feet, or plus 68 feet, in connection with the operation of removing the girder span in Bridge 57½, at Paraiso.

Following the failure of a ton and one-half of dynamite, exploded in the afternoon of October 10, and of successive smaller blasts at the upper end of the trench, which had been dug across the slide for the passage of Gatun Lake water, to enlarge the opening satisfactorily, blasting was temporarily abandoned, and efforts were made to increase the flow through the trench by means of shovels. This was augmented, beginning in the afternoon of October 11, by sluicing with hose. Two pipeline connections from tanks, and two from pumps installed on the lake side of the slide, were made by October 7, for the use of four lines of hose. Since the evening of October 14, the work has been carried on continuously by three shifts of men, working eight hours each in rotation.

The material has yielded slowly to sluicing. Beginning in the afternoon of October 15, further blasting was begun at the lower end of the trench, and advanced upward along the stream. Relatively light "dobie" charges were used at first, to loosen the bottom of the trench and assist the sluicing. Later, drill holes were sunk at advantageous points and heavy blasts exploded in the attempt to remove large masses of material. The heaviest of these, exploded at 11.45 p. m., on October 17, was of such violence that houses along the Canal, from Pedro Miguel to Empire, rocked on their foundations as in an earthquake, and articles were thrown from shelves.

The use of dynamite was scarcely more satisfactory than in the previous efforts. The nature of the material is such that it merely slumps back into place, or more of it is pushed forward by the slide to fill the hole made by an explosion. On the morning of October 19, it was decided to abandon blasting and remove the sluicing arrangements, and to bring a pipeline suction dredge from Gamboa to pump water over the barrier, in augmenting the flow. Accordingly, dredge No. 86 was towed in during the morning of October 20. In the meantime, a freshet in the Chagres was

causing a sharp rise of Gatun Lake; during the 48 hours ending at 7 a. m., October 21, the lake had risen 1.04 feet, or to elevation 70.74 above sealevel. This so increased the head of water at the slide that the flow during the morning of October 20 was estimated to be at the rate of 7,000,000 cubic feet per day. In the 24 hours following, the surface of water in the south end of the Cut rose two feet, registering an elevation of 49.87 feet above sealevel at 8 a. m., October 21. Moored about 300 feet north of the slide the dredge began pumping at 12.45 p. m., on October 21, using about 350 feet of 20-inch discharge pipe. Under the conditions at the slide, it has a pumping capacity of about 1,750,000 cubic feet in 24 hours.

The rate of rise of water in Culebra Cut, north and south of Cucaracha slide, is shown by the following records, taken at 8 a. m. of each date:

	North side*	South side†
Friday, Oct. 10.....	67.64	41.62
Saturday, Oct. 11.....	67.76	41.75
Sunday, Oct. 12.....	68.23	42.02
Monday, Oct. 13.....	68.55	42.31
Tuesday, Oct. 14.....	68.71	42.85
Wednesday, Oct. 15.....	68.96	43.10
Thursday, Oct. 16.....	69.14	44.03

Central Division Unloaders.

During the month of September, 1913, the following trains and cars were unloaded by the Central Division:

LOCATION.	No. of unloaders.	No. of trains.	No. of cars.
Balboa.....	4	549	10,671
Gamboa.....	2*	182	3,458
Total.....	5	731	14,129

*One unloader worked three days.

Steamshovel Records in September.

During the month of September, the total amount of material excavated in the Central Division was 519,800 cubic yards, of which 369,400 cubic yards were excavated by Cen-

tral Division forces, and 150,400 cubic yards were removed by sluicing at Gold Hill, the latter work being in charge of the Fifth Division of the Chief Engineer's Office. Of the amount removed by the Central Division, 144,490 cubic yards were classified as earth and 224,910 cubic yards as rock.

Of the total, 297,800 cubic yards were primary excavation for the Canal, and 71,600 cubic yards were classified as "Plant excavation." Three hundred and sixty-nine thousand four hundred cubic yards were removed by steamshovels.

Concrete Work in Locks and Spillways.

Concrete work in the Canal locks is nearly completed, the aggregate amount in place at the close of work on October 18, being 4,480,876 cubic yards.

A statement of the concrete laid in the three sets of locks for the Canal, and in Gatun and Miraflores spillways, as of October 18, follows:

GATUN LOCKS.

The last concrete for the locks proper, as distinguished from that necessary to finishing work by the First Division, was mixed and placed on August 16, 1913. At the close of work on that day the total amount of concrete placed by the Atlantic Division amounted to 2,945,485 cubic yards.

MIRAFLORES SPILLWAY.

Concrete work at the Miraflores spillway was completed on October 8. At the close of work on that day, the amount of concrete placed aggregated 76,346 cubic yards.

Missing Man.

Any one having information regarding the whereabouts of Mr. Clarence Mynders, who is supposed to be on the Isthmus of Panama, is requested to communicate with the office of the Chairman and Chief Engineer, Culebra.

Fire at New Gatun.

Fire on Tuesday, October 14, entirely destroyed two frame buildings at New Gatun, the property of Mr. Ricardo Arias of Panama. One of the houses, tax No. 222, contained 72 rooms, and the other, tax No. 225, twelve rooms. The fire broke out at about 6.23 p. m., in the larger of the two buildings, and quickly spread to the one adjoining. The Gatun company was assisted by the automobile fire engine, and a crew from the Cristobal sta-

tion, the engine pumping for 40 minutes. The fire, which is supposed to have been caused by the overturning of a kerosene lamp, or stove, was completely extinguished at 9.53 p. m. The construction cost of the buildings is estimated at about \$23,000. Three West Indians, who volunteered their services, were slightly injured during the progress of the fire.

Removal of Colon Light.

The lighthouse on Manzanillo Point, known as Colon Light, will be removed. It is the property of the Panama railroad, which has maintained a light in the tower, and has made a fixed charge against all ships entering the harbors of Colon and Cristobal for the cost of its maintenance. It has also been used by the railroad company as a signal station to notify ships at which dock they are to berth, or to be notified as to a ship's intention to lie at anchor in the harbor, when the ship enters without a pilot. The lens in the tower is of the fourth order revolving type, and is in fairly good condition. The iron framework is still serviceable, and may be utilized on Bona Island, or San José Rock, at the Pacific approach to the Canal. While the light is no longer required, it will be necessary for the railroad to have a signal tower, and it is proposed to erect one on the roof of the Hotel Washington, where the signals may be given with flags. The Fortifications Division will have charge of removing the light, and the material will be turned over to the Lighthouse Subdivision.

Accidental Drownings.

George L. Martin, a private in the United States Marine Corps at Camp Elliott, was accidentally drowned in the Caribali reservoir, near Gorgona, on Friday, October 17. He was 22 years of age, was unmarried, and had been on the Isthmus 10 months. His former home was at Philadelphia. A brother, Robert Martin, lives at No. 1224 South Nineteenth street in that city.

Guillermo Castro, metal check No. 19810, and Felipe Rojo, metal check No. 19614, Spanish laborers employed in the work of sluicing at Cucaracha slide, were drowned in the lagoon between the two sections of the trench across the slide, at about 10.40 a. m., October 16. Castro fell into deep water and Rojo attempted his rescue. Lawrence B. Steelman, an American powder foreman, sprang into the lagoon to assist them. He was unable to bring them out, and narrowly escaped drowning.

Suicide.

Miss F. Barrera, a passenger on the Pacific Mail Steamship Company's *City of Para* committed suicide at Balboa on the night of Wednesday, October 17, by jumping from the vessel into the water. The body floated to the surface and was discovered by the Balboa police the same night. Miss Barrera was between 35 and 40 years of age, and was on her way from Paris to her home in Salvador. She was a cripple and it is supposed that her deformity led to the commission of the act. The body was given burial in Ancon cemetery.

The semiweekly informal dance of the Strangers Club will be held on Thursday, October 23. The Guatemalan orchestra will furnish the music.

SOCIAL LIFE OF THE ZONE.

Cristobal Woman's Club.

The Cristobal Woman's Club held a reception at the Commission clubhouse on Wednesday afternoon, October 15, when there were present about 20 members of the club and a number of invited guests. This was the first general meeting of the club for the year, and the president, Mrs. Thomas Edwin Brown, Jr. delivered an address of welcome in which she gave an outline of the program as arranged by the committee.

The following musical program was carried out: Contralto solo, Mrs. Diers; soprano solo, Mrs. Mears; piano solo, Mrs. Farmer; soprano solo, Mrs. Williamson; vocal duet, Mrs. Mears and Mrs. Diers. Accompanists, Mrs. Ullrich and Miss Leyland.

On the first meeting in each month there will be a formal program, with a speaker or lecturer invited to speak on some special subject. The second meeting in each month will be more informal. The topic suggested by the paper read at the general meeting will be employed, with one of the members of the club as leader, and the short paper read will be followed by a general discussion.

With the exception of the two meetings in November, the names of the speakers cannot be given at this time. The calendar for the year is, as follows:

NOVEMBER.

Wednesday, November 5—Subject, The newspaper of today; its place and influence in moulding public opinion. Speaker, Mr. Richard Lee Metcalfe.

Wednesday, November 19—Subject, What newspapers and periodicals are responsible for. Leader, Mrs. Frederick Mears. General discussion.

DECEMBER.

Wednesday, December 3—Subject, higher education for women.

Wednesday, December 17—Discussion of public schools.

JANUARY.

Wednesday, January 7—Subject, eugenics.

Wednesday, January 21—Subject, the social problem and related topics.

FEBRUARY.

Wednesday, February 4—Subject, the trend of modern literature.

Wednesday, February 18—Subject, book reviews.

MARCH.

Wednesday, March 4—Subject, the Government of the United States.

Wednesday, March 18—Subject, suffrage and political parties.

APRIL.

Wednesday, April 1—Subject, sanitary conditions in South Africa.

Wednesday, April 15—Annual meeting.

Church Notes.

The annual harvest thanksgiving festival was celebrated in Christ Church, Colon Beach, on Sunday, October 12. The chancel was decorated with fruits, vegetables, and other products, the gifts of members of the parish. These articles were afterward sold in the schoolroom, the proceeds being devoted to the expenses of the church. Following the evening service at 7.30 o'clock, the second in the series of monthly organ recitals was given, the program consisting of compositions of Haydn. On Sunday, November 9, a Beethoven evening will be given.

The new Baptist church building in Cristobal was opened on Sunday morning, October 19, when the services were conducted by the superintendent of the mission, the Rev. J. L. Wise. Special preachers for the afternoon were the Rev. E. C. Notman, for 50 years missionary in Bocas del Toro, and Mr. Merwin Ganton, a worker among the

Indians in Peru. In the evening, the Rev. S. Moss Loveridge of Culebra preached. The new building has been erected to take the place of the concrete building, destroyed by fire on March 23, 1911, which was formerly situated across the boundary line in Colon.

At the quarterly convention of the Isthmian Sunday School Association, held on October 18, eighty-seven persons were present. Ten Sunday schools were represented by their superintendents, as follows: East Balboa, Mrs. William Tomey; Panama, Mrs. Rebecca Compton; Corozal, Mr. W. E. Lyno; Pedro Miguel, Mr. W. H. Faulkner; Paraiso, Mr. Thomas Kent; Culebra, Mr. J. F. Warner; Empire, Mr. W. H. Hoffman; Las Cascadas, Mrs. H. Jackson; Gatun, the Rev. C. O. Purdy; Cristobal, Mr. W. H. Kromer. The convention voted to arrange for the circulation of the library among the families living at the stations on the Panama railroad. This will be done through the Sunday schools in the towns of Gatun, Cristobal, and Bas Obispo.

Annual Meeting of University Club.

At the annual meeting of the members of the University Club, held in the evening of October 18, the following officers were elected for the ensuing year: President, Edward Schildhauer; vice-president, Robert K. Vibert; secretary, Paul S. Wilson; treasurer, A. Richardson; members of the board of governors, the aforementioned, *ex officio*, and Lieut. Geo. R. Goethals, Messrs. Joshua Piza, Samuel Lewis, James Forsythe, and Dr. A. B. Herrick.

Sale of Flowers at Mount Hope Cemetery.

It has been decided to discontinue the giving away of flowers at the Mount Hope cemetery, and to make sales hereafter at the following rates: Roses, 60 cents U. S. currency, per dozen; other flowers in bouquets at a price of 25 cents U. S. currency, and upward, according to the size of the bouquet, scarcity of flowers, season, etc.

Education of a Blind Boy.

A meeting of the committee on the Elysium James Education was held at the Hotel Tivoli recently. The committee is composed of women who were members of the executive board of the Canal Zone Federation of Women's Clubs at the time of the disbanding of this organization on April 19, 1912. There are seven members, and five were present at the meeting. The object of this meeting was to consider ways and means of raising money to complete the payment of the second year's schooling for the blind boy, Elysium James, who entered the Perkins Institute for the Blind in Boston, Mass., in September, 1912, as the ward of the Federation. The reports of his work and progress for this year were promising beyond the expectations, not only of the women who sent him, but of the teachers who instructed him. At the meeting of the Federation in January, 1913, a popular subscription for the second year's schooling was taken, the amount raised being a little over \$100. This money was paid for the first school term when the boy entered the institute in September, 1913. The committee feels that the full year should be given him if it is possible to raise the \$200 that remain to be paid. At the close of this year he will be brought back to the Isthmus, where efforts will be made to place him in

the way of earning his living by suitable work, such as caning chairs, which he has learned to do. The committee has undertaken various means of raising the remainder of the fund, and, with the generous response thus far accorded, it is thought that the money is assured. Mrs. Thomas E. Brown, Jr., of Cristobal is the chairman of the committee, and Mrs. J. E. Westberg of Empire is the treasurer.

PERSONAL.

Lieut.-Col. Charles F. Mason, accompanied by his family, returned from his annual leave of absence on the *Cristobal*, which docked on Saturday, October 17.

Lieut.-Col. E. E. Winslow, Corps of Engineers, Maj. William Chamberlaine of the Department of Artillery and Land Defense, and Maj. George Blakely of the Coast Artillery Corps, are spending a few days on the Isthmus.

Maj. F. C. Boggs, General Purchasing Agent of the Isthmian Canal Commission, and chief of the Washington office, was a passenger on the *Cristobal*, arriving October 18.

Mr. H. O. Cole, accompanied by his family, sailed for New York on Thursday, October 16, on the *Santa Maria*, on his annual leave of absence.

Mr. James C. Courts, clerk of the House Committee on Appropriations, accompanied by his son, arrived on the Isthmus on the *Cristobal*, on Saturday, October 18.

Mr. Forrest M. Towl, president of the Southern Pipe Line Company, arrived on the Isthmus on the *Pastores* on Tuesday, October 14. He has been engaged by the Canal Commission to make a study of oil pipe and pumping plant designs in connection with the permanent fuel oil pipe lines and pumping plants to be established at the Canal termini.

Mr. Frank P. Wagg, resigned as superintendent of schools, effective at the close of work, Saturday, October 18, and sailed for the United States on the *Panama* on Wednesday, October 22. He has been connected with the Canal Zone school system for the last four years. Mr. Albert R. Lang, has been appointed to fill the vacancy.

Banquet by First Division Employees.

A banquet was given at the Hotel Tivoli on Tuesday evening, October 21, by the employees of the First Division. Mr. C. P. Fortney acted as toastmaster, and remarks were made by Col. H. F. Hodges, Mr. W. R. Holloway and Mr. J. Donahue.

"Wandering Herd."

There will be a meeting of the "Wandering Herd" at the Hotel Washington on Sunday, October 26, at 1.30 p. m. It is urgently requested that all members attend as business of vital importance will be acted upon, and a report on the financial condition of the organization will be made by the secretary-treasurer.

JOHN H. KEEFE,
President.

Ancon, C. Z., October 20, 1913.

Obituary.

Mrs. Bernsee, wife of F. L. Bernsee, a former American employe, died at her quarters in the Garfield House, Colon, on Saturday, October 11. She was 43 years of age, and had been on the Isthmus two years. Her former home was at Louisville, Ky.

CANAL WORK IN SEPTEMBER.

Monthly Report of the Chairman and Chief Engineer to the Secretary of War.

CULEBRA, C. Z., October 15, 1913.

The Honorable the Secretary of War,
Washington, D. C.

SIR: I have the honor to submit the following report of operations on the Isthmus for the month of September, 1913:

Department of Construction and Engineering.

The following table summarizes the principal items of work accomplished by the construction divisions during the month:

ITEM.	Unit.	Atlantic.	Central.	2d Div.	5th Div.	6th Div.	Total.
Work excavation, dry.	Cubic yds...	1,091	297,860	69,432	35,881		404,204
Work excavation, wet.	Cubic yds...		*150,400	†214,917		1,060,647	1,425,964
Total work excavation	Cubic yds...	1,091	448,260	284,349	35,881	1,060,647	1,830,168
Plant excavation, dry.	Cubic yds...		71,600	15,756	5,189		92,545
Total Canal excavation	Cubic yds...	1,091	519,860	300,105	41,070	1,060,647	1,922,713
Material placed in dams	Cubic yds...	24,531			23,690		48,221
Concrete placed, locks, dams, and spillways.	Cubic yds...	2,615			3,095		5,710
Explosives used	Tons (Gross)	19.04	56.88		6.89	28.00	110.81
Rock drilled	Feet	9,080	137,218		6,702	15,510	168,510
Tracks removed	Miles	0.63	27.69	3.09			31.41
New track laid	Miles	1.40		4.80	1.10		7.30
Rock crushed	Cubic yds.				35,209		35,209
Cement used	Barrels	2,785		8,197	2,062	25	13,069
New roads built	Miles						
Water mains laid	Feet	2,305					2,305
Sewers laid	Feet						
Open drains and ditches dug	Feet			6,550			6,550
Average daily force		2,851	5,200	3,401	3,378	2,839	17,669
Average rainfall	Inches	9.92	9.95	9.01	8.32	9.45	9.66

*Removed by Fifth Division for Central Division.

†Removed by Sixth Division for the Second Division.

First Division—Office of the Chief Engineer.

LOCK GATE AND PROTECTIVE DEVICES.

The status of the work in the several locks may be summarized, as follows:

Gatun—Work was in progress on all the leaves, 40 in number: Erection, 99.9 per cent complete; reaming, 99.9 per cent complete; riveting, 99.9 per cent complete; finishing, 90.9 per cent complete.

Pedro Miguel—Work was in progress on the entire 24 leaves: Erection, 99.5 per cent complete; reaming, 99.9 per cent complete; riveting, 99.5 per cent complete; finishing, 90 per cent complete.

Miraflores—Work was in progress on all of the 28 leaves: Erection, 99 per cent complete; reaming, 99 per cent complete; riveting, 97.3 per cent complete; finishing, 76 per cent complete.

ERECTION.

On October 1st, 99.45 per cent of the total tonnage of lock gate material in all locks had been erected. There were still to be erected 26 tons at Gatun, 45 tons at Pedro Miguel, and 166 tons at Miraflores.

INSPECTION AND ERECTION OF OPERATING MACHINERY AND ELECTRICAL EQUIPMENT.

Valve machines—The present status of the mechanical erection is, as follows: Rising stem valve machines, 96 per cent complete; cylindrical valve machines, 100 per cent complete; auxiliary culvert valve machines, 100 per cent complete. The electrical installation of the above machines is 56 per cent complete for the rising stem valve, 56 per cent complete for the cylindrical valve, and 68 per cent complete for the auxiliary culvert valve machines. The mechanical erection of the 18

guard valve machines is 88 per cent complete, and the electrical installation of these machines is 19 per cent complete.

Miter gate moving machines—Ninety-two per cent of the mechanical, and 35 per cent of the electrical installation is complete.

Miter gate forcing machines—The mechanical erection is 40 per cent, and the electrical installation, 38 per cent complete.

Track—Approximately 89 per cent of all track is complete with concrete; 33 per cent of single, and 66 per cent of double crossovers, have been placed.

Spillway gate machines—The mechanical

erection is entirely completed and the electrical installation is 15 per cent complete.

Pumps—Mechanical erection is 75 per cent complete on miter gate sump pumps, 11 per cent complete on chain fender sump pumps, 100 per cent complete on drainage sump pumps, and 66 per cent complete on culvert pumps. Electrical installation is 36 per cent complete on miter gate sump pumps, and 57 per cent complete on drainage sump pumps.

Transformer room equipment—The installation of this equipment is 85 per cent complete at Gatun, 62 per cent complete at Pedro Miguel, and 52 per cent complete at Miraflores. For all the locks, this work is approximately 66 per cent complete.

Hydroelectric station—All foundations have been built. The three turbines and their penstocks, and also the headgates, are set complete.

Cable—Out of a total of 2,429,296 feet of cable on order, 802,250 linear feet have been pulled into the ducts.

Control houses—Seventy per cent of the steel beams for control house floors have been placed in concrete. The roof trusses of the control house at Gatun are placed and riveted.

Illumination—Reflectors for exterior and interior lighting are being manufactured from material on the Isthmus. At Gatun, the erection of the lamp posts, with cross-arms, is 99 per cent complete. At Pedro Miguel, 30 poles and 20 single cross-arms are set. At Miraflores, 30 posts are set.

Control apparatus—Practically all control apparatus for the locks and spillways is on the Isthmus.

Transmission line—Surveys were made from Mile 7 to Mile 18, inclusive, for the

location of track-span bridges, and stakes were set for the alignment of concrete forms between Miles 40 and 44½. Eighty-six foundations for track-span bridges were placed to carry the transmission line, making a total of 247 foundations set to the close of the month. Eleven track-span bridges have been placed on permanent foundations.

TESTING THE LOCKS.

Gatun—At 11.20 a. m., on September 26, water was admitted to the upper end of the upper lock from the west culvert, through the upper rising stem valves, and the water brought up to lake level. As a preliminary test of the valves and culverts of the west wall, the upper rising stem valves were then closed and the water passed down the flight of three locks. Water was then locked down, step by step, from the lake to the lower lock, which was also being filled by the two 14-inch sea valves in the lower guard gates. At 4.45 p. m., the lock had filled to sealevel and the lower gates were opened for the tug *Gatun*. The lower operating gates were closed behind the tug and she was lifted, step by step, to the lake. In order to save time on the ascent, the short length of lock was used, and the upward passage was made in approximately one hour and fifty-one minutes. All operating devices were operated from local control, that is, each machine was operated from the panel in the same room with the machine. This made it necessary to move from machine to machine for the various operations, whereas, when the plant is completed, the entire flight will be controlled from a central tower. On its return from the lake, the tug was locked through to sealevel in one hour and thirty-two minutes, all operating valves and gates in the west chamber being used.

Pedro Miguel—Five transformer rooms, necessary for the operation of the east lock chamber, and emergency dams, were put in service, including high and low tension feeders. All rising stem valve machines in the east culvert were tested and adjusted, including electrical work for local control. Four rising stem valves, the upper four on the center and west walls, were put in service, as well as all rising stem valves in the center wall, except Nos. 334 and 335, which were not tested on account of mud in the culvert below. All miter gate moving machines in the east chamber were tested and adjusted without struts. All cylindrical and auxiliary culvert valves have been finally tested and are ready for service.

Miraflores—All cables necessary for operating the west lock chamber have been tested for continuity of circuit, and all oil switches have been inspected and adjusted.

EMERGENCY DAMS.

Gatun, east dam—This dam has been completed, tested, and accepted.

Gatun, west dam—This dam has been completed, tested, and accepted.

Pedro Miguel, west dam—Final tests were made during the month with satisfactory results. The time for the complete operation was practically the same as for the two dams at Gatun. With the exception of painting, this dam is ready for acceptance.

Pedro Miguel, east dam—Pouring of concrete for the operator's house was finished, and the work of placing windows and doors was started. All concrete work for rack and

track quadrant was completed, and painting of the dam continued.

Miraflores, west dam—During the month, a total of 204 tons of structural material was assembled and bolted in place. Riveting is about three per cent complete.

Miraflores, east dam—During the month, a total of 204 tons of structural material was assembled and bolted in place. Riveting is about 28 per cent complete.

AIDS TO NAVIGATION.

During the month, work was in progress constructing an electric transmission line across the Cut at Gamboa and pulling cable through the same; installing an electric pole line from the main line of the Panama railroad to beacon No. 3, Atlantic section; completing the erection of range towers Nos. 9 and 10, erecting range tower No. 13, and delivering material to the site of tower No. 14, all in Gatun Lake section; driving pile cluster for the foundation of beacon No. 1, Atlantic section, and constructing slab foundations for beacons Nos. 2 and 3, Atlantic section; casting lamp bracket arms, beacon tops, and gas buoy sinkers at the pile casting platform at Gatun; constructing a permanent water stage register at Gatun, one at the north end of the east wing wall, and one at the south end of the east wing wall at Pedro Miguel; moving beacons, roofs, and sinkers from the old Balboa plant; and making the necessary surveys and reconnoissances, and clearing land in connection with the construction of range towers, targets, beacons, electric pole lines, etc. Forty-nine beacon platforms were manufactured at Empire shops and delivered at Gatun.

Second Division—Office of the Chief Engineer.

BALBOA TERMINALS.

The design of power distribution and interior illumination systems for the shops, and of the illumination for the administration building, was advanced; and other studies and designs for the shops were made. Work of erecting structural steel in various shed buildings, laying cement tile roofing, and erecting core ovens in the foundry, was carried on. Requisitions were submitted for tools and equipment, and some minor awards were made.

At the drydocks, entrance basin, and coal-plant, 85,188 cubic yards of earth and rock were excavated. Filling at the terminus amounted to 98,713 cubic yards. Five thousand nine hundred and eighty cubic yards of concrete, with 1,120,618 pounds of reinforcing steel, were placed in the construction of shops and quay walls. Thirteen thousand eight hundred and forty-nine linear feet of pile, 10,670 feet wood, and 3,179 feet pipe, were driven.

On the quay walls and pier, 362 linear feet of superstructure were completed, 2,630 linear feet of caisson manufactured, 28 piers sunk to rock, and 2,822 linear feet of caisson sunk.

METEOROLOGY AND HYDROGRAPHY.

The rainfall for the month was deficient at all stations, except Ancon, Balboa, Empire, Monte Lirio, Gatun, and Brazos Brook. The monthly totals ranged from 6.75 inches at Camacho to 14.12 inches at Monte Lirio. The maximum precipitation recorded in one day was 3.26 inches, at Monte Lirio on the 5th. Approximately normal conditions of temperature, relative humidity, and atmospheric pressure prevailed during the month, while

the cloudiness and wind movement were generally above normal. The average estimated rainfall over the Chagres River basin was about 10 per cent below normal: 10.57 inches, against a 13-year normal of 11.82 inches.

HYDROLOGY.

The total yield of the Gatun Lake watershed for the month was about eight per cent below normal, and that for Alhajuela, about three per cent below. There was one rise of moment, on the 9th during which the elevation at Vigia reached 136.2, a rise of 10 feet. This is the largest freshet since May 22, 1913. The maximum discharge at Alhajuela was 20,000 second-feet. The rise at Gamboa was about seven per cent of the Vigia rise, being one-tenth of the percentage holding (70 per cent) before Gatun Lake was formed. The lake rose from 60.42 to 66.00, or 5.58 feet, representing a storage of 18.90 billion cubic feet.

SURVEYS.

A circuit of precise levels was run around the territory of the Pacific terminus; a careful survey was made for the proper location of the coal dock at the Atlantic entrance; the location of gravel banks in the Chagres River between Alhajuela and Gamboa was made upon a map, 34 banks being located; surveys were made for oil tank location at both termini; surveys of large areas for the Joint Land Commission were completed, and other miscellaneous surveying work was done.

INSPECTOR OF SHOPS.

Pedro Miguel engine house was abolished on September 15, and the temporary hostling of engines at Cocoli was started that night. The hostling of engines at Gold Hill was commenced on September 9. Steel castings were poured for the first time in the Balboa foundry on September 5. The generation of oxygen and acetylene gas was commenced on September 6. The preparation of equipment for storage was started at Las Cascadas on September 29.

GENERAL.

The routine work of the office engineer, and the traveling engineer was carried on; and the landscape architect continued work on plans for Balboa and Pedro Miguel.

Fifth Division—Office of the Chief Engineer.

DISTRICT NO. 1—LOCKS, DAMS, AND DRY EXCAVATION.

Excavation—The total excavation amounted to 41,070 cubic yards, the entire amount being classified as earth.

Filling and embankment—Dry filling in the prism of the west dam at Pedro Miguel was not increased, the total amount of material in place remaining at 699,518 cubic yards. The backfill at Pedro Miguel was increased by 340 cubic yards, the total quantity in place at the close of the month being 1,024,253 cubic yards. At Miraflores, dry filling in the west dam was increased by 23,690 cubic yards, making the total quantities of dry and hydraulic filling in place at the close of the month 1,708,639 cubic yards, and 661,048 cubic yards, respectively. The backfill at Miraflores was increased by 9,511 cubic yards, the total quantity in place on August 31 being 1,910,270 cubic yards.

Pedro Miguel Lock—On the morning of September 17, the drainage from Culebra Cut was diverted to the east wall lock culvert, and the opening through which the drainage

water had entered the middle wall culvert since August, 1911, was closed, forms placed, and the opening filled with concrete. The middle wall culvert was cleared of debris. Drainage pumps, temporary dams, tracks, and materials were removed preparatory to the filling of Miraflores Lake. The wooden fender on the end of the south guide wall was completed. The steel roof of the lock control house was assembled and the riveting about 50 per cent completed. A 20-inch pump was installed to keep the west lock chamber dry until the gates are completed.

OPERATION OF THE AUXILIARY CONCRETE CONSTRUCTION PLANT AT PEDRO MIGUEL.

One $\frac{1}{2}$ -cubic yard mixer worked four days (30 hours, actual working time), and mixed and placed 170 cubic yards of concrete. There were 508 cubic yards mixed by hand, or a total of 678 cubic yards.

Miraflores Locks—Excavation of the dikes and high ground in the forebay of the locks was completed, the spoil being used for back-filling and grading around the locks. One steamshovel, located in a borrow pit on the north side of Cocoli Hill, supplied material for completing the junction of the west dam with the locks. Concrete work on the control house was continued. Obsolete material was removed and there was a general cleaning up around the locks. One 20-inch pump was installed in the lower east chamber to take care of drainage while work continues on the lock gates and the installation of machinery.

OPERATION OF THE AUXILIARY CONCRETE CONSTRUCTION PLANT AT MIRAFLORES.

One $\frac{1}{2}$ -cubic yard mixer worked four days (20 $\frac{1}{2}$ hours, actual working time), and mixed and placed 200 cubic yards of concrete. Concrete mixed by hand amounted to 1,144 cubic yards, or a total of 1,344 cubic yards.

DISTRICT NO. 4—ANCON QUARRY.

PERFORMANCE OF ROCK CRUSHER PLANT.

Length of working day (hours).....	8.00
Average number of hours per day, actual working time.....	7.09
Average number of cubic yards crushed per hour per working day.....	156.48
Average number of cubic yards crushed per working hour.....	196.41
Total output for the month (cubic yards)...	35,209.00

DISTRICT NO. 5—GOLD HILL SLUICING PLANT.

Excavation during the month totaled 150,400 cubic yards. The south cut was extended approximately 100 feet into the active slide. The north flume was raised and excavation continued near the face of the Cut. Near the north flume, a hydraulic elevator was installed, which elevated material to a height of 26 feet and discharged it into the flume. A 4-inch nozzle was used in the elevator, and a 4-inch monitor was employed for cutting and sluicing to the elevator. Foundations were completed for the booster pumps which are to be used in connection with sluicing the high ground east and to the rear of Cucaracha slide, and one of the pumping units was received. The pile foundations were driven for the additional 7,500-gallon pumping unit at the central station.

Sixth Division—Office of the Chief Engineer, PACIFIC END.

Seven dredges were engaged in channel and inner harbor excavation at Balboa, removing 321,246 cubic yards of earth and 269,712 cubic yards of rock from the Canal prism, and 178,579 cubic yards of earth from the inner harbor and terminal basin site, a total of 769,537 cubic yards. At the close of the month, there remained to be removed from the Canal

prism, not including fill, 2,291,535 cubic yards. The French ladder dredge *Gopher*, engaged in sand excavation at Punta Chamé during the entire month, removed 18,650 cubic yards.

ATLANTIC END.

Eight dredges were in operation during the month, removing 450,517 cubic yards of earth and 28,172 cubic yards of rock from the Canal prism. On October 1, there remained to be excavated 710,896 cubic yards. On the same date, 40 feet of water could be carried from zero to zero plus 2,100 feet, and 35 feet to the locks at Gatun. In addition to prism excavation, 116,385 cubic yards of coral sand from Margarita Bay, 4,573 cubic yards of coral and 31,765 cubic yards of coral sand from the coal station, and 21,946 cubic yards of rock from the north side of pier No. 17, were taken out.

Division of Municipal Engineering—Office of the Chief Engineer.

NORTHERN DISTRICT.

The construction of the new Colon waterworks was continued and all concrete work, other than pavement and gutter and certain finishing work, was completed. The pump station was completed, with the exception of the floor within the building and the installation of the low service pumps. All work on the sedimentation basin was completed, except for certain miscellaneous service piping. The main filter building was completed up to and including the eaves, and made ready for the setting of the roof trusses. The main entrance, including the stairways, was 75 per cent completed at the close of the month. The 20-inch pipe line from Brazos Brook to the aeration basin was also completed. Preparation of the special sand for the filter bed was continued, and approximately 350 cubic yards were screened, washed, and separated. All work on the new Colon improvements was completed.

SOUTHERN DISTRICT.

Construction of the storm sewers for the new American townsite at Balboa was continued and 571 linear feet were completed. Construction work on the new townsite known as La Boca was continued, approximately 7,000 cubic yards being excavated and about 5,200 cubic yards being backfilled. At the end of the month, all work in this townsite was approximately 40 per cent completed.

NEW PANAMA WATERWORKS.

Work was continued at the site of the Miraflores pump station, at the purification plant, and at the high service reservoir at Ancon. At the Miraflores pump station, concrete work on the intake house was practically completed, four piers were built to support the concrete walk between intake house and pump station, and the concrete walk was completed. Excavation for the main pump sump was completed; also, all concrete work in distribution culvert and walls of main sump. Floors were started in the auxiliary sumps. The 30-inch pipe line was extended nine feet into the distribution culvert, and the 4-inch section extending into the gatehouse was installed. At the Miraflores filtration plant, steamshovels were engaged throughout the month on the site proper, 12,640 cubic yards of rock being excavated. Fill was continued on the north end of the plant. At the Ancon high service reservoir, work was completed on the sand and rock bins, track was laid up the incline and a car put in operation, and work was continued excavating the site for the

foundations, and 5,964 cubic yards of material were removed, most of it solid rock. Work was commenced on the construction of the 300,000-gallon wash water tank for the Miraflores purification plant, 250 cubic yards of earth and rock being removed.

Atlantic Division.

GATUN LOCKS.

Construction of the new Gatun saddle dam was continued, 2,441 cubic yards of earth being taken out of the banks and placed therein. The backfill placed during September amounted to 30,391 cubic yards; at the close of the month, the backfill was 98.4 per cent completed.

Receiving and issuing material—No cement was received at the locks cement shed; the small balance on hand at the beginning of the month was issued and the shed cleaned out. Six hundred and ninety cubic yards of sand were received from Balboa, and 1,219 cubic yards were issued from the storage pile. The small amount of rock on hand at the beginning of the month was issued.

GATUN DAM.

Construction during the month increased the total fill by 24,531 cubic yards, car measurement, making the total amount in place 21,986,893 cubic yards. On October 1, the dam was 99.98 per cent completed. Additions to the dry fill amounted to 24,531 cubic yards, and this material was placed on the north and south toes of the dam. This makes the total dry fill in place 11,768,481 cubic yards.

GATUN SPILLWAY.

The backfill was extended by 52 cubic yards, making the total 16,769 cubic yards. Concrete laid during the month amounted to 2,124 cubic yards, making the total quantity in place 229,873 cubic yards. Concrete work was 99.87 per cent complete at the close of the month.

Hydroelectric plant—The work of constructing the hydroelectric building was taken over by the Quartermaster's Department on September 8. During the month, plain concrete placed amounted to 492 cubic yards, making a total of 7,167 cubic yards.

WEST BREAKWATER—COLON.

Out of a total of 23,467 cubic yards of Porto Bello rock placed on the breakwater during September, 6,677 cubic yards were unloaded by cranes, and 16,790 cubic yards by derrick barges. The total amount of rock placed upon the breakwater to October 1 was 320,160 cubic yards.

Central Division.

The total amount of material excavated during the month was 369,400 cubic yards, of which 144,490 cubic yards were classified as earth and 224,910 cubic yards as rock. The entire amount was removed by steamshovels, 297,800 cubic yards being classified as primary excavation and 71,600 cubic yards as "Plant" excavation. Of the total primary excavation, 45,000 cubic yards were taken from within the lines of the Canal prism and 242,800 cubic yards from without the prism, the latter amount being excavated from slides and from high levels as a preventive measure against slides.

The daily average number of steamshovels at work was 14.62 and the total number of shovel days was 365½.

The estimated amount of material removed and to be removed, according to the revision of July 1, 1913, is 115,696,455 cubic yards.

Up to October 1, 1913, 109,229,155 cubic yards had been removed, leaving 6,467,300 cubic yards to be removed, in order to complete all excavation in the Central Division. At the close of the month, 94.41 per cent of all excavation was completed.

Dry excavation in Culebra Cut was completed on September 10, and all rolling stock, equipment, tracks, and miscellaneous material were removed from the Canal prism.

Material dumped from the Naos Island trestle during the month totaled 31,671 cubic yards.

The daily average number of laborers at work was 4,788, while the average number of gold men working was 412.

Quartermaster's Department.

LABOR.

The force report of September 24 showed a decrease of approximately 3,000 men, as compared with the number working on August 27. The United Fruit Company has established a recruiting agency on the Isthmus, and in two weeks 327 laborers were sent by that company to its plantations in Costa Rica and Honduras; over 90 per cent of these laborers were British West Indians.

BUILDINGS.

Building work was confined chiefly to the commissary, clubhouse, and police station at Pedro Miguel. All of these buildings were well under way at the close of the month and will be completed within 60 days.

QUARTERS

The demand for gold and silver quarters at Ancon and Balboa continues; at other points there is no congestion. Instructions have been given to discontinue assignments of married quarters in the Las Cascadas-Bas Obispo district, and the department will withdraw its organization from that district as soon as all quarters are vacated.

MATERIAL AND SUPPLIES.

The value of material received was \$643,155.38. This material came forward in 32 steamers, having a total weight of cargo, exclusive of lumber, piling, and ties, of 11,850 tons.

Subsistence Department.

The Hotel Tivoli was operated at a loss of \$152.36. The operation of the line hotels, laborers' messes, and restaurants resulted in a net profit of \$1,718.93. The total net profit on subsistence operations during the month was \$1,566.57.

Department of Civil Administration.

COURTS.

During the month, one civil case was disposed of in the Supreme Court, 51 civil and 45 criminal cases in the circuit courts, and 51 civil and 398 criminal cases in the district courts.

POSTS, CUSTOMS, AND REVENUES.

Money order sales amounted to \$406,515.28, and the fees to \$1,868.45. Receipts from stamp and card sales and newspaper postage aggregated \$6,177.22. The total collection of revenues was \$19,110.50, and the collections on account of court fines, costs, and fees \$2,272.05. A total of \$164,794 was deposited in postal savings accounts, and a total of \$187,585 was withdrawn. At the port of Ancon, 22 vessels entered and 19 cleared; at the port of Cristobal, 18 entered and 20 cleared.

POLICE AND PRISONS.

The total number of persons arrested was 399, of whom 357 were men and 42 women

Nine convicts were committed to the penitentiary and 12 were discharged, leaving 140 convicts in confinement at the close of the month. The cost of guarding and subsisting these prisoners was \$2,592.64, and the value of the work performed by them on the roads of the Canal Zone was \$2,340.90.

FIRE PROTECTION.

Two fires were reported in the Canal Zone and these occasioned no loss of property.

Department of Sanitation.

The total number of deaths from all causes among employes was 44, divided, as follows: From disease 36, and from violence eight, giving an annual average per thousand of 7.30 and 1.62, respectively. The annual death rate per thousand among employes during the month of September, 1912, was 9.19.

The annual average death rate per thousand in the Canal Zone, and in the cities of Panama and Colon, including both employes and nonemployes, was 27.39. This rate is based upon a population in the Canal Zone of 62,810, according to the census of February, 1912, and populations in Panama and Colon, respectively, of 47,172 and 20,232, as estimated by the Department of Sanitation. The annual average death rate per thousand among the same classes of population for the month of September, 1912, was 22.42.

Segregating the whites from the blacks, the annual average death rate per thousand from disease among employes was: Whites, 4.08; blacks 8.09, giving a general average for disease of 7.30. For the same month during 1911, the annual death rate per thousand from disease among whites was 5.95; blacks, 12.24, giving a general average of 10.63; and for the same month in 1912: Whites, 4.92; blacks, 6.81, giving a general average of 6.36.

Among employes, deaths from the principal diseases were: Dysentery, one; hemoglobinuric fever, one; organic disease of the heart, two; pneumonia, seven; tuberculosis, four, leaving 21 deaths from all other diseases, and eight deaths from external violence. No case of yellow fever, smallpox, or plague originated on, or was brought to the Isthmus, during the month.

GEO. W. GOETHALS,

Chairman and Chief Engineer.

Interments in Canal Zone Cemeteries.

At a meeting of the Board of Health, held on September 15, it was decided to abolish the charge of issuing burial permits on and after September 20. A charge of \$2, however, will be made for gravedigging and interment in connection with each burial made in Canal Zone cemeteries. This charge does not apply to employes of the Canal Commission and the Panama railroad, or their families, or to employes of contractors engaged on Commission or railroad work.

Balboa Sand Service.

A report of sand shipped from Balboa during the month of September, follows:

JOINT LAND COMMISSION.

Rules of Dismissal.

(Continued from last week.)

In the matter of sundry claims, in the lands of Matachin, docket No. 618-A, etc.—In the case of the following named persons, the evidence before the Commission is that their houses and other improvements have been purchased by the United States and that payments therefor have been made in the year of 1913.

The record of these claims, showing the name and docket number of each, together with the tax numbers of houses included in such claims and the record of the Disbursing Officer showing the register number of each account, its amount, and the month of the year of 1913 in which the same was paid is, as follows:

Name.	Doc. No.	Mo. paid.	Reg. No.	Am't.

In view of the payments noted, the foregoing claims call for no further action by this Commission and they are accordingly dismissed.

(Signed) FEDERICO BOYD, ROLAND P. FALKNER, SAMUEL LEWIS, L. S. ROWE, Commissioners.
September 16, 1913.

In the matter of sundry claims, in the lands of Matachin, docket No. 618-A, etc.—With respect to the occupiers, on the lands of Matachin hereinafter named, the evidence before the Commission is that they have signed contracts with the Isthmian Canal Commission for the sale of the houses designated by their tax numbers, together with all their other improvements situated on the said lands. The names of such persons, the docket numbers of their claims, and the tax numbers of their houses, follow:

Name.	Docket No.	Tax No.
Chambers, Richard.....	489	148 & 151
Austin, George H.....	1,246	
Chong, Fen.....		132
Hoffman, Dorcas.....		571
Iglesia, Innocencio.....		380

Name	Docket No.	Tax No.
Jones, Drusella.....	1,347	537
McGrath, Beryl.....	494	152
Morris, Robert.....	234	1,723 & 1,729
Morrison, Thomas.....	589	358
Pedregales, P.....	44.	1,554
Scott, Harriet.....		566
Vassal, George.....		1,709
Vidal (Vieal), Michael.....	1,212	

In view of the agreements herein referred to, these claims call for no further action by the Commission and they are accordingly dismissed.

(Signed) FEDERICO BOYD, ROLAND P. FALKNER, SAMUEL LEWIS, L. S. ROWE, Commissioners.
September 22, 1913.

In the matter of certain claims for houses in the town of Gorgona, docket No. 1,250-A, etc.—The evidence submitted to the Commission with respect to certain claims filed for buildings in the town of Gorgona showed that the houses referred to were constructed upon lots leased from the Isthmian Canal Commission after such a lease had been entered into.

In a decision rendered April 16, 1913, in the case of Agusta Dunlop, the Commission said:

"We have therefore reached the conclusion that it is not within the province of the Joint Land Commission to take cognizance of claims arising out of the revocation of revocable leases or licenses issued by the Isthmian Canal Commission. Such claims have no organic relation to grants contained in the Treaty, nor to the international obligation which the United States has agreed to discharge under the Treaty, and for the adjudication of all such claims, the claimants must seek a remedy through the procedure afforded by municipal laws."

In accordance with the decision rendered in the case of Agusta Dunlop, the claims of the following persons, for the houses upon the lots hereinafter designated by their tax numbers, are dismissed without award:

Name.	Tax No.	Docket No.
Chong, Kong Sing.....	770	1,059
Cools, Gabriel V.....	805	1,539
Scipion, Moncoq.....	861	
Scipion, Moncoq.....	866	
Kenton, Joseph.....	865	

(Signed) FEDERICO BOYD, ROLAND P. FALKNER, SAMUEL LEWIS, L. S. ROWE, Commissioners.
September 20, 1913.

In the matter of sundry claims, docket No. 1,240-A, etc.—A number of claims have been presented to the Commission for properties below the 87-foot level, some of which are already submerged or partly submerged. In preparing for the creation of Gatun Lake, many persons were removed from time to time from their holdings, and with many of them settlements were made. Other settlements have been made within this area at a more recent date.

A careful examination has been made of all cases in which a payment has been reported, and where there was any uncertainty in regard to the property covered by the previous payment the claimant has been given the benefit of every reasonable doubt. In the following cases the Commission has reached the conclusion that the claimant has no property for which an award could be sought from this Commission which is not covered by the previous payments hereinafter noted:

Bocanegra, Rufino, docket No. 1,352, the property included in this claim was covered by the payment in April, 1911, by Voucher 14769 for 1,500 banana plants and all his other improvements in the valley of the Trinidad River.

Burnett, Jethero, docket No. 1,377, the property included in this claim was covered by the payment in January, 1912, by Voucher 18133 for growing crops and other improvements in the valley of the Chagres.

Clair, James, docket No. 1,456, the property included in this claim was covered by the payment in February, 1912, by Voucher 18696 for house tax No. 1, and other improvements in or around Bohio.

Felix, Francisco (Francis), docket No. 1,042, the property included in this claim was covered by the payment in December, 1911, by Voucher 17759 for all growing crops and fruit trees, one house tax, No. 105, and all other improvements in the valley of the Chagres River in the area to be covered by the waters of Gatun Lake.

Garcia, Alejandro, the property included in this claim was covered by the payment in October, 1909, by Voucher 8203 for a house at Buenavista, and in January, 1912, by Voucher 18265 for House 153 and improvements near Bohio.

Grant, Virginia, the property included in this claim was covered by the payment in January, 1912, by Voucher 18490 for house, tax No. 1,214 and other improvements near Tabernilla.

Hamilton, Charles, docket No. 1,143, the property included in this claim was covered by the payment in January, 1912, by Voucher 18267 for house, tax No. 29, together with improvements near Bohio.

Henry, Robert, the property included in this claim was covered by the payment in February, 1912, by

Voucher 18752 for house, tax No. 1,137 and other improvements at Barbacoas.

Herrera, José Pizar, docket No. 1,369, the property included in this claim was covered by the payment on April 6, 1911, by the Panama Railroad Company to said Herrera for the purchase of improvements on land owned by the Panama Railroad Company in the valley of the Chagres River which was situated below a contour line of 87-feet above sealevel.

Jimenez, Jacinto, docket Nos. 126 and 237, the property included in this claim was covered by the payment in May, 1912, by Voucher 20192 for property near the Valdespino River, located as property No. 32 on the sketch map of the Gatun Lake area.

Johnson, Joseph, the property included in this claim was covered by the payment in January, 1912, by Voucher 18495 for houses, tax Nos. 1,217 and 1,218 and all other improvements in or near the town of Tabernilla.

Leonis, Edward (Girard), the property included in this claim was covered by the payment in June, 1913, by Voucher 25051 for house, tax No. 36 and other improvements.

McLean, John, the property included in this claim was covered by the payment in September, 1910, by Voucher 12404 for houses, tax No. 134 and fruit trees near Bohio.

de Orla, Andres, docket No. 434, the property included in this claim was covered by the payment in February, 1912, by Voucher 18739 for house, tax No. 1,432 and other improvements at Buenavista.

Osborn, John, the property included in this claim was covered by the payment in January, 1912, by Voucher 18509 for house, tax Nos. 1,163 and 1,169 and other improvements near Tabernilla.

Ortíz, Ezequiel, docket No. 1,160, the property included in this claim was covered by the payment in July, 1911, by Voucher 15929 for house, tax No. 1,431 and other improvements at Buenavista.

Rojas, Juan, docket No. 1,374, the property included in this claim was covered by the payment in December, 1911, by Voucher 17752 for house, tax No. 102 and other improvements in the valley of the Chagres.

Rowe, Ann, docket No. 1,376, the property included in this claim was covered by the payment in January, 1912, by Voucher 18134 for houses, fruit trees, growing crops and other improvements in the valleys of the Chagres and Cano Quebrado Rivers.

Sanguillen, Tomas, docket No. 1,491, the property included in this claim was covered by the payment on April 17, 1911, by the Panama Railroad Company, for the purchase of improvements on land owned by the Panama Railroad Company, in the valleys of the Trinidad and Chagres Rivers, which are situated below a contour line of 87-feet above sealevel.

Tecijera or Trejola, Francis, the property included in this claim was covered by the payment in July, 1913, by Voucher 25509 for house No. 259 and all other improvements at Santa Cruz.

In view of the payments herein noted, no claim against the United States can be recognized by the Joint Land Commission, and these claims are hereby dismissed.

(Signed) FEDERICO BOYD, ROLAND P. FALKNER, SAMUEL LEWIS, L. S. ROWE, Commissioners.

September 16, 1913.

In the matter of sundry claims in the lands of Matachin, docket No. 618-A, etc.—With respect to the occupiers on the lands of Matachin hereinafter named, the evidence before the Commission is that they have signed contracts with the Isthmian Canal Commission for the sale of the houses herein designated by their tax numbers, together with all other improvements situated on the said lands. The names of such persons, the docket numbers of their claims, and the tax numbers of their houses, follow:

(Signed) FEDERICO BOYD, ROLAND P. FALKNER, SAMUEL LEWIS, L. S. ROWE, Commissioners.

September 16, 1913.

In the matter of sundry claims, docket No. 1,240-A, etc.—In the case of the claims hereinafter noted, the evidence before the Commission showed that the properties claimed had been voluntarily abandoned by the claimants a number of years before the claim was filed with the Joint Land Commission. By reason of such abandonment any rights which these persons may have had to the properties in question lapsed, and such parties are not entitled to an award from the Joint Commission.

In view of the abandonment of the properties the claims of the following persons are hereby dismissed:
Lucero, Cristobal.—Claim for improvements located on the public land, tract No. 17 of the property map of the Canal Zone.

Rodriguez, Jacinto.—Claim for improvements located on the public land, tract No. 16 of the property map of the Canal Zone.

Rojas de Padilla, Virginia, docket No. 360.—Claim for houses and other improvements at Old Frijoles.
(Signed) FEDERICO BOYD, ROLAND P. FALKNER, SAMUEL LEWIS, L. S. ROWE, Commissioners.

September 20, 1913.

In the matter of sundry claims, docket No. 1,240-A, 532-A, 1,215-A, etc.—With reference to the claims for improvements of the persons hereinafter named, the evidence before the Commission is that they have signed agreements for the sale of their houses and other improvements to the Isthmian Canal Commission.

The names of such persons, their docket numbers, the tax numbers of the houses included in such agreement, and their location, follow:

Name.	Docket No.	Tax No.	Locality.
Baptiste, John	906	244	Gamboa

September 22, 1913.

In the matter of sundry claims at Matachin, docket No. 618-A, etc.—In the case of the claimants named below who are occupiers of that portion of the original estate of Matachin, which was purchased by the French Canal Company and subsequently became the property of the United States, an examination of the evidence shows that they entered upon possession of the lands on which they claim improvements under leases from the Isthmian Canal Commission.

In a decision in the case of Agustina Dunlop, rendered April 16, 1913, the Commission said:

"We have therefore reached the conclusion that it is not within the province of the Joint Land Commission to take cognizance of claims arising out of the revocation of revocable leases or licenses issued by the Isthmian Canal Commission. Such claims have no organic relation to the grants contained in the Treaty, nor to the international obligations which the United States has agreed to discharge under the Treaty; and for the adjudication of all such claims, the claimants must seek a remedy through the procedure afforded by municipal laws."

In accordance with the foregoing decision, the claims of the following persons are hereby dismissed:

Arias, Ricardo, for House 149, and other improvements.

Ayarza, Victor, docket No. 1,430, for house, tax No. 119, and other improvements.

Collender, Louise, estate of, for house, tax No. 125, and other improvements.

Cesaire, Boula, in docket No. 930, for house, tax No. 649.

Sing, Man, for house, tax No. 127, and other improvements.

(Signed) FEDERICO BOYD, ROLAND P. FALKNER, SAMUEL LEWIS, L. S. ROWE, Commissioners.

September 19, 1913.

In the matter of sundry claims located as below designated, docket No. 1,240-A.—In the case of the claimants named below, an examination of the evidence shows that the properties which they now claim were held under leases from the Panama railroad, which leases provide that on the revocation of the lease the lessee shall remove all improvements which he has made, and which leases in the cases here named have been duly cancelled.

The claims for damages in these cases have no organic relation to the grants contained in the Treaty, nor to the obligation which the United States has agreed to discharge under the Treaty. The relationship is one existing between the claimants and the Panama Railroad Company, and if any damage was suffered by reason of the cancellation of these leases, the courts of the Canal Zone are the proper forum for the assertion of such claims.

In accordance with the principles herein formulated; the claims of the following persons are dismissed because of lack of jurisdiction, to-wit:

Gutierrez, José Carmen, for house, tax No. 1,003, at West San Pablo.

White, Ateo, docket No. 1,525, for houses, tax Nos. 1,072 and 1,082 at San Pablo.

White, Wong, docket No. 1,608, for houses, tax Nos. 1,095 and 1,098 at San Pablo.

(Signed) FEDERICO BOYD, ROLAND P. FALKNER, SAMUEL LEWIS, L. S. ROWE, Commissioners.

September 22, 1913.

(To be continued.)

PANAMA RAILROAD CROSS-TIES

Black Guayacum Variety Laid in Early Days Has Stood Test of Time.

The chief engineer of the Panama railroad has prepared a report of the use and life of hardwood ties laid in the roadbed of the line since 1878, and specifications under which they have been purchased since the United States assumed control of the road. The report, in part, is, as follows:

The original track of the Panama railroad, as it existed in 1885, before being disturbed in any way by Canal operations, was laid with small hardwood ties obtained on the Isthmus, and from Colombia. The greater part of these ties were procured from the north coast of Colombia, and were shipped to Colon from the port of Barranquilla. They were of a variety of wood commonly known as *lignum vitæ* (*guayacum resinata*), and now spoken of as black guayacum, to distinguish it from yellow guayacum, a wood of the same family, but with less power of resistance to mechanical wear or decay.

Other varieties of wood, such as balsamo (or quira), and polvillo, were procured by the company, but the only species available at the present time are a few balsamo ties, which were laid in the old track near Mount Hope in 1900, and which were taken out of the roadbed last year, and replaced by a larger tie. Practically, the only wood that has stood the test of time is the black guayacum, procured in the early days of the railroad's operations.

The guayacum ties procured by the old company were very small, being "pole" ties, about five to six inches thick, with a 6 to 7-inch face, eight feet long; some of them were quite crooked and irregular in shape. These carried the light traffic of the railroad prior to American Canal operations without difficulty, but when construction work was begun in earnest, it was found necessary to replace the small ties with those of a larger dimension.

There has been so much said about the long life of these hardwood ties that it would be well to set forth what little authentic information is available. The following are extracts from the annual reports since 1878:

1880—About 5,000 new *lignum vitæ* ties have been placed in the track.

1884—During the year, 30,000 new *lignum vitæ* ties have been put in, and during the coming year, 3,000 additional will be required.

1885—During the year 1885, 10,000 *lignum vitæ* ties have been received and put in the roadbed. The existing contract for the 30,000 spoken of in the annual report of 1884 will complete the work for the present.

1886—The number of *lignum vitæ* ties put in the road in 1885 amounted to 10,000, while in 1886, over 20,000 have been received.

1888—The number of *lignum vitæ* ties placed in the main line during the year was 5,456, and upon deviations, 8,747.

1889—Such is the durability of *lignum vitæ* cross-ties used in the track that only 5,855 new ones were required for the year.

1890—The track has been kept in excellent condition, although only 4,014 *lignum vitæ* ties were received during the year.

1891—The general condition of the roadbed and track continues excellent. Only 6,167 *lignum vitæ* ties were laid during the year. The exceptional durability of these ties (about 30 years, when of good quality) re-

duces the number of yearly requirements to small proportions.

1892—Four thousand one hundred and twelve *lignum vitæ* ties were laid.

1893—Four thousand five hundred and seven genuine *lignum vitæ* ties were laid, and 2,539 of native hardwoods for sidings.

1894—Seven thousand one hundred and ninety-six *lignum vitæ* ties were laid.

1895—Ten thousand two hundred and twenty *lignum vitæ* ties were laid.

The main line of the railroad was first double-tracked from White House (near Las Cascadas) to Tabernilla, to provide for the movement of the spoil trains to and from the Tabernilla dumps, and it was found necessary to remove many of the small hardwood ties from the roadbed in this section, on account of the increased traffic. These small ties were allowed to remain in the track in the section between Empire and Culebra, where the line was double-tracked, and where the traffic was comparatively light. There are many of these old ties still in use in the roadbed in that section.

The hardwood ties laid in the old track were, generally speaking, in very good condition. There were little, if any, signs of decay, but in many cases, especially with the smaller ties, they were badly worn at the rail seat by the mechanical action of the base of the rail, no tie plates being used on the ties. They were also "spike killed," caused by replacing spikes and changing rail. It will be interesting to note that many of the ties removed from the main track at that time, and later, are now being relaid on the tracks connecting with the new terminal docks at Cristobal. The timber in the ties is practically as good as ever. As their smaller size is not objectionable in the yard tracks, it is expected that they will still have a long life in other services. Tie plates are not necessary with these ties, which results in some saving.

The mechanical wear on the old hardwood ties in contradistinction to the decay of the wood is demonstrated by the fact that while the base of the rail, and the driven spikes have cut into the hardwood and weathered it, the material in the balance is as good as ever. The same experience has, of course, long been encountered and commented upon in the tie records of the United States. The difference between the experience there and here, however, lies in the fact that the ties referred to in the former records have probably not been used for a period longer than eight to 10 years, while local hardwood ties are from 20 to 25 years old, and have been used in a tropical climate where all other wood decays in from three to five years.

The black guayacum cross-tie is probably a thing of the past. Such material is now so valuable for other purposes in connection with machinery and manufacturing arts, that it is not to be expected that it can be procured at reasonable prices for cross-ties. The Panama Railroad Company has procured only 4,000 or 5,000 guayacum cross-ties in the past six years, and most of these have been of the inferior variety known as yellow guayacum.

During the past few years guayacum cross-ties have been purchased under the following prices and specifications:

1898-1901.
First-class—6 by 8 inches, by 8 feet, \$1.50 each.
Second-class—5½ by 6 inches, by 7.9 feet, \$1 each.

1907.
First-class—6 by 8 inches, by 8 feet, \$1.62 each.

Second-class—5½ by 7 inches, by 7.9 feet, \$1.42 each.
1908-1910.

First-class—7 by 9 inches, by 8.6 feet, \$2.10 each.
Second-class—6½ by 8 inches, by 8.3 feet, \$1.75 each.
1911.

First-class—7 by 9 inches, by 8.6 feet, \$2.25 each.
Second class—6½ by 8 inches, by 8.3 feet, \$1.75 each.

SPECIFICATIONS.

1. The material used shall be black or yellow guayacum, commonly known as guayacan or *lignum vitæ*.

2. All ties shall be well and smoothly hewed out of straight growing timber of specified dimensions, and out of wind, sawed, or square cut ends, with straight and parallel sides and faces. All ties shall have bark entirely removed when cut. Ties shall be free of splits, loose, or decayed knots, or any other imperfections, which may impair their strength or durability. Not more than one inch of sap wood will be allowed, measured across the side or face.

3. Sawed ties will be accepted agreeing in other respects with the above paragraph, provided the saw cut extends throughout the length of the tie, making parallel sides and faces.

4. The width of the face and the thickness of the tie shall conform to sizes mentioned in the table of dimensions below, but a variation of size will be permitted of one inch over in thickness, one inch over in width, and three inches over in length. No variation in size under those specified will be allowed.

TABLE OF DIMENSIONS.

	Thick- ness.	Width of face	Length.	Maximum vari- ation from straight edge.	
				Top and bottom.	Sides.
First-class.	7"	9"	8'6"	¾"	2"
Second-class	6½"	8"	8'3"	1"	3"

Not more than 10 per cent of any particular shipment will be accepted as seconds, and it is desired to reduce this percentage as much as possible.

Emigration from the Isthmus Continues.

According to the figures of the quarantine service nearly 2,500 more people left the Isthmus in September than landed, constituting the largest exodus in any one month since the beginning of the Canal work.

The total number of steamship passengers who embarked at Colon for foreign ports during the month was 5,371, consisting of 2,279 cabin, and 3,092 steerage passengers. The number of passengers who landed at Colon from foreign ports was 2,849, consisting of 1,600 cabin, and 1,249 steerage passengers. The number of persons who embarked over those who landed at this port was 2,522. The immigration from the West India islands consisted of 172 cabin, and 802 deck passengers, an increase in cabin, but a slight reduction in steerage passengers, as compared with August. Of the steerage passengers from other countries, Colombia furnished 130, and Costa Rica 77. There were only 96 steerage passengers from Europe during the entire month. The number of persons arriving "in transit," practically all tourists, was 1,806, a decrease of 601, as compared with the preceding month.

The number of persons who landed at the ports of Ancon and Panama during September from foreign ports was 487, consisting of 352 cabin, and 135 steerage passengers. The number of persons who embarked for foreign ports during the same period was 450, con-

sisting of 356 cabin, and 94 steerage passengers. The number of those who landed over those who embarked was 37. The net emigration from the Isthmus during September was 2,485. The total number of vessels arriving at Colon during the month was 93, and at the port of Ancon, 23.

Red Cross Finances.

The financial statement of the Canal Zone Chapter, American National Red Cross, for the month of September, 1913, follows:

RECEIPTS.	
September 1, On hand.....	\$2,018.21
September 18, From disbursing Officer, I. C. C., for piano sold at Culebra.....	80.00
September 30, Membership dues.....	3.00
September 30, Received to date, account of Red Cross ball.....	827.50
Total receipts.....	\$2,928.71
DISBURSEMENTS.	
September 6, Relief of destitute missionary, Ancon.....	75.00
September 6, Disbursing Officer, I. C. C., printing.....	2.67
September 13, Relief of Jamaican woman at Colon, deported by I. C. C.....	3.00
September 13, Relief of family of employee at Ancon, repatriated to Jamaica.....	15.00
September 17, Relief of destitute American, Cristobal.....	23.25
Total disbursements.....	\$118.92
September 30, Balance on hand.....	\$2,809.79
JOHN L. PHILLIPS, Treasurer.	
Approved: EDW. SCHILDBAUER, Chairman.	

The "Gold Hill Line."

The so-called "Gold Hill line" is $9\frac{1}{2}$ miles in length, from the south end of the Chagres River bridge to the junction with the previously operated line at Pedro Miguel. Just south of the bridge it swings eastward of the 95-foot berm and passes around Gold Hill on a high level. Its highest point is 271 feet above sealevel, near the La Pita divide; the continental divide is crossed opposite Culebra, at an elevation of 241 feet above sealevel. The grading was completed in March, 1912, and the completed track was turned over to the railroad by the Canal Commission on May 25, 1912, since which it has been used for through freight trains, and, on occasions, for special passenger trains.

Married.

TORBERT-MORCHIO—At the Ancon Chapel, on Saturday, September 13, at 8.30 p. m., Miss Maria Catalina Morchio of Genoa, Italy, to Mr. William A. Torbert of Miami, Fla., the Rev. H. R. Carson officiating. Canal Zone residence, Balboa.

DAILY-GALE—At the Union church, Cristobal, on October 13, Miss Mahel Louise Gale of Imperial, Cal., to Mr. John D. Daily of Monticello, Ia., the Rev. C. O. Purdy officiating. Canal Zone residence, Gatun.

WEDDOE-BALLARD—On October 11, in the Union Church, Cristobal, Miss Ada Mae Ballard of Joliet, Ill., to Mr. James Andrew Weddow of Pulaski, Va. Canal Zone residence, Corozal.

LOST—On October 18, in Empire shops, one hotel book, containing about 32 coupons; one commissary book, new, \$15, one commissary book, old, containing coupons to the value of 14 cents, and one metal check, No. 187032. Finder is requested to return articles to office of general foreman, Empire shops.

LOST—On Monday, October 13, between 2 and 4 p. m., a gold and enamel belt buckle, either in the Cristobal commissary, or on Front street, Colon, in going to the railroad station. Finder is requested to communicate with Mrs. S. R. Hart, Box 52, Cristobal. Reward.

COMMISSION CLUBHOUSES.

Activities of the Young Men's Christian Association.

GENERAL.

The following is the schedule for moving pictures for the week October 27 to November 1: Monday, Empire; Tuesday, Gatun; Wednesday, Culebra; Thursday, Empire; Friday, Porto Bello; Saturday, Cristobal. The standing in the chess tournament is, as follows: Culebra won 15 points; Empire, 10; Cristobal, seven, and Gatun, six.

The standing in the bowling league, October 20, was, as follows:

Team.	Won.	Lost.	P. C.
Cristobal.....	7	2	.778
Corozal.....	6	3	.667
Empire.....	5	4	.556
Culebra.....	5	4	.556
Gatun.....	1	5	.167
Camp Elliott.....	0	6	.000
The standing in the basketball league, October 20 was, as follows:			
Empire.....	4	0	1.000
Gatun.....	3	1	.750
Camp Elliott.....	3	1	.750
Culebra.....	1	3	.250
Cristobal.....	1	3	.250
Corozal.....	0	4	.000

COROZAL.

The Corozal bowling team won three games on Saturday night, October 18, from the Marines of Camp Elliott. All games were close as shown by the following scores:

Camp Elliott.			Corozal.		
Donell.....	215	181	Louch.....	188	138
Weiss.....	147	148	Ziller.....	133	...
Ogl.....	164	132	Bordt.....	168	193
Hoffman.....	127	185	Parkis.....	203	192
Thompson.....	157	170	Edwards.....	181	162
			Davis.....	179	178
Totals.....	810	816	873	864	794

High scores in duckpins for the week ending Saturday, October 18, were, as follows: Owens, 101, Burke, 102; Beall, 109. Tenpins—Ziller, 201, 205, 242, 213; Davis, 202; Parkis, 205, 232; Taylor, 211, 231, 200.

The Corozal tenpin team will not bowl on Saturday night, October 25, but will bowl Empire on the Corozal alleys on November 1.

Although the Corozal basketball team is badly crippled by the absence of four of the players, who started the season with the team, they will play Culebra at Empire on Wednesday night, and Empire at Empire on Saturday night of this week.

CULEBRA.

On Wednesday night, October 15, the Culebra basketball team was defeated by the Camp Elliott team on the Empire floor by the score of 41 to 19. The line-up was: Camp Elliott—Smith and Harper, forwards; Murray, center; McElroy, and Briggs, guards.

Culebra—Stripling, Worsely, and Bracker, forwards; Gassman, center; Rose, and Blumenberg, guards.

The Camp Elliott bowling team will bowl at Culebra on Friday night, October 24.

EMPIRE.

The Isthmian league bowling game between Empire and Cristobal, played Saturday, October 18, resulted in favor of Cristobal. Scores:

Empire.....	812	787	801
Cristobal.....	795	888	836

For the remainder of the bowling series, the home games for Camp Elliott will be bowled on Nos. 1 and 2 alleys at the Empire clubhouses.

On Wednesday evening, October 15, the Culebra chess club played the Empire club at Empire, with the following results:

Culebra.		Empire.	
Dubois.....	0	Caldwell.....	1
McClure.....	1	Goolsby.....	1
Warner, A. M.....	0	Hall.....	1
Warner, J. F.....	1	Smith.....	0
Second play.			
Dubois.....	1	Goolsby.....	0
McClure.....	0	Hall.....	1
Warner, A. M.....	1	Smith.....	0
Totals.....	4	4	

The results of the chess tournament games played with Cristobal on Saturday, October 18, were:

Cristobal.		Empire.	
Hunt.....	0	Caldwell.....	1
Taylor.....	0	Goolsby.....	1
Tuttle.....	1	Brady.....	0
Wilson.....	0	Smith.....	1
Second play.			
Hunt.....	0	Smith.....	1
Tuttle.....	0	Goolsby.....	1
Taylor.....	0	Caldwell.....	1
Wilson.....	1	Brady.....	0
Totals.....	2	6	

At the meeting of the Empire debating club, held Friday evening, October 17, the following question

was debated: "Should what is popularly known as the unwritten law be given credence in court." The speakers were Messrs. Morrison and DeBarrows for the affirmative, and Messrs. Swanson and Patterson for the negative. The judges were Messrs. McColey, Rossiter, and Harris, and decided in favor of the negative.

GATUN.

The Empire basketball team defeated the local team on Saturday night, October 18. The score was 41 to 18. F. G. Swanson acted as referee. Mr. W. B. Childers, mayor of Gatun, made a few remarks before the game, congratulating the Empire team on its splendid record, and expressing the appreciation of the Gatun public for the work the Gatun team has done so far this season.

Mr. C. B. Russell will act as secretary during the leave of absence of Mr. Frank Gardner Smith, who sailed for the United States on the *Carl Schurz* on Tuesday, October 21, on six weeks' vacation.

Culebra took two out of three games of tenpins at Gatun on Saturday, October 18.

The results of the chess match between Culebra and Gatun on Saturday, October 18, were 5 to 3 in favor of Culebra:

Culebra.	Won.	Gatun.	Won.
Dubois.....	1	Brown.....	1
McClure.....	2	Carson.....	0
Warner, A. M.....	1	Logan.....	2
Warner, J. F.....	1	Marquard.....	0

Mrs. Dow Walker played several piano selections for the motion picture entertainment at Gatun on Friday evening, October 17.

CRISTOBAL.

On Wednesday evening, October 15 a chess match between local teams resulted, as follows:

Ratner.....	2	Verner.....	0
Ogden.....	2	Taylor.....	0
Tuttle.....	1	Wilson.....	1
Martin.....	0	Hurt.....	2

Totals..... 5 3

All postponed tenpin games will be bowled on or before October 25, at which time the local bowling tournament closes.

An unmarried folks tournament in duckpins will be held on Monday, October 27. It is the intention to hold a married folks tournament and an unmarried folks tournament on the second and fourth Monday nights of each month, respectively.

The Cristobal basketball team defeated Corozal on Saturday, October 18. Score 35 to 7. Luce threw nine field goals and six foul goals. The line-up was, as follows: Corozal—Dougherty, Howe, Bessy, Ross, Kenaly, and Russell. Cristobal—Mathews, Luce, Simons, Hughes, and Barcroft.

The Cristobal junior basketball team was defeated by the Panama National Institute team on Saturday, October 18. Score, 16 to 14. The juniors are open to challenge.

Sixty-six were in attendance at the discussion club on Thursday night, October 16 to hear Dr. C. C. Pierce on "Sex hygiene." Subject for discussion on Thursday night, October 23 will be "Shall candidates for marriage hold health certificates?" with Mr. J. M. Weaver in charge. On Wednesday night, October 29, Mr. W. W. Warwick, assistant comptroller of the treasury, will speak.

An old fashioned All Hallowe'en social will be held on Thursday night, October 30. The games, refreshments, and decorations will be suited to the occasion.

Mr. H. D. Brittin, who has been connected with the Jersey City Y. M. C. A., arrived on the steamship *Advance*, on Saturday, October 11, to assume the physical directorship at the Cristobal clubhouse.

PORTO BELLO.

A set of new books for the library has been ordered from the United States, and will be here in a short time.

A number of new phonograph records have been added to the collection.

The handicap pool tournament, which has been in progress for the last few weeks has been concluded. The final standings are:

Name.	Won.	Lost.	P. C.
Bucklin.....	12	1	.923
*Smith.....	11	2	.833
Bowen.....	11	2	.833
Heil.....	10	3	.769
Cummings.....	7	5	.583
Murray.....	7	5	.583
Keene.....	7	6	.538
Colberg.....	7	6	.538
Doyle.....	5	8	.385
J. D. Sherrard.....	4	8	.333
Chase.....	4	9	.307
Engelbrecht.....	2	11	.154
T. V. Sherrard.....	2	11	.154
Thompson.....	1	12	.077

*Smith and Bowen were tied for second place, and on the play-off, Smith won the game, 100 to 60, receiving the silver medal. Bowen was awarded a bronze medal.

OFFICIAL CIRCULARS.

November 3 a Holiday.

CULEBRA, C. Z., October 14, 1913.

CIRCULAR No. 503:

Monday, November 3, 1913, the anniversary of the independence of the Republic of Panama, will be observed as a holiday in the Canal Zone, and as far as practicable all public business will be suspended on that day.

GEO. W. GOETHALS,
Chairman and Chief Engineer.

Acting Head of the Fifth Division.

CULEBRA, C. Z., October 16, 1913.

CIRCULAR No. 509:

Effective this date, and during the absence of Mr. H. O. Cole on leave, Mr. Robert B. Tinsley, superintendent, will be in charge of the work of the Fifth Division of the Chief Engineer's Office.

GEO. W. GOETHALS,
Chairman.

Chief Clerk, Office of the Chairman.

CULEBRA, C. Z., October 11, 1913.

CIRCULAR No. 507:

Effective October 13, 1913, Mr. Wm. H. May will, in addition to his duties as Secretary to the Chairman, take over the duties of the chief clerk during the absence on leave of Mr. C. A. McIlvaine.

GEO. W. GOETHALS,
Chairman.

Handling of Brass and Copper Scrap.

CULEBRA, C. Z., October 18, 1913.

CIRCULAR No. 426-C:

Special attention is directed to the necessity for exercising more care in the handling of brass and copper scrap, which is very valuable salvage. This applies particularly to scrap material or equipment composed partly of brass and copper. It has been noticed around various shops and at points where construction work is being carried on that brass valves, copper wire, sheet copper and various other items of this character are mixed with iron and steel shop scrap. During the month of September, the salvage gang at Mount Hope recovered over 11,000 lbs. of brass and copper scrap, after sorting over shop scrap turned in from the line. Such material should be carefully segregated in separate piles and turned over to the nearest district quartermaster or storekeeper, Q. M. D., at least once a week, for if it is allowed to lie around, loss will be incurred.

GEO. W. GOETHALS,
Chairman, Isthmian Canal Commission,
President, Panama Railroad Company.

Accountability for Rolling Stock.

CULEBRA, C. Z., October 9, 1913.

CIRCULAR No. 183-2-2:

Effective October 10, 1913, the accountability for all rolling stock, over which the superintendent of transportation has control, will be transferred on Form Q. M. D. 4, to the accountability of Mr. J. C. Keller, Corozal.

Mr. Keller will consolidate memorandum receipts he holds for rolling stock and obtain memorandum receipts from the superintendent of transportation, who will be

the responsible officer for all rolling stock under his jurisdiction.

GEO. W. GOETHALS,
Chairman and Chief Engineer.

Submission of Work Requests.

CULEBRA, C. Z., October 15, 1913.

HEADS OF DEPARTMENTS AND DIVISIONS:

Hereafter, when submitting work request, Form C. E.-159-2, the original and five copies must be forwarded to this office when the work is to be performed by a department or division of the Isthmian Canal Commission, and the original and ten copies when the work is to be performed by the Panama Railroad Company.

Attention is also called to the fact that the estimated cost of the work to be performed must be shown in every instance where it is practicable to do so.

GEO. W. GOETHALS,
Chairman.

Preparation of Contracts.

CULEBRA, C. Z., October 13, 1913.

CIRCULAR No. 505:

Hereafter, all contracts made by the Isthmian Canal Commission or the Panama Railroad Company on the Isthmus will be prepared by the Chief Quartermaster, with the advice of the Chief Counsel or the Examiner of Accounts when necessary.

GEO. W. GOETHALS,
Chairman.

Appointment of Superintendent of Schools.

ANCON, C. Z., October 18, 1913.

CIRCULAR No. 117:

To Heads of Departments and Divisions—Effective today, Mr. Albert R. Lang is appointed superintendent of Canal Zone schools, vice Mr. Frank P. Wagg, resigned.

RICHARD L. METCALFE,
Head of Department of Civil Administration.

Sailing of the "Cristobal."

PANAMA RAILROAD COMPANY,
OFFICE OF GENERAL SUPERINTENDENT,
COLON, R. P., October 20, 1913.

CIRCULAR No. 245:

To All Concerned—The sailing date of the steamship *Cristobal* has been set at 3 p. m., October 25, from Pier 11, Cristobal.

F. MEARS,
Acting General Superintendent.

Suspension of Interlocking Service at Tower R.

OFFICE OF GENERAL SUPERINTENDENT,
PANAMA RAILROAD COMPANY,
COLON, R. P., October 15, 1913.

G. S. BULLETIN No. 12:

The interlocking plant at Tower R will be put out of service at 12 o'clock noon, Friday, the 17th instant, and switches will be handled by switch tenders as long as required.

Train order signal at Tower R and signals at south end Canal siding, will continue to be controlled from

Tower R until operators are no longer required at this point.

F. MEARS,
Acting General Superintendent.

Special Train.

No communication, either for publication or requesting information, will receive attention unless signed with the full name and address of the writer.

NOTES OF PROGRESS.

Water Supply from Miraflores Lake.

The rise of Miraflores Lake has necessitated the abandonment of the pumping station for the Cocoli reservoir, west of Miraflores Locks, and water is now being taken from the lake near Miraflores passenger station. The floor of the Cocoli station was 37.6 feet above sea-level. A concrete bulkhead four and a half feet high was built around the building to protect it until the surface of the lake had reached elevation 41 feet. When the water reached elevation 39.3 feet it flooded over the spillway of the reservoir, and Cocoli Lake is now a part of Miraflores Lake.

The two pumps in the Cocoli station were transferred to the temporary pump station at Miraflores, about 250 feet southwest of the permanent station, now under construction. One was closed down on October 16, and started at its new location at 6 p. m., Sunday, October 19; the other was removed on October 18, and started at Miraflores at 4 p. m., October 22. Each is a 10-inch, three-stage, turbine pump, with a registered capacity of 1,500 gallons per minute. They supply through a 16-inch discharge pipe to the main from the Rio Grande reservoir to Panama. A Venturi meter installed near the juncture indicates that the two sources together are supplying about 7,000,000 gallons per day to the Canal work and villages south of the continental divide, and the city of Panama. Approximately 70 per cent of this comes from Miraflores Lake.

Excavation at the site of the permanent purification plant in connection with the water supply, on the hill overlooking Miraflores spillway, is being carried on by night and day shifts.

Trial of Steel Couplings for Dredge Pipelines.

Trial will be made of a metal coupling for use on the pipelines of the Commission suction dredges, and if they meet the test, the use of the present rubber sleeves will probably be

discarded. The coupling is all steel, does away with clamps and attachments necessary to fasten the rubber sleeve to the pipe, and it is claimed that after once installed, there will be practically no expense for maintenance. The rubber sleeves give trouble constantly, and their upkeep is a considerable item. The steel device is known as the Parker Universal coupling, and requisition has been made for six for use on 20-inch pipe.

Increase of Pupils and Staff in Schools.

Contrary to expectations some months ago, the work in the Canal Zone schools since the beginning of the new school year has shown an increase over last year. On October 7, there was an average daily attendance in the schools for white children of 1,005, as compared with 940.6 in June, 1913, and an average daily attendance in the schools for colored children of 817, as compared with 706.5 in June. The work of the high schools has also increased, and it has been found necessary to recreate the position of supervisor of the high school and grammar grades, and to employ an additional teacher in the high school, whose time will be devoted to the teaching of English and history. A rearrangement has been made in the high school hours of study, which allows the pupils more time for their lessons. Under the new schedule, the morning session at the Ancon high school is from 8.30 to 11.50, and the afternoon session from 1.20 to 2.40. Formerly, there was only the daily morning session, from 8.30 to 11. At the Empire high school, the new hours are from 8.30 to 11 in the forenoon, and from 1.40 to 3.40 in the afternoon. There was formerly only the afternoon session, from 1.50 to 3.40. The schedule is arranged to fit closely with the arrival and departure of trains carrying pupils who reside at other points. The shortening of the present noon hours at all schools, now rather long, is being given consideration.

Crematory Building.

A one-story frame building to house the two-retort crematory described in THE CANAL RECORD of July 30, 1913, will be erected by the Chief Quartermaster's construction forces. It will be situated near the sexton's office in Ancon cemetery, and is designated for temporary use only, as the site of the graveyard will probably be changed within the next year or so. The building will be 35 by 39 feet in plan, and will contain four rooms divided by wooden partitions, one for receiving, one for the incinerator, one to house the machinery, and the other to be used for storing supplies. The floor will be of cement. The crematory apparatus will be installed under the supervision of an expert furnished by the contractor, the Jarvis Engineering Company of Boston.

DREDGING CULEBRA CUT.

Vessels from Atlantic and Pacific Entrances Working Together in Removal of Slides.

Excavation of a navigable channel through the foot of Cucaracha slide was begun at 6 p. m., Sunday, October 26, by pipeline suction dredge No. 85. The dredge was brought up to the south end of Culebra Cut from the Pacific entrance during the forenoon of October 24. During the same morning, a barge surmounted by trestle work, which had been held in the chamber of Pedro Miguel Lock since October 15, was towed to Bridge 57½ of the Panama railroad, crossing the Cut about 1,000 feet north of the lock, for the removal of the girder span through which vessels are to make passage until the bridge is demolished. Earlier plans had reckoned on a surface elevation of 68 feet in the Cut at the time of removing the span, but the trestle work on the barge was reconstructed, and the span was towed aside during the morning of October 25, when the surface was at 63.08 feet above sealevel. The dredge reached the slide at 10.40 a. m. of that day. Connection of its discharge pipe, floated on pontoons, was made with the relay pumping station on the west bank of the Canal, 2,500 feet south of the slide, by 3 p. m. Preliminary pumping, for test and adjustment, began directly afterward, and first excavation was made in the evening of October 26.

In its passage from the Pacific to the Cut, the dredge was towed by the tug *Miraflores*. Accompanying them were the steam launches *Birdena* and *Louise*, towing a lighter for repair parts and a fuel oil lighter, and clapnet No. 9, and steam launch No. 26, towing seven sections, each about 250 feet in length, of the 20-inch discharge pipe for the dredge, arranged in parallel on pontoons. The tows entered the lower chamber of Miraflores Locks at 9.04 a. m., the upper level at 9.45, and Miraflores Lake at 10.20. Passing across Miraflores Lake, the foremost vessels entered the east flight at Pedro Miguel Lock at about 11.10, and passed into Culebra Cut at 11.52 a. m.

The tug, clapnet, and two of the launches returned directly to the Pacific entrance, passing out of the lower end of Miraflores Locks at about 1.50 p. m. The third launch, the *Louise*, remained in the Cut, just south of Bridge 57½, to handle the dredging equipment through the trestle and to the slide.

With its work in the Cut, dredge No. 85 will have served in each of the three primary divisions of the Canal, namely, the Atlantic, Pacific, and Central. From the beginning of its service, in 1909, to April, 1910, it worked in the Atlantic entrance and in supplying spoil from the south side of Gatun Dam for the hydraulic core. Just before the closing of the West Diversion at Gatun, effected on April 24, 1910, the dredge was towed through it to the lake side of the dam. It supplied

hydraulic spoil until July, 1912, when it was stranded on the toe of the west wing of the dam, by raising and then lowering the lake surface, in order that it might be dismantled and transferred by train to the Pacific entrance. Rebuilt at the Balboa shipyard, it began excavation in the inner harbor in November, 1912, and was engaged there, excavating over 2,000,000 cubic yards, until its transfer to Culebra Cut.

The tug *Miraflores* is distinguished as the

only Isthmian Canal Commission vessel equipped with wireless telegraph. The apparatus was installed in 1912 by the commander of the vessel, Mr. Neil Langvardt, at his own expense, to provide means of communication while the *Miraflores* was engaged in the sand service from Punta Chamé. The commander was his own operator, having learned the operation of the system while on his annual leave. The launch *Louise* is one of the relics of the French work, rebuilt by

the Americans. It was formerly *La Petite Louise*, and is best remembered by older employes for its services in the communication with the sanitarium on Taboga Island. Clapet No. 9 and launch No. 26, also relics of the French, towing the pontoons loaded with discharge pipe for the dredge, were commanded in group by Laurent Roquebert, foreman of dredges in the Pacific section, who has the record of the longest Canal service of any of the employees. He came to the Isthmus for the first French company in 1885, and has worked ever since at dredging about the Pacific end, for the two French companies, for the Panama railroad in the maintenance of the channel to its wharves, and for the Isthmian Canal Commission.

NORTH OF THE SLIDE.

The first dredging in Culebra Cut was begun on Thursday, October 23, at the bases of the east and west Culebra slides, about 2,000 feet on the other side of Gold Hill, from Cucaracha slide, by ladder dredge No. 1 and the dipper dredges *Chagres* and *Mindi*, which were brought from the Atlantic entrance and across Gatun Lake on October 22. These slides, pushing toward the center of the Canal from either side, have narrowed the channel to a clear passage of about 90 feet width. It is believed that the three dredges will be able to maintain the channel and clear the Cut at this point without difficulty. They are served by six dump barges, each of 400 cubic yards capacity, which the tugs *Bohio*, *Empire*, and *Gatun* handle to and from the dumping grounds in the old course of the Chagres, opposite Gamboa bridge and below the line of the Canal. The tows are made up by the tender *De Lesseps*.

RISE OF SURFACE IN SOUTH END.

Dredge No. 86, which began pumping water from the lake side of Cucaracha slide through the trench leading to the south end of the Cut at midday of October 21, was engaged continuously in that work until the morning of October 27. Its output, augmenting the natural flow through the trench from the lake, which increased steadily with the rise of the lake, was sufficient to fill the south end of the Cut practically to lake level in the night of October 26. Dredge No. 86 will begin excavating at the foot of Cucaracha slide as soon as electrical energy is supplied to the pump prepared for it in the relay station. The stages on each side of the slide, since October 22, at 8 a. m. of each date, have been, as follows:

	North side*	South side†
Thursday, October 23.....	71.71	56.02
Friday, October 24.....	71.39	59.61
Saturday, October 25.....	71.53	63.08
Sunday, October 26.....	71.67	67.03
Monday, October 27.....	71.78	71.23
Tuesday, October 28.....	71.92	71.90

*Gamboa gage, same as Gatun Lake.

†Gage at north end Pedro Miguel Lock.

WORK AT GAMBOA.

The old French ladder dredge No. 5 had excavated to the morning of October 29, a channel through the dike at Gamboa, 150 feet wide with bottom 10 feet above the Canal bottom, giving a clear draft of over 21 feet at present. It is estimated that the dredge will have the channel entirely clear within a month.

LOST—At Pedro Miguel, on Friday, October 24, gold seal ring with red camelian stone. Reward, if returned to L. W. Taswell, Jr., Culebra.

LABOR FORCE AND QUARTERS IN SEPTEMBER.

The force report for September 24 shows the actual working force of the Canal Commission to be 32,266; of the Panama railroad, 5,234, and of the contractors, 2,282, a total effective working force of 39,782 men, a decrease of 3,103 as compared with the statement for August. The gold force on the Canal work, composed almost exclusively of white Americans, was 4,524, an increase of 437, as compared with the previous month. A statement of the Canal force, by divisions, follows:

DEPARTMENT OR DIVISION.	SILVER EMPLOYEES*											Total silver.	Total gold.	Grand total.

(1) Includes Sabanas police station, Taboga Island, Culebra Island, Palo Seco, and Naos Island. (2) Includes 74 Panamanians. (3) Includes eight Asiatics. (4) Includes Colon Beach, and Colon Hospital. (5) Includes 46 East Indians, 11 American citizens and, 65 Panamanians. (6) Includes 19 Asiatics. Gold force of contractors (included above), 19 families, and 439 bachelors.

TABOGA SANITARIUM.

Institution To Be Placed Entirely on a Pay Basis After November 1.

An arrangement has been approved, effective November 1, whereby all employes of the Canal Commission and Panama railroad, and of contractors having hospital privileges, who are recommended for a stay at Taboga sanitarium by the physicians at Ancon and Colon hospitals, and who elect to go there, will be charged the rates in force for members of employes' families. It is to be borne in mind that the trip to Taboga will be wholly optional with the patient, and in case he goes, he will be given the usual sick certificate covering his stay. A circular, published in THE CANAL RECORD of August 13, 1913, gives the rates that are now charged dependent members of employes' families, which, for adults, two or more assigned to one room, is \$1.50 per day, and for adults occupying a room to themselves at their own request, \$2 a day.

The new plan is for the purpose of making the sanitarium as far as possible self-sustaining. The total expenditures of the institution during the fiscal year ending June 30, 1913, amounted to \$32,469.41, not including any portion of the cost of operating the launch *Sanidad*. The revenues for the same period amounted to \$9,706.96.

The number of employes in the sanitarium on June 30, 1912, was 59; number admitted during the fiscal year 1912-13, was 1,953, and of members of their families, 1,189, a total of 3,201. This was about 700 less than the total for the fiscal year 1911-12. The number of Americans who received treatment during the last fiscal year was 2,586; all others, consisting principally of Spaniards, Greeks, and Italians, 615; total, 3,210. The average number of days' treatment per employe for the year was 6.71; average number of persons constantly sick 36.06; number of days' relief furnished patients 21,165, and cost of subsistence per patient per day, \$0.674, as compared with \$0.651 for the preceding fiscal year.

Additional Seismic Movements.

Another pronounced earthquake shock was experienced at 10.02 a. m., on Thursday, October 23, following a period of about 10 days during which only one tremor was recorded. The movement was felt generally over this part of the Isthmus, and its intensity, according to the Rossi-Forel scale, I to X, was estimated at IV. All seismograph pens at the Ancon and Gatun stations were thrown off the sheets, so the record of maximum amplitude was lost, but the seismograph at Gatun showed a movement of 115 mm. to the north before the pen left the sheet. The duration of the shock is estimated at from 15 to 20 seconds. The instruments indicated the same distance as heretofore, namely, a point about 115 miles from Ancon, probably southwest, which would bring the epicenter off the coast of Los Santos province. Telegraph advices received from towns in Los Santos and Coclé provinces show that the last pronounced shock, while severe there, did not accomplish any great amount of damage. At Anton and Penonomé, some buildings threatened to collapse, and in Los Santos village, the schoolchildren became panic-stricken, and in the hurry to leave the building, several of the smaller pupils were

trampled on and injured. Up to Monday, October 27, there had been a total of 38 movements registered by the instrument at Ancon in the present series, which began on October 1. Three tremors occurred on the 24th, one on the 25th, and another on the 26th.

A report received from Messrs. W. C. Johnston and D. F. MacDonald, who went to Los Santos province on October 7 to investigate the cause of the earthquakes at the request of the Panama Government, states that the disturbances appear to have their origin in the vicinity of two mountain peaks, known as Quema and Canajagua, the former having an altitude of about 3,000 feet. Their study of this locality leads them to believe that the shocks are caused by breaks in the earth at a distance below the surface, resulting in subterranean slides and displacements. The investigators found no sign of volcanic activity. They also announced their belief that the movements will end about the middle of November, when the forces of the sun and moon will cease to work in conjunction. They advise that reports of damage have been considerably exaggerated, and that only the roofs of some old adobe houses have suffered.

PERSONAL.

The Hon. Lindley M. Garrison, accompanied by Mrs. Garrison, Brigadier General Erasmus M. Weaver, U. S. A., member of the General Staff, and Chief of the Coast Artillery, and Mr. and Mrs. W. R. Pedigo, arrived on the steamship *Colon*, which docked at about 9.30 a. m., Tuesday, October 28. He called on President Porras at 4 p. m., on the same day, also on the American Minister, and was afterward taken on an automobile trip to Old Panama, and around the city, visiting the famous flat arch in Santo Domingo church. He began an inspection of the Canal work on Wednesday, October 29. During their stay on the Isthmus, Secretary and Mrs. Garrison will be the guests of Colonel and Mrs. Goethals at Culebra.

Capt. Courtland Nixon returned to the Isthmus on the *Colon*, on Tuesday, October 28, from his annual leave of absence.

Lieut. Geo. R. Goethals, accompanied by Mrs. Goethals, will sail for New York on the United Fruit Company's steamer *Zacapa*, on Thursday, October 30, on vacation leave.

Mr. J. W. Collier, Member of Congress from Mississippi, arrived on the Isthmus on the *Cristobal*, on October 18, on a sightseeing trip to the Canal. He returned to New York on the same vessel on October 25.

Judge S. E. Blackburn, accompanied by his family, sailed for New York on the *Cristobal*, on Saturday, October 25, on annual leave of absence.

Mr. Chas. R. Williams sailed for New York on the *Panama*, on Wednesday, October 22, on vacation leave.

Knights of Columbus.

The recently instituted council of the Knights of Columbus at Cristobal, elected the following officers, Sunday, October 26, for the ensuing term: Grand knight, A. P. E. Doyle; deputy grand knight, J. A. Corrigan; chancellor, Wm. J. McCusky; recording secretary, J. V. Delgado; financial secretary, C. B. Briggs; treasurer, Wm. J. Owens; lecturer, T. A. Aanstoots; advocate, J. M. O'Brien; warden, A. L. Kerr; inside guard, T. E. Heslin; outside guard, P. F.

Corrigan; trustees, F. Bruk, D. F. Rabbitt, M. C. O'Hearn; chaplain, Rev. Father Henry C. Pouget. The council is in an excellent condition, both numerically and financially.

Masonic Club of Empire.

The material for the "Record of Masons on the Panama Canal" has been sent to the States but owing to the number of photographs it will take the printers several weeks to prepare the plates, etc. Consequently, there are about 30 days remaining in which applications can be received. All Master Masons who have delayed sending in their photographs and Masonic records should communicate with J. L. Caldwell, secretary-treasurer, Masonic Club, Box 147, Empire.

J. L. CALDWELL.

Empire, C. Z. October 27, 1913.

Visit of Exposition Commissioners.

Mr. James F. Stutesman, formerly United States minister to Bolivia, Mr. John T. Dwyer, managing editor of the *Philadelphia Record*, and Mr. Oscar H. Fernbach of the publicity bureau of the Panama-Pacific Exposition, composed a commission, which arrived at Colon on the United States scout cruiser *Birmingham*, on Friday, October 24. Their mission was to extend an official invitation to the Republic of Panama to participate in the San Francisco celebration, and in an audience with the President, assurance was given that Panama would take part. The commissioners were entertained at a dinner at the University Club by Mr. William Jennings Price, the American minister, on Tuesday evening, October 28. Messrs. Stutesman and Fernbach sailed for Costa Rica on Wednesday, October 29, while Mr. Dwyer will return to his home on Thursday. The two first-named commissioners expect to visit all the Central American countries in the interests of the exposition.

Canal Visitors.

Twenty-four members of the National Grain Dealers Association, recently in convention in New Orleans, arrived on the Isthmus on the *Sixaola*, on Thursday, October 23, to see the Canal. They sailed for Bocas del Toro on Monday, October 27.

Twenty-five members of the American Society of Civil Engineers, also arrived on the *Sixaola* from New Orleans, on Thursday, October 23, and are inspecting the Canal work. They will return to the United States on Thursday, October 30.

Examination by Board of Local Inspectors.

The Board of Local Inspectors will conduct examinations at the Administration Building, Ancon, on Wednesday, November 5, 1913, beginning promptly at 2 p. m., for persons desiring to procure the following classes of licenses: Pilots, masters, mates, marine engineers, chauffeurs, and navigators of motor boats. All applicants for licenses must procure from the Executive Office, Ancon, forms of application and information respecting the filling out of same, not later than the day previous to the examination. In addition, all persons desiring chauffeurs' licenses must provide themselves with automobiles with which to demonstrate their ability to properly operate same.

W. V. JUDSON,

Chairman, Board of Local Inspectors.

ANCON, C. Z., October 23, 1913.

CANAL MEDALS.

A Total of 6,489 Medals and 3,857 Service Bars Have Been Earned to Date.

Six hundred and forty-three Canal medals have arrived and are being distributed among those entitled to them. The service bars earned for the period January 1, 1912, to January 1, 1913, have not yet been received.

The presentation of Canal medals was formally authorized by ex-President Roosevelt in a letter to the Chairman of the Isthmian Canal Commission, dated December 23, 1907. The details were turned over to a committee, which, on April 27, 1908, recommended certain conditions in line with Mr. Roosevelt's expressed desire under which the medals were to be awarded, and also made suggestions as to their general design. The conditions as adopted were, as follows:

1. American citizens alone to be eligible for medals; for naturalized citizens medal service to commence only after acquiring citizenship.

2. Medal service to begin with American occupation, employees of the Canal Commission and the Panama railroad to be equally eligible after that date.

3. Medals to be numbered consecutively in the order in which they have been earned.

4. Service to be satisfactory.

In addition, it was decided to award bars for each two years of continuous service.

The suggestion, afterward adopted, that the name of the medal holder and date of his appointment be engraved on the back of each medal, was made by one of the 1904 employees in a letter, dated March 12, 1908.

The artist, Mr. F. D. Millet, who went down with the *Titanic*, was engaged to prepare the design, and Mr. Victor M. Brenner, medalist, was employed to make the dies. It was early decided to manufacture the medals out of old French scrap, and with this end in view, five samples were sent to the director of the United States mint at Philadelphia on October 29, 1908. The shipment consisted of 25 pounds of staybolts, 30 pounds of excavator bearings, 24 pounds of bushings, another lot of 28 pounds of excavator bearings, and 35 pounds of locomotive driver bearings, all taken from old French equipment. Subsequently, the director of the mint advised that the only metal in the samples sent adapted to the manufacture of the medals was that in the staybolts, and to make the metal workable 10 per cent of alloy would have to be added. There were 5,500 pounds of these staybolts available; the entire amount was reserved for the medals, and in January, 1909, one thousand pounds were shipped to the United States. This amount has sufficed for the manufacture of all medals and service bars up to date.

As the mint could only make the medals, the engraving had to be arranged for elsewhere, and a contract was entered into with Mr. Alva Nelson of New York City for this work at a cost of 22 cents each for the medals, and 14 cents each for the service bars. This arrangement has been renewed from year to year on the same basis. The cost of making the medals has been \$350 per thousand, and of the service bars \$80 per thousand. The tissue paper in which they are wrapped costs 19 cents for each thousand medals, and the pasteboard box in which they are mailed to the employee adds slightly to the total expense, so that each medal represents an out-

lay of about 50 cents. The expense is paid out of a special appropriation made by Congress for the purpose.

Under the present regulations medals cannot be duplicated; if an employee loses his medal the loss is irremediable. It is possible, however, in view of the numerous reports of loss of medals by the holders thereof since the first issue, that some action may be taken in the future for providing duplicates. In one case, a medal claimed to have been received in bad condition was returned for correction of the defects.

A statement of the number of medals and service bars issued, or to be issued, for each period from 1904 to 1912, inclusive, follows:

Period.	No. Medals.	First Bar.	Second Bar.	Third Bar.
1904-1906.....	232
1905-1907.....	885
1906-1908.....	1,147	146
1907-1909.....	1,384	536
1908-1910.....	943	704	92
1909-1911.....	959	830	362
1910-1912.....	939	615	498	74
Total.....	6,489	2,831	952	74

Sixty-three per cent of medal recipients, 1904-1906, received first bars, 1904-1908.

Sixty-one per cent of medal recipients, 1906-1908, received first bars, 1906-1910. Sixty per cent of medal recipients, 1907-1909, received first bars, 1907-1911.

Forty per cent of medal recipients, 1904-1906, received second bars, 1904-1910. Forty-one per cent of medal recipients, 1905-1907, received second bars, 1905-1911.

Thirty-two per cent of medal recipients, 1904-1906, received third bars, 1904-1912.

New Gasoline Boats.

Award has been made to the Welin Marine Equipment Company of Long Island City, N. Y., for a gasoline launch for use of the port captain at Balboa, at \$4,530. The vessel is designed for rough service in connection with the moving of cargo lighters at the Balboa docks and wharves, and will have a length of about 40 feet, and beam of 10 feet. Its scantlings and keel will be of oak, keelson of yellow pine; planking of 1½-inch yellow pine, copper fastened; frame of 1½-inch oak; hull, sheathed with copper. The engine will be of the heavy duty type of from 40 to 45 horsepower.

Requisitions have been placed for a sea-going gasoline towboat, and a gasoline launch, to be used in connection with the work on the proposed east breakwater. The towboat will be 60 feet long, with beam molded at the water line of 14 feet. Its freeboard at the lowest point of sheer will be two feet nine inches. It will be equipped with an 80-horsepower engine, two watertight bulkheads, an electric light plant to take care of all the lights normally required and four additional ones, tank capacity for gasoline sufficient for a run of 150 miles, pilot house, cabin, which will be capable of accommodating 24 passengers, provided with benches covered with cushions; necessary life-saving apparatus, and a 12-foot dory. The bottom of the hull will be sheathed with No. 18 copper. The towboat will have a speed of nine knots an hour, and will be used principally in towing piles, but can also be utilized in shifting barges, picking up stray piles, and in running back and forth from Toro Point.

The launch is to be a duplicate of the *Psyche Rittenhouse*, now in the quarantine

service at Colon and Cristobal, which was built by C. L. Seabury and Company of Morris Heights, N. Y. It will be used in making miscellaneous trips in connection with the breakwater work.

Progress on Permanent Buildings at Balboa.

Forces of the American Bridge Company completed the erection of the steel framework for the new administration building, overlooking the proposed Balboa townsite, on October 10. They have also completed to date the erection of skeletons for 19 of the 27 steel-frame buildings of the permanent shops at Balboa. Buildings Nos. 14, 15, 24, 25, and 27 have not been begun. Erection of the steel for building No. 5, the general storage building, is about 75 per cent completed; for No. 6, the paint shop, about 50 per cent; and for No. 9, the galvanizing shop, about 65 per cent. All of the slightly over 6,000 tons of steel required for the shop buildings has been delivered on the Isthmus, and about 5,400 tons have been erected. The erection force of the company at Balboa numbers about 90 white Americans, structural iron workers, with about 20 negro painters.

Roofing the buildings has kept pace with the completion of erection at the successive structures. The local factory of the American Cement Tile Manufacturing Company has completed the manufacture of the tile required in the original contract for the shop buildings, and is now engaged in the preparation of roofing for other buildings, and for stock for future repairs. It is expected that the work will be finished about the first of January, 1914.

Change in Tramway Line to Ancon.

The street railway track leading up the hill on which the Hotel Tivoli is situated has been removed, as a means of beautifying the approach and grounds of the hotel, and connection with the branch line leading into the Ancon Hospital grounds has been effected by a curve track, swinging from the foot of the hill to a connection opposite the Ancon dispensary. This arrangement eliminates reversing the cars, as was necessary before on both out and return trips and saves about five minutes on each trip.

Counterfeit Money.

The Chief of the Division of Police and Prisons has issued the following circular notice to the district commanders, under date of October 25:

Information has reached this office that there are a number of counterfeit 50-cent United States silver coins in circulation in the Canal Zone, a number having been located at Empire.

All members of this division are instructed to be on the lookout with a view of locating the source of this spurious coin, and in the event that any information is received, immediate report should be made to police headquarters by telephone.

The people of Gatun will celebrate the successful use of Gatun Locks, at the Gatun clubhouse on Saturday evening, November 1, under the auspices of the Gatun Masonic Club. There will be addresses by some of the distinguished men on the Isthmus, followed by dancing.

Married.

PRINGLE-MALLET—On Monday evening, October 27, at the Panama Cathedral, Miss Dita Mallet, only daughter of Sir Claude and Lady Mallet, to Mr. Kenneth McKenzie Pringle, eldest son of Sir John Pringle of Cape Clear, Jamaica, Bishop William Rojas officiating.

GROWING OF TROPIC FRUITS.

Subsistence Department Plans to Develop a Tract at Frijoles to Supply Commissaries.

The Subsistence Department has taken charge of the estate known as Palenquillo and Frijol Grande, which comprises lands formerly owned by Martin Linczer, Margaret Rose Smith, and Mrs. George Francis Hill, lying along the Panama railroad relocation, and extending from the old site of Bohio to Caimito. Title to this land passed to the United States through awards for damages made to the owners by the Joint Land Commission. The land between Gatun and Gamboa, recently declared a reservation, also includes a number of other cultivations which are a part of the Frijoles plantation. Some of these contain valuable fruit trees, together with a considerable amount of cane and bananas.

The Linczer tract included several acres of standing cane, a crudely equipped sugar mill, and certain building improvements at Frijoles. The present crop of cane should have been cut in March, and has, therefore, depreciated to some extent in value, but the Subsistence Department is utilizing as much of it as is valuable in the production of molasses for the commissaries. The apparatus consists of a small Champion crusher, which is being operated by mule power, and three kettles for boiling down the cane juice. It is intended to continue the growing of cane, but only in sufficient quantities to supply the commissaries with cane syrup, and cane for sale by the stalk, which is greatly in demand by the West Indian employes. Eventually, it is probable that the crusher will be operated by steam power, and that an evaporating pan will be installed, thereby insuring a standard quality of molasses.

The production of sugar cane will, however, be secondary to the growing of the most common varieties of tropic fruit. During the past two years, the supply of oranges, limes, avocados, bananas, mangoes, etc., has been steadily diminishing. Jamaica was formerly depended on to a considerable extent for oranges, limes, mangoes, and avocados, but of late the shipments have become scantier and of poorer quality. With the reduction of the duty on these fruits by the new tariff, it is anticipated that the shipments from Jamaica to the United States of the better grades will increase, especially in the case of oranges, in view of the shortage of the California crop, and the high prices now prevailing.

There are at present on the farm a considerable number of banana walks in productive state. The Frijoles banana is considered superior in quality to others in this part of the Isthmus, and for years vendors have done a profitable business in selling to passengers at the Frijoles railroad station

when the trains stop there. The rise of the Chagres River, which has drowned out a number of small plantations in the vicinity of Cruces, has had a tendency to cause a scarcity of banana shipments down the Chagres. A shipment of 110 bunches from the farm one day last week was distributed among various commissaries. It is planned to go into banana culture on a scale sufficient to meet the commissary and hotel requirements, and also to raise an adequate supply of oranges, limes, and avocados. To this end, over 1,000 avocado seeds have already been planted, all from Jamaican stock. Recognizing the impossibility of at once determining the best grades to adopt, various kinds will be planted and then budded on to other stock in a way to procure the best results. It is not intended to import budded orange and grape fruit trees from the United States, as the experience of others has shown that they do not thrive well under local conditions, but to bud from native pedigreed stock. This plan will give all the better known tropic varieties a trial, and by gradually eliminating the undesirable kinds, to arrive eventually at a standard. This high class stock will also be available for dissemination throughout the Republic of Panama.

There are about 275 acres of cultivable land in the tract. A great deal of the original estate was inundated by Gatun Lake, and a considerable part of the remaining portion above the 87-foot level has been detached and isolated, making it necessary to use a launch in visiting the various sections. It is not planned to do any intensive farming, and the products will be limited in the main to the articles mentioned above, with the addition possibly of corn and plantains. The farm arrangements are in the hands of Mr. Ernest Bradford, chemist for the Subsistence Department. All products derived from the estate are handled through the local purchasing agent of the Panama railroad.

New Schedule for Sightseeing Trains.

Following is a new schedule of sightseeing trains, effective October 27, 1913:

Mondays, Wednesdays, Fridays, leave Panama passenger station at 8 a. m., for Pedro Miguel over the main line, returning to Panama over construction tracks, taking in Pedro Miguel and Miraflores Locks and Pacific sealevel section, returning to Panama about 11 a. m.

Tuesdays, Thursdays, and Saturdays, leave Colon passenger station at 8.15 a. m. for Gatun, taking in Gatun Locks and Atlantic sealevel section, returning to Colon about 11.45 a. m.

Passengers located in Panama desiring to make this trip, can do so by taking regular train No. 2, leaving Panama at 7.30 a. m., connecting with sightseeing train at Gatun,

and can return to Panama after the trip on train No. 5, leaving Gatun at 11.20 a. m.

Lectures on the lock models will be given at the model room near the Hotel Tivoli at Ancon on Mondays, Wednesdays, and Fridays, about 11 a. m., and on Tuesdays, Thursdays, and Saturdays, at 3 p. m.

Concrete Work in Locks and Spillways.

Concrete work in the Gatun locks is nearly completed, the aggregate amount in place at the close of work on October 25, being 4,481,109 cubic yards.

A statement of the concrete laid in the three sets of locks for the Canal, and in Gatun and Miraflores spillways, as of October 25, follows:

GATUN LOCKS.

The last concrete for the locks proper, as distinguished from that necessary to finishing work by the First Division, was mixed and placed on August 16, 1913. At the close of work on that day the total amount of concrete placed by the Atlantic Division amounted to 2,045,485 cubic yards.

Men Wanted for Hard Rock Excavation.

The Wisconsin Granite Company, 520 Chamber of Commerce Building, Chicago, Ill., has advised the office of the Chairman of the Canal Commission that it can use a few men experienced in hard rock excavation. All applications should be directed to the company at the above address.

Celebration of Mass at Culebra.

The Catholics of Pedro Miguel and Paraiso are informed that mass is celebrated at the Church of the Holy Redeemer, Culebra, at 9.15 on Sundays and feast days.

HENRY COLLINS.

Culebra, C. Z., October 27, 1913.

CLASSIFIED EXPENDITURES—ISTHMIAN CANAL COMMISSION.

A statement of classified expenditures of the Isthmian Canal Commission to July 31, 1913, follows:

PERIODS.	Department of Civil Administration.	Department of Law.	Department of Sanitation.	Department of Construction and Engineering	General Items.	Fortifications.	Total.
Total to June 30, 1909.....	3,427,090.29		9,673,539.28	69,622,561.42	78,022,606.10		160,745,797.09

JOINT LAND COMMISSION.

Rules of Dismissal.

(Continued from last week.)

In the matter of sundry claims located at Matachin, docket No. 618-A, etc.—In the case of claimants named below, who are occupiers on that portion of the original estate of Matachin, which was purchased by the French Canal Company and subsequently became the property of the United States, an examination of the evidence shows that they entered upon possession of the lands on which they claim improvements under leases from the Isthmian Canal Commission.

In a decision in the case of Agustá Dunlop, rendered April 16, 1913, the Commission said:

"We have therefore reached the conclusion that it is not within the province of the Joint Land Commission to take cognizance of claims arising out of the revocation of revocable leases or licenses issued by the Isthmian Canal Commission. Such claims have no organic relation to the grants contained in the Treaty, nor to the international obligation which the United States has agreed to discharge under the Treaty; and for the adjudication of all such claims the claimants must seek a remedy through the procedure afforded by municipal laws."

In accordance with the foregoing decision, the claims of the following persons are hereby dismissed:

Barrio, Andrea, for house, tax No. 1,600 and other improvements.

Cleron, Felix, in docket No. 931, for house, tax No. 594 and other improvements.

Domingue (Dominique), Isidore, docket No. 1,077, for house, tax No. 538 and other improvements.

Maestre, Rafael, in docket No. 482, for house, tax No. 645 and other improvements.

Melendez, Petrona, for house, tax No. 1,736 and other improvements.

Olivarez, Julia, for house, tax No. 1,731 and other improvements.

Piite (Peters), Stephen, for house, tax No. 122 and other improvements.

Ramos, Carlos, docket Nos. 1,599 and 160, for house, tax No. 156, and other improvements.

Robinson, Matilda, for house, tax No. 1,710 and other improvements.

Williams, John, for house, tax No. 22 and other improvements.

(Signed) FEDERICO BOYD, ROLAND P. FALKNER, SAMUEL LEWIS, L. S. ROWE, Commissioners.

September 16, 1913.

In the matter of sundry claims located as below designated, docket No. 1,240-A, etc.—In the case of the claimants named below, an examination of the evidence shows that they entered upon the possession of the lands on which they claim improvements, under leases from the Isthmian Canal Commission.

In a decision in the case of Agustá Dunlop, rendered April 16, 1913, the Commission said:

"We have therefore reached the conclusion that it is not within the province of the Joint Land Commission to take cognizance of claims arising out of the revocation of revocable leases or licenses issued by the Isthmian Canal Commission. Such claims have no organic relation to the grants contained in the Treaty, nor to the international obligation which the United States has agreed to discharge under the Treaty, and for the adjudication of all such claims the claimants must seek a remedy through the procedure afforded by municipal laws."

In accordance with the foregoing decision, the claims of the following persons are hereby dismissed:

Best, Joseph, for house, tax No. 1,024, and other improvements at Caimito Mulato.

Campbell, Daniel, for house and other improvements at Caimito.

Gutierrez, Manuel, for house, tax No. 1,797 and other improvements in the lands of Juan Grande (Waterloo).

James, Daniel, docket No. 31, for house and other improvements at Caimito, under Lease 6,813.

Fontenell, Nugent, docket No. 884, for house and improvements on the lands of Juan Grande (Waterloo).

Mendez, Celso, docket No. 1,322, for improvements at Mamey y Culo Seco.

Morrison (Murray), Thomas, docket No. 1,625, for house, tax Nos. 1,033 and 1,038 and other improvements at Caimito Junction.

Navarro, Eusebia, for house, tax No. 1,643, and other improvements at Gamboa.

Phillips, Richard, docket No. 620, for house, tax No. 1,023 and other improvements at Caimito.

Villaverde, José, for house, tax No. 1,762 and other improvements on the lands of Juan Grande (Waterloo).

(Signed) FEDERICO BOYD, ROLAND P. FALKNER, SAMUEL LEWIS, L. S. ROWE, Commissioners.

September 16, 1913.

In the matter of sundry claims, docket No. 1,240-A, etc.—In a number of cases claims have been presented to the Joint Commission for property which is no longer in existence, it being alleged by the claimants

that such property has been destroyed by the operations of the Isthmian Canal Commission, by the formation of Gatun Lake, the relocation of the Panama railroad line, by the formation of dumps, by the clearing of watersheds, or other operations.

In some cases the United States denies that the property claimed ever existed in the names of the claimants and bases this denial upon the fact that the Isthmian Canal Commission has from the outset made very complete records of any property damaged by the operations of the Commission and of all houses destroyed by the Commission, and that prior to the formation of Gatun Lake, careful investigation was made of the territory to be covered by the waters of the lake and records made of all houses and improvements in this area.

In the following cases the evidence before the Commission is not of a character to justify the Commission in making an award for the property claimed, and the said claims are accordingly dismissed:

Aguilar, Theodosia Dulcia, claim for improvements said to have been located on the Aojeta River.

Arouz, Arvelina Filos de, docket No. 1,483, claim for thatched house and other improvements said to have been located at Aguas Claras.

Bernal, Miguel, docket No. 778, claim for thatched house and other improvements said to have been located in the district of Buenavista at the mouth of the river Caño Quebrado.

Lee, Susan, docket No. 1,439, claim for improvements said to have been located at Bohio.

Montout, Leopold, docket No. 378, claim for thatched house and other improvements said to have been located on the lands of Caño Quebrado.

Quinto, Juan, claim for a thatched house burned by the Isthmian Canal Commission and for other improvements said to have been located between Frijoles and Agua Salud.

(Signed) FEDERICO BOYD, ROLAND P. FALKNER, SAMUEL LEWIS, L. S. ROWE, Commissioners.

September 20, 1913.

In the matter of sundry claims, docket No. 1,240-A—In the case of the claims hereinafter mentioned, the evidence submitted to the Commission, either as to the ownership in the claimant of the property for which a claim was made or as to the existence of the property itself, was not of such a nature as to justify the Commission in proceeding to an award:

Ernest, Isidore, claim for improvements now largely overgrown with jungle at Caimito.

Fackelow (Ficklow), William, claim for a thatched house and other improvements at Bohio Hill.

Gale, John, docket No. 405, claim for House 1,143 and improvements on east side of Barbacoas bridge.

Lee, Jan (Hing Lee), docket No. 1,244, claim for property said to have been located at Escoval and under water since 1908.

Nobriga, John D., docket No. 535, for house at Bailamonos.

In the absence of sufficient evidence, these cases are hereby dismissed.

(Signed) FEDERICO BOYD, ROLAND P. FALKNER, SAMUEL LEWIS, L. S. ROWE, Commissioners.

September 18, 1913.

In the matter of house No. 1776 and improvements, docket No. 1,240-A—The evidence before the Commission is to the effect that the owner of the house No. 1776 and its improvements, who appears in the records of the Commission under the name of Manuel Yveino, is also known under the names of Yebano, Ibaña, Ibañez, and Baños. The evidence before the Commission shows that under the name of Manuel Baños he signed on March 19, 1912, an acknowledgment, in which it is stated that he recognizes that the land occupied by himself on which was located the house, tax No. 1776, belonged to the United States of America, and in which he agreed that in consideration of permission to occupy said land that he would vacate the said land and remove therefrom any and all improvements without making any claim of any kind against the United States, the Isthmian Canal Commission, or Panama Railroad Company by reason of such removal.

In view of the agreement herein described the Joint Land Commission can recognize no claim against the United States for which an award should be made, and the case is accordingly dismissed.

(Signed) FEDERICO BOYD, ROLAND P. FALKNER, SAMUEL LEWIS, L. S. ROWE, Commissioners.

September 15, 1913.

Rules.

In the matter of sundry claims for houses in the town of Gorgona, docket No. 1,250-A, etc.—Inasmuch as the Commission has certified its inability to agree whether or not those persons are entitled to compensation, who after November 15, 1907, purchased houses in the town of Gorgona from persons who owned such houses prior to the said date, and whose occupancy of the lots upon which such houses were erected was prior to their acceptance of Isthmian Canal Commission leases, it

is directed that the claims of the following persons for the houses specified, which fall in this category, be referred to the decision of the umpire to be appointed under Article XV of the Treaty ratified February 26, 1904:

Armstrong, Christian, tax No. 840; Brigitte, Augustin, tax No. 780; Bernard, Charles D., tax No. 775; Bailey, George, tax No. 841; Ching, Wing Lee, tax Nos. 710 and 834; Caldwell, Jack, tax No. 786; Carrington, W. H., tax No. 735; Forbes, Rosa, tax No. 732; Gordon, Edward, tax No. 811; Maduro, I. L., tax Nos. 835 and 837; Lindor, Leonor, tax No. 831; Ogilvie, D. W., tax Nos. 868 and 736; Pence, Juan A., tax Nos. 753 and 754; Tai, Kam Ling, tax No. 743; de Tono, Francisco and Fasano, A., tax No. 799; Yu, Josi L., tax No. 772; Zuleta, Marcial, tax No. 816.

(Signed) FEDERICO BOYD, ROLAND P. FALKNER, SAMUEL LEWIS, L. S. ROWE, Commissioners.

September 23, 1913.

In the matter of sundry claims.—Inasmuch as the Commission has certified its inability to agree on the question, whether or not compensation should be awarded to persons who purchased houses and other improvements from parties who held the same under leases from the Isthmian Canal Commission, but who had been in the occupancy of such houses or lands prior to the time when they took a lease from the Commission, it is ordered that the following cases, which come within this category, be referred to the decision of the umpire to be appointed under Article XV of the Treaty ratified February 26, 1904:

Calderson, Eleodoro, claim for house No. 1733 at Matachin, on lands purchased by the French company, which subsequently became the property of the United States.

Estrada, José de la Cruz, claim for house No. 281 in the village of Cruces.

Maldonado, Juan, in docket No. 678, claim for house No. 280 in the village of Cruces.

Murgas, Marcalino, claim for house No. 303 in the village of Cruces.

Prado, Coyetano, in docket No. 136, claim for houses Nos. 241, 181, 296, and 306 in the village of Cruces.

(Signed) FEDERICO BOYD, ROLAND P. FALKNER, SAMUEL LEWIS, L. S. ROWE, Commissioners.

Opinion

on the status of occupiers and tenants on that portion of the Matuchin estate acquired from the French Canal Company—Portions of the original estate of Matachin were acquired by purchase by the French Canal Company and subsequently became the property of the United States. On this part of the estate the status of occupiers and tenants of the Matachin estate is governed by the principles formulated by the Commission in the opinions dated June 24, 1913, and July 25, 1913, which determined the status of occupiers and tenants on public lands in the Canal Zone who went upon such land prior to and subsequent to the date of the Treaty between the United States of America and the Republic of Panama, ratified February 26, 1904.

(Signed) FEDERICO BOYD, ROLAND P. FALKNER, SAMUEL LEWIS, L. S. ROWE, Commissioners.

September 15, 1913.

Opinion

in the matter of sundry claims on that portion of the lands of El and La Pihiva lying below a topographical contour line of 87 feet above sealevel—Among the persons who make claim for improvements in the lands of El and La Pihiva are certain persons whose improvements are below the 87-foot level. Concerning such persons the following statement is made in the answer of Counsel for the United States:

"It is submitted that the United States of America have acquired under an award of the Joint Land Commission of 1908 and the deeds in execution thereof, all interest, claims, and demands of every kind and character whatsoever in and to that part of the estates of El and La Pihiva (Pisva) lying below a topographical contour line of 87 feet elevation above mean sealevel, and that this Joint Land Commission has no jurisdiction to make awards in favor of claimants alleging themselves to be the owners of any improvements located upon said lands."

For the determination of the rights of these claimants the Commission deems it unnecessary to enter into an examination of the effect of the award of the Commission of 1908. The evidence submitted shows that these claimants occupied these lands subsequently to 1908 for a period sufficient to acquire rights under Law No. 48 of 1882. Their status, therefore, is governed by the opinion of the Commission announced July 25, 1913.

The Commission has, therefore, reached the conclusion that those claimants who fulfill the aforesaid requirements are entitled to compensation and awards will be made accordingly.

(Signed) FEDERICO BOYD, ROLAND P. FALKNER, SAMUEL LEWIS, L. S. ROWE, Commissioners.

OFFICIAL CIRCULARS.

Disposition of "Bad Order" Lidgerwood Cars.

CULEBRA, C. Z., October 22, 1913.

CIRCULAR No. 323-T:

Hereafter, any Lidgerwood flat cars which may be retired and turned over to the Quartermaster's Department as bad order cars, should be sent to Mount Hope depot, at which point the air brake parts will be removed, bodies lifted off trucks and burned, and such usable parts as are needed will be recovered after the bodies are burned.

GEO. W. GOETHALS,

Chairman.

Estimate of Cost on Work Request.

CULEBRA, C. Z., October 21, 1913.

HEADS OF DEPARTMENTS AND DIVISIONS:

Hereafter, in cases where it is not practicable for the department submitting work request (form C. E. 159-b) to furnish an estimate of the cost of the job, the department performing the work will insert the estimated cost on one copy of the work request, which will be furnished for that purpose, and forward the same direct to the Examiner of Accounts at Empire.

GEO. W. GOETHALS,

Chairman and Chief Engineer.

Form for Silver Employees Sent to District Physician.

CULEBRA, C. Z., October 21, 1913.

HEADS OF DEPARTMENTS AND DIVISIONS:

The Acting Chief Sanitary Officer calls attention to the fact that foremen and others who are in the habit of sending silver employees to the district physicians for treatment are not using form D. S. No. 3 (Request for medical treatment) which is provided for that purpose. Please instruct all concerned to furnish the necessary information to the district physicians on form D. S. No. 3 and see that they are supplied with this form.

GEO. W. GOETHALS,

Chairman and Chief Engineer.

Inspector, Office of Chief Engineer.

CULEBRA, C. Z., October 23, 1913.

CIRCULAR No. 510:

Effective this date, Mr. George A. Greenslade is appointed inspector, Office of the Chief Engineer.

As such, his duties will cover both work and labor. As regards work, he will report on the methods and economy of performance. As regards labor, he will inspect and report on the methods of handling labor, the results obtained, the tools used, conformance with rules and regulations, and the efficiency attained, not only as regards the labor itself, but also as regards the foremen and general foremen in charge of same.

Heads of departments and divisions will afford him any facilities necessary for the proper performance of his work and will consult with him directly on all matters requiring his assistance.

GEO. W. GOETHALS,

Chairman and Chief Engineer.

Reservations on the "Cristobal," November 25.

CULEBRA, C. Z., October 27, 1913.

HEADS OF DEPARTMENTS AND DIVISIONS:

All first-class sailing accommodations on the steamship *Cristobal*, scheduled to sail from New York on November 25, will be reserved exclusively to members of the House Committee on Appropriations. No requests for first-class accommodations on this boat should, therefore, be made.

GEO. W. GOETHALS,

Chairman and Chief Engineer.

Fire Equipment in Moved Buildings.

CULEBRA, C. Z., October 23, 1913.

HEADS OF DEPARTMENTS AND DIVISIONS:

In the future, when on account of construction work or for any other reason it becomes necessary to remove or demolish any buildings of the Commission or Panama railroad, prior notice should be given to the Chief of the Division of Fire Protection in order that steps may be taken to properly care for any fire equipment which may be installed therein.

GEO. W. GOETHALS,

Chairman and Chief Engineer.

New Section P. R. R. Main Line Placed in Service.

PANAMA RAILROAD COMPANY,

OFFICE OF GENERAL SUPERINTENDENT,

COLON, R. P., October 25, 1913.

G. S. BULLETIN No. 15:

The new section of north bound track near the Pedro Miguel station, will be put in service at 7 a. m., Sunday, the 26th instant, and double track will thereby be extended northward to a point opposite Pedro Miguel station.

Switches will be equipped with hand throw switch-stands temporarily, and served by switch tenders, until

such time as new interlocking plant is put into service. Please be governed accordingly,

F. MEARS,

Acting General Superintendent.

Change in P. R. R. Signal Service.

PANAMA RAILROAD COMPANY,

OFFICE OF GENERAL SUPERINTENDENT,

COLON, R. P., October 24, 1913.

G. S. BULLETIN No. 14:

Effective 12.01 p. m., October 25, the outlying home signal located south end of Canal siding and governing northward trains will be placed "Out of service." All northward trains will continue to observe the "Fixed arm" indicating "Limited speed" until train has passed all switches that were formerly controlled from Tower R. This "Fixed arm" will remain in its same location, which is 1,950 feet south of Canal siding.

On the same date and at the same time the power operated manual block signal (stencilled M. B.) at the south end of Canal siding will go out of service and all southward trains will be governed by the manual block signal at Tower R.

F. MEARS,

Acting General Superintendent.

Change in Sailing of the "Heredia."

COLON, R. P., October 28, 1913.

To All Concerned—The steamship *Heredia* is scheduled to sail from New Orleans on Wednesday, October 29, stopping at Mobile to pick up members of the Southern Commercial Congress who are making the cruise. The following will be the itinerary:

Leave New Orleans, Wednesday, October 29, at 11 a. m.; arrive Mobile, Thursday, October 30, at 8 a. m.; leave Mobile, Thursday, October 30, at 11 a. m.; arrive Colon, Tuesday, November 4, at 7 a. m.; leave Colon, Thursday, November 6, at 10 a. m.; arrive Bocas del Toro, Thursday, November 6, at 9 p. m.; leave Bocas del Toro, Friday, November 7, at 9 p. m.; arrive Colon, Saturday, November 8, at 8 a. m.; leave Colon, Saturday, November 8, at 3 p. m.; arrive New Orleans, Thursday, November 13, at 7 a. m.

You will note that the usual stop at Limon is omitted from this itinerary and steamer will remain in Colon until Thursday, sailing at 10 a. m. direct to Bocas, returning to Colon Saturday morning, and resuming her regular schedule northbound.

H. R. WILFORD,

General Agent.

GENERAL.

The first ten men in the all-Isthmian bowling league are, as follows: O'Meara, Parkis, Cushing, Dougherty, Bullard, Davis, Barte, King, McColley, Barrett.

The standing of the chess clubs in the all-Isthmian tournament is, as follows: Culebra won 20½ points, Empire, 16½ points; Gatun, 15 points, and Cristobal, 10 points.

The standing of the teams in the basketball league on October 27, was, as follows:

Team.	Won.	Lost.	P. C.
Empire.....	6	0	1000
Camp Elliott.....	4	2	.600
Gatun.....	3	2	.667
Cristobal.....	2	3	.400
Culebra.....	2	4	.333
Corozal.....	0	6	.000

The standing of the teams in the bowling league on October 27, was, as follows:

Cristobal.....	7	2	.778
Corozal.....	6	3	.667
Empire.....	8	4	.667
Culebra.....	8	4	.667
Gatun.....	1	8	.111
Camp Elliott.....	0	9	.000

CULEBRA.

On Monday night, October 20, the first "Smoker" since the demolition of the old Culebra Y. M. C. A., was held in the schoolhouse, with an attendance of 150 men. An orchestra furnished music during the evening. The program for the entertainment was, as follows: Piano solo, Mr. C. C. Pearsall; singing and dancing act, Shubert; blackface comedy, E. L. Emery; banjo solo, C. R. Ray, with five encores; and a wrestling match between Christy of Camp Otis and J. Guy DeCoro of Culebra, won by the former. During the evening, four comic moving picture films were exhibited. Sandwiches, home made cake, lemonade, and cigars were served at the close of the program.

High scores in tenpins during the week were made by Finley, with 201, and Chadbourn, with 216.

The Camp Elliott bowling team lost three games to the local team on Friday night, October 24, by the following scores:

Camp Elliott.	Culebra.
Darnell.....	149 144 120
Weis.....	143 137 181
Ogle.....	120 158 165
Thompson.....	133 188 149
Jenkins.....	151 156 129
Case.....	178 165 142
Cushing.....	186 184 189
Herrington.....	157 179 144
Chadbourn.....	124 170 150
Dougherty.....	193 145 184

Totals.... 687 783 744 838 843 809

Rev. C. H. Elliott of Cristobal spoke at the Sunday night service, October 26, to a good-sized audience. Everyone is invited to attend these services in which special features will be introduced nearly every Sunday evening.

On Wednesday night, October 22, the Culebra basketball team defeated the Corozal team at Empire by the score of 20 to 16. The line-up was, as follows:

Corozal—Bessey and Doherty, forwards; Russell, center; Kenely, Howe, Shafer, guards.

Culebra—Bracker, and Stripling, forwards; Gassman, center; Rose, Blumenberg, Worsely, guards.

EMPIRE.

The regular meeting of the Empire debating club will be held Friday, October 31. The subject will be "Resolved, that the trusts should be abolished." Speakers for the affirmative will be Mr. D. C. Brown and Mr. McColley; for the negative, Mr. Martin and Mr. D. Watson. The public is invited.

The Empire basketball team defeated the Corozal team on Saturday, October 25, by the score of 53 to 13.

The bowling games between Empire and Gatun were won by Empire on Saturday, October 25. Scores were, as follows: Empire, 843,904,850; Gatun, 737,811,734.

Three hundred and fifty men attended the "Smoker" on Tuesday, October 21, at which the following program was given: Music by the Tenth Infantry orchestra; three selected moving picture reels; E. L. Emery in his own act; E. Paul Case, soloist; F. J. Shubert, song and dance; Kane and Terrell, musical impersonators; "Happy" Draughton, comedian; Burmaster and Morrison, blackface act; C. C. Pearsall, piano solo; Mr. Ray on the banjo; and an address by Mr. W. W. Warwick, formerly chairman of the Empire Y. M. C. A. council.

The Culebra chess team played the Empire team on Wednesday, October 22. Empire won two and one half games, and Culebra won five and one half games.

On Saturday, the Gatun chess team visited the Empire team, with the result that each won four games and lost four games.

On Wednesday night, October 22, the Empire basket-

ball team defeated the Camp Elliott team at Camp Elliott, by the score of 31 to 12.

GATUN.

On Wednesday evening, October 22, the local basketball team defeated the Cristobal team, by a score of 22 to 16. The players for the local team were Huber, Whiston, Wright, Bane, Mitchell, Connolly, and Bruce. Those on the Cristobal team were Mathues, Frazer, Simons, Hughes, and Barcroft.

On Saturday evening, the local team was defeated at basketball by the Marines from Camp Elliott. The game was close throughout the halves, the score standing at 11 to 12 in favor of the Marines at the close of the first half, and 23 to 25 at the close of the game. Mr. F. G. Swanson of Empire was referee.

Moving pictures this week will be shown on Thursday evening, October 30.

On Saturday evening, November 1, the Gatun basketball team will play the Corozal team at Corozal.

CRISTOBAL.

A concert was given on Tuesday night, October 21, by the orchestra from the steamship *Prinz August Wilhelm*.

On Wednesday night, the Gatun chess team defeated the Cristobal team, in the all-Isthmian chess tournament. Results were, as follows:

Cristobal.	Won.	Gatun.	Won.
Hurt.....	0	Brown.....	1
Taylor.....	0	Byrne.....	1
Tuttle.....	1	Dashiel.....	0
Verner.....	1	Logan.....	2
Wilson.....	1	Marquard.....	1
Totals.....	3		5

Mr. Chas. J. Ewald was a guest at the discussion club meeting on Thursday evening. Mr. Ewald is traveling secretary of the Y. M. C. A., for South America. Mr. Christian Doxrud and Captain Thorvald Nilsen will address the club on Thursday night, November 6. Captain Nilsen accompanied Amundsen on his Antarctic explorations as far south as their vessel, the *From*, could go. This will be an open meeting, to which the public is invited.

On Saturday night the band from the cruiser *Birmingham* gave a concert in connection with the moving picture show, and Mr. E. J. Shubert sang several solos. Immediately following the moving pictures, the Culebra basketball team played Cristobal in the all-Isthmian tournament. The score was 13 to 10 in favor of Cristobal. The line-up was, as follows: Culebra—Messrs. Bracker, Stripling, Chadbourn, Rose, and Gassman. Cristobal—Messrs. Mathues, Raymond, Simons, Hughes, Moons, Fraser, and Taylor. Camp Elliott plays at Cristobal on Saturday, November 1. The Cristobal juniors will play the team from the National Institute of Panama at Cristobal on the same night.

A "Camp fire banquet" will be held on Thanksgiving eve at the Washington Hotel. Judge Thos. E. Brown, Jr., will be toastmaster. Other speakers will be Mr. Richard L. Metcalfe, Mr. William Jennings Price, Mr. W. W. Warwick, and Dr. Claude C. Pierce. Col. George W. Goethals and Mr. Joseph Bucklin Bishop are to be the guests of the occasion. Tickets for the banquet are on sale this week. Men who procure tickets on or before November 16 will have their names and the dates on which they began service on the Isthmus printed on the souvenir programs.

During the week ending October 25, the high scores for tenpins were: Bullard, 211; Britton, 205; Barte, 200. For duckpins: Barte, 115; Pioocy, 122. Mr. J. W. Barrett is in the lead for the monthly high score in tenpins, having bowled 232 pins.

The local tenpin tournament, which closed this week resulted, as follows:

Name.	Won.	Lost.	P. C.
1—Bullard.....	24	6	.800
2—Collins.....	15	15	.500
3—Gibson.....	15	15	.500
4—Barrett.....	14	16	.467
5—Buser.....	13	17	.433
6—Barnum.....	9	21	.300

Isthmus of Panama.

No communication, either for publication or requesting information, will receive attention unless signed with the full name and address of the writer.

NOTES OF PROGRESS.

Last Lock Gate Leaf on Hinges.

The last of the 92 leaves for the miter gates of the Canal locks was lowered into place on its hinge pintle on Thursday, October 30. This was the side wall leaf of the lower operating gate in the east flight at Miraflores Locks. The lower operating gates at Miraflores are the largest in the Canal construction, each of the lower leaves being 82 feet high and weighing over 700 tons.

The swinging of a leaf means the completion of its erection, sheathing, and most of the riveting and reaming, but it is a step toward final adjustment. The work of lining up and babbiting the nickel steel bearing plates at both ends of a leaf can be completed only after the leaf is swinging in operating position, and the leaves are yet to be tested, painted inside and out, and fitted with foot-walk and handrail.

Progress on High-Power Radio Station.

The Penn Bridge Company of Beaver Falls, Pa., which has the contract from the Navy Department for the fabrication and erection of the three 600-foot towers for the proposed Darien radio station at Caimito, has let a subcontract to the Central American Construction Company of Colon to do the work of erection. None of the material has arrived on the Isthmus. Forces of the Quartermaster's Department of the Isthmian Canal Commission are engaged in the preliminary work of erecting the foundation piers of concrete for the towers.

Paraiso Shops Reopened for Repairs to Dredging Vessels.

The mechanical shops at Paraiso were reopened on November 1, to care for the repair of vessels used in dredging operations between Gatun and Pedro Miguel. These shops were closed in the early part of 1909, as a step in the centralization of steamshovel and steel dump car repair work at Empire shops, and of

other heavy repairs to rolling stock at Gorgona.

At present, the shops at Paraiso are operated by the Mechanical Division, which now has charge of all the large shops maintained in the Canal construction. The dry dock shops at Cristobal were transferred to this division on May 1, and the shipways shops at Balboa on November 1. The force at the Paraiso shops at present numbers about 150 men.

Gatun Valley Railroad Embankment Completed.

The work of raising the embankment of the main line of the Panama railroad, across the Brazos and Quebrancha bottoms in the Gatun River valley, to final grade, which was begun early in August, was completed on October 30. The fills have been raised approximately five feet, so that the top is now at elevation 92 feet above sealevel, with a minimum width of 40 feet, and the track has been ballasted with Chagres River gravel. Steamshovel No. 225, which supplied about 75,000 cubic yards of spoil from a borrow pit near Quebrancha siding for raising the embankments, and the rolling stock used in placing the material, have been transferred to Cristobal for work on permanent railroad connections to Atlantic coaling pier.

Panama Railroad Ships to Carry Tourists.

In view of the anticipated reduction in force, it was believed some months ago that the Panama railroad steamers would not be able to engage in the tourist traffic during the early months of the dry season at least, and instructions were issued to that effect. A less number than was expected of the employees separating from the Canal service are returning to the United States via P. R. R. boats, and, in consequence, there has been no lack of accommodations in either direction. It is now thought that this condition will continue, and, therefore, the previous instructions have been revoked to the extent that each Panama railroad steamship, except in special cases, will be permitted to carry a limited number of tourist passengers.

Reduced Coal Consumption.

The completion of various parts of the Canal work has effected a considerable reduction in coal consumption, and a recent estimate, based upon the probable requirements of the Canal Commission and the Panama railroad until June 30, 1914, places the amount at about 27,000 tons monthly; from 15,000 to 20,000 tons monthly for the Commission, and the remainder for the Panama railroad. The consumption before the end of dry excavation averaged about 40,000 tons a month for both the Canal and the railroad. The dredges from now on will use more coal than formerly, but the amount is expected to be considerably less than that required when the Central Division steamshovels were in full operation.

Three storage piles are maintained near

the coal dock at Mount Hope. One is known as the Folks River storage pile, another as the borrow pile, and the third as the Brown hoist pile. From 60,000 to 70,000 tons of coal are kept constantly in storage in these three piles. The Brown hoist, used in lifting the coal from ships, was formerly operated the full 24 hours, working on three 8-hour shifts. With the lessened demand for coal, it has been possible to reduce the number of shifts to two, one shift working from 6 a. m. to 2 p. m., and the second shift from 2 p. m. to 10 p. m.

Coal is brought to the Isthmus from the United States under a contract with the Earn Line, and, under arrangement with the Panama railroad, the unloading of the cargo is performed by the railroad forces, the steamship company paying for the service at the rate of 20 cents a long ton. While the colliers have occasionally been subjected to delays in arrival on account of rough weather at sea, and on one trip, a vessel had to put in at Cuba for repairs, no cargo has ever been lost.

Awards for Pumping Equipment.

Bids were opened in Washington on October 6, under Circular No. 796, for the required motor-driven centrifugal pumps, valves, piping, hydraulic operating tables, traveling cranes, air compressor, and switchboards, complete, with all electrical instruments and connections, for the new Ancon and Miraflores pump stations. Awards have been made, as follows:

1. To the Blackall and Baldwin Company, New York, for 14 centrifugal pumps, complete, with General Electric motors and compensators, at \$29,000, as follows:

Ancon pump station—Two 3-stage pumps, each of 2,500 gallons a minute capacity, with a total discharge and suction lift of 355 feet, equipped with 10-inch suction and 10-inch discharge; three single-stage pumps, each of 5,000 gallons a minute capacity, with a total discharge and suction lift of 125 feet, equipped with 12-inch suction and 12-inch discharge.

Miraflores pump station No. 1—One 2-stage pump of 2,500 gallons a minute capacity, with a total discharge and suction lift of 143 feet, equipped with 12-inch suction and 10-inch discharge; three 2-stage pumps of 2,500 gallons a minute capacity, with a total discharge and suction lift of 143 feet, equipped with a 15-inch suction, and a 12-inch discharge; one single-stage pump of 250 gallons a minute capacity, with a total discharge and suction lift of 70 feet, equipped with a 4-inch suction and a 3-inch discharge; and one single-stage pump of 250 gallons a minute capacity, with a total discharge and suction lift of 70 feet, equipped with a 4-inch suction and a 4-inch discharge.

Miraflores pump station No. 2—Three 2-stage pumps, each of 2,500 gallons a minute capacity, with a total discharge and suction

lift of 143 feet, equipped with a 12-inch suction, and a 10-inch discharge.

The pumps are to be of the turbine or volute type, direct-connected and mounted on a common cast iron base, with induction motors. The pumps for the Ancon station and for Miraflores station No. 2 will handle filtered fresh water, taking their suction from a force main laid beneath the floor. The pumps for Miraflores station No. 1, with the exception of one of the single-stage 250-gallon pumps, will handle raw fresh water having an iron content of three parts in a million, lifting it from a sump. The other single-stage pump is designed for handling raw sewage with the usual amount of solid and foreign matter, without clogging.

2. To the General Electric Company, for all switch and gage boards, complete, with all instruments, gages, and equipment, at \$8,273.

3. To the Pittsburgh Valve, Foundry and Construction Company, for miscellaneous valves, consisting of hydraulic operated, hand operated, check, and foot valves, together with miscellaneous piping, at \$15,654.10.

4. To the Janesville (Wis.) Iron Works, one air compressor for Miraflores pump station No. 2, complete, with General Electric motor; one air receiver, and accessories. The compressor is to be a 2-stage intercooled compressor, with a normal capacity of 500 cubic feet of free air a minute to 110 pounds per square inch pressure.

5. To the Chisholm-Moore Manufacturing Company, three hand operated traveling cranes, designed for six tons maximum capacity, and arranged for a maximum lift above the floor of 12 feet, at \$1,900.

Progress on Cristobal Terminal Wharves.

Erection of the remainder of the superstructure on Dock 16 of the new Cristobal terminals, 918 feet of which was erected by forces of the Panama railroad, was begun last week by forces of the Central American Construction Company, which has a contract to complete Dock 16 and erect the superstructure on Dock 15. Only a relatively small amount of material for Dock 15 has reached the Isthmus, but it is expected that arrivals will be fast enough to allow the erection gangs to proceed to Dock 15 as soon as the outer end of Dock 16 is completed. Forces of the contractor have begun to lay the reinforced concrete roof for Dock 16, beginning at the inner end. About 3,100 square feet, containing about 75 cubic yards of concrete, are being laid daily.

Semiweekly Mail Service to New Orleans.

It has been decided to despatch Canal Zone mails in the future on the steamers of the United Fruit Company leaving Colon for New Orleans on Saturdays, in addition to the Thursday steamers on the same line, but the only mail which will be routed by the Saturday steamers will be that addressed to points in the Gulf States of Alabama, Mississippi, Louisiana, and Texas, and also Arkansas, except when several days elapse between Saturday and the next sailing of a Panama railroad steamer, in which case, mail will be despatched to other points as well. The new arrangement will furnish a double weekly mail service from the Isthmus to those states.

HOTELS AND MESSES.

Small Decrease in Net Revenue during last Fiscal Year—Hotel Tivoli Does an Increased Business.

There were 17 line hotels, three night restaurants, 15 European laborers' messes, and 16 common laborers' kitchens, in operation by the Subsistence Department of the Canal Commission at the close of business on June 30, 1913, a decrease of two hotels, three European laborers' messes, and two common laborers' kitchens over the previous year. This branch of the Subsistence Department is in charge of Capt. F. O. Whitlock, assistant subsistence officer.

The hotel at old Balboa was closed July 16, 1912, and consolidated with the hotel at East Balboa, under the name of the Balboa hotel. The No. 2 hotel at Gatun was closed on March 31, 1912. The messes at Cerro, Haut Obispo, Gatun (No. 68), and Naos Island were closed during the year, and one at Bas Obispo opened. A new kitchen was opened at Bas Obispo, while those at Ancon, Cerro, and Haut Obispo were closed. The number of districts served by the department was reduced from 15 to 14.

The total revenue for the year from the line hotels, restaurants, messes, and kitchens was \$1,235,077.84, a decrease of \$28,791.97, as compared with the preceding fiscal year; the total cost of operations was \$1,205,800.76, a decrease of \$20,551.40; the profit was \$29,277.08, a decrease of \$8,240.57 from the year before. The ratio of supplies consumed to revenue was 0.24 per cent less than the previous year, and of expense to revenue 0.84 per cent more, making the ratio of total cost of operations to revenue 0.60 per cent greater than for the fiscal year 1911-12. The percentage of profit to revenue was 2.37 per cent, or 0.60 per cent less than the previous year.

The net expense for salaries and wages was \$166,398.65, an increase of \$4,391.88. The proportion of net pay roll to revenue was 13.47 per cent, or 0.65 per cent more than the preceding year.

The total number of meals served in line hotels was 2,340,644, an increase of 265,309, or 12.78 per cent, as compared with the previous year. The average cost of supplies per meal was 24.64 cents, a decrease of 0.40 cent, as compared with 1911-12, while the average cost of service was 5.52 cents, a decrease of 0.09 cent, making a decrease in the total cost per meal of 0.49 cent from the preceding fiscal year. The total number of rations served in European laborers' messes was 935,516, a decrease of 172,659, or 15.58 per cent, as compared with the year before. The average cost of supplies per ration was 31.27 cents, an increase of 0.21 cent, and the average cost of service was 5.86 cents, an increase of 0.39 cent, making an increase in the total cost per ration over the previous year of 0.60 cent. The total number of rations served in the common laborers' kitchens was 461,456, a decrease from the previous year of 123,001, or 21.05 per cent. The average cost of supplies per ration was 22.12 cents, an increase of 0.24 cent from the previous year, and the average cost of service was 3.52 cents, an increase of 0.31 cent, making the total cost per ration 25.64 cents, an increase over 1911-12 of 0.55 cent. The average daily attendance during June, 1913, was 3,279 at the line hotels, 2,412 at the messes, and 1,229 at the kitchens. The attendance at the line hotels was de-

termined on the basis that each guest averaged two meals per day. The following table shows the quantities and gross costs of the principal articles consumed in the line hotels, restaurants, messes, and kitchens during the year:

ARTICLE.	Quantity.	Cost.
Bacon, lbs.	64,672	\$15,815.93
Beans, dried, lbs.	187,721	10,787.46
Beef, fresh, lbs.	2,514,380	263,353.57
Beef, salt, lbs.	42,008	5,077.98
Beef bones and suet, lbs.	175,656	2,573.99
Bread, lbs.	2,425,223	95,055.73
Breakfast foods, tins.	35,231	4,706.25
Butter, lbs.	132,063	49,596.73
Cabbage, lbs.	153,075	5,257.90
Cake, lbs.	13,492	1,478.81
Cheese, lbs.	27,951	6,611.02
Cocoa, lbs.	25,691	3,539.65
Coffee, lbs.	80,664	16,154.50
Corn meal, lbs.	29,016	1,276.91
Eggs, dozen.	211,227	65,469.89
Fish, canned, tins.	30,460	3,724.03
Fish, fresh, lbs.	107,035	7,032.72
Fish, salt, lbs.	34,333	2,884.50
Flour, lbs.	500,319	15,009.57
Fruits, canned, tins.	74,325	3,027.76
Fruits, dried, lbs.	33,968	3,993.80
Fruits, fresh.		31,171.92
Garbanzos, lbs.	162,384	7,321.12
Ham, lbs.	45,654	9,142.16
Ice, cwt.	66,081	26,432.60
Ice cream, gallons.	70,050	35,318.75
Jams.		7,491.43
Lamb, fresh, lbs.	35,894	4,693.98
Lard, lbs.	124,228	13,478.06
Liver, beef, lbs.	19,103	2,101.48
Macaroni, lbs.	187,360	13,153.26
Maple syrup, quarts.	7,702	2,428.88
Meats, canned, tins.	23,989	4,571.06
Milk, tins.	226,731	18,835.05
Mutton, fresh, lbs.	39,801	4,430.79
Oleomargarine, lbs.	15,025	1,652.75
Onions, lbs.	172,135	9,886.64
Peas, dried, lbs.	94,886	5,866.86
Pork, fresh, lbs.	166,865	26,468.54
Pork, salt, lbs.	4,823	650.07
Potatoes, sweet, lbs.	191,422	4,578.93
Potatoes, white, lbs.	1,355,214	41,731.25
Poultry, lbs.	153,987	25,830.00
Rice, lbs.	433,567	13,011.18
Rolls, dozen.	37,541	8,741.28
Sausage, lbs.	27,325	3,971.42
Sugar, granulated, lbs.	144,951	7,104.75
Sugar, yellow, lbs.	633,227	25,329.08
Tea, lbs.	8,207	2,847.91
Veal, fresh, lbs.	72,651	11,009.15
Vegetables, canned, tins.	165,566	25,594.74
Vegetables, fresh.		21,992.68
Wine, barrels.	1,128	23,124.00
Cleaning.		10,554.98
Miscellaneous.		50,248.16

The original cost of the Hotel Tivoli was \$300,595.40. Additions and improvements have been made to the permanent building and bathrooms since July 1, 1908, amounting to \$84,264.46, making the book value of the building, \$384,859.86. Repairs since the hotel was built have cost \$28,098.67, making the total expense of construction and repairs to July 1, 1913, \$412,958.53. Profits on operations since July 1, 1908 total \$170,298.14, and at the present rate of traffic, the cost will probably be entirely amortized within the next four years. The total cost of the operation of the Hotel Tivoli during the last fiscal year was \$200,728.43, and the gross revenue was \$276,984.98; the gross profits amounted to \$76,256.55. During the months of August, 1912, and June, 1913, the hotel was operated at a loss of \$2,333.38, making the total net profits for the year, \$73,923.17. A commercial laundry was installed in the hotel in December, 1912, for handling the guests' work.

The total revenue of the Subsistence Department from the operation of the hotels, messes, and kitchens, and the Hotel Tivoli, for the five years from July 1, 1908 to June 30, 1913, was \$7,493,887.59. The total revenues of the commissary department of the Panama railroad, which is operated by the Subsistence Department, during the same period, was \$30,287,222.74, making a grand total of \$37,781,110.33.

SOCIAL LIFE OF THE ZONE.

Church Notes.

The Woman's Altar Guild of St. Luke's Hospital chapel entered upon its seventh year of activity at the annual meeting held at the residence of Mrs. Joseph Bucklin Bishop on Saturday afternoon, November 1, All Saints' Day. The corporate communion of the guild was celebrated in the chapel in the morning at 8 o'clock, there being 10 members present. Minor changes have been made in the working of the organization during the year; these include a reduction of the monthly dues and the omission of one meeting in the month. The only meeting held now is on the first Tuesday afternoon in each month at 4 o'clock. During Lent, weekly morning meetings were held, and the guild members made garments for the children in a summer home in New Jersey. Gifts to the church have been new carpets, cushions for the chancel and for the clergy, and rebinding of the large altar book, in red morocco, from the guild; brass bobaches and shields for the altar candles from a member of the society, and a litany book as an Easter offering from a member. The Sunday school was reopened early in the year, and the members of the guild have cooperated with the chaplain in promoting the work. The officers were reelected for the ensuing year. These officers, with the chaplain, honorary president *ex officio* constitute the executive board. They are, as follows: President, Miss J. Macklin Beattie; vice-president, Mrs. Charles F. Mason; secretary, Miss Kate Feuille; treasurer, Mrs. Charles W. Barber. The next meeting of the guild will be held at the residence of Mrs. Barber at 4 o'clock on Tuesday, December 2.

The monthly meeting of the Woman's Foreign Missionary Society of the Methodist Episcopal Church was held at the home of Mrs. E. M. Keyser on Saturday afternoon, November 1. The important business of the meeting was the report of the chairman of the committee on the federation of church societies. Mrs. Keyser stated that several societies had responded favorably to the plan issued by the committee, notably, the Ladies' Aid Society of the Union Church, Cristobal, and the Woman's Altar Guild of St. Luke's Hospital chapel, Ancon. At the next meeting of the missionary society, which will be held at the residence of Mrs. Charles W. Ports in Panama, the plans for the organization will be perfected, and a call will be issued to the societies of women engaged in Christian work to send delegates to the organization meeting, which will be held early in December.

During the absence on leave of the Rev. Father Ferdinand Allot, priest in charge of St. Ferdinand's Church, Empire, the French and Spanish section of the parish work is under the charge of the Rev. Father Nicholas De-Graaff, C. M., who was called from his missionary work in Persia by the Superior General of the St. Vincentian Order in Paris for this purpose. Father McDonald is in charge of the American section of the parish. The Woman's Altar Society will hold its monthly euchre party in the parish house on Saturday evening, November 8. The society is planning to hold a Christmas bazaar in December.

The monthly meeting of the Ladies' Aid Society of the Union Church, Cristobal, was held

in the church on Tuesday, October 14, when a paper was read by Mrs. W. T. Harrison on home customs in Japan. The society extends an invitation to all ladies to join. The officers are, as follows: President, Mrs. M. F. Bradney; vice-president, Mrs. Juliet Carter; secretary, Mrs. F. L. Piper; treasurer, J. T. Veen.

Bible Society's Work.

The agency of the American Bible Society for Central America, which includes Colombia and Panama, is temporarily occupying the new parsonage of the Baptist Church in Cristobal. With the exception of a study, which the pastor reserves for his own use, the agency occupies the entire two-story building. The office is on the ground floor, the walls being lined with shelves where hundreds of Bibles and portions of Scripture are stored. The report of the society's agent for the past six months, just issued, shows that the circulation of Bibles in his district exceeded 1,000. Two salaried agents are employed. Much of the work of circulation is accomplished by the personal effort of the agent, and many of the sales are made by the Canal Commission chaplains and missionaries. Shipments, amounting to 5,543 copies of the Scriptures, entire, or in part, valued at \$1,099, have been received at the agency since June 1, 1913. The books circulated are in the following languages: English, Spanish, French, Italian, Swedish, Chinese, Portuguese, Greek, and Arabic.

In August, an exchange of territory was effected between the British and Foreign Bible Society and the American Bible Society, the former taking Persia, from which the American society withdrew for the purpose of occupying Central America, including Colombia and Panama.

Visit of Secretary Garrison.

The Hon. Lindley M. Garrison, accompanied by Mrs. Garrison, and the remainder of the Secretary's party, sailed for New York on the *Colon* on Tuesday, November 4. During his week's stay on the Isthmus, he visited every part of the Canal work. On Wednesday, October 29, he inspected the fortifications at the Atlantic entrance in the morning, and was shown through the manufacturing plants at Cristobal in the afternoon. On Thursday, he was lifted through Gatun Locks from the sea channel to the Gatun Lake level on French claret, No. 4, and was afterward conveyed on a tug through the lake section and Culebra Cut as far as Cucaracha slide. On Friday, he went over the Pacific locks and terminals, and in the afternoon visited the Gold Hill sluicing plant. On Saturday, he inspected Camp Otis and Camp Elliott. He spent most of the day Sunday at Culebra, and on Monday, paid a visit to the fortifications on the islands in Panama Bay in the morning, and was taken through Ancon Hospital in the afternoon.

No Work for Americans in Costa Rica.

Mr. Samuel T. Lee, American Consul at San José, Costa Rica, reports that in recent months, with the closing down of certain parts of the Canal work, a considerable number of white Americans have come to that country in search of employment. Being unable to find work, most of them have soon found themselves in a destitute and desperate situation. The opportunities for profitable work in Costa Rica, at wages which are

reasonably expected by white Americans, are very few, and such persons are warned not to go there without a definite engagement in advance.

PERSONAL.

Mr. C. D. Mell of the Forestry Service, Department of Agriculture, has been on the Isthmus for the past few days preparing for a trip to Demerara, where he goes at the request of the Canal Commission for the purpose of making an investigation and report on the quality of greenheart timber to be found there. If a suitable grade can be obtained, the Commission proposes using it for the water seals of mitering gates, as well as for the keel blocks, at the new Balboa dry docks.

Mr. Augustus Smith, the contractor for the coal-handling plants at the Canal termini, arrived on the Isthmus on Sunday, November 2, on the *Carrillo*.

Independence Day of Panama.

The tenth anniversary of the independence of the Republic of Panama was celebrated on Monday, November 3, by patriotic exercises by the schoolchildren, by fire and police drills, and by a solemn session held at the National Theatre. In accordance with custom, the day was observed as a holiday in the Canal Zone.

Prison Commission.

A commission, consisting of Maj. Joseph H. Ford, chairman; Maj. Chas. Gerhardt, Rev. E. J. Cooper, Mrs. Thomas E. Brown, Jr., and Mrs. Frederick Mears, has been appointed by Mr. Richard L. Metcalfe, Head of the Department of Civil Administration, to make inquiry into the conditions at the Gamboa stockade, and to suggest plans for the welfare of its inmates through educational effort. It will be known as the Gamboa commission.

A band will be organized among the prisoners at the stockade, and an expenditure of \$150 from the Canal Zone funds for the purpose has been authorized. It is thought that a balanced band can be formed with 12 pieces, and the leaders of the Tenth Infantry and Marine Corps bands have announced their willingness to instruct those of the prisoners who show aptitude. The instruments will probably be purchased from a surplus stock, which has been offered for sale by the Marine Corps band.

Obituary.

Napoleon Brodeur, a private in the Tenth Infantry, U. S. A., stationed at Las Cascadas, died at Ancon Hospital on October 24. He was 19 years of age, single, and had been on the Isthmus five months. He is survived by his father, Napoleon Brodeur, living at Central Falls, New York.

Harry K, the infant son of H. A. Haywood, living at Empire, died at Ancon Hospital on Tuesday, October 29, aged eight months.

In the competition conducted by Don Alejandro Bermudez, Director General of the Panama National Exposition, of designs for an emblematic coat of arms for the exposition, award of the prize of \$200 was made to R. Roa Escandon, a Colombian, living in San José, Costa Rica.

UNDERGROUND TRANSMISSION

Combination System Approved for Permanent Wire Distribution.

A committee, consisting of Mr. H. Rowe, chairman; Mr. C. L. Bleakley, Mr. R. K. Morris, and Capt. W. H. Rose, appointed to consider lighting, power, telephone, and fire alarm systems for the permanent towns, has investigated three types of construction, as follows:

1. Overhead construction, where the wires are carried on wood, concrete, or steel poles.
2. Underground construction with armored cables, where the wires are enclosed in lead-sheathed cables, which are protected from mechanical injury by a steel band, or wire armor, the cables to be laid directly in the ground with no other form of protection.
3. Underground conduit construction, where lead-sheathed cables are pulled through underground conduit composed either of vitrified clay or bituminized fibre ducts laid in concrete, with concrete manholes at intervals varying from 250 to 500 feet.

OVERHEAD CONSTRUCTION.

In the opinion of the committee, the only advantage overhead construction has is the smaller first cost. On the other hand there are several disadvantages, chief among which are:

(A) Greatly increased cost of maintenance. The cost of maintenance of the present overhead power and lighting lines on the Isthmus is about \$400 per mile per annum, and of overhead telephone and telegraph lines about \$550 per mile per annum after two years' service, with a gradually increasing maintenance cost, due to progressive deterioration of messenger wires, hangers, and cable sheaths. The maintenance of the conduit system is known to be very small in comparison with the overhead system, and is estimated at not more than \$50 per mile per annum. The maintenance of the armored cable laid directly in the ground would probably exceed this amount, but would be less than the charge against the overhead system.

(B) Any system of overhead wires and cables will prove unsightly, especially in the case of the permanent towns on the Isthmus where expenditures are to be made for the architectural treatment of buildings and grounds.

(C) The danger from lightning is a strong objection to overhead lines. The damage from lightning is not confined to the line structures alone, but extends as well to the buildings entered by any electrical apparatus connected with the lines. This point is especially important at Gatun, where the 2,200-volt lighting service will be connected directly to the main generators in the hydro-electric station. Even the best lightning arresters will not give absolute immunity. Underground lines would be immune in this respect.

(D) The overhead lines are also more susceptible to accidental and malicious damage. The telephone and telegraph lines of the Panama railroad have suffered considerably from falling branches and palm fronds, as well as from persons maliciously shooting into the cables.

UNDERGROUND ARMORED CABLE SYSTEM.

This system is in general use in European countries, but as yet does not appear to have met with much favor in the United States, where the conduit system is standard for

high-class permanent installations. A disadvantage of this system is the greater difficulty of locating and repairing faults. The protection from mechanical injury afforded by the armor is fairly effective, but is not considered as good as that of the concrete-surrounded ducts. It is, however, more flexible, so far as location is concerned, than the conduit system. The main difficulty of telephone cables of this type is the cutting in of service connections. Even in permanent towns, the changes in service connections will probably be so frequent that for the main telephone cables, it would be necessary to resort to the use of the overhead, or conduit system, in case the armored cable system were adopted for the light and power lines.

UNDERGROUND CONDUIT SYSTEM.

The only disadvantage possessed by this system is the first cost. On the other hand, it possesses to a high degree the qualities of permanence, protection to conductors, ease of inspection and repair, and has the least maintenance cost. The estimated construction costs per mile of each of the above systems, according to the committee's figures were, as follows:

For overhead construction, based upon two pole lines, one for the 2,200-volt circuits, and one for telephone, telegraph, and fire alarm cables, using old 70-pound iron rail for poles, \$2,050 per mile for the 2,200-volt line, and \$4,345 a mile for the telephone and telegraph cable; total, \$6,395 a mile.

For the underground armored cable system, based upon three cables laid in a single trench, \$9,829 a mile.

For the underground conduit system, based upon the installation of four ducts, \$13,611 a mile. The total annual charges against the three separate systems would be about, as follows: Overhead, \$1,413 a mile; armored system, \$425 a mile, and underground conduit system, \$241 a mile.

The committee was unanimously of the opinion that the overhead system should be discarded in the permanent towns, but in view of the fact that in these towns the present roads and buildings will probably be used as long as their upkeep is not excessive, the committee recommended a combination system based upon the following:

In case of entirely new town layout and construction, the underground conduit system should be installed at the same time as other permanent structures, such as roads, buildings, sewers, etc. In the case of branch lines to isolated buildings, or to isolated small groups of comparatively unimportant buildings, the armored cable system could be used for the lighting and power circuits, and an underground lead-covered cable, without armor, for telephone, telegraph, and fire alarm circuits.

In case of the towns now existing, which will remain as permanent towns, but in which structures will later be replaced by permanent ones, the underground conduit system should be installed in such locations as will not have to be changed later on. The underground armored cable system may be used where this fact cannot be determined, where topographical conditions are unfavorable, or in serving isolated buildings or groups of buildings.

BALBOA-ANCON.

The permanent buildings in this vicinity, comprise the following groups of buildings

now under erection, or projected: Shops, dry docks, terminals, administration group, official residence group, gold employees' residence group, silver employees' residence group, marine post, etc. In addition, there are the present groups, Ancon Hospital buildings and grounds, Hotel Tivoli, and the Panama railroad station. So far as the new shops, dry docks, and other terminal structures at Balboa are concerned, light and power will be supplied from the substation to be erected near the new dry dock. The committee, therefore, recommended the construction of a trunk conduit line from this substation to a point in the vicinity of the new administration group, with the necessary branch conduit lines to supply light, power, telephone, telegraph, and fire alarm service to the above groups, with the exception of the silver residence group. Under this arrangement, the branch from the new new administration group supplying Ancon Hospital buildings and grounds, Hotel Tivoli, and Panama railroad station would be extended by way of Bishop's Hollow to a point near the hospital gate, with armored cable branches from this point to the Hotel Tivoli and railroad station. Secondary feeders for all new buildings and street lights would be carried in underground conduit, and supplied from subway transformers located in manholes. For all of the buildings in the Ancon Hospital grounds, the present secondary system would be kept in service, and supplied from transformers in the manholes of the new conduit system. In the armored cable feeders, the transformers would be located in small concrete houses, or boxes, built above ground. The silver employees' residence group would be supplied direct from the Balboa substation through an underground conduit line, with secondaries underground and transformers in manholes. The present overhead telephone service from Panama to Balboa by way of the Ancon Hospital grounds is unsatisfactory, and there is urgent necessity for improving it at the earliest practicable date. The committee recommended that as soon as the new Balboa layout had been fully determined the work of constructing that portion of the proposed underground system extending from Panama to Balboa be begun without delay.

PEDRO MIGUEL—PARAISO.

At Pedro Miguel, the committee recommended the substitution of the present overhead system by underground distribution, and that work should begin as soon as the plans for the layout of the permanent structures are decided upon.

GATUN.

Owing to the poor condition of the existing pole lines supplying the town of Gatun, and of the danger from lightning, the committee recommended the construction of an underground system at this point some time within the next six months. From experience with the old French buildings on the Isthmus, the committee was of the opinion that under the policy of utilizing the present buildings until the cost of repairs justifies the erection of new ones, the buildings now at Gatun will last for 15 or 20 years. Moreover, it was believed that when new buildings are erected at Gatun, they will conform closely to the general sites of the present structures on account of the topography of the ground, the sharp, steep ridges, and the location of the permanent roads, and that conduit lines laid now will not have to be disturbed. The committee recommended an underground conduit line from the

new substation to be erected north of the present administration building, following the general line of the telephone exchange, lodge hall, fire station, to the hospital building. From a point near the telephone exchange, an armored cable branch would extend to the group of buildings in the vicinity of the concrete range light tower, another from near the fire station to the division engineer's residence and buildings in that locality, and a third from near the hospital to the group of buildings west of the Panama railroad. The underground system as outlined would be connected to the present overhead secondary distribution. Authority has already been granted for the construction of an armored cable line from the Gatun substation to the permanent filtration plant at Agua Clara.

CRISTOBAL-COLON.

This district will be supplied with electric light and power from a transformer substation to be built at Mount Hope. The committee has recommended that a trunk conduit line be laid from Mount Hope to Cristobal, and that the distribution system in Cristobal and Colon be placed underground. The present Panama railroad system in the two towns is already to a large extent underground. The committee expressed its belief that underground systems in the permanent towns can be installed within the coming year, and recommended that the work be begun at once, in order that it may be planned and executed with due regard to other permanent work.

The combination system referred to above was approved, in general, by the Chairman and Chief Engineer on September 12, but the stipulation was made that each piece of work be authorized separately and handled on separate work requests. A standing committee, consisting of Mr. Hartley Rowe, chairman; Capt. W. H. Rose, Mr. W. H. Fenley, and Mr. W. L. Phillips, has been appointed, which will be in charge of all matters pertaining to the proposed combination system.

Fire Drills in Canal Zone Schools.

The practice of holding fire drills has been instituted in the Canal Zone schools. These drills, now incorporated into most of the school systems of the United States, have as their object, not only their protective value in case of fire, but also the training they provide in poise and self-control. As a result of a conference with the chief of the Canal Zone Fire Department, it was decided that these drills should be practiced at least once a week until the desired results have been accomplished, when the number may be reduced to two a month, and eventually to one a month. Under the effective working of the system, the alarm is given without any previous warning, and in order that the protective value may not be lost, the same conditions

govern in the case of a false alarm as those of a genuine alarm. The working out of the details of these drills has been left to the principal and teachers of the respective schools, and advantage will be taken from time to time of any improvement that the practice may suggest. A monthly report of these drills will be made to the superintendent of schools, together with a summary of the results accomplished.

New Dipper Dredges.

The *Gamboa*, the first of the two 15-cubic yard dipper dredges contracted for by the Canal Commission early in 1913 for work in Culebra Cut, was launched recently at Newburg, N. Y. In accordance with the terms of contract with the builders, the Bucyrus Company of South Milwaukee, Wis., one of these dredges must be delivered at an Atlantic port on or before December 1, 1913, and the other on or before January 1, 1914. It is planned to take the *Gamboa* to New York City about December 1, and to bring it to the Atlantic entrance of the Canal in tow of a seagoing tug. The second dredge will be named the *Paraiso*. A detailed description of these dredges was published in THE CANAL RECORD of February 5, 1913.

Cristobal Dancing Club.

The regular dance of the Cristobal Dancing Club will be held on Saturday, November 8, at the Commission club house. Date of the second dance will be announced on that evening. W. H. MARSH,

Secretary.

Cristobal, C. Z., November 4, 1913.

The construction of two sidings at Coco Solo Point in connection with the proposed east breakwater work, to be built parallel to the track leading from Margarita Point to Coco Solo Point, has been authorized.

Alighting platforms will be built for the convenience of passengers at New Frijoles station, and at New Culebra Siding on the Panama railroad main line.

The Gatun Hunting Club held its last annual barbecue and hunt at Camp Bohio, in the Gatun Lake section, on Sunday and Monday, November 2 and 3. The barbecue was held on the high ground adjacent to the former residence of Mr. Porfirio Melendez at Bohio, the place being one of the old hunting grounds of the club.

A new hotel for the use of gold employees only was opened at Ancon on Tuesday, November 4, while the I. C. C. hotel at Bas Obispo was permanently closed on Sunday, November 2.

Launch Service to Taboga.

The steam launch *Sanidad* leaves the dredge landing at Balboa at 9 o'clock, Tuesday, Thursday, and Saturday mornings. On the return trip it arrives at Balboa about 4 p. m., in time to make connection with the evening trains.

THANKSGIVING.

The President's Proclamation.

By the President of the United States of America. A proclamation:

"The season is at hand in which it has been our long respected custom as a people to turn in praise and thanksgiving to Almighty God for His manifold mercies and blessings to us as a nation.

"The year that has just passed has been marked in a peculiar degree by manifestation of His gracious and beneficent providence. We have not only had peace throughout our own borders and with the nations of the world, but that peace has been brightened by constantly multiplying evidences of genuine friendship, of mutual sympathy and understanding, and of the happy operation of many elevating influences both of ideal and of practice.

"The nation has been prosperous not only, but has proved its capacity to take calm counsel amidst the rapid movement of affairs and deal with its own life in a spirit of candor, righteousness and comity. We have seen the practical completion of a great work at the Isthmus of Panama, which not only exemplifies the nation's abundant resources to accomplish what it will, and the distinguished skill and capacity of its public servants, but also promises the beginning of a new age of new contacts, new neighborhoods, new sympathies, new bonds, and new achievements of cooperation and peace.

" 'Righteousness exalteth a nation,' and 'peace on earth, good will toward men' furnish the only foundations upon which can be built the lasting achievements of the human spirit. The year has brought us the satisfactions of work well done and fresh visions of our duty which will make the work of the future better still.

"Now, therefore, I, Woodrow Wilson, President of the United States of America, do hereby designate Thursday, the 27th of November next, as a day of thanksgiving and prayer, and invite the people throughout the land to cease from their wonted occupations and in their several homes and places of worship render thanks to Almighty God.

"In witness whereof, I have hereunto set my hand and caused the seal of the United States to be affixed.

"Done at the City of Washington, this 23d day of October, in the year of our Lord one thousand nine hundred and thirteen and of the independence of the United States of America the one hundred and thirty-eighth.

WOODROW WILSON.

By the President:

"W. J. BRYAN, Secretary of State."

CLASSIFIED EXPENDITURES—ISTHMIAN CANAL COMMISSION.

A statement of classified expenditures of the Isthmian Canal Commission to August 31, 1913, follows:

PERIODS.	Department of Civil Administration.	Department of Law.	Department of Sanitation.	Department of Construction and Engineering	General Items.	Fortifications.	Total.
Total to June 30, 1909	3,427,090.29		9,673,539.28	69,622,561.42	78,022,606.10		160,745,797.09
Total—Fiscal Year, 1910	709,351.37		1,803,040.95	26,300,167.05	2,863,088.83		31,675,648.20

COMMISSION CLUBHOUSES.

Activities of the Young Men's Christian Association.

GENERAL.

The standing of the chess clubs in the all-Isthmian tournament is, as follows: Empire won 21½ points; Culebra, won 20 points; Gatun, won 15 points; Cristobal, won 13 points.

The standing of the teams in the basketball league on November 3, was, as follows:

Team.	Won.	Lost.	P. C.
Empire.....	7	0	1.000
Camp Elliott.....	5	2	.714
Gatun.....	3	2	.667
Cristobal.....	2	3	.400
Culebra.....	2	5	.286
Corozal.....	0	7	.000

The standing of the teams in the bowling league, November 3, was, as follows:

Team.	Won.	Lost.	P. C.
Cristobal.....	7	2	.778
Corozal.....	8	4	.667
Culebra.....	8	4	.667
Empire.....	9	4	.600
Gatun.....	1	8	.111
Camp Elliott.....	0	9	.000

The following dates have been arranged for the exhibition of the moving picture films entitled "Quo Vadis": Tuesday, November 11, Gatun; Wednesday, November 12, Empire; Thursday, November 13, Corozal; Friday, November 14, Cristobal. The admission fees will be, as follows: Adult nonmembers, 50 cents; children, 25 cents; members, free.

COROZAL.

The 3-man team tournament in tenpins closed this week, with team No. 3, composed of Taylor, Smith, and Emerson, the winners. Edwards, high average 175. Prizes for high scores for October were won by Ziller, 242; and Davis, 241.

Empire.	Corozal.
Gustavson... 154 210 233	Davis..... 181 172 180
Potter..... 161 205 203	Bordt..... 134 143 187

Sims..... 112 ...	

Totals.... 809 843 947 696 675 727
Corozal bowls Camp Elliott at Empire, Saturday, November 18.

Corozal's team was defeated on its own floor at basketball by a score of 26 to 16 by the Gatun team. The line-up was as follows: Gatun—Huber, forward; Wright, forward and center; Flynn, center; Claybourne, Whiston, guards; Bain, forward. Corozal—Bessey, Doherty; forwards; Russell, center; Kenealy, Howe, guards; Hess, forward.

The Corozal-Cristobal game scheduled for November 3 has been postponed until November 22.

A combined moving picture show and old-fashioned Hallowe'en party was held on Tuesday, October 31 at which about 385 people were present. Such games as "Cake-snapping," "Ducking for apples," "Snap the apple," "Peanut scramble," "Coin in flour," "Musical chairs," or "Trip to Jerusalem," and "Virginia Reel" were taken part in by all. Apples, coffee, and "Sinkers" were served. The medals for the athletic and aquatic feats of last Labor Day, having been received, were distributed to the winners present.

"Open house" was held at Corozal all day on Monday, November 3. In the evening, free moving pictures were shown, among them two reels of "Custer's last fight," and slides of the Isthmus.

Pablo, the magician, will give an exhibition at the regular picture show on Friday night, November 7. He will present two features called; "Spookville," and "Noah's ark."

Mr. P. H. Chadbourne, a former resident of Corozal, has recently been appointed one of the secretaries of the Corozal clubhouse.

CULEBRA.

The high score in tenpins for the month of October was made by H. G. Cornthwaite, 226.

On Sunday night, colored slides illustrating the story of "The other wise man" written by Henry Van Dyke, were shown at the regular Sunday night service.

On Friday night, November 7, the moving picture reels entitled "Quo Vadis" will be exhibited. The admission fees will be 50 cents for adult nonmembers; children, 25 cents; members, free.

EMPIRE.

The prizes offered for the high score in duckpins and the high score in tenpins for the month of October were won by A. C. Lowande in duckpins, G. E. Gustavson in tenpins. Duckpin score, 119; tenpin score, 237.

The Empire basketball team defeated the Culebra team on Wednesday evening, October 29, by the score of 50 to 6. On Saturday, November 8, the Cristobal team will play at Empire.

At the regular meeting of the Empire Debating So-

ciety held Friday, October 31, the question "Resolved, That the trusts should be abolished" was debated. Mr. Brown and Mr. McColey speaking for the negative won, the judges voting two for the negative and one for the affirmative. The next meeting will be held November 14.

CRISTOBAL.

The single folks bowling tournament held Monday, October 27, resulted, as follows:

Mr. Archie Gibson and Miss C. Carpenter.....	480
Mr. G. R. Farr and Miss L. Madison.....	460
Mr. Swift Carpenter and Miss A. Butler.....	449
Mr. W. G. Russell and Miss M. Stephens.....	449
Mr. Ernest Cotton and Miss I. M. Clawson.....	436
Mr. Forest Herrington and Miss C. Mathews.....	428
Mr. D. Raymond and Miss G. McKenzie.....	404
Mr. J. H. Gill and Miss M. Butler.....	397
Mr. James Purvis and Miss O. McKenzie.....	383
Mr. E. H. Nash and Miss C. Madison.....	374

Over 100 men attended the discussion club meeting on Thursday, October 30. Mr. W. W. Warwick, the speaker, explained the leading features of the new currency bill. After his address many questions were put to him by his hearers as to the "Why" of certain points in the bill. Mr. H. R. Wilford, general agent of the United Fruit Company will discuss before the club "How to increase shipping in American bottoms," at the regular meeting on Thursday, November 13.

Over 300 persons attended the Hallowe'en social held on Thursday, October 30. A number of men and women all masked in woman's attire led off in a parade. This was followed by a number of games customary on Hallowe'en, which occasioned great merriment. The blindfolded pie eating contest was won by G. R. Farr and Miss Clara Mathews; Mr. I. V. DeLong and Miss Marion Stevens were second. Apple ducking, A. Farrell, first; S. Pollard, second. Placing the donkey's tail, Mrs. Stephens and Mr. V. C. Dillon first; no second. Flour ducking, Mr. L. E. Willson and Mrs. Cook, first; no second. Bag bursting, Mr. Veen, Mrs. Simonson and Mr. Zundel, first; no second. Mr. H. D. Brittin gave a number of exhibitions in gymnastic dancing and tumbling along with members of the boys' department. Messrs. Morris, Burmeister, and Otis furnished a Barbadian talk. Mrs. I. V. DeLong presided at the piano. The ladies furnished home made cakes, which with apples, pumpkin pies, ice cream, and coffee made up the refreshments.

Culebra bowls tenpins in the all-Isthmian tournament at Cristobal on Saturday, November 8.

A married folks' duckpin tournament will be held on Monday, November 10.

The Cristobal boys defeated the Gatun boys at basketball on Saturday, November 1. Score, 14 to 5. Anderson scored four field goals for Cristobal. Saturday night, the second team defeated the Panama National Institute team. Score, 19 to 11.

Eight girls from the girls' gymnasium class gave an exhibition in folk dancing at the children's Hallowe'en party under the auspices of the Sunday school at building No. 1 on Friday night, October 31.

The Empire chess team took five out of eight games in the all-Isthmian chess tournament on Saturday, November 1. The scores were, as follows:

Empire.	Won.	Cristobal.	Won.
Caldwell.....	1	Hurt.....	0
Goolsby.....	1	Taylor.....	0
Hall.....	2	Tuttle.....	1
Smith.....	1	Verner.....	0
		Wilson.....	2

Totals..... 5 3

PORTO BELLO.

Rev. Carl Elliott of Cristobal preached to a good-sized audience at the Porto Bello clubhouse on Wednesday night, October 29. Mrs. Wilkes sang a solo and Mrs. McClutosh played the piano.

A Hallowe'en social was held at the clubhouse on Friday night, October 31. Nearly all who attended were in costume. A lively series of games were played ending with a pie eating contest, and the time honored custom of ducking for apples. The ladies served coffee and pumpkin pie. Prizes were awarded, as follows: For the prettiest costume, Mr. Colberg; the funniest costume, John Bruck; pinning the tail on the cat, Mrs. Medd; chewing the string, Mrs. Butler; ladies' egg race, Mrs. Wilkes; threading the needle, Mrs. Butler; dog fight, Rodger Bucklin; rooster fight, Cland Smith; ducking for apples, Doris Geyer; pie eating contest, Rodger Bucklin.

A "Smoker" was held on Saturday night, November 1 which was attended by nearly everyone in Porto Bello. The gentlemen were served with cigars, and the ladies with candy. Punch was also served. The following program was rendered: Mandolin duet by Messrs. Ramsey and Arbuckle; recitations by Mr. Burmeister; piano solo by Mr. Bailey; Barbadian impersonations by Messrs. Burmeister and Otis; mandolin duet by Messrs. Ramsey and Arbuckle; fancy juggling by Mr. Brennan; wrestling by Messrs. Martinoff and Ewald.

Moving pictures depicting the "Siege of Calais" were given between the numbers on the program.

The Sunday school held in the morning, and the song service held in the evening were both well attended. Mrs. Wilkes and Messrs. Caldwell and Bailey formed a trio which gave a vocal selection. Mr. Bailey played a piano solo and also sang "A perfect day." About 60 people were present.

Revised Pay Car Schedule.

EMPIRE, C. Z., November 5, 1913.

Payments from the pay car will be made on the 11th and 12th of each month, beginning with the November payment and the following approximate schedule will be followed:

11TH.

Leave Empire 5.45 a. m., running direct to Gatun. Gatun 7.20 to 10. Frijoles, 10.45 to 11.45, paying transmission line gaugs. Leave Frijoles 11.45, paying Tower R. Stockade, 12.10 p. m. to 12.20. Obispo Junction over inside track to Gold Hill tower and vicinity, 12.40 to 1.20. Paraiso, gangs on east side, 1.50 to 2.10. Paraiso, gangs on west side, 2.30 to 2.40. Rio Grande, 3.10 to 3.40. Culebra, Quartermaster's siding, 4 to 4.10. Empire shops, 4.20 to 5.

12TH.

Leave Empire 6.05 a. m., running direct to Naos Island. Pay Naos Island 7.05 to 7.50. East Balboa, near commissary and terminal siding, 8 to 11. Pedro Miguel 11.20 a. m. to 12.40 p. m. Corozal, 1 to 1.30. Miraflores Locks, east side, 1.40 to 2.20. Bas Obispo, 3 o'clock, paying south, arriving at Empire, 4 p. m. JOHN H. MCLEAN, Disbursing Officer.

Rainfall, Oct. 1 to Oct. 31, 1913, Inclusive.

OFFICIAL CIRCULARS.

Rates of Pay for West Indians in the Transportation Service.

CULEBRA, C. Z., October 28, 1913.

CIRCULAR No. 229-z-4:

Effective November 1, 1913, the rates of pay for West Indians in the transportation service will be, as follows:

Clerks—	
Entrance rate of pay.....	\$30.00 a month
Intermediate rate of pay.....	37.50 a month
Maximum rate of pay.....	50.00 a month
Firemen, (Standard gage locomotives)—	
Entrance rate of pay.....	37.50 a month
Maximum rate of pay.....	45.00 a month
Firemen (Narrow gage locomotives)—	
Entrance rate of pay.....	25.00 a month
Maximum rate of pay.....	30.00 a month
Messengers—	
Entrance rate of pay.....	17.50 a month
Intermediate rate of pay.....	20.00 a month
Maximum rate of pay.....	25.00 a month
Switch tenders.....	10 an hour
Telephone operators.....	30.00 a month
Trainmen.....	30.00 a month
Watchmen—	
Entrance rate of pay.....	20.00 a month
Intermediate rate of pay.....	25.00 a month
Maximum rate of pay.....	30.00 a month

All employees of the above classes, who are now receiving more than the maximum rates of pay as shown above, will be reduced, effective November 1, 1913, so that their rates of pay will agree with the above schedule. New employees will be taken on at the entrance rates shown. After three months' satisfactory service they may be promoted to the intermediate rates, where such rates are shown, and after a further period of three months' satisfactory service they may be promoted to the maximum rate of pay of their position.

GEO. W. GOETHALS,
Chairman and Chief Engineer.

Amendment to Circular No. 314-K.

CULEBRA, C. Z., October 28, 1913.

CIRCULAR No. 314-L:

Paragraph 7 of Circular No. 314-K, dated September 1, 1913, prescribing gas engine oil for the cylinders of internal combustion engines, is hereby amended to permit the use of Monogram engine oil on motor boats and motor cars of the Commission and Panama Railroad Company.

GEO. W. GOETHALS,
Chairman and Chief Engineer.

Reservations on the "Cristobal," Sailing from Colon on November 25.

CULEBRA, C. Z., October 27, 1913.

HEADS OF DEPARTMENTS AND DIVISIONS:

All first cabin accommodations on the steamship *Cristobal*, scheduled to sail for New York on November 25, will be reserved exclusively to members of the House Committee on Appropriations. No requests for first-class accommodations on this boat should, therefore, be submitted.

GEO. W. GOETHALS,
Chairman and Chief Engineer.

Invoicing of Cement Bags.

CULEBRA, C. Z., October 26, 1913.

HEADS OF DEPARTMENTS AND DIVISIONS:

Effective November 1, cement bags will be invoiced by the Quartermaster's Department for physical accounting only. On that date the various departments and divisions will take an inventory of the cement bags on hand, both empty bags and bags containing cement, and forward these inventories to the costkeeping accountant at Culebra.

By this method, the value of the cement bags will remain in the account, "Material and supplies," and that account will receive credit for the value of the bags accepted by the contractors. The value of all bags rejected, as well as the freight charges on bags returned, will be invoiced to the costkeeping accountant for prorate to the various units of the work on the basis of the cement used.

Inventory of the bags actually on hand should be taken by the departments and divisions every three months for check against the property records.

GEO. W. GOETHALS,
Chairman and Chief Engineer.

Transfer of 10-Cent Laborers.

CULEBRA, C. Z., October 30, 1913.

MEANS OF DEPARTMENTS AND DIVISIONS:

Before laying off any 10-cent laborers due to reduction of force, Inspector Greenslade of this office will be notified directly long enough in advance so that he may have an opportunity to arrange for the transfer of these laborers to other departments and divisions in lieu of

higher priced West Indian laborers, who shall be discharged to make place for same, or, if retained, shall be reduced in pay to 10 cents per hour.

GEO. W. GOETHALS,
Chairman and Chief Engineer.

Forwarding Survey Papers for Retired Equipment.

CULEBRA, C. Z., October 30, 1913.

CIRCULAR No. 323-I:

Accountable officials will forward promptly survey papers for each steamshovel, locomotive, or other piece of rolling stock to be permanently withdrawn from service, in order that such equipment may be prepared for storage with the least delay practicable.

GEO. W. GOETHALS,
Chairman and Chief Engineer.

Delays in Local Freight Shipments.

CULEBRA, C. Z., October 28, 1913.

HEADS OF DEPARTMENTS AND DIVISIONS:

The acting general superintendent of the Panama Railroad quotes the following report submitted by the freight and passenger agent:

"Considerable delay has been experienced of late to carload shipments from points on the new main line and old main line and *vice versa* due to cars being improperly carded, showing consignee and destination.

"Should be glad if you would have this matter brought to the attention of all heads of departments and divisions of the Isthmian Canal Commission. In many instances, cars with material are moved and left in Paraiso yard by I. C. C. crews without any billing whatever to cover, causing difficulty on our part in locating even the shipper or the originating point, much less consignee and destination, and the movement of cars without billing, and especially by I. C. C. engines on P. R. R. tracks, has always been strictly against the rules and these rules are not being lived up to."

Please give this matter your attention, and see that the necessary instructions are issued to all concerned.

GEO. W. GOETHALS,
Chairman and Chief Engineer.

Shop Expense Percentage.

CULEBRA, C. Z., October 28, 1913.

HEADS OF DEPARTMENTS AND DIVISIONS:

In accordance with the provisions of Circular No. 169-E, the following shop expense percentage for each shop is hereby fixed, effective November 1, 1913, and will be applied, until further orders, to the distributed labor used in all shop work, in accordance with the provisions of Circular No. 264-A, viz:

DIVISION OR SHOP.	Shop expense percentum.
Mechanical Division.....	50
Dry dock shop.....	50
Porto Bello.....	25
Toro Point.....	50
Paraiso shop.....	35

Circular letter from this office dated August 22, 1913, is revoked.

GEO. W. GOETHALS,
Chairman and Chief Engineer.

Stripping Steamshovel Boilers.

CULEBRA, C. Z., October 25, 1913.

CIRCULAR No. 323-H:

Paragraph B of Circular 323-E, dated September 12, 1913, is hereby amended to omit the stripping of jackets and lagging from the boilers of steamshovels.

GEO. W. GOETHALS,
Chairman and Chief Engineer.

Disposition of Chronic Patients.

DEPARTMENT OF SANITATION,

OFFICE OF CHIEF SANITARY OFFICER,

ANCON, C. Z., October 28, 1913.

TO ALL CONCERNED:

Effective October 31, all chronic patients in Ancon and Colon Hospitals not requiring further hospital treatment, and whose disability does not render them eligible for admission to the Corozal Farm, will be discharged from these hospitals, and transferred to a ward set aside for them in Colon Hospital grounds. The expense connected with their maintenance—food, necessary clothing, and attendance—will be kept separate from the hospital. The superintendent of Colon Hospital will have supervision over them, and will, in case it becomes necessary, regularly transfer them to the hospital for treatment.

Patients in Ancon and Colon Hospitals eligible for admission to Corozal Farm, and who require no further hospital treatment, must be required to make the necessary application for admission to the farm, and in the event they fail to do this on or before the 5th day of November, 1913, they must be discharged from hospital.

Should there be any of the patients not entitled to the privilege of the farm, who pay the 30-cent rate for their

care in hospital, a statement to this effect with the necessary data, should be submitted when the patient is transferred, in order to enable the superintendent of Colon Hospital to render bills.

The necessary arrangements incident upon carrying out the provisions of this circular will be attended to by the Acting Chief Sanitary Officer.

JOHN L. PHILLIPS,
Acting Chief Sanitary Officer.

Approved:

GEO. W. GOETHALS,
Chairman.

Privilege of Choosing Hospitals Discontinued.

DEPARTMENT OF SANITATION,

OFFICE OF THE CHIEF SANITARY OFFICER,

ANCON, C. Z., October 27, 1913.

ALL DISTRICT PHYSICIANS:

Heretofore, American employees, members of their families, and others have been allowed their choice of Commission hospitals, Ancon or Colon. Effective at once, this privilege will be discontinued, and all such patients, unless otherwise ordered from this office, will be sent to Ancon Hospital. This not to include individuals at Gatun, Cristobal, Toro Point, and Porto Bello, who require operative interference, or whose condition will not admit of their transportation to Ancon.

JOHN L. PHILLIPS,
Acting Chief Sanitary Officer.

GEO. W. GOETHALS,
Chairman.

Interlocking Plant at Pedro Miguel.

PANAMA RAILROAD COMPANY,

OFFICE OF GENERAL SUPERINTENDENT,

COLON, R. P., October 29, 1913.

G. S. BULLETIN No. 16:

Interlocking plant at Pedro Miguel will go into service at 12.01 p. m., Sunday, November 2. All routes are governed by home and dwarf signals, giving aspects in accordance with the Book of Rules. Please be governed accordingly.

F. MEARS,
Acting General Superintendent.

Change in School Hours.

DEPARTMENT OF CIVIL ADMINISTRATION,

DIVISION OF SCHOOLS,

ANCON, C. Z., October 29, 1913.

PRINCIPALS AND TEACHERS OF WHITE GRADE SCHOOLS:

The following schedule of school hours in the grades of the white schools will be effective November 4:

	A. M.	P. M.
Ancon.....	8.00 to 11.00	1.00 to 3.00
Corozal.....	8.00 to 11.00	1.00 to 3.00
Pedro Miguel.....	8.30 to 11.30	1.00 to 3.00
Paraiso.....	8.30 to 11.30	1.00 to 3.00
Culebra.....	8.00 to 11.00	1.00 to 3.00
Empire.....	8.30 to 11.30	1.00 to 3.00
Las Cascadas.....	8.00 to 11.00	1.00 to 3.00
Gatun.....	9.00 to 12.00	1.30 to 3.30

Cristobal—		
Upper grades....	8.00 to 11.15	1.15 to 3.15
Lower grades....	8.15 to 10.45	1.00 to 2.45
Porto Bello.....	8.00 to 11.00	1.00 to 3.00

At Ancon, the only changes in the break service will be that the break will arrive in the afternoon 45 minutes earlier and leave one hour earlier than under the present schedule; at Pedro Miguel and Empire, the only change will be that the breaks will leave one hour earlier in the afternoon. An entirely new schedule has been arranged for the Cristobal break.

The first grade in all schools will dismiss 30 minutes earlier in the morning than the other grades. The first, second, and third grades will dismiss 30 minutes earlier in the afternoon than the other grades. The condition of break service at Cristobal has made it necessary to make school hours for the lower grades independent of the upper grades.

Teachers will send to this office revised programs. As a rule, in grades above the second, it is better to have the study period of a subject in preparation of the next day's lesson immediately following the recitation period of that subject.

A. R. LANG,
Superintendent of Schools.

Proposals for Construction of Earth Dike.

OFFICE OF CHIEF QUARTERMASTER,

CULEBRA, C. Z., October 29, 1913.

Sealed proposals will be received at this office until 3 p. m., Thursday, November 20, 1913, and then opened, for the construction of an earth dike, or embankment, containing approximately 71,500 cubic yards of material, at Caño saddle, No. 4, separating Gatun Lake from the drainage area of the Lagarto River. Full information, including plans and specifications, can be secured upon application to this office. Bids must be accompanied by cash, certified check, or post-office money order for five per cent (5%) of amount bid. Proposals should be marked "Proposal for construction of earth dike," and addressed to Captain R. E. Wood, Chief Quartermaster, Culebra, Canal Zone.

COMMISSARY DEPARTMENT.

The commissary stores are open during the following hours:

Cristobal, 8 a. m., to 12.30 p. m., and 2 to 7 p. m.
Balboa, 8 a. m. to 12.30 p. m., and 2.30 to 7 p. m.
Ancon, 8 a. m. to 1 p. m., and 3 to 6 p. m.
All others, 8 a. m. to 1 p. m., and 3 to 7 p. m.
Retail prices of cold storage provisions for the week beginning November 3, 1913:

CANAL

RECORD

Volume VII.

ANCON, CANAL ZONE, WEDNESDAY, NOVEMBER 12, 1913.

No. 12.

The Canal Record

Published weekly under the authority and supervision of the Isthmian Canal Commission.

The Canal Record is published free of charge, one copy each to all employees of the Commission and Panama Railroad Company whose names are on the gold roll. Extra copies and back numbers can be obtained from the news stands of the Panama Railroad Company for five cents each.

Address all Communications,

THE CANAL RECORD,

Ancon, Canal Zone,

Isthmus of Panama.

No communication, either for publication or requesting information, will receive attention unless signed with the full name and address of the writer.

NOTES OF PROGRESS.

Canal Equipment Available for Use in Alaska.

The following resolution, which was considered and agreed to, was introduced in the Senate of the United States on August 23, 1913:

"Resolved, That the Isthmian Canal Commission be, and they are hereby, directed to transmit to the Senate information showing as nearly as may be practicable, the amount, character, and value of construction machinery, equipment, and material which will be available on the completion of the Panama Canal, and which it would be possible to transfer to Alaska for use in railroad, and dock construction and coal mining."

A preliminary report of equipment and material available has been prepared under the direction of the Chief Quartermaster, based in part on the list incorporated in the report of the Alaska Railroad Commission.

Progress of Dredging in Culebra Cut.

Excavation by pipeline suction dredges at the foot of Cucaracha slide has been abandoned temporarily on account of the heavy material encountered in the lower part of the slide. Pipeline suction dredges No. 85, working on the south side of the slide since October 24, and No. 86, on the north side since October 28, were replaced on November 8 by the ladder dredges *Marmot* and No. 5, respectively. Dredge No. 85 was transferred to Miraflores Lake, where the bottom of part of the channel is five feet above final level, and is now excavating at a point about 1,500 feet from the end of the lower approach wall; No. 86 was towed to Gamboa to join No. 82 in the removal of material carried into the completed channel by the Chagres River. The spoil from No. 5 is handled to the dumping grounds near Gorgona in barges, and that from the *Marmot* by clapnets No. 6, 9, and 11, dumping near bridge No. 57½ in the old

drainage channel at the bottom of the Canal, which is below required level.

The channel through Cucaracha slide is now from 20 to 150 feet wide, averaging about 100 feet for the length of approximately 1,000 feet which the slide has obstructed, and has a depth of from 10 to 20 feet, while the surface of the water is around 75 feet above sealevel. On the north side, beginning at the south side of Gold Hill, the dredges have made a channel about 200 feet wide for a distance of about 250 feet.

The dipper dredges *Mindi* and *Chagres*, working near one another at the bases of the east and west Culebra slides, respectively, are handling the situation at that point without difficulty. Ladder dredge No. 1 has been transferred from Gamboa to the base of the slide at La Pita point, on the east bank of the Canal, about half a mile north of Empire.

Recreation Hall at Balboa.

The first floor of the lodge hall at Balboa is being converted into reading and recreation rooms, which will be under the management of the Y. M. C. A. The usual papers and periodicals will be supplied the reading room, and there will be space for writing tables and refreshments. Two pool tables will be installed in the recreation room, together with chess and checker games. The upper floor of the building is devoted to lodge meetings, but the Y. M. C. A. will have its use one night a week for entertainments, etc. There are about 430 bachelors quartered in the Balboa district, who, at present, are without means of social diversion.

Sales of Retired Canal Equipment.

Sales of retired Canal equipment have recently been made to the Costa Rica Government, for account of the Pacific Railway of Costa Rica; to the Northern Railway of Costa Rica, and to the United Fruit Company. For the Pacific Railway, there have been purchased six 42-inch dump cars, six 42-inch flat cars, two 42-inch Porter locomotives used in the construction of Pedro Miguel Lock, three 70-ton Bucyrus steamshovels, Nos. 45, 58, and 59; and two 25-ton Lidgerwood unloaders. The Northern Railway of Costa Rica has purchased forty-one 42-inch dump cars, seven 42-inch flat cars, eight 42-inch Porter locomotives, and two 45-ton Bucyrus steamshovels, Nos. 51 and 52. The purchases of the United Fruit Company include two 60-ton Marion steamshovels, Nos. 151 and 153, one Model 20 Marion steamshovel, and, through Mr. H. M. Fields, for use in the Bocas del Toro District, six 36-inch Porter locomotives. This company has also bought 18 tons of second-hand 70-pound rail, and 11,000 second-hand angle bars. The firm of R. W. Hebard and Company, Panama, has purchased two 36-inch electric locomotives, formerly used on the industrial railway at Gatun Locks.

The prices of the equipment were fixed by

the Board of Survey and Appraisal in each instance, and its cost to the buyer depended to a large extent on its serviceability, the repairs necessary to put it in condition in case repairs were desired, changing of gage, and the cost of dismantling and crating for shipment.

To Increase Tenth Infantry to 1,500 Men.

At a conference at Camp E. S. Otis, between the Secretary of War, Colonel Goethals, and Colonel Greene, during the recent visit of the Secretary, it was agreed that sufficient quarters would be available at Las Cascadas and would be placed at the disposal of Army authorities to house a sufficient number of enlisted men to bring the strength up to about 1,500 as per Field Service Regulation organization.

The matter of procuring the additional men and equipment is now the subject of correspondence with the War Department, and a decision thereupon is expected soon.

Removal of Sixth Division Offices.

Removal of the office of the Sixth Division from Balboa to Paraiso will be effected within the next few days, and the removal of the office of the same division, now on Dock 13, Cristobal, will follow shortly thereafter, thereby consolidating all of the office work of the division under one roof. The new office at Paraiso will be located in the old storehouse building, which has been altered to accommodate the following: Office of the resident engineer, office of the dredging superintendents, office of the clerical force, drafting room and office of the civil engineers and mechanical draftsmen, property room, subsistence department, and a room for the silver clerks. The office of the resident engineer is 14½ by 31 feet in plan, equipped with shelves and a coat closet; that of the superintendents is similar in size; the office for the white clerks is 46 by 31 feet in plan, provided with a stationery storeroom and a coat closet; the drafting force will occupy a room of the same size furnished with drawer cabinets and a bookcase. The property room is furnished with shelves extending to the ceiling. All the above offices are separated by partitions built part way to the ceiling, but between the drafting room and that set aside for the subsistence department the partition will extend to the ceiling. The room for the subsistence section is 20 by 31 feet in plan, fitted with shelves all the way to the ceiling, and provided with a packing table. It is also provided with an ice box for keeping perishable supplies, entrance to which is gained through a vestibule opening on an unloading platform extending the entire length of the office building.

The greater part of the Pacific dredging force, as well as the shop employees, have already been assigned quarters at Paraiso. The old shop building has been reequipped

with the necessary machinery for repairs to the dredging outfit and placed under the Mechanical Division. Shop operations were begun on November 1.

Changes at Pedro Miguel.

The fill on the east side of the Panama railroad at Pedro Miguel for raising the southern part of the townsite above the level of Miraflores Lake, has been completed, except for final grading and arrangement of drainage facilities. The commissary store has been transferred from the west side of the railroad to the old Gorgona commissary building, rebuilt on the east side of the track, near the station. The station is being enlarged by a 40-foot extension of the waiting shed for first-class passengers, and an additional alighting platform has been built on the opposite side of the tracks. The local detachment of police has moved into new quarters in a two-story building east of the railroad station, and the hotel for gold employes has been transferred from the building at the south end of the town to a part of the building formerly devoted to a mess for European laborers, opposite the railroad station. The Commission clubhouse, transferred from Gorgona, is being rebuilt at the eastern limit of the present town, on a hill overlooking an arm of Miraflores Lake. The framework and roof have been completed, and the remaining work will be interior finishing and painting.

Sales of Obsolete Material.

The total value of all material sold, including scrap and obsolete material and equipment, during the months of July, August, and September, was \$402,077.98. Of this amount, sales to the Panama railroad and commissaries totaled \$308,518.35. Although the latter are classed as sales, they are practically issues of stock, similar to the issues to departments and divisions of the Commission. The value of the sales, however, is reimbursed to the Commission from Panama railroad funds. The remainder of the transactions, amounting to \$93,559.63, represent sales to employes and outside individuals and companies, as follows: Sales of obsolete equipment, \$24,310.30; sales of obsolete material, \$19,593.84; sales of American scrap screening, etc., \$10,362.66; sales of old French buildings, \$5,538.91; sales of French scrap (collections under French scrap contract), \$6,930.87; sales of stock material, including stationery, \$26,823.35. The expenses directly chargeable to these sales amounted to \$11,462.14, of which \$4,297.85 represents expenses at the Mount Hope scrap yard.

Exodus from the Isthmus Continues.

According to the figures of the quarantine service, 2,430 more persons embarked on vessels sailing from the Isthmus for foreign ports during the month of October, than landed, almost equaling the excess of emigration over immigration for September.

The total number of steamship passengers who embarked at Colon and Cristobal for foreign ports during the month was 4,927, consisting of 2,656 cabin, and 2,271 steerage passengers. The number of persons who landed from foreign ports was 2,568, consisting of 1,644 cabin, and 924 steerage passengers. The number of persons who embarked over those who landed at these ports was 2,359. The steerage passenger lists on in-

coming boats were the smallest in months. The immigration from West Indian ports consisted of 224 cabin and 523 steerage passengers, an increase in cabin, but a considerable decrease in deck passengers, as compared with September. Of the steerage passengers from other countries, Colombia furnished 136, and Costa Rica, 61, while only 97 came from Europe. The number of persons arriving "in transit," practically all tourists, during the month, was 1,787, a decrease of 19, as compared with the previous month.

The number of persons who landed at the ports of Ancon and Panama from foreign ports during the month was 458, consisting of 301 cabin, and 157 steerage passengers. The number of persons who embarked for foreign ports during the same period was 529, consisting of 384 cabin, and 145 steerage passengers. The number of those who embarked over those who landed was 71. The net emigration from the Isthmus during the past three months has been 6,759.

The total number of vessels arriving at Colon during October was 97, and at the port of Ancon, 22.

The "Fram" Relieved from Payment of Harbor Dues.

By authority of the Secretary of War, the Polar ship *Fram*, now at Colon, will be relieved from the payment of all harbor and light dues and wharf charges during its stay there. This action is in line with the exemption from similar payments, which is said to have been made to the ship in every port at which it has called. The *Fram* sailed from Buenos Aires on August 14, and arrived at Colon on October 2, where it expects to stay until an opportunity is afforded for it to continue on its way to San Francisco via the Canal.

Obsolete Material Sold for Cash.

A great many articles in the obsolete storehouse at Mount Hope have been appraised by the Board of Survey and Appraisal and prices thereon approved, so that they can be purchased for cash. Individuals interested in the purchase of any of these articles may obtain full information by applying to the Depot Quartermaster, Mount Hope, Cristobal, C. Z., by letter, or in person.

Tenth Infantry Patrol in Panama.

Acting under instructions from higher authority, the Commanding Officer, Tenth Infantry, has adopted the policy of sending a patrol to the city of Panama at such times as a visit to that city by any considerable number of his command is anticipated. This action is taken with the consent of the Government of Panama, with a view to maintaining good order as far as the men of the Tenth Infantry are concerned, and is intended to prevent possibility of a recurrence of the disorder of September 6, last, which involved sailors and marines from the *U. S. S. Detroit* and a few men of the Tenth Infantry, and which was inspired by the apparently unprovoked stabbing of a member of that ship's crew.

The patrol which has been on duty every night since pay day (Nov. 6), consists of a lieutenant and 7 enlisted men and is stationed at the Panama police station at Cocoa Grove.

Señor Joaquin Miro Quesada has been appointed Consul General and Chargé d'Affaires of the Republic of Peru in Panama.

FILTER GRAVEL AND SAND.

Washed and Separated by Hydraulic Gravity Plants.

The filter medium for the filters being constructed for the new Colon waterworks will consist of layers of selected Chagres River gravel and Punta Chamé sand. The gravel will be placed at the bottom of the filter, in three layers. For the first, or bottom, layer the gravel will be laid 10 inches deep and in size will be that which can be passed through a 1½-inch screen and held on a ¾-inch screen; for the second layer, seven inches in depth, the gravel passing through the ¾-inch screen and held on a ¾-inch screen; for the top layer, that which can be passed through a ¾-inch mesh and held on a 3/16-inch screen. On top of this last layer of gravel will be placed 30 inches of washed sand, separated in such a manner as to give a mean effective size, approximately .35 to .44 millimeters in diameter and having a uniformity coefficient of from 1.2 to 1.8.

In order to obtain gravel of the required sizes, a washing and separating plant was constructed at Gatun, at which the gravel has been prepared. The plant consists of a series of 12 by 12-inch sluice boxes, arranged in steps, and discharging at their lower ends against electrically welded wire screens, which are set at an inclination of approximately 30 degrees to the bottom of the flumes. The drop between steps is about three feet. The gravel is shoveled into the washing box at the head of the first flume, and is sluiced down the flume to fall against the first screen. The water and all sizes of gravel smaller than the mesh of the screen pass through it and drop into the second flume. At the foot of this flume the gravel falls on the second screen. That which is too large to pass through, rolls off the screen into a bin; the remainder passes through the screen in the same manner as at first. This process is repeated through the third and fourth screens. In this manner, the three sizes of gravel desired are separated by gravity and fall into three bins.

The preparation of sand for the filters is also effected hydraulically. This is done by emptying the sand into a washing box, 16 feet long, five feet high, and two feet wide, inside measurements, with an inclined bottom along which is a pipe manifold system, made of seven lengths of 3-inch pipe with a number of small holes in its under side. When a workable quantity of sand has been dumped into the box, water is admitted to the pipe manifold at such pressure as to give a constant flow of 10 gallons per square foot of floor area per minute. At the top of the box, with its inner end about 10 feet from the end at which the sand enters the box, is an overflow trough, nine inches wide by 12 feet long, with an incline of five inches in its length. The water from the manifold forces the sand into suspension, and the fine particles and dirt are carried away by the overflow. The sand left in the box is that which is desired for the filters. It is removed from the box through a slot, two by nine inches, at the lower end of the floor, controlled by a sliding door.

The gravel separation plant has developed a capacity of about 25 cubic yards a day, employing six laborers in its operation; and the sand plant, with eight laborers, washes and separates about 50 cubic yards of sand in the 8-hour day.

JOINT LAND COMMISSION.

Rule

in the matter of the claim of the Las Cascadas Estates Company, Limited, for lands of Bohio Soldado and Buena Vista—Under date of September 2, 1913, an award was made by the Joint Land Commission in favor of the Las Cascadas Estates Company, Limited, for property located at Bohio and Buena Vista in the amount of \$3,500 U. S. currency.

A motion has been filed by Messrs. Hinckley and Ganson praying that said award be amended by adding thereto a ruling by the Commission in regard to the area for which the said award was made, basing such motion upon the plea that the interests of the Las Cascadas Estates Company, Limited, might be prejudiced in some manner by the omission from the award of the desired statement as to the area covered by the same.

In considering the award to be made to the Las Cascadas Estates Company, Limited, it became necessary to reach a conclusion with regard to the area of the property which rightly belonged to the claimant.

The claimant asserts that its property extends two leagues in depth from the River Chagres, and bases this claim on deeds from Porfirio Melendez. The latter acquired the land in 1891 from Buenaventura Gutierrez and others.

It is admitted by the United States that title to the property was acquired by Porfirio Melendez by this deed of 1891, and the subsequent conveyances to the present claimant are not disputed. It is, however, denied by Counsel for the United States that the deed of 1891 conveyed land two leagues in depth from the River Chagres, because Buenaventura Gutierrez and his predecessors in interest never had title beyond half a league in depth from the River Chagres.

Bohio Soldado lands form a part of the tract known on the Harrison-Arosemena map as Ahorca Lagarto y Bohio Soldado. This tract was included in an *in dulto* issued in 1788 to Benegas Arqueche Santillana and de Gracias. In the course of time it became divided up into many tracts which, on the property map are designated, as follows: Ahorca Lagarto, Vamos Vamos, Peñas Blancas Abajo, Peñas Blancas en medio, Peñas Blancas Arriba, Bohio Soldado, Buenavista, and Agua Salud.

In the various instruments the three latter names often appear together. Titles in this area are very much confused. They offer many gaps, and the transition of the property from the original grantees to others who have given deeds in the last thirty years is often obscure. Some deeds go back uninterruptedly (i. e., Peñas Blancas en medio) to the original grantors, and all titles in this area show the original grant as their background.

In this grant of 1788 the whole tract in question is described, as follows:

"Las tierras en las vegas del río del Chagres desde la quebrada nombrada Juan Gallegas hasta la de Agua Salud de una y otra banda del dicho Río, que sera como, dos leguas de largo y media legua tierra adentro."

In face of the specific mention of "Media legua tierra adentro," it is manifestly absurd to interpret the phrase, "Que sera como dos leguas de largo," as a measurement of the depth of the estate. It may be noted that this document is voluminous, and gives the original petition and the report of the committee of inspection, as well as the final decree. In the original petition the land to be granted is described in exactly the same terms as those above quoted, with omission of the phrase, "Que sera como dos leguas de largo." The report of the committee of inspection, in designating the lands, uses the language of the original petition and then proceeds to a description of the lands, as follows:

"Que las espersadas tierras son de terreno firme, fértil a propósito para labranzas y eria de ganados de una y otro banda del río, aunque por partes no alcanza la tierra firme a la media legua tierra adentro por encontrarse lagunas y pantanos que siguen hasta la montaña;—Que entre los citados linderos habra como dos leguas poco mas ó menos, etc."

This quotation shows how the two league phrase came to be introduced into the original decree and if there were any suspicion that in the decree the "Dos leguas" and the "Media legua" applied to the same measurement, these phrases in the introduction to the decree above quoted would dispel such suspicion. All of the title to the various sections into which Ahorca Lagarto and Bohio Soldado became divided, go back to this document. The document was recorded in 1887 by none other than Porfirio Melendez, to establish his titles to other tracts in this general area.

The fact that this general area extended only half a league back from the Chagres is recognized in the Harrison-Arosemena map, and was concurred in by Porfirio Melendez in various transactions prior to 1891 in which he or his family acquired title to portions of this estate. In three deeds cited by Counsel for the United States, Porfirio Melendez or his wife appears

as purchaser. In each case the depth from the Chagres River is half a league, or three miles.

Concerning the part called Bohio Soldado, specifically, there is a deed of 1867 and an affidavit of 1882, both of which state the interior limits as three miles. Moreover, it may be noted that in the claim before the Commission of Luisa Cerezo, who shows an uninterrupted title back to the original grantees, no claim is made for a depth of two leagues. There is also a series of transactions by which the United States acquired other parts of the same estate—the properties now designated as Ahorca Lagarto, Peñas Blancas Abajo, Buena Vista, and Agua Salud, none of which made any claim to extensions beyond the limits designated on the Harrison-Arosemena map.

In the adjudication of the claim of the Las Cascadas Estates Company, Limited, to the lands of Bohio Soldado and Buena Vista:

The Commission has reached the conclusion, that at the time the deed of 1891 was made, no title existed in the predecessors of Buenaventura Gutierrez to a greater depth of land than that possessed by the owners of the other portions of the estates of Ahorca Lagarto and Bohio Soldado, and that the land beyond the half-league limit was, as indicated in other deeds, "Tierras baldías."

September 22, 1913.

Opinion

in the matter of the claim of Maria E. J. de Bosque Domitila Carmen Paredes de Bosque, and Hilario V. Seixas, for damages by reason of withdrawal of passes on the Panama railroad, docket No. 618—The evidence submitted to the Commission shows that a suit was instituted against the Panama Railroad Company some years ago for damages suffered by the Bosque family, because of the occupancy of certain of their lands by the said railway company for the line of the road, sidings, station, and the removal of stone for ballast.

By public instrument dated May 24, 1884, an agreement was reached by which this suit was compromised, under which agreement General Correo, Maria E. J. Bosque, and Domitila Carmen Bosque de Paredes agreed to withdraw the suit and make no further claim for damages, on condition that the railroad company pay to them five thousand dollars, United States currency, and furthermore, that General Correo, and his wife, and Maria Jaramillo de Bosque and her son Tomas, should have free passage, with baggage, on the trains of the railroad company.

The rights of the claimants in this case rest entirely on the promise embodied in the agreement of May 27, 1884. Any question of damage arising out of the failure of the Panama Railroad Company to execute this agreement is a matter which must be determined by the local tribunals, and does not come within the jurisdiction of this Commission.

The Commission has therefore reached the conclusion that any claim for damages, because of the alleged failure of the Panama Railroad Company to issue passes to these claimants, must be dismissed for lack of jurisdiction, and a rule to this effect is entered accordingly.

(Signed) FEDERICO BOYD, ROLAND P. FALKNER, SAMUEL LEWIS, L. S. ROWE, Commissioners.
September 15, 1913.

Opinion

in the matter of the status of tenants on that portion of the estate of Matachin situated above the 87-foot contour line—Tenants on that portion of the estate of Matachin situated above the 87-foot contour line were lessees of rural property, and their status is governed by Chapter 6 of the Civil Code.

Although the payment of rental was made monthly, the leases held by these claimants did not specify a fixed time for the termination of the lease. The duration of such leases must, therefore, be governed by the provisions of Article 2043 of the Civil Code, which reads as follows:

"Article 2043. Should there be no fixed time for the duration of the lease, notice to quit must be given one year in advance, in order to terminate it.

The year shall be understood in the following manner:

The day of the year upon which the delivery of the estate to the tenant was begun, shall be considered as the initial day of the successive years, and the year in advance shall be counted from this initial day, even though notice to quit shall have been served some time before.

The parties may agree on another rule, if they deem it advisable."

These tenants, having acquired an interest in the land under the provision of the Civil Code, must be joined in the present expropriation proceedings. Their tenancy is brought to a close by their eviction from the land. It is clear, therefore, that this eviction works an injury within the contemplation of Article VI of the Treaty between the United States of America and the

Republic of Panama, ratified February 26, 1904, and that, in the proper cases, awards will be made for the value of the unexpired leaseholds.

(Signed) FEDERICO BOYD, ROLAND P. FALKNER, SAMUEL LEWIS, L. S. ROWE, Commissioners.
September 20, 1913.

Dissenting Opinion to Award No. 36.

In the matter of the claim of Leopoldo Cantoral, for property located at Chagresito near Old Frijoles, docket No. 128—In the award made in favor of Leopoldo Cantoral, and signed by a majority of the Commission, the opinion is expressed that the evidence does not support any claim for damages alleged to have been suffered in 1905, and in this finding I concur.

In the award allowed for damages suffered by reason of the rising of the waters of Gatun Lake, I find myself unable to concur for the following reasons:

Cantoral was a tenant of the French Company. Whether his lease terminated or not by the sale of the French lands to the United States, he recognized a position of lessee by the payment of rent in 1905 as shown by the records of the Isthmian Canal Commission. It may also be noted that Cantoral testified to having made a payment for rent in 1906. In any event, he was a lessee of the United States, under the provisions of the Civil Code governing relations of lease, if not under the lease signed with the French Company. His status as a lessee did not give him the right to claim compensation for his improvements on the expiration of this relation. The fact that after 1905 or 1906, he was permitted to occupy the land without the government collecting any rent, especially in view of the notice given to him frequently from time to time that the land occupied by him would be needed for the Canal; though he might stay there till it was actually required for Canal purposes, could not confer upon him rights superior to those which he enjoyed when required to pay rent for the use of the land. In these circumstances it is my opinion that the claim should be dismissed without award, and I cannot concur in the opinion expressed by the majority of the Commission that Leopoldo Cantoral is entitled to compensation under Law 48 of 1882 and Article 739 of the Civil Code, and must dissent from the award made to him.

(Signed) ROLAND P. FALKNER, Commissioner.
September 20, 1913.

Certification of Disagreement No. 1.

Under the provisions of Article XV of the Treaty between the United States of America and the Republic of Panama ratified February 26, 1904, it is provided:

"The President of the United States shall nominate two persons and the President of the Republic of Panama shall nominate two persons and they shall proceed to a decision; but in case of disagreement of the Commission (by reason of their being equally divided in conclusion) an umpire shall be appointed by the two Governments who shall render the decision."

Pursuant to the provisions of this article, the Commission desires to bring to the notice of the Governments parties to the Treaty, that the Commission has been unable to reach an agreement on the following question:

Do the provisions of Article VI of the Treaty between the United States of America and the Republic of Panama, ratified February 26, 1904, grant a right to compensation to the following class of claimants:

Lessees of town lots in Gorgona who held such lots under revocable leases or licenses issued by the Isthmian Canal Commission, and who purchased the buildings located on such lots from persons who, although occupying such lots prior to the abolition of the municipality of Gorgona by the Executive Order of March 13, 1907, accepted, subsequent to such abolition, a revocable lease or license from the Isthmian Canal Commission.

The Joint Commission herewith certifies this disagreement to the Governments parties to the Treaty, for reference to an umpire, as provided for in Article XV of said Treaty.

Nov. 8.....	6.50	1,780
Total.....	36.30	9,793

FINISHING THE LOCKS.

Summary of Work Remaining October 15, When First Division Took Over Operations.

All the remaining work at the locks of the Canal, with the exception of backfilling and grading, was taken over by the First Division on October 15, as follows:

PEDRO MIGUEL AND MIRAFLORES LOCKS.

1. Finishing lock control houses at both locks.
2. Grading and paving the depressed areas beneath the wicket girders of the emergency dams, the grading for which will be performed by forces of the Fifth Division.
3. Constructing stairway parapets in locations where decking was formerly incomplete, or work inaccessible, at both locks.
4. Closing of the gap in the northeast core wall at Pedro Miguel Lock, through which Central Division trains passed. The tracks at this point were taken up on Monday, October 27, and the work of placing concrete to make the wall continuous has been completed.
5. Erection of crib fender at the end of the south guide wall at Miraflores Locks; also, pile support and crib fender at the end of the north guide wall of the same locks, piles to be driven by floating equipment.
6. Completion of the top of the core wall on the west side of Miraflores Locks. On October 15, this wall had been built to elevation 54½ feet and no further work at that point could be done until the removal of the tracks used in the erection of the emergency dams.
7. Footbridges across miter gate sumps, east lock chamber at Miraflores.
8. Installation of snubbing buttons at odd points in Miraflores Locks, inaccessible before.
9. Calking and concreting shrinkage cracks in wall of east chamber, Miraflores Locks.
10. Cross bonding with steel rails the end of the south guide wall at Miraflores, by tying together the tops of the side walls.

GATUN LOCKS.

1. Finishing lock control house.
2. Constructing parapets on upper approach wall.
3. Erection of crib fender at end of south guide wall in Gatun Lake, and driving pile supports for the same, piles to be driven by floating equipment.
4. Finishing calking and shrinkage cracks in the main culverts of the west lower chamber.

A record of the odd amounts of concrete which remain to be placed, in order to complete all work in the locks, will be kept, and when the work is done will be compiled and added to the concrete already placed in the locks as shown in the statement published in THE CANAL RECORD, of October 29. In view of the above, the publication of the concrete tables, which have appeared regularly since the beginning of concrete work at the locks, was discontinued after the above date.

Steamshovel Operations During October.

During the month of October, the total amount of material excavated by the Fourth Division in Culebra Cut was 238,900 cubic yards. Of this amount, 216,000 cubic yards were primary excavation for the Canal and 22,900 cubic yards were classified as "Plant" excavation; 106,515 cubic yards were class-

ified as earth excavation, and 132,385 cubic yards as rock excavation.

In addition thereto, the Fourth Division excavated at Sosa Hill 30,500 cubic yards of rock for use on the Naos Island breakwater. All the yardage handled by this division was excavated by steamshovels.

The Fifth Division of the Chief Engineer's office removed by sluicing at Gold Hill 105,900 cubic yards, 81,900 cubic yards of which were classified as earth, and 24,000 cubic yards, as rock excavation.

SOCIAL LIFE OF THE ZONE.

Church Work.

The ladies' auxiliary to the Empire Christian League held its annual Thanksgiving meeting at the home of Mrs. John H. McLean on Friday afternoon, November 7, when there were present nearly all the members of the organization and a number of invited guests from Culebra, Ancon, and Balboa. Among the reports read was that of the delegate to the Panama missionary society on the question of the federation of church societies in the Canal Zone. The report was received with favor, and it was decided by unanimous vote to cooperate with the Methodist society in the effort to form a federation. The following program was given: Piano selection; hymn, by the auxiliary; devotional, "Thank-offering", by Mrs. McCullough; roll call and response; report of the secretary; report of the Panama missionary meeting, by Mrs. Peak; vocal solo, by Mrs. Roberts; a 10-minute talk on Chinese missions, by Mrs. Stanton; the life story of a Chinese mother-in-law, by Mrs. Goolsby; exercise, Chinese nursery rhymes, and songs, by five little children; vocal solo, by Mrs. Davies; paper on "Our thankoffering", by Mrs. H. A. A. Smith; trio for the piano, by Mrs. McLean, Mrs. Hoffman, and Mrs. Glaw; recitation "Nellie's two mitts," by Carla Smith; offering; closing prayer.

During the absence on special leave of the Rev. H. R. Carson, chaplain of Ancon Hospital and St. Luke's chapel, the charge will be taken over by the Rev. Edward J. Cooper, rector of Christ Church, Colon. Services at St. Luke's chapel for the remainder of the month will be, as follows: November 16 and 30, celebration of the Holy communion at 7 a. m., and morning prayer and sermon at 10 a. m. The Sunday school will be as usual, every Sunday morning at 9 a. m. The chaplain will be in the vestryroom at the chapel on Mondays, Tuesdays, Fridays, and Saturdays, from 9 to 10 a. m., and from 2 to 3 p. m.

Examination by Board of Local Inspectors.

The Board of Local Inspectors will conduct examinations at the Administration Building, Ancon, on Wednesday, November 19, 1913, beginning promptly at 2 p. m., for persons desiring to procure the following classes of licenses: Pilots, masters, mates, marine engineers, chauffeurs, and navigators of motor boats. All applicants for licenses must procure from the Executive Office, Ancon, forms of application and information respecting the filling out of the same, not later than the day previous to the examination. In addition, all persons desiring chauffeurs' licenses must provide themselves with automobiles with which to demon-

strate their ability to properly operate the same.

NOTE.—The demonstration test for chauffeurs will be given on Tuesday, the day preceding the regular examination, at 2 p. m., at the Administration Building, Ancon.

W. V. JUDSON,
Chairman, Board of Local Inspectors.

Ancon, C. Z., November 6, 1913.

PERSONAL.

Representatives John J. Fitzgerald of New York, chairman; William P. Borland of Missouri, Frank W. Mondell of Wyoming, and Swagar Sherley of Kentucky, members of the House Committee on Appropriations, sailed from New York on November 8, on the *Cristobal*, for an official visit to the Canal. Accompanying them are Representatives A. J. Barchfield, W. N. Carr, W. S. Vare, and A. H. Walters, all of Pennsylvania, P. P. Campbell of Kansas, Wm. H. Hinebaugh of Illinois, and George White of Ohio.

Lieut.-Col. Chas. F. Mason sailed for Callao, Peru, on Monday, November 3, as a delegate to the sixth annual Pan-American Medical Congress to be held at Lima.

Judge H. A. Gudger returned from his annual leave on the *Panama*, which docked on Sunday, November 9.

Mr. F. S. Dannenberg, assistant engineer at Miraflores Locks, has resigned from the service of the Canal Commission and returned to the United States.

Dedication of Site for Morgan Memorial.

A delegation from the Southern Commercial Congress dedicated, on November 7, a spot on the bluff at the north end of Culebra Cut, between Gamboa stockade and Tower R, as the site for the proposed memorial to the late Senator John T. Morgan. The site was selected by Col. H. F. Hodges and Dr. Clarence J. Owens, managing director of the Congress, with the approval of Senator Morgan's son, Mr. George W. Morgan, who lives in Colon. At the dedication, addresses were made by Commissioner Richard L. Metcalfe, Mr. William Jennings Price, the American Minister to Panama, Miss Louise Lindsley of Nashville, representing the women's auxiliary of the Southern Commercial Congress, and Dr. Owens.

Steamshovel and Dredge Men.

Local No. 19, I. B. of S. S. and D. M., will hold its next meeting at Empire, C. Z., on Sunday, November 16, at 12.30 p. m. All members are requested to be present.

J. I. MAJOR, Secretary.
Empire, C. Z., November 9, 1913.

Isthmian Marine Association.

The next regular meeting of the Isthmian Marine Association will be held at Ancon Hall on Sunday, November 16, at 7 p. m. Matters of importance will come up for discussion.

LEO. FOLK,
Recording Secretary.
Cristobal C. Z., November 10, 1913.

Dr. F. R. Brumby, the Commission dentist at Culebra, returned from his vacation on the *Heredia* on Monday, November 3, and will be found at his office during regular office hours.

STEAMSHIP SERVICE.

Increased Regular Connections, and Special Cruises during Dry Season.

Travel to the Isthmus during the coming dry season is likely to exceed that during any previous equal period in the Canal operations. The regular passenger service has been augmented since last season by two ships a week from the United States, to which will be added a weekly service from Boston after January 1, and at least 35 special vessels, carrying tourists, will reach the Isthmus between that date and the first of May.

Following is a schedule of arrivals and departures of the special vessels during the coming season:

Steamship.	Line.	Arrive.	Depart.
Evangeline.....	C. A. & P.	Jan. 10 ..	Jan. 14
Megantic.....	W. S.....	Jan. 15 ..	Jan. 16

Victoria Luise.....	H.-A.....	Apr. 19 ..	Apr. 20
Evangeline.....	C. A. & P.	May 1 ..	May 2

The regular service to and from the Isthmus, as maintained the year around, is in three parts: Connecting with Atlantic ports of the United States, Central and South America and all ports of the West Indies; with Pacific ports of North and South America, and with ports of Europe. Altogether, from 70 to 75 regular passenger steamers arrive and depart from the two terminals of the Panama railroad each month. The number of passengers disembarking from them on the Isthmus is normally about 4,000 per month; this includes persons connected with the Canal work, immigrants to Panama, passengers enroute to foreign ports, and approximately 1,800 tourists to the Canal Zone.

The service from Atlantic ports of the United States, Central and South America and all ports in the West Indies, is the heaviest of the three parts. It brings at least 95 per cent of the tourists, and an aggregate of cabin passengers of between 3,000 and 3,500, in from 25 to 30 steamers. Regular sailings from New York to the Isthmus are maintained by the Panama Railroad Steamship Line, every five days; the Royal Mail Steam Packet Company, fortnightly; the Hamburg-American Line, weekly; and the United Fruit Company, semi-weekly. United Fruit Company also operates semi-weekly connections with New Orleans.

Connection with Pacific ports is maintained by the Pacific Mail Steamship Company, with three sailings a month between San Francisco

and Balboa; the Pacific Steam Navigation Company, fortnightly to Callao, three times a month to Guayaquil direct, and fortnightly to Guayaquil, via intermediate ports; the Peruvian Steamship Company, weekly sailings between Callao and Balboa; and the Compañía Sud America de Vapores (Chilean Line) twice a month between Valparaiso, via intermediate ports, and Balboa. From 12 to 15 passenger steamers come to Balboa each month, with between 400 and 600 cabin passengers, most of whom are in transit to Atlantic ports of the United States or to Europe.

From nine to 12 passenger steamers from Europe arrive at Colon each month, disembarking there approximately 200 passengers. These vessels are in the service of the Hamburg-American Line, fortnightly from Hamburg; the Compagnie Generale Transatlantique, monthly from Bordeaux and monthly from St. Nazaire; the Compañía Trasatlantica, monthly from Genoa, via Barcelona; La Veloce, an Italian line, monthly from Genoa; and the Royal Mail Steam Packet Company, fortnightly from Southampton. The Leyland and Harrison Lines together maintain a service every ten days from Liverpool; on the homeward trips, their vessels sail to some Gulf port of the United States, thence to Liverpool.

Special tours to the Isthmus during the coming dry season, separate from the foregoing sailings, will be conducted from United States ports by the North German Lloyd, the International Mercantile Marine, the Canada, Atlantic and Plant Steamship Company, the Hamburg-American Line, and the United Fruit Company.

The North German Lloyd, which conducted its first tours through the Caribbean last dry season, will duplicate that service by sending the *Grosser Kurfürst*, of 13,102 tons, on three cruises from New York, leaving in January, February, and March.

The International Mercantile Marine will operate nine tours, all from New York, using the *Laurentic*, 14,892 tons, of the White Star Line, for three trips; the *Megantic*, 14,878 tons, of the same line, for four; and the *Lapland*, 18,694 tons, of the Red Star Line, for two. This will be the third Caribbean season for the *Laurentic*, the second for the *Megantic*, and the first for the *Lapland*.

The Canada, Atlantic and Plant Steamship Company will operate the steamer *Evangeline*, 5,650 tons, in seven tours to the Isthmus. This vessel was operated last year by the Peninsular and Occidental Steamship Company in trips from Key West to Colon, making the passage down in 72 hours, and it is probable that it will be conducted in the same manner during this season. The Panama Railroad Company, which is the Isthmian agent for the company, has not yet been advised of details of the service.

The Hamburg-American Line will conduct 10 special tours, six from New York, and four from New Orleans. The vessels sailing from New York will be the *Victoria Luise*, 16,500 tons, on four cruises, and the *Amerika*, 22,620 tons, on two. The *Amerika* will be the largest vessel that has ever visited Isthmian waters. Two tours from New Orleans will be made in the *Kronprinzessin Cecilie*, 8,700 tons, which made two tours from that port to Colon last season, and is a sister ship to the *Fürst Bismarck*, which will also make two tours from New Orleans.

The United Fruit Company, in addition to

inaugurating a regular weekly connection with Boston, beginning January 1, will conduct a variety of special tours. Special cruises for tourists will be conducted from New York on the *Pastores*, *Tenadores*, and *Calamares*, 9,000 tons each. Four special cruises from New Orleans are scheduled, two in January, and two in February. A number of associations will visit the Isthmus in group, by means of this company's service from New Orleans, including the Laundrymen's National Association, sailing November 8; the Louisville Commercial Club, sailing November 12; the Birmingham Chamber of Commerce, sailing January 21; and the Memphis Business Men's Club, on special schedule, sailing February 4. Steamers to sail from New Orleans on February 18 and March 4, have been reserved by a travel service bureau.

Train Collision on Bas Obispo-Panama Line.

Passenger train No. 51, which is due to leave Bas Obispo at 10.55 p. m., daily, except Sunday, and to arrive at Paraiso Junction at 11.27 p. m., collided with a work train, consisting of a locomotive and Lidgerwood car, headed in the opposite direction, on the Panama-Bas Obispo branch of the Panama railroad, on Friday, November 7, resulting in the death of six persons, two Americans, and four West Indians, and injuries to five others. The accident occurred at a point about half a mile north of bridge No. 57½ over the Canal.

The dead are: J. H. Wilkins, American conductor of the work train, living at Empire; E. Logan, American, engineer of locomotive No. 203, pushing the work train; also, a resident of Empire; Stephen Hunt, Barbadian, an employe of the Mechanical Department, living at Empire; William Rollins, Barbadian, check No. 52062, an employe of the transportation department, living at Empire; Alonso Yearwood, Barbadian, an employe of the Mechanical Department, living at Empire; William Webster, Jamaican, check No. 21411, an employe of the transportation department, living at Las Cascadas. The injured are: W. C. Chester, American, engineer of locomotive No. 656 pulling the passenger train, who lives in Panama; W. D. McFeeley, American, machinist, living at Empire; James Anderson, Jamaican, check No. 86500, a locomotive fireman on the Panama railroad, with residence at Panama; A. Straker, Barbadian, check No. 146199, an I. C. C. brakeman, living at Las Cascadas; Richard Jones, Jamaican, check No. 21029, an I. C. C. fireman, living at Empire.

The locomotive of the passenger train was running backward, as is the custom on the return trip from Bas Obispo. The engine of the work train was pushing the Lidgerwood car, so that when the impact occurred, this car and the tender of the engine pushing it were upended and completely overturned. Both engines were badly damaged, and the forward trucks of the first passenger coach were driven out of position. There were only a few passengers in this coach at the time, and although considerably shaken, no one was hurt.

A coroner's jury, consisting of Lieutenant Kennedy of the Empire police station, J. W. Tannehill, postmaster at Ancon, G. W. Green of the Division of Municipal Engineering, and E. F. Quimby of the Department of Sanitation, has been empaneled, and began the taking of testimony on Monday, November 10.

COMMISSION CLUBHOUSES.

Activities of the Young Men's Christian Association.

GENERAL.

The standing of the chess clubs in the all-Isthmian tournament is, as follows: Culebra, 27½ points; Empire, 21½; Cristobal, 16; Gatun, 15.

The standing of the teams in the basketball league on November 10, was, as follows:

Team.	Won.	Lost.	P. C.
Empire.....	7	0	1.000
Cristobal.....	3	3	.500
Camp Elliott.....	5	3	.625
Gatun.....	3	2	.667
Culebra.....	2	5	.286
Corozal.....	0	7	.000

The standing of the teams in the bowling league on November 10, was, as follows:

Team.	Won.	Lost.	P. C.
Cristobal.....	10	2	.833
Corozal.....	10	5	.667
Empire.....	9	6	.600
Culebra.....	8	7	.533
Gatun.....	2	10	.167
Camp Elliott.....	0	9	.000

COROZAL.

Corozal defeated Ancon in basketball on Thursday, November 6. The game ended 24 to 24 and the tie was played off; Corozal made the first basket, resulting in a total of 26 to 24.

On Friday night, in addition to regular moving pictures, Pablo, a magician, appeared at the clubhouse, and performed some feats in magic, including "Trip to Spookville," "Enchanted table," "Noah's ark," hand-cuff, foot-iron and straight-jacket escapes.

Moving pictures of the play, "Quo Vadis?" will be shown on Thursday, November 13.

CULEBRA.

Two hundred people attended the exhibition of the special moving picture reels of "Quo Vadis?" on Friday night, November 7. Mr. Pearsall furnished music.

On Sunday night, at the regular service, Mr. J. F. Warner spoke, his subject being, "A river of pure water, clear as a crystal." There was a good attendance.

On Saturday night, November 8, the Cristobal chess club team played the local Y. M. C. A. team, and was defeated by the score of 5 to 3, as follows:

Cristobal.	Won.	Culebra.	Won.
Wilson.....	1	Dubois.....	0
Verner.....	1	McClure.....	1
Tuttle.....	1	Warner, A. M.....	2
Forfeited.....	2	Warner, J. F.....	2

EMPIRE.

The regular meeting of the Empire debating society will be held on Friday, November 14. Mr. W. W. Warwick, who is now on the Isthmus, will be the speaker of the evening. The public is invited to attend.

About 350 people attended the special moving picture show held on Thursday, November 6, when the "Custer" films were shown.

The basketball game scheduled between Empire and Cristobal has been postponed, but will be played some time before November 22.

GATUN.

An invitation aquatic meet will be held on Thanksgiving day, at Gatun Locks, in the east lower forebay. This meet is open to all Americans on the Isthmus. It is to be a championship meet to determine the aquatic champions of the Isthmus. The list and order of events is, as follows: Twenty-five yard dash for men; 25-yard back swim for men; 50-yard dash for men; fancy diving from 12-foot spring board for men; diving for ladies from low spring board; relay race for 200 yards (four-men teams); plunge for distance; 100-yard dash for men, mile race for men; 50-yard dash for boys under 14 years; 50-yard dash for girls and ladies; obstacle race, 50 yards for men; under-water swim for men, 440-yard race. The events will begin at 2 p. m., on Thanksgiving day. The entry fee is 50 cents for each event. Gold and silver medals will be given as prizes for all events, except the obstacle race, which is open to all who have entered some other event. For further information about the meet, address the secretary or assistant secretary of any of the clubhouses.

On Saturday morning, November 8, the Cristobal boys played the Gatun boys at basketball, and at bowling, winning in basketball by a score of 9 to 2, and taking two games out of three in bowling. In the evening, the junior team of Cristobal played the local team, Cristobal again winning by a score of 25 to 9.

Saturday evening, the Corozal bowling team took two games out of three from the Gatun team. The scores were: Corozal, 828, 799, 834; Gatun, 744, 827, 747.

Mr. A. N. Kjellander, the newly appointed assistant secretary and physical director for the Gatun clubhouse, arrived on November 9 on the Panama.

CRISTOBAL.

On Monday afternoon, November 3, Cristobal de-

feated Camp Elliott in basketball by the score of 21 to 15. Mathues scored five field goals for Cristobal. Line-up—Camp Elliott—Harper and Smith, forwards; Murry, center; McElroy and Day, guards. Cristobal—Mathues and Luce, forwards; A. Fraser, center; Taylor and Jaeger, guards.

On Thursday evening, the lecture delivered by Capt. Thorvald Nilsen filled the entertainment hall to capacity. The commander gave a realistic account of Amundsen's dash for the South Pole. He illustrated his lecture with blackboard maps of the journey, and exhibited a dog sledge, skis, cooking box, and clothing that were used by the party.

Lieut.-Col. Eugene T. Wilson, subsistence officer, will address the discussion club on Thursday, November 20 on "Tolls and traffic of the Panama Canal."

On Saturday morning, November 8, the Cristobal midget basketball team defeated the Gatun midget team, by a score of 9 to 2.

Cristobal defeated Culebra in the all-Isthmian bowling tournament on November 8. Scores follow:

Culebra.	Cristobal.
Case.....	158 193 169
Cushing.....	155 183 182
Herrington.....	145 138 158
Chadbourne.....	170 157 159
Dougherty.....	164 169 151
Barrett.....	174 141 147
Barnum.....	178 157 159
Collins.....	163 155 184
Barte.....	173 213 178
Bullard.....	182 232 169

Totals.... 792 840 819 870 898 837

Gatun bowled Cristobal Saturday night, November 15, at Cristobal.

A single folks' tournament will be held on Monday, November 24. Persons desiring to enter this contest are requested to submit their names at once.

On Friday night, November 14, the "Quo Vadis?" films will be shown at the Cristobal clubhouse.

Indications are that between two and three hundred men will be in attendance at the camp fire banquet to be held on Thanksgiving eve, November 26, at the Hotel Washington. This banquet is being given for the benefit of Cristobal men, but outsiders are welcome to attend.

Because of the large increase of the girls' gymnasium class it has been divided. The younger girls will meet on Monday at 3.30 p. m., and the older girls on Friday at 3.30 p. m.

Supplies for the Canal.

The following steamers with supplies for the Isthmian Canal Commission and Panama Railroad Company arrived at the ports of Balboa, Colon, and Cristobal during two weeks ending November 8.

Tenadores, October 26, from New York, with 6,891 pieces conduit, 763 packages structural material, for First Division; 28 packages fittings, for fortifications; 102 pieces galvanized pipe, for Mechanical Division; 200 cases lined oil, 8 bales rubber hose, for stock.

Damara, October 26, from Columbia River, with 3,802,509 feet Douglas fir lumber, 224 pieces piling, for stock.

Emil Roas, October 27, from New York, with 224 barrels asphalt, 32 crates paper, for fortifications; 728 bales hay, for stock.

Cartago, October 27, from New Orleans, with 50 pieces piling, for Atlantic Division; 777 barrels paving brick, for Second Division; 45 pieces lumber, 700 cases oil, 593 bales hay, for stock.

Lewis Luckenbach, October 28, from San Francisco, with one case oil burner parts, for Panama Railroad Company; two cases oil burner parts, for Sixth Division.

Colon, October 28, from New York, with 38 boxes lamps, 8 crates electrical machinery, 7 reels cable, 103 cases electrical machinery, 334 pieces structural material, 15 reels cable, 255 bundles steel bars, for First Division; 237 pieces electrical machinery, 14 boxes fire brick, for Mechanical Division; 13 cases pumping apparatus, for Fifth Division; 8 cases dredging sleeves, for Sixth Division; 42 rolls wire fencing, for Panama railroad; 43 pieces pipe and fittings, 5,403 bundles steel bars for Division of Municipal Engineering; 56 pieces material, for fortifications; 4,227 pieces steel bars, for administration building; 461 pieces galvanized pipe, 66 cases water coolers, 22 cases valves and parts, 96 barrels coal tar, 23 reels wire rope, for stock; and a miscellaneous cargo, the whole consisting of 11,721 pieces, weighing 642 tons.

Almirante, October 29, from New York, with 1,393 pieces reinforcing bars, for administration building; 355 pieces pipe, for Mechanical Division; 208 barrels enameled brick, for hydroelectric station; 20 cases washers, for stock.

Turrialba, October 30, from New Orleans, with 141 pieces lumber, 334 bales straw, 380 sacks feed, 746 bales hay, for stock.

City of Sidney, October 30, from San Francisco, with 114 coils manila rope, for stock.

Director, October 31, from Liverpool, with 5 bucket links, 3 reels wire rope, for Sixth Division.

Carrillo, November 2, from New York, with 43 boxes soap, for stock; 22 cases copper nails, for Administration Building; 11 cases electrical machinery,

826 pieces structural material, for First Division, 692 pieces conduit, for Panama Railroad Company.

Prinz Joachim, November 4, from New York, with 100 barrels avenarius carbolinum, for First Division; 122 pieces pipe, for Second Division; 102 cases paper, 362 bales hay, for stock.

Heredia, November 4, from New Orleans, with 78 pieces piling, for Atlantic Division; 102 pieces lumber, for stock.

Advance, November 4, from New York with 58 cases electric lamps, 36 pieces transformer material, for Mechanical Division; 29 cases signal material, 34 reels copper wire, 58 rolls wire fencing, for Panama Railroad Company; 59 pieces structural material, for fortifications; 193 bundles pipe, for Administration Building; 103 cases electrical machinery, for First Division; 48 bags cork, 15 cases lampblack, 324 kegs bolts and rivets, 21 barrels plumbing material, 20 barrels paint, for stock; and a miscellaneous cargo, the whole consisting of 1,337 packages, weighing 116 tons.

Ancon, November 5, from New York, with 595 pieces structural steel, for First Division; 18 pieces electric crane, for Mechanical Division; one road roller, for Second Division; 59,946 bags cement, 300 bundles galvanized sheets, 169 pieces structural steel, 319 packages steel plates, 20 reels wire rope, 250 kegs spikes, 188 kegs rivets, for stock; and a miscellaneous cargo, the whole consisting of 1,857 pieces, weighing 619 tons.

Santa Maria, November 5, from New York, with 75 packages wheelbarrows, 300 cases lined oil, 16 cases miscellaneous material, for stock.

Atenas, November 6, from New Orleans, with 102 pieces pipe, for Division of Municipal Engineering; 164 pieces piling, for Atlantic Division; 228 bales hay, for stock.

Lyra, November 8, from San Francisco, with eight spud timbers, for Sixth Division; 61 cases soap, 4,000 cases Trojan powder, 43 bales rubber hose, for stock.

Rainfall, Nov. 1 to Nov. 8, 1913, Inclusive.

Proposals for Construction of Earth Dike.

OFFICE OF CHIEF QUARTERMASTER,

CULEBRA, C. Z., October 29, 1913.

Sealed proposals will be received at this office until 3 p. m., Thursday, November 20, 1913, and then opened, for the construction of an earth dike, or embankment, containing approximately 71,500 cubic yards of material, at Caño saddle, No. 4, separating Gatun Lake from the drainage area of the Lagarto River. Full information, including plans and specifications, can be secured upon application to this office. Bids must be accompanied by cash, certified check, or post-office money order for five per cent (5%) of amount bid. Proposals should be marked "Proposal for construction of earth dike," and addressed to Captain R. E. Wood, Chief Quartermaster, Culebra, Canal Zone.

MOVEMENT OF OCEAN VESSELS.

The following is a list of sailings of the Panama Railroad Steamship Line; of the Royal Mail Steam Packet Company; of the Hamburg-American Line, and of the United Fruit Company's Line.

CANAL

RECORD

Volume VII.

ANCON, CANAL ZONE, WEDNESDAY, NOVEMBER 19, 1913.

No. 13.

The Canal Record

Published weekly under the authority and supervision of the Isthmian Canal Commission.

The Canal Record is published free of charge, one copy each to all employees of the Commission and Panama Railroad Company whose names are on the gold roll. Extra copies and back numbers can be obtained from the news stands of the Panama Railroad Company for five cents each.

Address all Communications,
THE CANAL RECORD,
Ancon, Canal Zone,
Isthmus of Panama.

No communication, either for publication or requesting information, will receive attention unless signed with the full name and address of the writer.

NOTES OF PROGRESS.

Stability Attained In Naos Island Breakwater.

Railroad communication with Naos Island, over the breakwater fill, was established on November 6, 1912. Since that time, however, it has been broken frequently by slips in the fill, which caused the track to sink and be flooded at high tide. One section, approximately the first quarter of a mile of the 5,400 feet of narrow embankment connecting the island with the outer end of the triangular fill off East Balboa, has proved especially difficult. Dumping heavy pieces of rock from a borrow quarry opened on the west side of Sosa Hill, near the site of the dry dock, on October 7, 1913, along this section, has made the fill stable; the superintendent in charge of the work has expressed the opinion that it requires only a continuance of this procedure to bring the breakwater to full height and width. The resident engineer in charge of the Fourth Division is now preparing plans and estimates to determine just what elevation, width, and slope appear most desirable.

The two steamshovels excavating at the Sosa Hill quarry have supplied to date for the breakwater, approximately 55,000 cubic yards of rock. The rock is a hard columnar basalt, most of which comes out in large pieces, weighing from three to 20 tons, and recently one piece of 30 tons was handled. This heavy material, settling in the earth spoil previously dumped on both sides of the breakwater, forms a firm ridge with sufficient firmness to withstand the forces which have caused the lighter fills to slip. Levels run on November 11 between the triangular dump and Naos Island, a distance of 5,400 feet, showed a marked improvement in the barrier since the similar survey of September 17; the fill has been raised from one to four feet throughout the distance, and widened considerably at the base.

Another 5-yard shovel was set at work at the Sosa Hill quarry on Monday, November 17, and a fourth will be added in a short

time, so that the monthly output will approximate 100,000 cubic yards. Excavation in the quarry is carried down to the same level as that made nearby for tracks and highway, and will be useful as a building site.

Congressional Party Taken Through Gatun Locks.

Clapet No. 4, was lifted through the west flight of Gatun Locks on Tuesday, November 18, with the House Committee on Appropriations and accompanying party on board. The lockage began at 8.54 a. m., and was completed in 54 minutes, the least time required to date for a passage through Gatun Locks. The clapet returned shortly afterward to the Atlantic entrance and the Congressional party inspected Gatun Dam and Spillway, and was taken on a cruise through Gatun Lake in the afternoon, on the tug *Bohio*.

Abandonment of Central Division Office Building.

The old Central Division office building at Empire was abandoned on November 17, when all the maps, profiles, records, etc., accumulated in the operations of that division, which had not been previously transferred to the office of the Fourth Division at Culebra, in charge of steamshovel work, were moved to the new office of the Sixth Division at Paraiso. With the records were moved also a lot of surveying and drafting instruments, office supplies, and furniture. The headquarters of the Sixth Division were formally transferred to Paraiso from Balboa on November 15, a subordinate office being retained at Balboa for the immediate administration of vessels operating in the Pacific entrance channel and the inner harbor at Balboa.

New Building for United Fruit Company.

Work on the United Fruit Company's new office building, to occupy a site on the fill recently made on the Cristobal water front between the fire station and the land end of the mole for the new terminals, was begun on November 7 by forces of the Central American Construction Company. The building will be of reinforced concrete, two stories high, with a concrete roof, and surrounded with a veranda, 11 feet wide. The total length, including the veranda, will be 89 feet six inches, and the depth 66 feet six inches. The ground floor will be occupied by the office forces in the passenger, freight, auditing, and wireless telegraph services of the company, and the second floor will be devoted to apartments for the general agent. The building is to cost between \$40,000 and \$50,000 and be completed in about six months.

Class 601 and Class 201 locomotives will be substituted for all Class 101 locomotives in the Canal service. There are 24 Class 101 locomotives in the transportation service of the Canal Commission, and these will be permanently retired and sold.

RISE OF GATUN LAKE.

Surface on November 17, Was Within Six and a Half Feet of Normal Level.

The rise of Gatun Lake during the first 17 days of November almost equalled the increase in height during any one month since the closing of the Gatun spillway gates. This was due to copious rains which have fallen over the watersheds drained by the Rio Pequeni; one of the principal tributaries of the Chagres, and the Gatun and Trinidad Rivers. These rains, on Monday, November 10, caused a 14-foot rise in the Chagres River, the water height at El Viga on that date registering 141.9 feet, and at Alhajuela, 103.8 feet, making it the greatest freshet since last May. The velocity of the flow at Gamboa bridge at 5.10 p. m., on November 10, was 2.60 miles per hour; at Juan Grande and Mamei, at 6 and 6.20 p. m., respectively, 1.04 miles per hour. The maximum discharge at Alhajuela was 36,000 second-feet at 4 p. m., on the 10th. Another rise in the Chagres to 137.4 feet at El Viga was recorded on the 12th. On November 1, the lake level was at 72.5 feet; at midnight, Monday, November 17, it was at 78.5 feet, a rise of exactly six feet for the 17-day period. The rise by months since the closing of the spillway gates at Gatun on June 27, when the lake level was at 48.25 feet, is given below:

PERIOD.	Feet.
June 27 to July 1, inclusive.....	.5
July.....	5.6
August.....	6.1
September.....	5.6
October.....	6.5
November 1 to 17, inclusive.....	6.0
Total.....	30.3

The last week in October was unusually dry, and the lake during that time only rose .8 of a foot, but rains earlier in the month brought the total for the 31-day period higher than any preceding month. On November 17, the lake lacked 6.50 feet of its normal height of 85 feet, and it is expected that this figure will be attained by the end of the year. Higher than 85 feet, it cannot go at the present time, although the storage level is 87 feet, due to the low Caño saddle, No. 4, which dips to 87.4 feet at the lowest point. Plans are being made to raise this saddle, and bids for the work will be opened on November 20.

Miraflores Lake would have been filled to its normal level of 54½ feet by this time had it not been found necessary to keep it for the present below the 52-foot line. When the level reached 51.2 feet on November 10, the lake was lowered by allowing the water to waste into the sealevel channel by means of the culvert in the west side wall of Miraflores Locks. The spillway could not be used, as the channel below it is being enlarged by steamshovel. Since November 10, the lake level has been kept around the 51-foot mark. During the month of October, 36,000,000 gallons

of water were pumped from the lake at the Miraflores temporary pump station into the mains of the water system for the Pacific end.

The maximum heights of the Chagres River, Gatun Lake, and Miraflores Lake for the nine days ending Monday, November 17, at midnight, follows:

DAY AND DATE.	STATIONS.				
	Vigia.	Alhajuela	Gatun	Frijoles	Miraflores Lake
Sun., Nov. 9...	130.0	95.8	75.1	75.2	50.8
Mon., Nov. 10.	141.9	103.8	76.2	76.1	51.2
Tues., Nov. 11.	132.4	98.1	76.4	76.5	50.9
Wed., Nov. 12.	137.4	100.7	76.9	77.0	51.1
Thurs., Nov. 13.	133.1	98.0	77.3	77.3	50.9
Fri., Nov. 14...	134.3	98.8	77.7	77.7	50.7
Sat., Nov. 15...	129.8	95.5	78.8	78.0	50.9
Sun., Nov. 16...	130.2	95.8	78.2	78.2	51.1
Mon., Nov. 17...	129.3	95.0	78.4	78.5	51.2
Height of low water nearest ft.	125.0	91.0	44.0		

Record of Seismic Movements.

The only seismic disturbance recorded at the Ancon seismograph station during the period between November 1 and 18, inclusive, occurred at 6:54:05 a. m., on Thursday, November 13, and continued, as far as individual perceptibility is concerned, for about five seconds. It was classed as Intensity III, measured by the Rossi-Forel scale, I to X, the maximum amplitude registered being considerably less than that of the heavy shock on the night of October 1. No after shocks followed as has been the case with most of the more pronounced movements theretofore. The location, as indicated by the instruments, was more or less identical with the others in the present series—a point about 115 miles from Ancon, probably southwest. A total of 39 movements was recorded at the Ancon station during the month of October, and, counting the one on November 13, the total is 40 to date.

Case of Smallpox on the "Pachitea."

Juan Piguismán, a member of the crew of the Peruvian steamship *Pachitea*, which arrived off the Culebra quarantine station on Monday, November 10, developed a case of smallpox on Saturday morning, November 15, and was removed to the isolation ward in Santo Tomas hospital. The period of incubation in the case of smallpox is about 14 days therefore, the 7-day period which must elapse from the time a ship leaves an infected port and the time it is released here under the existing Isthmian quarantine regulations, does not protect against this disease. The patient on arrival at quarantine did not show any signs of illness. The usual precautions were taken, all the members of the crew submitting to vaccination. All persons coming through quarantine at Cristobal, Colon, and Balboa and who are to remain on the Isthmus, are vaccinated at quarantine, unless they can show evidence of recent successful vaccination.

Cancellation of Revocable Licenses.

All revocable licenses in the town of Las Cascadas will be cancelled, and all houses there under license will be required to be removed prior to January 1, 1914. All the native houses in this village are covered by revocable license, with the exception of three. All remaining occupants on the lands of Mata-

chin will also be required to vacate the land and remove therefrom before January 1.

In connection with the buildings still remaining in the native section of the former town of Gorgona, the request made of the Commission that the old owners of these houses be granted free transportation by rail or water for the material in them, has been denied. An exception has been made in cases where the former owners have already prepared the material for shipment. To others, a rate of \$2.25 a ton has been made for the railroad haul, and a special rate for the water haul. No authorization, however, will be granted for the removal of any material at this point in the houses now standing, which can be made use of by the Commission.

Report of Railroad Wreck of November 6.

The coroner's jury empaneled to inquire into the circumstances and causes of the collision between train No. 51 of the Panama railroad, and a work train of the Isthmian Canal Commission, between Paraiso Junction and Summit Cabin, at about 11:21 p. m., on November 6, has submitted the following report:

VERDICT OF THE JURY.

We, the undersigned coroner's jury, duly empaneled, having viewed the bodies and heard the statements of witnesses, find, as follows:

That the deaths of John M. Wilkins, Jr., white American, Orren Logan, white American, William Webster, black Jamaican, William Hollins, black Barbadian, Stephen Hunt, black Barbadian, and Alonzo Yearwood, black Barbadian, which occurred about 11:21 p. m., November 6, 1913, resulted from injuries received in the wreck caused by Panama railroad passenger train No. 51, engine No. 656, colliding with work train, I. C. C. engine No. 203, at the hour and date stated. The collision and wreck occurred on the Panama railroad main line track about 100 yards north of "Pacific spur," Cartagenita, between Paraiso Junction and Summit Cabin. A careful consideration of all the evidence submitted causes the jury to believe that the responsibility for the accident rested with the crew of train Engine No. 203, entering upon the track, time, and right-of-way of passenger train No. 51, engine No. 656, and that this action on the part of train crew of engine No. 203, occurred, because they for the moment overlooked the presence of train No. 51, and its position and movements on the road.

(Signed) FREDERICK QUIMBY, GEORGE W. GREEN, J. W. TANNEHILL, Jurors.

Dated at Ancon, Canal Zone, this 14th day of November, 1913.

(Signed) ARTHUR W. KENNEDY, Lieutenant No. 3, Zone Police, Deputy Coroner. C. W. BARBER, Coroner.

Accompanying the report, the coroner's jury appended the following recommendations:

In summing up the evidence submitted, we, the coroner's jury are of the opinion that if the block system was maintained for the full 24-hour day, and the responsibility of all trains entering or leaving blocks was placed in the hands of the dispatcher or operators, we feel that accidents of this nature can be avoided. Also, the question of long daily service of train crews should be taken into consideration and that no crews should be allowed to work longer at one time than the regular established hours of service, except in cases of emergency.

(Signed) FREDERICK QUIMBY, GEORGE W. GREEN, J. W. TANNEHILL, Jurors.

Upon the recommendation of the acting superintendent of the Panama railroad, the installation of an automatic signal system between Paraiso Junction and Summit Cabin has been authorized, at an estimated cost of \$12,000. The superintendent of signal apparatus and telegraph and telephone service for the railroad has begun a survey in carrying out this provision.

Damage to Rolling Stock in Wreck.

Locomotives Nos. 656 and 203, damaged in the wreck of November 6, are undergoing repairs at Empire shops. Damage to No. 656 was principally in the tender, which was practically demolished, the oil-burning

mechanism, the rear drivers and rear portion of frame broken; to No. 203, in the trucks of the tender, the cab and all cab fixtures, and the reversing mechanism. Following is the estimated cost of repairs and replacement of all the rolling stock damaged in the wreck: Locomotive No. 656, \$1,800; locomotive No. 203, \$1,250; first-class passenger coach No. 114, \$250; second-class passenger coach No. 210, \$30; 50-ton steel flat No. 466, \$700; total, \$4,030.

Obituary.

John M. Wilkins, Jr., the conductor in the Second Division transportation service, who was killed in the railroad accident on the Panama-Bas Obispo line on the night of November 6, was 39 years of age, married, and had been on the Isthmus since October 27, 1907. The body was shipped to his former home at Bowling Green, Ky.

Orren Logan, the locomotive engineer in the Second Division transportation service, who met death in the same accident, was 33 years of age, and had been on the Isthmus since July 25, 1906, coming here from Fort Wayne, Ind. He is survived by his wife and two children. His mother, Mrs. E. M. Logan, resides at No. 1009 High Street, Fort Wayne.

A Correction.

Seattle, Wash., October 21, 1913.

THE CANAL RECORD:

In THE CANAL RECORD of October 1, I find the following, referring to the passage of a tug through Gatun Locks:

"The filling of the lock chambers occupied a longer time than normally, because of the small displacement of the tug; in the case of large vessel, much less water would have been used."

Is this correct? Does the size of the vessel make any difference in the quantity of water let into or run out of the lock chamber during the change of level? Would any more water be required with no vessel at all than for a vessel that completely filled the lock chamber? If so, my education in this respect has been in vain.

H. M. CHITTENDEN.

[Gen. Chittenden is right. The statement referred to is incorrect.]

Singer Sewing Machine Company Wants Men for Latin-America.

The Singer Sewing Machine Company, through its agent in Panama City, has advised the Chairman of the Isthmian Canal Commission that, in view of the extension of its organization throughout Latin America, it is in a position to offer opportunities to men of high character and ability, who can furnish first-class references. A knowledge of Spanish is indispensable. All communications should be addressed to Mr. Edward Nadro, agent, Singer Sewing Machine Company, Panama, R. P.

Ancon Crusher.

Following is a statement of rock crushed at Ancon quarry for the week ending November 15:

DATE.	Hours worked.	Cubic yards.
Nov. 10.	6 50	1,902
Nov. 11.	6 15	1,111
Nov. 12.	6 20	1,807
Nov. 13.	7 10	1,472
Nov. 14.	6 40	1,641
Nov. 15.	6 25	2,229
Total.	39 40	10,162

WORK AT CUCARACHA SLIDE.

Dipper Dredge Replaces Ladder Dredge—Sluicing in the Rear of Slide.

The dipper dredge *Mindi* took the place of ladder dredge No. 5 last week in excavating on the north side of Cucaracha slide, and No. 5 was transferred to Gamboa dike. The *Mindi* had been working from October 24 to November 12 at the base of the east Culebra or Gold Hill slide; the dipper dredge *Chagres* continues at the base of the west Culebra slide. On the south side of Cucaracha slide, the ladder dredge *Marmot* has been engaged steadily since November 8, when it supplanted pipeline suction dredge No. 85, transferred to Miraflores Lake.

To November 18, the dredges working on the north side of Cucaracha slide had advanced a channel 50 to 150 feet wide and about 20 feet deep at the contemporary level of Gatun Lake, from the northern limit of the slide at Gold Hill, station No. 1805, to station No. 1811, a distance of 600 feet. Beyond this the barrier bulks largest in the channel, and along most of the site of the drainage ditch through which water was passed into the south end of the Cut, a distance of about 100 feet, the present clearance is scarcely more than 20 feet wide, with a depth of approximately 16 feet. South of this for 100 feet, the obtrusion of the slide is less and the water broadens into an elliptical lagoon, about 200 feet wide and 400 feet long. Dredge *Marmot* has advanced from station No. 1820 to station No. 1815, plus 50 feet, through the southern end of the slide and ditch breaking into this lagoon, making a channel about 100 feet wide. The dredges are now about 450 feet apart.

Some of the discharge pipe which was installed on the 95-foot berm on the west bank, below Contractor's Hill, and above, in the valley of the Rio Grande, beyond the booster pumpstation, is being taken up and transferred to the present sites of operation of dredges No. 85 and No. 86. A small, soggy slide has developed immediately north of the relay station, but it is being handled by sluicing with 3-inch pipe and hose, connected with the Rio Grande pumping station. The greater part of the discharge pipe will be kept where laid, in readiness for future operations with the pipeline dredges.

ATTACKING THE SLIDE FROM THE REAR.

The hydraulic excavating system which has been sluicing material from the top of the slide north of Gold Hill back into the valley to the east, away from the Canal, since June 16, has been extended, so that the monitors may cut through a saddle south of Gold Hill and assist in handling some of the material involved in Cucaracha slide. A relay station on the southeast slope of Gold Hill at elevation 425 feet above sealevel, was placed in trial operation on November 6 and has since been supplying a monitor on the east slope of the saddle with water at a pressure of 150 pounds to the square inch. The booster pump in this station is direct-connected to a 350-horsepower induction motor, to which current is supplied from Miraflores power station through a transformer station along the Canal south of Gold Hill, which transforms the current from its transmission voltage of 11,000 to 2,300 volts. A second similar relay pump is now being installed at the station to allow the operation of another monitor; and at the source of water supply, near New Culebra passenger station, a third 7,500-gallon pump-

ing unit operated by a 24-inch triple expansion Worthington horizontal engine, is being installed alongside the two already transferred there from the old Agua Dulce plant, south of Miraflores Locks.

The flume from the Cucaracha saddle disposes of the spoil in a valley with a general elevation of about 250 feet above sealevel. The outer edge of the slide at this point is about 565 feet above sealevel, 1,800 feet east of the center line of the Canal, and it is estimated that between 1,000,000 and 1,500,000 cubic yards of material can be sluiced away from the Cucaracha slide area. After the limit of practicable outward sluicing has been reached, the equipment may be used to wash material from the face of the slide down into the Canal, to be handled by pipeline suction dredges, and clean away the moving earth until a firm face of rock is exposed.

Construction of Seawall at Cristobal.

Forces of the Panama railroad are engaged in building a concrete seawall along the front of the fill recently made between the Cristobal fire station and the land end of the mole for the new piers, to be occupied by steamship companies' buildings. The wall is made of cubes of concrete, one yard on the side, formerly used for riprapping the waterfront along Roosevelt avenue, which are laid in brick style, two and three tiers deep, and faced above the water line with a wall of concrete, one foot thick. The wall is surmounted by a concrete coping, 18 inches wide and six inches thick, with its top five feet above mean sealevel, the same elevation as the top of the seawall extending from the Colon passenger station to Cristobal. Its total length will be about 350 feet. Material for backfilling is supplied from the excavation for the United Fruit Company's building.

Canal Excavation in October.

The grand total of Canal excavation to November 1 was 212,625,216 cubic yards, leaving to be excavated under the revised estimate of July 1, 1913, 19,727,784 cubic yards.

The total excavation for October was 1,642,851 cubic yards. The wet excavation for the month was 1,263,181 cubic yards, and the dry excavation 379,670 cubic yards.

In the Atlantic section, the total excavation for October was 419,873 cubic yards. Of this amount all but 1,383 cubic yards was wet excavation, and consisted of material dredged from the Atlantic entrance to the Canal, the slip alongside the new east breakwater dock, and at the Cristobal terminal, by forces of the Sixth Division.

The total excavation in the Central Division was 539,833 cubic yards, 238,900 cubic yards of which were classified as dry excavation, and 300,933 cubic yards as wet excavation. The dry excavation was wholly confined to taking material from the banks of Culebra Cut in the zone of slides by forces of the Fourth Division. The wet excavation was divided between dredging in Culebra Cut at the toes of Cucaracha slide and opposite the east and west Culebra slides, 62,330 cubic yards; dredging operations in the lake channel near Gamboa, 132,703 cubic yards, all by forces of the Sixth Division; and hydraulic work at Gold Hill, 105,900 cubic yards, by Fifth Division forces.

In the Pacific section, operations by the Sixth Division resulted in the removal by dredges of 543,758 cubic yards, 433,098 cubic

yards from the Pacific approach to Miraflores Locks, and 110,660 cubic yards at the Balboa terminal site. Excavation by steamshovels around Balboa amounted to 139,387 cubic yards, 122,241 cubic yards of which were taken from the dry dock site.

A detailed statement of excavation, and a summary of the work on the locks and dams, follow:

Mean rainfall along Canal (nine stations), 11.09 inches. By "Work" excavation is meant excavation actually made for one of the constituent parts of the Canal, such as prism, diversions, or locks, etc., that is, it represents material taken from the area to be occupied by the Canal and constitutes excavation useful for the completed Canal.

By "Plant" excavation is meant excavation outside any of the constituent parts of the Canal, such as prism, diversions, or locks, etc. It includes material necessary to be excavated for construction purposes only, and is chargeable against the particular plant item for which it is performed, such as prism, diversions, locks, etc.

United Spanish War Veterans.

Chagres Camp will hold a meeting in the lodge hall, Cristobal, on Saturday, November 22, at 8 p. m.

CONCRETE TILE BLOCKS.

Operation of Plant for Manufacture of Material For Permanent Structures Begun.

Operations at the new factory for the manufacture of hollow concrete tile blocks designed for use in some of the permanent structures of the Canal, but primarily for the new Administration Building at Balboa, were begun on Monday, November 10. The plant is located under the same roof as the new cement shed, situated on the west side of the railroad track at Corozal. The process is the invention of A. A. Pauley, and is known as the "Wet," or "Steam" method in contradistinction to what is ordinarily called the "Dry" process. The exclusive right of manufacture on the Isthmus was acquired by the Canal Commission, and the inventor personally supervised the installation of the moulding machinery.

Concrete for the blocks is mixed in the following proportions: Four and a half parts of Punta Chamé sand; six parts of screenings from Ancon quarry, and three parts of cement. The materials are hoisted by an elevator to a platform at the top of the building and dumped into a $\frac{3}{4}$ -cubic yard concrete mixer. This mixer discharges by means of a 2-way chute into two wooden troughs, each served by a agitator, consisting of an iron rod to which are attached a series of blades. The agitators move forward and backward horizontally, the passing of the blades through the mixture serving to keep it constantly stirred up. The object of the agitators is to prevent the concrete from stiffening and to give it the proper age. The agitator troughs are provided with valves, one to each of the 12 moulding machines. These machines are arranged in two rows, six machines on each side of the agitator troughs, and are capable of producing blocks of the following sizes: 12 by 12 by 18 inches, for foundations, or walls; 8 by 12 by 12 inches, for main walls; 8 by 8 by 16 inches, for corners; 6 by 12 by 12 inches and 4 by 12 by 12 inches, for partitions; and 3 by 12 by 12 inches, for interior columns.

Each moulding machine is of cast steel construction; they are raised a short distance, thus placing the top of all machines on a level line 65 inches above the floor, and are capable of turning out four blocks at a single operation, except the 12 by 12 by 18-inch machines, which turn out three blocks per operation. The forms are enclosed within a double cast steel lining with a space between for the admission of steam. In moulding a block, the first step is to insert a cast iron frame, called a palette, having the shape of the solid portion of the required block, at the bottom of the mould; this acts as a base and support for the block. The valve in the agitator trough is then opened, and the concrete is allowed to flow down a short chute to the top of the mould. The workman in charge of the machine, using a trowel, then diverts the thin or wet concrete into the crevices around the forms until all are filled level with the top. Steam which may be graduated to the desired pressure by a series of valves located beneath the machine, is then turned on for a period of four minutes. The steam causes the mixture to heat until a sufficient amount of moisture is evaporated and the thin concrete stiffened so that it will stand alone, when it is turned out of the mould by means of a crank, which pushes the palette,

and the block which rests upon it, upward until they are in the clear above the top of the machine. Careful handling at this stage is necessary, the blocks being lifted from the mould and transferred to short lengths of wooden planking placed on receiving racks, or elevators, by means of a wooden device which clamps the sides of the block closely and also fits beneath the palette. There are six of these receiving racks or elevators, so constructed that when the first plank or shelf is loaded with tile, the turning of a crank lowers the shelf about 20 inches and another plank is placed, for loading, on the angle iron brackets which automatically appear at the top of the rack; this result is obtained by spacing brackets, at equal distances of $19\frac{5}{8}$ inches, along four endless chains which pass over sprockets actuated by the crank. Each elevator has a capacity of four loaded shelves. The elevators are set with the top shelf on a level with the top of the tile-making machinery, and each elevator serves two machines. The blocks are removed from the elevator to the curing rooms, or alleys, by a special truck provided with arms, which, when extended under the elevator shelves, and raised by means of a lever on the truck, remove the planks and their loads, from the elevator, the same resting securely on the arms of the truck.

The curing rooms consist of 24 galvanized iron compartments, each about 45 feet long, four feet wide and eight feet high, entirely enclosed, and equipped with racks in tiers. Twelve of these compartments are situated on one side of the plant, and 12 on the other. In these rooms, the blocks are given their perfecting treatment, which consists of a combined steam and water-dripping process, calculated to facilitate the setting up and hardening of the blocks, so that within a period of 48 hours, they are ready to be removed to the storage yard.

Each mould is attended by one man, with a helper for each two machines. The men now employed are all new to the work, and have not yet attained proficiency. It is proposed to place a double shift in effect shortly, one shift working from 7 a. m., to 3.30 p. m., with a half hour for lunch, and the other shift working from 3.30 p. m., until midnight, with a half hour for supper. Under this arrangement, with the plant operated at its maximum capacity, it is estimated that about 5,000 blocks can be produced during the 16 hours of labor. The loss in defective output is expected not to exceed .02 per cent.

The storage yard consists of a large space adjacent to the plant on the west, which has been leveled off, with trucking ways concreted through it. A railroad track for loading the blocks on cars extends along the outer side of the yard.

Each unit of the machinery is operated by individual electric motors, the power being furnished from the Miraflores station. Steam is generated by two boilers located in a shed outside the plant. One of these boilers was taken from the old carpenter shop at Gorgona, and the other from stock in disuse at Mount Hope.

The plant is under the general charge of Mr. Frank Holmes, the resident engineer, permanent buildings, Quartermaster's Department, and is under the direct charge of Mr. C. E. White.

COMMISSION CHAPLAINS.

Only Two Retained Dating from November 15—Others Appointed to Honorary Positions.

A reduction in the number of chaplains in the service of the Isthmian Canal Commission became effective on Saturday, November 15, the order applying to the following: Rev. Harry Compton, pastor of the seaway Methodist church, Panama; Rev. J. L. Wise, superintendent of the Baptist Mission under the Southern Baptist Convention; Rev. S. Moss Loveridge of Culebra; Rev. Carl H. Elliott, pastor of the Union Church, Cristobal; Rev. Charles O. Purdy, pastor of the undenominational work at Gatun; Rev. Edward J. Cooper, rector of Christ Church, Colon; and two priests of the Roman Catholic missions, Father Ferdinand Allot of Empire, and Father P. José Volk of Colon.

In view of the services performed by the above chaplains, the Chairman decided to permit their reemployment on the following day in the positions of honorary chaplains, which positions will carry no compensation, but will entitle the holder to all privileges and allowances of an employee on the gold roll drawing \$1,200 a year. The services of the above chaplains are to be regarded as continuous in respect to quarters.

The executive council of the Union Church of Cristobal has decided to maintain the church work as usual, retaining the services of the pastor, the Rev. Carl H. Elliott. Mr. Elliott will also continue to hold services at Corozal as recently organized. The Rev. Charles O. Purdy will leave on December 1; until that time the services at the chapel will be held as usual. The Baptist mission work will be continued as heretofore, being maintained by the mission board of the Southern Baptist Convention. The mission owns two dwelling houses for its missionaries, one at Gatun, and one at Empire, and holds a lease on the house of the pastor at Culebra. No change will be made in the work of the Roman Catholic missions at Empire, under the Rev. Father Allot, and the Church of the Immaculate Conception, Colon, under Father Volk, will continue as usual. At present the chaplaincies of Ancon Hospital are held by the Rev. Father Quijano, Roman Catholic priest, and the Rev. H. R. Carson, Episcopal clergyman. During the absence of the latter on special leave, the work of Ancon Hospital and St. Luke's hospital chapel is maintained by the Rev. Edward J. Cooper of Christ Church, Colon, who is dividing this duty with that of his own church.

Balboa Sand Service.

A report of sand shipped from Balboa during the month of October, follows:

DESTINATION.	Number cars.	Cubic yards.
Fifth Division.....	927	16,277
Panama railroad.....	58	1,436
Central Division.....	41	815
Fortifications.....	287	5,409
First Division.....	7	105
Division of Municipal Engineering.....	88	1,922
Panama Tramways Company.....	1	25
Quartermaster's Department.....	6	138
Republic of Panama.....	2	46
Total.....	1,417	26,123

Colonel Hodges, Lieutenant-Colonel Dickson, and Capt. R. E. Wood have been appointed a committee to consider the question of providing suitable storage at some convenient point for repair parts, supplies, etc., for the lock gate operating force.

SOCIAL LIFE OF THE ZONE.

Woman's Clubs.

There will be a third meeting of the Cristobal Woman's Club on Wednesday afternoon, November 26, when Miss Mary E. Woolley, president of Mount Holyoke College, will be the speaker. This meeting will take the place of the regular meeting scheduled for December 3. There will be only one meeting in December, the date of which will be announced later. The Cristobal Woman's Club wishes to state that no invitations to join their organization are given. Women wishing to become members will be welcomed at any time and it is necessary only to send the name to the secretary, Mrs. E. G. Whitney. Upon election to membership, the new member is asked to subscribe to the club pledge which is, as follows:

"Holding worthy of unfailing loyalty my membership in the Cristobal Woman's Club, I will sustain its good work and guard its reputation."

There will be no meeting of the Ancon Study Club on Thursday, November 27, Thanksgiving Day. The regular meetings will be resumed on the following Thursday, December 4.

The American Bible Society.

In the general article on the work of the American Bible Society published in THE CANAL RECORD of November 5, the statement that the report covered the work of the society in Central America, Colombia, and Panama was incorrect. The agent who is temporarily living in the new Baptist parsonage at Cristobal has charge of the work in the Republic of Panama and the Canal Zone. The sales of books for the entire district by the society's agent for the period between February and November, 1913, in Panama and the Canal Zone, amounted to nearly 9,000.

Church Work.

The monthly meeting of the Isthmian Ministers' Association was held in the Union Church, Cristobal, on Monday afternoon, November 10. The subject for discussion was the evangelization of the world in this generation, which is the slogan of the student volunteer movement. Those taking part were the Rev. C. G. Hardwick, pastor of the Wesleyan Methodist Church, Panama, and head of the mission for the Isthmus, the Rev. S. Moss Loveridge, of Culebra, the Rev. Carl H. Elliott, of the Union Church, Cristobal, and the Rev. Charles O. Purdy of Gatun. The association has circulated a letter among ministers and others in the Canal Zone urging the holding of services on Thanksgiving day in which special reference is to be made to the practical completion of the Panama Canal.

At the meeting of the Ladies' Aid Society of the Union Church, Cristobal, held in the church on Tuesday afternoon, November 11, Mr. Lum, a Chinese merchant of Colon, was the speaker. He delivered his address in English, and told of the early history of China, the religions, the dress for men and women, marriage customs, and domestic life. At the close of the program, tea was served, Mrs. Lum, the wife of the speaker, presiding at a table decorated with flags and the Chinese colors, over which Chinese lanterns were suspended.

The Wesleyan Methodist Church in the Canal Zone and Panama celebrated the

centenary of the founding of the mission of the church during the week beginning November 3. Public meetings were held at the various stations, which are located at Colon, Gatun, Frijoles, and Panama. The mission was established on the Isthmus in 1882.

Christ Church, Colon beach, will hold its annual anniversary services on Sunday, November 23. The parish communion will be at 7.30 a. m.; eucharist, with special music, at 10.30 a. m.; a flower service will be held at 4 p. m., and choral evensong will be at 7.30 p. m. On Thanksgiving Day, there will be a service at 9 a. m.

The Elysius James Fund.

The Elysius James education committee held a meeting in the Hotel Tivoli on Monday, November 10, for the purpose of receiving the reports on the progress of the 200-dollar fund to complete the payment for the education of the blind boy in the Perkins Institute at Boston. The result of the committee's work far exceeded the expectations of the members; enough money has been subscribed not only to complete the payment for the current year in the institute, but to leave a deposit of \$50 at the school to pay the expenses of his return to the Isthmus and to keep an amount of money here in trust which will be used for his immediate expenses after the close of the school year in June. The two years of study will place the boy on a self-supporting basis; he will be able to take up chair caning, and basketry, and will be sufficiently schooled to write a good letter, work in mathematics, and read such books as may be procured for him. He will also have a knowledge of the rudiments of music. The reports from the institute show that he has done unusually well in all his work.

The committee has decided to carry on the philanthropy of sending a Christmas box to the inmates of the Government leper asylum at Palo Seco, which was a special work of the Canal Zone Federation of Women's Clubs for six years, from 1907 to 1912. Contributions in money for the purchase of the articles, which consist of a personal gift for each inmate, and one general gift, an outdoor game, which may be enjoyed by all, may be forwarded to the treasurer, Mrs. J. E. Westberg, Empire. They should reach Mrs. Westberg not later than December 1.

New Principal of Canal Zone High Schools.

Miss Jessie E. Daniels, formerly principal of the Canal Zone high school at Gatun, has been appointed principal of the consolidated high schools with regular duty at Ancon, vice A. R. Lang who was appointed superintendent of schools on October 18. Miss Daniels has been a member of the teaching staff of the Canal Zone schools since November, 1908. She is a native of Canton, Ohio, and a graduate of the Western Reserve University.

Changes in the Salvation Army.

Adjutant E. C. Grimes has been called from headquarters at Jamaica to take charge of the work of the Salvation Army in Panama and the Canal Zone in the place of Adjutant Catlin, who has been recalled for assignment to duty elsewhere. Adjutant Grimes arrived on the Isthmus recently, and is looking over the work with a view to being prepared for emergencies in the increase of calls for assistance as the work on the Canal approaches an end. The territorial commander, Colonel Charles Roth-

well, spent a few days on the Isthmus last week in the course of a visit to Barbados and other islands of the West Indies. He will proceed to England, and return in January to spend a short time here. Arrangements have been made for the visit of one of the traveling evangelists of the Salvation Army, Colonel John Roberts. He will arrive about February 1, and conduct a 17 days' mission in the Canal Zone. The army has opened a new hall with officers' quarters in the Guachipali district, Panama City. The hall was dedicated on Sunday, September 28.

PERSONAL.

Mr. John Purroy Mitchel, mayor-elect of New York City, accompanied by Mrs. Mitchel and a party of six, will arrive at Colon on Sunday, November 23, on the *Tenadores* of the United Fruit Company's service, on a visit to the Canal.

Mr. Robert Bacon, representative of the Carnegie Endowment in the interests of international peace, arrived on the Isthmus on the steamship *Mantaro* of the Peruvian Line, on Tuesday, November 18, from Lima. He has been engaged in delivering a series of lectures in the interest of the peace movement in various parts of South America. He visited the Canal work and was given an audience by President Porras on Wednesday, November 19. He will sail for the United States on Thursday, November 20.

Railroad Telegraphers.

The Order of Railroad Telegraphers, Panama Railroad System Division, No. 158, recently instituted, held an election of officers at a meeting in the lodge hall at Paraiso on November 15, as follows: Frank Kinsman, chief telegrapher; J. F. Stahl, general secretary and treasurer; C. S. Baber, first vice-chief telegrapher; H. J. Linde, second vice-chief telegrapher; E. I. Barnard, past chief telegrapher; P. L. Malone, marshal; Earl Orr, inside sentinel; J. N. Fuller, outside sentinel. Meetings are subject to the call of the general chairman, Frank Kinsman.

St. Mary's, Star of the Sea.

Mass is celebrated at the church of St. Mary, Star of the Sea, Balboa, at 9 a. m., on Sundays; Sunday school at 8.30 a. m. Father Pouget, the pastor, is at home to visitors on Wednesdays, afternoon and evening, and holds services on Thursdays at 8 a. m.

V. PEREZ, Assistant Priest.

Balboa, C. Z., November 17, 1913.

Concrete Work at the Locks.

The following is a statement of the concrete laid in the Canal locks and auxiliary works up to November 1, 1913:

Gatun Locks.....	2,050,193.20
Gatun Spillway.....	230,443.00
Gatun hydroelectric station.....	7,295.03
Gatun duct line.....	1,919.00
Pedro Miguel Lock.....	911,851.10
Miraflores Locks.....	1,487,650.10
Miraflores Spillway.....	73,497.00
Pedro Miguel-Miraflores duct line.....	4,616.00
Total.....	4,767,464.40

Orchid Chapter, No. 1, Order of the East-ern Star, has adopted a resolution memorializing the death of Martha Wilson, which will become part of the records of the order. The committee signing the document is, as follows: Annie L. Calvit, P. W. M., Stephen E. Calvit, Minnie H. Kosier, and Katherine R. Casey.

OFFICIAL CIRCULARS.

Board of Survey and Appraisal Abolished.

CULEBRA, C. Z., November 12, 1913.

CIRCULAR No. 399-D:

Effective at once, the Board of Survey and Appraisal created by Circular No. 399-c, dated September 10, 1913, is abolished and the duties of that board, as outlined in Paragraph 5 of Circular No. 399-n and subsequent instructions, will be assumed by the Chief Quartermaster, with the exception that:

The surveying officer and the assistant surveying officer will continue to pass on all surveys of public property presented to them, and, in general, perform the duties assigned to them prior to the creation of the board of appraisal, except that they will not fix or recommend prices on any item of material, supplies, and equipment for sale.

In the future, prices on all second-hand, surplus, or obsolete material, supplies, and equipment of the Isthmian Canal Commission and of the Panama Railroad Company available for sale, will be fixed by the Chief Quartermaster, and after such prices have been approved by the Chairman, the Chief Quartermaster may proceed to effect sale to the best interests of the Government without further authority, except in such cases as may be required to be submitted to the Secretary of War for approval.

The Chief Quartermaster will be required to keep proper and detailed records showing the manner and basis on which all prices are fixed, and full information as to all sales effected. He will, at the close of each month, submit to the Chairman a complete report of all sales made during that month.

The Chief Quartermaster is authorized to call upon the Mechanical Division, or any official or employee of the Commission or Panama Railroad, for any necessary data or assistance in connection with fixing prices on material and equipment.

GEO. W. GOETHALS,
Chairman and Chief Engineer.

Encroachments on P. R. R. Right-of-Way.

CULEBRA, C. Z., November 8, 1913.

HEADS OF DEPARTMENTS AND DIVISIONS:

Your attention is invited to circular No. 182, dated June 15, 1908, reading, as follows:

"No encroachment of any kind by employees of the Commission will be allowed on the right-of-way, station grounds, or tracks of the Panama railroad, until after same has been duly authorized by the general manager of the Panama railroad."

"Right-of-way" shall be understood to cover a strip of ground 25 feet in width, measured from the center line of the nearest track and on both sides of the center line.

"Station grounds" is intended to cover all land between switches, irrespective of its width.

"Tracks" cover all tracks or sidings of the Panama railroad over which trains and switch engines may operate.

Any work that may interfere with the trains or switching service of the Panama railroad, whether adjacent to, or crossing tracks, will be performed by employees of the Panama railroad after receipt of properly signed work order; or, if requested by the Panama railroad, may be performed by the Commission under the general direction of the Panama railroad."

It has been brought to my attention that the instructions contained in the above circular are not being strictly adhered to. Please issue the necessary instructions to all concerned.

GEO. W. GOETHALS,
Chairman, Isthmian Canal Commission,
President, Panama Railroad Company.

Rates for Use of Cristobal Dry Dock.

CULEBRA, C. Z., November 1, 1913.

CIRCULAR No. 169-O:

Effective November 1, 1913, the following rates will be charged for use of the Cristobal dry dock:

FOR COMMISSION EQUIPMENT.

\$40.00 for first day,
\$15.00 per day thereafter.

FOR INDIVIDUALS AND COMPANIES.

Alone—\$75.00 for first day,
\$25.00 per day thereafter.

With another vessel—

\$50.00 for first day,
\$18.00 per day thereafter.

GEO. W. GOETHALS,
Chairman and Chief Engineer.

Panama Railroad Passenger Terminal in Panama.

PANAMA RAILROAD COMPANY.

OFFICE OF GENERAL SUPERINTENDENT.

COLON, R. P., November 14, 1913.

G. S. BULLETIN No. 18:

To All Concerned—The south end of the new Panama station building will be put into service on Sunday morning, the 16th instant, and will be used for first-

class passengers. The ticket seller now occupying the temporary booth on the alighting platform, will be moved to his regular place in the station building and serve both first and second-class passengers.

F. MEARS,
Acting General Superintendent.

Sailing of the "Cristobal."

PANAMA RAILROAD COMPANY.

OFFICE OF GENERAL SUPERINTENDENT.

COLON, R. P., November 13, 1913.

CIRCULAR No. 280:

To All Concerned—The sailing date of the steamship *Cristobal* has been set for 12 o'clock noon, Saturday, November 22, 1913, from Pier 11, Cristobal.

F. MEARS,
Acting General Superintendent.

Rainfall, Nov. 1 to Nov. 15, 1913, inclusive.

Supplies for the Canal.

The following steamers, with supplies for the Isthmian Canal Commission and Panama Railroad Company arrived at the ports of Colon and Cristobal during the week ending November 15:

Panama, November 9, from New York, with 28 cases solder, 368 pieces structural steel, First Division; 10 crates metal caging, 6,723 bundles steel bars, 450 pieces concrete steel, Second Division; 100 pieces pipe, Sixth Division; one road roller, Division of Municipal Engineering, 25 bundles steel bars, Administration Building, 30 boxes varnish, 534 bundles galvanized sheets, 11 bundles lubricating grease, 50 cases lubricating grease, 19 drums lubricating oil, 18 pieces steel plates, for stock; and a miscellaneous cargo, the whole consisting of 8,654 pieces weighing 839 tons.

St. Andrew, November 8, from Baltimore, with 1,386 pieces structural material, Second Division; 59 cases castings, 40,500 pieces clay conduit, First Division; 48 pieces dredge parts, Sixth Division; 601 pieces steel, fortifications; 400 pieces sewer pipe branches, 5,884 pieces pipe and fittings, Division of Municipal Engineering; 50 car wheels, Mechanical Division; 102 cedar logs, Lighthouse Division; 691 cases gasoline, 29 cases blasting material, 1,413 barrels sulphate ammonia, 30,000 arch brick, 8,800 pieces vitrified tile, 250 cases turpentine, 163 pieces sewer pipe, 83 boxes window glass, 155 boxes window glass, 413 cases paint, 903 bales hay, 38 barrels gasoline, 50 cases lard oil, 30 cases benzene, for stock.

Pastores, November 9, from New York, with four reels copper cable, 40 cases electrical machinery, First Division; 59 cases electrical machinery, Mechanical

Division; 1,100 galvanized water pails, 60 cases paint, for stock.

Carl Schurz, November 10, from New York, with 184 pieces pipe, Second Division; 140 cases paper, 19 kegs bolts and nuts, stock.

Parissima, November 10, from New Orleans, with 90 pieces pipe and fittings, Mechanical Division; 120 sacks dairy feed, 563 bales hay, 62 pieces pipe-fittings, for stock.

Nession, November 11, from Liverpool, with five dredge bucket lips, Sixth Division; 155 barrels crude carbolic acid, for stock.

Metapan, November 12, from New York, with 1,655 crates insulators, 545 pieces structural material, First Division; 22 pieces structural material, fortifications.

Sixaola, November 13, from New Orleans, with 180 pieces piling, Atlantic Division; 108 pieces oak timbers, Sixth Division; 334 boxes paste, 154 bales rice straw, 11,726 pieces lumber, for stock.

Red Cross Finances.

The financial statement of the Canal Zone Chapter, American National Red Cross, for the month of October, 1913, follows.

RECEIPTS.		
October 1, On hand	\$2,809.79	
27, Received on account of Red Cross ball ..	67.25	\$2,677.04
DISBURSEMENTS.		
October 2, Relief of Chilean family stranded at Panama		\$10.00
6, Services, Hotel Tivoli, account of Red Cross ball		32.00
15, Relief of patient, Ancon Hospital		3.00
17, Printing account of ball		65.47
17, Use of rooms, Hotel Tivoli, for ball		4.00
21, Deportation of patient, Colon Hospital		10.00
23, Relief of American family at Ancon		35.00
28, Relief of American from South America		35.00
28, Printing badges for ball		5.61
31, Relief of destitute employee, Ancon		2.00

\$ 202.08

October 31, Balance on hand

Approved: EDW. SCHILOHAUER,
Chairman.

JOHN L. PHILLIPS,
Treasurer.

Married.

CLINE-BURDETTE—In the Union Church, Cristobal, on November 11, Gail Gordon Burdette of Atlanta, Ga., to William Joseph Cline of Malden, Mass., the Rev. Carl H. Elliott officiating.

RANDOLPH-LAYLAND—At Christ Church, Colon beach, on Saturday, November 8, Eleanor Dorothy Matilda, daughter of Captain and Mrs. Sydney Layland of London, England, to Edward Sydney Randolph of New Orleans, Louisiana, the Rev. Edward J. Cooper officiating. Canal Zone residence, Culebra.

BEVERLY-SNABLEY—At Christ Church, Colon beach, on Tuesday, November 11, Pearl Lorene Snabley of Palestine, Texas, to Mr. Robert Beverly of Virginia, the Rev. Edward J. Cooper officiating. Canal Zone residence, Colon.

Cold Storage Prices.

Prices of cold storage supplies sold at the commissaries, as listed in THE CANAL RECORD of November 12, remain unchanged with the following exceptions: Cucumbers, advanced to 14 cents a pound; Jamaican oranges reduced to 14 cents a dozen; rabbits, unskinned, at 30 cents each, added to stock.

Sale of Cows at Ancon Hospital.

ANCON, C. Z., November 11, 1913.
There will be sold at public action at the Ancon Hospital dairy on Saturday morning at 10 o'clock, November 29, five cows. The right to reject any and all bids is reserved.

A. B. HERRICK,
Acting Superintendent.

LOST—In Colon, or Cristobal, one gold watch, hunting case, initials F. E. H. engraved on back. Gold lock- et on fob engraved in same way. Finder please return to office of Division of Municipal Engineering, Cristobal.

COMMISSION CLUBHOUSES.

Activities of the Young Men's Christian Association.

GENERAL.

The standing in the all-Isthmian chess tournament on November 17 was, as follows: Culebra had won 32½ points, Empire, 21½, Gatun, 17, Cristobal, 16.

The standing of the teams in the basketball league on November 17 was, as follows:

Team.	Won	Lost	P. C.
Empire.....	8	0	1.000
Camp Elliott.....	7	3	.700
Gatun.....	6	3	.667
Cristobal.....	3	4	.429
Culebra.....	2	7	.222
Corozal.....	0	8	.000

The standing of the teams in the all-Isthmian bowling league on November 17 was, as follows:

Team.	Won	Lost	P. C.
Cristobal.....	13	2	.857
Empire.....	12	6	.667
Culebra.....	11	7	.611
Corozal.....	10	8	.556
Gatun.....	2	13	.133
Camp Elliott.....	0	12	.000

COROZAL.

Over 300 were present on Thursday night to see the photo-play, "Quo Vadis?" The regular weekly moving picture show was given on Tuesday.

The Corozal basketball team defeated the Ancon team for the second time on Friday by a score of 40 to 18. Fifteen-minute halves were played.

CULEBRA.

Through the courtesy of Mr. H. H. Buckwalter, seven reels of moving pictures of the Canal and Panama were exhibited on Thursday night, November 13. There were 250 people present.

On Saturday night, November 15, the Gatun chess team was defeated by the score of 5 to 2, as follows:

Gatun.	Won	Culebra.	Won
Brown.....	0	Strong.....	0
Logan.....	1	McClure.....	1
Boni.....	1	Warner, A. M.....	2
Marquand.....	0	Warner, J. F.....	2

One game was postponed.

At the regular service on Sunday night, pictures of the Yellowstone National Park were shown. Mr. Wilson read accompanying descriptions. There were 67 present. On Sunday night, November 23, Mr. W. W. Warwick, assistant comptroller of the Treasury, will speak. All are invited to attend.

On Friday night, November 21, Captain Thorvald Nilsen of the steamer *Fram* will speak of his experiences in the Antarctic regions. All are invited to attend and no admission fee will be charged.

On Wednesday night, November 26, there will be "open house" at the school building. All interested in checkers, chess, dominoes, etc. and other games are invited to attend. There will be music and refreshments, including pumpkin pie. The entertainment will be purely local. All grown-ups are invited to be present.

On Thursday night, November 13, the Corozal bowling team was defeated on the local alleys, by the following scores:

Corozal.	Culebra.
Davis..... 142 185 174	Case..... 160 170 151
Taylor..... 129 153 144	Cushing..... 177 153 160
Louch..... 190 198 179	Herrington..... 172 191 160
Parkins..... 202 180 185	Chadbourne 121 164 141
Edwards..... 127..... 125	Dougherty.. 176 204 218
Ziller..... 120.....	

781 836 807

806 882 830

High scores in tenpins for the week were, as follows: Case, 213; Perkins, 205; in duckpins: Gassman, 111; Kronmiller, 114; Kierman, 111; Jefferies, 101.

EMPIRE.

Four hundred people attended the "Quo Vadis?" moving picture show which was given in ten reels on Wednesday, November 12. Mr. Shubert sang several solos at the beginning of the performance.

At the regular meeting of the Empire debating society held on Friday, Mr. W. W. Warwick was the speaker of the evening. He explained the new currency bill which is now before Congress, and a general discussion followed. About 50 men attended. The next meeting will be on Friday, November 28.

Empire took three straight games from the Camp Elliott team in the Isthmian tournament games rolled on Saturday night, November 15. Enquire will bowl the Culebra team at Empire on Saturday, November 22.

The Thanksgiving championship bowling tournament will be held at the Empire clubhouse this year. The tournament will be for singles and doubles in tenpins; prizes for first, second, and third in each event, and a prize for the high single score. All entries should be sent into Empire by noon of Wednesday, November 26.

GATUN.

The rubber-band duckpin tournament is holding the

attention of the bowlers at present. The tournament closes on November 30.

The winners of the married folks' tournament on Thursday evening, November 13, were Mr. and Mrs. Grover, their score being 564. Those taking first place in the mixed tournament were Mrs. Walsh and Edward Walsh, with a score of 611; second place in this tournament was won by Mrs. Leitch and Mr. Coleman, their score being 576.

Regular gymnasium classes will be held twice a week from now on, in the evening, for the men; also, twice a week for the boys. If enough men desire gymnastic work at noon, a special class will be held from 11.15 to 11.45 a. m., on Tuesdays and Thursdays.

"Open house" on Thursday evening, November 20, was enjoyed by a large crowd of men. The Guatemalan orchestra furnished music.

The basketball game at Empire on Saturday night will close the basketball schedule for this season.

On Wednesday evening, November 12, the basketball team went to Bas Obispo by launch to play the Marines. A group of rooters went along with the team and enjoyed the ride and the game. The local team lost to the Marines, which places Gatun in third place in the league.

CRISTOBAL.

Twenty-two men are entered in the local French pool tournament.

Quite a number of new faces were noticeable in the line-up in the married folks' bowling tournament on Monday, November 10. Totals were, as follows: Mr. and Mrs. Bell, 512; Mr. and Mrs. Cotton, 463; Mr. and Mrs. Sloan, 456; Mr. and Mrs. McNulty, 443; Mr. and Mrs. Lucas, 428; Mr. and Mrs. Huff, 408; Mr. and Mrs. Mason, 382; Mr. and Mrs. Simonson, 365.

A single folks' duckpin tournament will be held on Monday, November 24. It will be limited to ten couples.

Cristobal took all three games from Gatun in the all-Isthmian bowling tournament on Saturday, November 15. Scores were, as follows:

Cristobal.	Gatun.
Barnum..... 190 159 138	O'Meara..... 144 168 150
Russell..... 152 145 156	Otto..... 196 150 181
Collins..... 193 180 160	Sherrard..... 191 168 131
Barte..... 206 157 193	Schandler..... 131 112 ...
Bullard..... 167 190 193	Kyes..... 121
	Hodges..... 150 174
	Grover..... 125

Totals... 908 831 840

783 748 761

Cristobal will bowl at Corozal on Saturday, November 22.

Mr. E. J. Rall of the Sanitary Department, Ancon, will give a number of humorous monologues at the discussion club meeting on Thursday, November 20. Because of the next regular date of the discussion club falling on Thanksgiving Day, there will be no meeting next week.

Twenty-four men, 18 boys, and 32 girls are now enrolled in gymnasium classes under Mr. Brittin, the physical director.

The Guatemalan orchestra furnished music for a concert on Tuesday, November 18.

A four-men team pool match between Corozal and Cristobal will be played at Cristobal on Saturday night, November 22. The play will be 100 balls, straight pool. A return match will be played at Corozal on the following Saturday night.

A basketball game between the second teams of Gatun and Cristobal will be played at Cristobal on Friday night, November 21.

Family Quarters.

Applications for married quarters on file on October 31, were, as follows:

DISTRICT.	List No. 1.	List No. 2.
Ancon.....	17 (12)	119 (34)
Ancon Hospital.....	1	5
Balboa.....	1 (1)	59 (7)
Corozal.....	5 (5)	144 (18)
Cristobal.....	120	(4)
Culebra.....	1.....	53 (8)
Empire.....	62 (10)
Gatun.....	63 (3)
Pedro Miguel.....	2 (2)	102 (15)
Porto Bello.....	1 (1)	9 (8)
Toro Point.....	2
Total.....	28 (21)	738 (107)

NOTE—The figures in parentheses show the number of applicants already occupying regular or nonhouse-keeping family quarters at stations other than those at which applications are filed.

LOST—One ladies' coral cameo ring left in the retiring room of the Hotel Tivoli at 7 p. m., on Sunday, November 16. Valued as keepsake. Finder please return to P. O. Box 166, Ancon.

CANAL

RECORD

Volume VII.

ANCON, CANAL ZONE, WEDNESDAY, NOVEMBER 26, 1913.

No. 14.

The Canal Record

Published weekly under the authority and supervision of the Isthmian Canal Commission.

The Canal Record is published free of charge, one copy each to all employes of the Commission and Panama Railroad Company whose names are on the gold roll. Extra copies and back numbers can be obtained from the news stands of the Panama Railroad Company for five cents each.

Address all Communications,
THE CANAL RECORD,
Ancon, Canal Zone,
Isthmus of Panama.

No communication either for publication or requesting information, will receive attention unless signed with the full name and address of the writer.

NOTES OF PROGRESS.

Progress of Dredging in Culebra Cut.

No transfers of dredges engaged in Culebra Cut have been made during the past week. At Cucaracha slide, a movement on Thursday, November 22, pushed material forward where the channel was narrowest and raised a barrier with an average elevation of 10 feet above the surface of the water, for a distance of 100 feet, between stations No. 1811 and No. 1812. The movement is believed to have been local, and caused by undermining during excavation. Cross-sections taken after the dredges show that all elevations on the material above water, in the prism, are constantly changing, generally, a lowering of the material, but sometimes an elevation.

The dipper dredge *Mindi* and the ladder dredge *Marmot*, excavating respectively, from the north and the south sides of the slide, have come within 200 feet of each other, leaving in their wakes clear channels about 150 feet and approximately 22 feet deep at present level of the water in the Cut. The *Mindi* is removing mostly broken rock, and the *Marmot*, red clay and broken rock.

A movement in the east Culebra slide, north of Gold Hill, also on November 22, set in motion about 150,000 cubic yards of material, of which about 50,000 cubic yards have entered the Canal channel. One of the spuds of the dipper dredge *Chagres*, excavating at the base of the slide, was broken by the movement of material. This has been repaired and the dredge is now at work in the center of the channel, opposite the north end of Culebra village.

Basin in Miraflores Spillway Discharge Channel.

The discharge channel of Miraflores Spillway is to contain a broad basin, instead of baffle piers, to break the force of the mass of water dropping down the ogee of the spillway dam, and rushing toward the outlet. The basin is to be the full width of the spillway discharge channel, 432 feet, and about 200 feet across, and its bottom is to be about 15

feet below mean sealevel. It is believed that the large body of water contained in the basin will absorb the momentum of the discharge and prevent serious washing of the bottom of the channel, which will not be protected, as at Gatun, by concrete paving. The earth on either side of the discharge will be protected for 250 feet from the spillway dam by the concrete wing, or retaining walls.

Steamshovel No. 126 is engaged in excavating the basin, and has removed about 30 per cent of a total of 30,000 cubic yards to be taken out. A dike was thrown across the channel of the Rio Grande to protect the pit against flooding by the tidal waters in the river bed. There is scarcely any leakage of lake water through the spillway gates, which are now under almost the maximum head to which they are to be subjected; a considerable quantity of water gets into the basin through the weep holes in the retaining walls on either side, but is handled without difficulty by one 12-inch electric pump.

Backfilling at Miraflores Locks.

Spoil obtained from a borrow pit on the west side of the Panama railroad, opposite the Corozal corral, is being used for backfilling the northeast wing wall of Miraflores Locks. The space to be filled lies between the wing wall and the 134-foot core wall extending from the spillway dam to the side wall of the locks, at the juncture of the wing wall. The spoil is being dumped at present from a track built on the concrete corbels of the wing wall, which are later to support the track for towing locomotives. About 60,000 cubic yards will be required for this fill, and approximately 30 per cent of it has been placed to date.

On the west side of the locks, the completion of the backfill consists in filling the spaces at the upper end of the locks which were occupied, until the first of October, by construction buildings and railway tracks. This involved a considerable amount of filling back of the northwest wing wall, and connecting the west dam with the locks backfill proper. Both are almost completed, using spoil supplied by a single shovel in a borrow pit on the northwest side of Cocoli Hill, at the south end of the Miraflores dam.

Steamshovel Operations in Culebra Cut.

Six steamshovels are operating on the upper levels of the slides at Culebra, to reduce the pressure at the top and lessen the excavation required of the dredges. Two of these are on the west bank of the Canal, and will continue excavation until the middle of December. The four engaged on the east bank, north of Gold Hill, are to continue indefinitely, their operations depending principally on the dumps to be completed, and the possible development of slides. Except for a portion of the spoil from the shovels on the east bank, which is wasted on dumps No. 1, right, and No. 1, left, just north of Gamboa station of

the Panama railroad, the material excavated is all being hauled to the Naos Island dumps. Spoil from this excavation will also be used to complete dumps at Ancon and the Balboa town site, and for the Sanitary Department. By the time dump No. 1, right, and No. 1, left, north of Gamboa station, are completed, it is anticipated, a new dump will be provided off the present Cotton Tree dump, near the recently erected engine house, opposite Culebra. A 1,200-foot trestle for this purpose is now being built, and will be ready for use about December 15. This dump will afford a short haul and relieve congestion on the main line of the Panama railroad.

These operations, as well as those in connection with the completion of the Naos Island breakwater, and the construction of approaches and concrete piers for the pontoon bridge at Paraiso, are in charge of the Fourth Division of the Chief Engineer's office, under Mr. A. S. Zinn, resident engineer, who was acting division engineer of the Central Division at the time it was abolished, at the close of business, October 10.

Approaches to Pontoon for Crossing Canal.

Concrete piers have been built in recesses on both banks of the Canal at Paraiso, to be used in connection with the pontoon bridge which will afford a means of crossing the Canal by rail after bridge No. 57½ has been removed. The piers are approximately 12 feet by 19 feet six inches in plan, and their tops are now at elevation 94 feet, or 54 feet above the bottom of the Canal. When completed, they will be about 19 feet higher, and contain, in rooms formed within the portion to be added, a part of the machinery for operating the bridge. No machinery has as yet been installed, but the pier on the east bank now holds, at the southeast corner, a steel pipe 18 inches in diameter and 24 feet long, which will form the pin of the massive hinge about which the pontoon will revolve. The pontoon will be 378 feet long, and 55 feet wide; and will swing across the Canal like a gate. The recess on the east bank has been made large enough to contain the pontoon without any portion of it encroaching on the fairway, so that when the crossing is opened there will be a 300-foot allowance for vessels.

Railway approaches are being laid to both piers to connect with the present line of the Panama railroad beyond the ends of bridge No. 57½. On the west side, the new track leaves the old line 2,100 feet from the west end of the bridge. Swinging over a 6-degree curve for 755 feet, it then runs straight 450 feet to the west pier, at station No. 1887 on the Canal. The grade is slightly less than one per cent. The 350 feet nearest the Canal are on an embankment raised from 10 to 20 feet above the natural surface of the ground.

On the east side, the approach has required a cut about 600 feet long, grading down to the pier, with a maximum depth of 12 feet. The

cut runs through the former site of the highway into Paraiso, and has necessitated rebuilding part of the road to the east, for which considerable excavation was required at the base of a hill skirted by the road. A steamshovel is now engaged in making a cut on the west side of the hill, just north of Paraiso station, to extend the new line to the station. The new track on the east side will be about 1,500 feet long. Two old spur tracks in Paraiso

yard have been connected at both ends to the track leading to the pontoon bridge, thereby increasing the yard capacity to 60 cars.

The American Consul at Barranquilla, Colombia, has informed the Office of the Chairman that there is absolutely no demand for white labor in Colombia, and that it is useless for white employes to go that country seeking employment.

LABOR FORCE AND QUARTERS IN OCTOBER.

The force report for October 29 shows the actual working force of the Canal Commission to be 29,717; of the Panama railroad, 5,061, and of the contractors, 1,648, a total effective working force of 36,426, a decrease of 3,356 as compared with the statement for September. The gold force on the Canal work, composed almost exclusively of white Americans, was 3,685, a decrease of 101, as compared with the previous month. A statement of the Canal force by divisions, follows:

DEPARTMENT OR DIVISION.	SILVER EMPLOYES*													Total silver.	Total gold.	Grand total

(1) Includes Sabanas police station, Taboga Island, Culebra Island, Palo Seco, and Naos Island. (2) Includes 68 Panamanians. (3) Includes Gamboa. (4) Includes Frijoles, and Monte Lirio. (5) Includes Colon Beach and Colon Hospital. (6) Includes 47 East Indians, 9 American citizens and, 55 Panamanians. (7) Includes 23 Asiatics. Gold force of contractors (included above), 29 families, and 377 bachelors.

GATUN RIVER BRIDGE.

Installation of Bascule Span at Monte Lirio.—Protective Arrangements.

The bascule bridge north of Monte Lirio, known as bridge No. 140, is now complete with the exception of electrical connections for the operating current and such changes in the signal circuits as will become necessary when the actual operation of the bridge, by power, begins.

This bridge provides a channel with unobstructed overhead clearance whose width will be eighty feet, and a depth that will be 45 feet with the lake at its normal level. This opening gives the required entrance to the upper Gatun River valley.

The reinforced concrete piers were constructed during the first three months of 1911. The three girder spans used were taken from the Barbacoas bridge when the old line was abandoned on February 15, 1912, and placed in their present position by the engineering department of the Panama railroad. The bridge was opened for service on October 26, 1912. During the period of erection the main track was carried on a temporary trestle located on the west side of the bridge.

The lift span is of the heel trunnion type, designed by the Straus Bascule Bridge Company of Chicago, and was erected, under traffic, by the bridge and building department of the Panama railroad. The Penn Bridge Company of Beaver Falls, Pa., furnished the requisite material, for the sum of \$24,390, and such supervision as was necessary to install the special devices used on the bridge. As soon as current is available from the high tension line, the necessary transformer will be installed and alternating current furnished to the locking and operating motors at a potential of 220 volts. At the present time, the manipulations of the bridge could be made by hand power if an emergency made such an opening necessary.

All the switchboards and controlling devices for electrical operation are located in the interlocking cabin at the south end of the bridge. This cabin is built of hollow tile and concrete and fulfils the combined functions of control house, interlocking cabin, and telegraph office. The present telegraph office and signals at Monte Lirio station will be moved to this point after the bridge is placed in operating service.

The interlocking features will work in conjunction with the automatic signals in such a way that a train, when approaching the bridge from either direction, will lock up the plant and make it impossible to open the bridge. As soon as the train has passed over the bridge the electrical locking device will automatically release. It will then be necessary to place the semiautomatic home signals at their stop positions, and open the derrails before the controlling devices for the bridge-operating machinery can be brought into use. This insures that the bridge will not be opened in front of an approaching train, and that the bridge and open span will be protected by derrails should the stop position of the home signals be disregarded in any manner while the bridge is open or in motion.

One of the cottages on Diablo Hill has been dismantled to make way for the steamshovel operations at that point. It will be reerected in Corozal village.

EXECUTIVE ORDERS.

Fixing the Rate of Interest on Money.

By virtue of the authority vested in me I hereby establish the following Executive Order for the Canal Zone:

Section I. No rate of interest shall be allowed in excess of six percentum per annum upon any contract for the use or detention of money, unless the same is in writing and the interest agreed upon must not exceed twelve percentum per annum.

Section II. All contracts whatsoever which may in any way, directly or indirectly, violate the preceding section by stipulating for a greater rate of interest than twelve percentum per annum, shall be void and of no effect for the amount or value of the interest only, but the principal sum of money or value of the contract may be received and recovered.

Section III. When the interest received or collected for the use or detention of money exceeds the rate of twelve percentum per annum, it shall be deemed to be usurious, and the person or persons paying the same, or their legal representatives, may recover from the person, firm, or corporation receiving such interest, the amount of the interest so received or collected, in any court of competent jurisdiction, within two years from the date of the payment of such interest.

Section IV. No evidence of usury shall be received on the trial of any case unless the same shall be pleaded and verified by the affidavit of the party wishing to avail himself of such defense.

Section V. This Order shall take effect thirty days from and after its publication in THE CANAL RECORD.

WOODROW WILSON.

THE WHITE HOUSE,

November 11, 1913.

[No. 1860.]

To Regulate the Carrying of Arms.

By virtue of the authority vested in me, I hereby establish the following Order for the Canal Zone:

Section 1. Any one who carries on or about his person any firearm, dirk, dagger, or other knife manufactured or sold for the purpose of offence or defence, or any slung-shot, sword-cane, or any knuckles made of metal or other hard substance, shall be punished by fine of not less than Five Dollars nor more than Twenty-five Dollars, or by imprisonment in jail of not less than five days nor more than thirty days, or by both such fine or imprisonment in the discretion of the court, and during such time of imprisonment such offender may be put to work upon any public work in the Canal Zone.

In addition to the punishment herein prescribed for unlawfully carrying arms, the court shall adjudge the seizure and confiscation of the arms unlawfully carried by the offending party and the same shall be disposed of in such a manner as the Head of the Department of Civil Administration shall determine.

Section 2. The preceding section shall not apply to a person engaged in the military or naval service of the United States, or as a peace officer or officer authorized to execute judicial process of the United States or the Canal Zone, or in carrying mail or engaged in the collection or custody of funds of the United States or the Canal Zone, nor to a member of a gun or pistol club for the pro-

motion of target practice, a certified copy of the constitution and by-laws of which have been approved by the Head of the Department of Civil Administration, and filed with the Collector of Revenues, when such member is going to or from a target range, and engaged in practice at the target range. For the purposes of this Order, a certificate of membership in the gun or pistol club shall be issued by the organization and approved by the Head of the Department of Civil Administration, and shall entitle the holder to carry firearms as provided for in this section.

Neither shall the preceding section apply to any person authorized to have or carry arms by permit granted under the terms and conditions named in Section 3 hereof.

Section 3. The Head of the Department of Civil Administration may authorize the granting of permits to have and carry arms, as follows:

1. To hunt upon the public lands of the Canal Zone, or upon the lands of private persons when authorized by the latter.

2. To have arms in residences, offices, business places and plantations; and to watchmen or overseers of plantations, factories, warehouses, docks, or piers.

Applications for such permits shall be made to the Head of the Department of Civil Administration and shall state the full name, residence, and occupation of the applicant, and if the applicant is a minor it shall not be granted without the written consent of his parent or guardian.

The Head of the Department of Civil Administration shall satisfy himself by due inquiry that the applicant is a proper person to have a permit to keep or carry arms, and he may grant or deny the application as to him may seem proper.

When an application is granted by the Head of the Department of Civil Administration for a permit to hunt he shall file the application, with his approval endorsed thereon, with the Collector of Revenues, who shall issue a permit to the applicant upon his paying the Collector of Revenues a fee of one dollar, to be covered into the Treasury of the Canal Zone Government.

The hunting permits issued by virtue of this Order shall authorize the holders thereof to have, use, or carry a gun, rifle, or other similar long arm for hunting purposes during the fiscal year for which the permit is issued, provided, however, that such permit may be revoked at any time for cause by the Head of the Department of Civil Administration.

Section 4. Any one who engages in hunting without first obtaining the permit provided for in this Order shall be subject to a fine not exceeding Twenty-five Dollars, or imprisonment in jail not exceeding ten days, provided, however, that persons engaged in the land or naval forces of the United States shall not be required to obtain a permit to hunt upon the public lands of the Canal Zone.

Section 5. Penalties for infringements of this Order imposed upon intoxicated or disorderly persons shall be in addition to the punishments authorized by law for such intoxicated or disorderly conduct.

Section 6. Sections 449 to 460, both inclusive, of the Penal Code, the Executive Order of December 1, 1909, issued by the Secretary of War by authority of the President, amending Sections 450 and 456 of the Penal Code, and the Executive Order of the Secretary of War, issued by authority of the President,

dated November 3, 1911, amending Section 456 of the Penal Code as amended by the Executive Order above mentioned, and all other laws, orders, and decrees in conflict with this Order are hereby repealed.

Section 7. This Order shall take effect thirty days from and after its publication in THE CANAL RECORD.

WOODROW WILSON.

THE WHITE HOUSE,

November 7, 1913.

[No. 1857.]

PERSONAL.

Mr. Henry Goldmark sailed for New York on the steamship *Panama*, on Sunday, November 16, on his annual leave of absence.

Mr. H. P. Warren, superintendent of the fortification work at the Pacific entrance to the Canal, has resigned, effective at the close of business on Wednesday, December 3. He will become chief engineer for a company which is opening up a new asphalt field for the Barber Asphalt Company in the Lake Maracaibo district in Venezuela, an enterprise with which Mr. A. L. Robinson, formerly superintendent of the Mechanical Division of the Canal Commission, is now associated. Mr. Warren entered the employ of the Commission in April, 1905. Six months later, he was transferred to the Panama railroad, first as assistant engineer, and afterward as engineer of maintenance, and engineer of construction, successively. In May, 1912, on completion of the relocated line, he was again transferred to the Canal service and placed in charge of the fortification work on the islands in Panama Bay. He will sail for Venezuela on December 7, and will have his headquarters at Maracaibo.

Swimming Through the Canal.

Mr. Alfred Brown, a professional swimmer from the United States, swam from Gatun Locks, through the Canal channel, to a point about a mile from Balboa, where he left the water on account of the interference of weeds, between 5.20 a. m. and 6.15 p. m., on November 22. The distance covered was approximately 22 miles. On November 24, being prevented by the regulations from swimming in Culebra Cut, north of Cucaracha slide, he resumed the water journey at the south side of the slide, at 10 a. m. He arrived in the forebay of Pedro Miguel Lock at 10.50 a. m., left Pedro Miguel at 11.05, and arrived at Miraflores Locks at 11.55. Leaving Miraflores Locks at 12.30, he reached Balboa at 2.30 p. m. The total distance by water in the two days was approximately 30 miles, traversed in 16 hours and 35 minutes of swimming time.

Obituary.

William Telfer, an employe of the Panama Railroad Company, living at Colon, died at Ancon Hospital on Sunday, November 16. He was 63 years of age, a widower, and had been on the Isthmus for eight years. A niece, Mrs. Edna Telfer, resides at No. 643 McLaren street, Ottawa, Canada.

Capt. Thorvald Nilsen of the Polar ship *Fram* will deliver a lecture at Ancon Hall on Tuesday evening, December 2.

The second regular dance of the Tivoli Club for December will not be held, but instead, a dance will be given on Christmas Eve, December 24.

TRAPPING ANIMALS ALIVE.

S. P. Verner of Cristobal Has Invented a Device for this Purpose.

The Patent Office at Washington announces the issue on October 14 of patent No. 1,075,954, to Mr. S. P. Verner, an inspector in the Colon Health Office, for an animal trap of improved design. It was primarily devised to catch rats alive in the work of preventing bubonic plague, but its construction admits of the capture of any kind of mammal, bird, or fish, according to the size of the trap.

The essential feature of the invention is, that when closed, it forms a cage of the shape of a 3-sided pyramid; when open, of a flat equilateral triangle. The base is an equilateral triangle, to the three sides of which are hinged three equilateral triangles of the same size as the base. When these three outer triangular "Wings" are closed, they make a peaked cage

flat when open and set, and may be easily covered.

4. Its simplicity of manufacture and operation, and the accessibility of the bait to the game in every direction, except under the base.

The inventor regards the trap as especially valuable in capturing rats alive. The fleas on rats, which constitute the rat-infecting agent in plague, and which are annoying even when not infected, leave the rat soon after it dies. If a rat is killed near another animal, or near a human being, the fleas will seek one or the other as a new host. Herein lies the advantage of capturing the rat alive, in order to destroy the fleas with it. The ordinary traps, it is claimed, often fail in their mission, as after a few captures the rats become cunning enough to avoid them.

The invention presents an entirely new

sired, such as an increase, or decrease, the chief clerk of the coal-handling plant will be notified direct.

To maintain the new service, it is estimated that 25 converted Rodgers ballast cars, fifty 19-yard Oliver dump cars, with a capacity of 12 tons each, and 100 gondola cars will be required. The ballast cars are now undergoing the necessary alterations, and, together with the 50 dump cars, will be stencilled to indicate that they are to be used in the coal service only. The gondola cars will probably have to be used from time to time for commercial purposes. It is planned to retire permanently the 10-yard cars now in the service as soon as the 19-yard cars are available. The smaller cars have a capacity of only about eight tons of coal each, and are expensive to handle.

The amount of coal consumed on the Canal work in October was less than in any preceding month in years; its value was about \$50,000 less than for the same month a year ago.

Peg Legs May Be Furnished Free.

The following resolution has been adopted by the Isthmian Canal Commission:

"Resolved, That Section 4 of Subdivision A of the regulations governing the treatment of persons in the hospitals of the Isthmian Canal Commission, adopted at the 124th meeting of the Commission, is amended to read, as follows:

"Any employe furnished any special appliance or apparatus, such as spectacles, etc., shall be required to pay the cost thereof plus 10 per cent, unless such special appliance or apparatus is made necessary by injury sustained or illness contracted in the performance of his duty.

"Provided, however, that the Chief Sanitary Officer is authorized to furnish peg legs at the expense of the Commission to either an employe or nonemploye in any case in which he considers that the interests of the I. C. C., or Canal Zone Government will be benefited thereby."

Missing Men.

Any one having information regarding the whereabouts of Norman D. McCutcheon, formerly of Adairsville, Ga., age 22, weight 170 pounds, at one time a clerk in a bank, now supposed to be on the Isthmus, is requested to communicate with the American Legation, Panama.

Information is desired regarding the present whereabouts of the following men who were formerly on the Isthmus: Louis Warju, Samuel Warju, Thomas Mara, Horace E. Johnson, Theodore Warren, Frank Pascoe, A. W. Haynes, C. A. Butts, S. Hall, and Rufus W. Landon. Any one having knowledge of their present whereabouts is requested to communicate with W. S. Perry, Cristobal, C. Z.

Any one having knowledge of the present whereabouts of Harry H. Howitz of New Britain, Conn., said to have been in the employ of the Isthmian Canal Commission in former years, is requested to communicate with the American Legation, Panama.

Any one having information as to the whereabouts of Harold A. Thomas, who left the Canal service on June 17, 1913, is requested to communicate with THE CANAL RECORD.

LEGEND.

A.—BOTTOM OF TRAP.
B. (1-5)—SIDES OF TRAP.
C.—SPRING PLATFORM.
D.—LEVER OF SPRING PLATFORM.

E.—SPRING.
F.—WIRE OR STRINGS.
G.—BASE FOR PAN.
H.—PAN FOR BAIT.

J-K-L.—THROWING LEVERS.

over the base, entirely enclosing the animal in case of capture. A pan in the center is baited, and so attached by levers to springs, which actuate the movement of the wings, that the latter fly up when the game tries to get the bait, or steps on the pan. A method of operating the trap with mechanism entirely inside the cage is also used. The accompanying sketch shows the trap when set and ready for service.

The claims for this style of trap are mainly, as follows:

1. That it captures the game alive and without injury, and protects it from attack by other animals; food and water may even be placed in it in case of animals of value, where some time might elapse before the trap is visited.

2. A high degree of efficiency, since the wings intercept escape in all directions simultaneously.

3. Its capacity for concealment, as it is

principle in game traps and went through the Patent Office without question. The inventor was assisted in his labors by Dr. W. T. Hornaday, Director of the New York Zoological Gardens, as well as by the publishers of the *Scientific American*.

Railroad Transportation of Coal.

A number of changes will be made in the present method of supplying and transporting coal used on the Canal work. The practice in vogue of ordering coal by the carload will be discontinued, and, in future, orders will be placed on the ton basis only. This is expected to eliminate any possibility of shortage on account of variance in car capacities. A standard order is to be placed to cover all coal destined for Gold Hill, Paraiso, Las Cascadas, Corozal, and Balboa, including the Ancon quarry, which will be shipped out daily, except Sunday. In addition, a 24-hours' supply will be maintained at each engine house. In case any modifications in an order are de-

CANAL WORK IN OCTOBER.

Monthly Report of the Chairman and Chief Engineer to the Secretary of War.

CULEBRA, C. Z., November 19, 1913.

The Honorable the Secretary of War,
Washington, D. C.

SIR: I have the honor to submit the following report of operations on the Isthmus for the month of October, 1913:

Department of Construction and Engineering.

On October 10, the Central Division was abolished; dry excavation in the territory was placed under the resident engineer of the Fourth Division, Office of the Chief Engineer; dredging in Culebra Cut under the resident engineer of the Sixth Division, Office of the Chief Engineer. On October 16, the unfinished lock work at Gatun, excepting back-fill, and the unfinished work of the Pacific Locks were turned over to the First Division, Office of the Chief Engineer; and the operation of the power plant at Gatun to the Mechanical Division. On October 22, the shipways shops at Balboa were transferred from the Sixth Division to the Mechanical Division.

First Division—Office of the Chief Engineer.
LOCK OPERATIONS.

Gatun Locks—Lock operations were made during the month, as follows:

On October 9, 1913, three tugs with tows of dredges and barges entered the lower west chamber at 9.48 a. m., and entered Gatun Lake at 1.46 p. m., taking three hours and 58 minutes to make the lockage. Two tugs were locked down, consuming one hour and 40 minutes for the operation.

On October 22, 1913, four tugs with nine tows of dredge scows and barges entered the lower west chamber at 10.57 a. m., and reached Gatun Lake at 1.02 p. m. Total time consumed in making lockage, two hours and five minutes.

On October 30, 1913, one tug was locked through in one hour and three minutes. One tug with tow was locked down in one hour and five minutes.

On October 31, 1913, one tug with tow was locked through in one hour and three minutes.

Pacific Locks—Lock operations were made during the month, as follows:

On October 14, 1913, the first lockage was made at Miraflores. Clapet No. 6, and tug *Miraflores* with three barges, were raised together through the west chamber from the Pacific channel to the surface of Miraflores Lake. The passage of the vessels was, as follows: Begun at 11.11 a. m., entering the lower level at 11.15 a. m., raised to the upper level at 12.15 p. m., passing out of upper lock at 12.41 p. m. The entire operation consumed one hour and thirty minutes. After filling chambers with water preparatory to operating, miter gates Nos. 126 and 127 were opened at 11.14 a. m. First boat passed into Miraflores Locks at 11.15 a. m. Rising stem valves Nos. 448 and 449 were closed at 11.15 a. m. Rising stem valve No. 418 was opened one-half way at 11.15:45; opened full at 11.27:45; closed at 11.33:50. Miter gates Nos. 122 and 123 were closed; vessels in lower lock at 11.36:58. Water in upper lock 54.8 feet over sill; water in lower lock, 17 feet. Rising stem valve No. 431 was opened one-half way at 11.43:50; opened at 11.45. Miter gates Nos. 118 and 119 were opened at 11.54:34. Miter gates Nos. 114 and 115 were opened at 11.50:30.

Water at equalization at 35.8 feet over sill of upper lock at 12 noon. First boat in upper lock at 12.02 p. m., all vessels in upper lock at 12.15 p. m. Valves Nos. 430 and 431 were closed at 12.07 p. m. Miter gates Nos. 118 and 119 were closed at 12.18 p. m. Miter gates Nos. 114 and 115 were closed at 12.22 p. m. Rising stem valve No. 418 was opened full at 12.23 p. m. Upper guard gates Nos. 102 and 103 were opened at 12.32 p. m. Rising stem valve No. 419 was opened full at 12.35 p. m. Upper operating gates were opened at 12.39; lake and lock levels equalized. First boat passed into Miraflores Lake at 12.41 p. m.

On October 14, 1913, the tug *Miraflores* was returned from Miraflores Lake to the sea. Time consumed in lockage, 45 minutes.

On October 24, 1913, five tugs with tows of dredges and barges, with pipe and supplies, were locked up in one hour and 53 minutes. One tug was locked through in one hour and 25 minutes.

On October 14, 1913, occurred the first lock operation at Pedro Miguel Lock. Three barges were towed into the lower east chamber; the upper valves were left open, so that the water would rise in the lock chamber with that in the Culebra Cut. On October 24, 1913, when the water in the Cut had risen sufficiently, the barges were towed by hand through the lock.

On October 24, 1913, five tugs with tows entered the lower east chamber at 11.10 a. m., and passed into Culebra Cut at 11.52 a. m., consuming 42 minutes in the operation.

On October 24, 1913, one tug was locked through in 32 minutes. All operating valves and gates worked satisfactorily.

LOCK GATES AND PROTECTIVE DEVICES.

The erecting work on all lock gates is 99.87 per cent completed, reaming 99.99 per cent, riveting 99.87 per cent, and finishing 92.2 per cent completed. Material erected amounts to 57,425 tons out of a total of 57,500 tons. All of the 5,730,000 rivets have been driven, excepting 7,500 in the two 82-foot gates of the lower east lock at Miraflores. At Gatun and Pedro Miguel, the erection, reaming, and riveting are completed; the finishing at Gatun is 96.50 per cent and at Pedro Miguel, 97.4 per cent completed. At Miraflores, work is in progress on all of the 28 leaves; erection 99.59 per cent completed, reaming 99.9 per cent, riveting 96.6 per cent, and finishing 81.2 per cent completed.

CHAIN FENDERS.

Fabrication of material for chain fenders progressed satisfactorily. Tests of chains were made at the Boston Navy Yard, and report thereon will be submitted shortly.

LOCK ENTRANCE CAISSON.

Satisfactory progress was made in the United States in the fabrication of material and checking of drawings for the first lock entrance caisson, being built by the Union Iron Works of San Francisco.

OPERATING MACHINERY AND ELECTRICAL EQUIPMENT.

Valve machines—Mechanical erection of cylindrical and auxiliary culvert valve machines is completed; electrical installation for the former is 71 per cent, and for the latter, 72 per cent completed. Mechanical erection of rising stem valve machines is 97 per cent completed, and electrical installation 63 per cent.

Miter gate machines—On the gate moving

machines, 96 per cent of the mechanical, and 49 per cent of the electrical installation, have been completed. Deliveries of the miter forcing machines are completed; mechanical erection is 46 per cent, and electrical, 45 per cent completed.

Track—Ninety per cent of the rack track is completed, 99 at Gatun, 97 at Pedro Miguel, and 75 at Miraflores. Fifty per cent of the single, and 67 per cent of the double crossovers have been placed.

Spillway gate machines—The mechanical installation of all spillway gate machines has been completed; the electrical installation is 50 per cent completed at Gatun and 17 per cent at Miraflores.

Pumps—All pumps and motors with float switches and starters have been received complete, except a part for chain fender machines. Mechanical erection is 83 per cent completed on miter gate sump pumps, 11 per cent on chain fender sump pumps, 100 per cent on drainage sump pumps, and 100 per cent on culvert pumps. Electrical installation is 51 per cent completed on miter gate sump pumps, 61 per cent on drainage sump, and 20 per cent on culvert pumps. The electrical installation has been started on chain fender sump pumps.

Hydroelectric station—Work on the hydroelectric station consisted chiefly of installing conduit and erecting the gate house machinery. Very little additional work can be performed until the building construction is further advanced. It is expected that about November 25, 1913, the building construction will have advanced to a stage which will permit of unhampered electrical and mechanical installation. No work has been done on the exciters. The turbogenerators are 45 per cent completed. The headgates have been set, and 10 per cent of the steel work has been done on the gate house.

Transformer room equipment—To date, work is 90 per cent completed at Gatun, 62 per cent at Pedro Miguel, and 60 per cent at Miraflores. Installation of all transformer rooms at all locks combined, is approximately 70 per cent completed.

Control houses and apparatus—About 85 per cent of the steel beams has been placed in the concrete. The control house at Gatun is completed, except the roof, which is about 90 per cent completed, and some finishing work on the second floor. The control house at Pedro Miguel is about 90 per cent completed, and the one at Miraflores is about 50 per cent completed.

Practically all control apparatus for the locks and spillways is on the Isthmus, except interlocking system and part of indicators for the main control board, only part of the switchboards being received to date. This material is being erected complete in the shops and is being shipped as the status of the work will permit.

Transmission line—Out of a total of 379 foundations for the track-span bridges of the transisthmian electrical transmission line, 132 have been placed; 1,166.2 cubic yards of reinforced concrete were placed during the month; total to date, 3,044.9 cubic yards. Seventy-three track span bridges were placed on permanent foundations during the month, the total to date being 76.

Tests—At Gatun, tests were made on 20 rising stem valve machines, two handrail machines, one miter forcing machine, and 14 spillway gate machines, and all were ac-

cepted. At Miraflores, six transformer rooms and all high and low tension lines necessary for the operation of the west flight of locks; and all miter gate moving machines, rising stem and cylindrical valve machines for the west locks, were tested and placed in service. At Pedro Miguel, all miter gate moving machines for the east lock were tested.

EMERGENCY DAMS.

Both of the emergency dams at Gatun, and the west dam at Pedro Miguel have been completed, tested, and accepted. Tests were made on the east dam at Pedro Miguel and, except for painting, it is practically ready for acceptance. At Miraflores west dam, all material has been delivered, and during the month 808 tons of material were assembled and bolted into place; riveting is about 30 per cent completed. At the east dam, all material is on the site, and during the month 65 tons of material were assembled and bolted into place; riveting is about 80 per cent completed. Concrete for the counterweight was poured, forms for the operator's house erected, and switchboard house erected.

AIDS TO NAVIGATION.

Contracts were entered into for acetylene gas installations for 18 range towers and three beacons, and for the necessary parts to complete the gas generating and compressing plant at Balboa. The construction of beacons and range towers, and related work, was advanced during the month.

Second Division—Office of the Chief Engineer.

COAL PLANTS.

Cristobal—The general layout of coal handling machinery and accessories has been presented by the contractor in what is thought to be practically its final form. The greater part of the necessary data is now available and final design of the deck structures can be pushed as rapidly as the available force permits. Studies of the reloaders and of the general working of the conveying system have been made. Features requiring settlement have been made the subject of correspondence with the contractor, who will visit the Isthmus in person to conclude arrangements.

Balboa—Considerable study was given the Balboa coal plant during the month, including the location of the submerged storage, and seawall; and engineering wall sections. A final plan of excavation was approved, and field work is proceeding on this basis. The general plan of the plant has been made, after correspondence with the contractor, and it is believed that actual construction will not depart from this. After considerable study, a plan for supplying locomotives with coal from an individual bunker, located along the straight railroad track surmounted by a simple boom derrick, was determined upon. The adaptation of the berm cranes was also the subject of study: their stresses in coal handling have been largely worked out, and the resultant unit stresses in various members have been ascertained. From these studies it appears that considerable modifications will be necessary in the suspended booms.

The questions of remotorizing these cranes, deciding whether they shall be operated by direct or alternating current, and the location of the operating stations, are under consideration. Studies have been made of the support for the berm cranes. In general, the layout of the Balboa coaling plant has been so definitely fixed that final design and con-

struction drawings can be proceeded with. Excavation for the coal pockets amounted to 19,376 cubic yards during the month.

FUEL OIL PLANTS.

Drawings for fuel oil handling plants were completed. At the Atlantic entrance, a survey was made of the hills along the east side of the East Diversion, and 30 new locations for fuel oil tanks were determined, making a total of 72 locations on both sides of the diversion channel. Two maps were made on scales of 3000 and 5000 showing 56 tank sites for fuel oil storage at the Pacific terminals. The maps show the Canal and shore line, Sosa and Balboa roads, La Boca, and the Union Oil Company's property, their pipeline and intake. The maps also show the building, track, and dock plans for the Pacific terminals. In addition, the 1/5000 plan shows the breakwater to Naos Island, taken from the Central Division plan.

DRY DOCKS.

Little work was done on designs of either dry dock. From the site of dry dock No. 1, 41,334 cubic yards were excavated, and 32,265 cubic yards from the entrance basin. The lowest cut in the dry dock site is at 18.5 feet below sealevel, which is as low as the shovels can dig until the sump pumps, now in use on the site of the coal pockets, can be moved to their final position in the entrance basin, where they can be lowered as excavation progresses to elevation minus 45 feet.

MACHINE SHOPS.

Drawings and bill of material for power distribution systems and for interior illumination systems in the steel storage shed and in the boiler and shipfitters shop were completed, and requisition for the material submitted. The design and calculations of the illuminating system for the general storehouse were completed. Drawings for enclosing the sides and ends of the steel storage shed with steel rolling doors were completed and requisition for doors submitted. Drawings showing plans of air, steam, oil, and water piping; and sewers for eight toilet buildings; and for the administration building, were completed. Drawings of switchboard platform and foundation for motor generator sets in the machine shop were completed and the material ordered. Other design work, both structural and embodying architectural features, was done, and requisitions of minor importance were submitted.

Excavation for the shops tunnel, foundations, and machine footings amounted to 1,264 cubic yards; concrete placed 1,964 cubic yards; reinforcing steel placed, 101,241 pounds; fixed steel placed, 13,693 pounds; piles driven, 1,670 linear feet. Footings are practically completed, excepting those for buildings Nos. 15, 24, 25, and 27. The 4-foot cylinders at the north end of building No. 1 were ready for steel erection at the end of the month, and the connecting beams were in place. Machine footings in building No. 1, as far as it is possible to go at the present time, were practically all in place. The hammer footings and other machine footings in building No. 2 were well advanced, and the excavation for those in building No. 4, in the south half, were nearly completed. Side walls around the foundry and buildings Nos. 1 and 2, were placed and completed as far as possible. Concrete floor for base of wood blocks was placed in building No. 1, and 525 cubic yards were placed and wood block lay-

ing begun. Very little work has been done on the transfer table, one 3-foot cylinder having been started. The hollow tile and plaster work on the pattern storage building was completed on October 30; and the walls of the coke shed were 40 per cent completed.

The erection of the structural steel in the steel storage shed, boiler and shipfitters shop, galvanizing plant, lumber and equipment shed, coke shed, and seven toilet buildings, was completed during the month. The laying of cement tile roofing on the boiler and shipfitters shop was finished, and was completed on the lumber and equipment shed and on the car shop. The installation of machines in the machine shop was commenced during the month.

TERMINAL PIERS AND WHARVES AT BALBOA.

On the superstructure of quay walls and the pier at Balboa, work was carried on in three distinct places, elevated towers with distributing chutes placing the greater part of the concrete, a total of 512 linear feet measured on the dock face being placed. Two thousand eight hundred and seventy-one cubic yards of concrete were placed in the floor system; 32 cubic yards were placed for bonding the 1,822 linear feet of permanent track. Two thousand five hundred and twenty linear feet of caisson were manufactured, and 2,191 linear feet were sunk for docks.

Studies and designs for the four sections of the quay wall, and the pier and pier shed, were continued. Excavation for the wharves and piers amounted to 7,494 cubic yards; concrete placed in caissons and quay wall amounted to 6,025 cubic yards, reinforcing steel used, 2,360,782 pounds, fixed steel used, 205,345 pounds.

CONSTRUCTION OF BALBOA TERMINALS.

On the site of the dry docks, coaling plant, and entrance basin there were 132,335 cubic yards excavated—93,843 cubic yards of earth and 38,492 cubic yards of rock—of which 128,648 cubic yards were "Work," and 3,687 cubic yards, were "Plant" excavation. Filling and embankment for preparation of site, cofferdam, railroad yard tracks, construction tracks, shops tunnel, dikes, etc., amounted to 129,108 cubic yards, of which 71,986 cubic yards were "Work," and 57,122 cubic yards, were "Plant." Eight thousand and twenty-seven cubic yards of concrete were placed in connection with shop foundations, shops tunnel, caissons, quay walls, etc., which involved the use of 2,467,363 pounds of reinforcing steel. There were 20,828 linear feet of piles driven for shop and machine foundations, cofferdam, trestles, culverts, etc., which consisted of 19,158 wooden piles and 1,670 feet of pipe piles.

METEOROLOGY AND HYDROGRAPHY.

Rainfall was below normal at all stations, except Balboa, Brazos Brook, Colon, and Porto Bello. The monthly totals ranged from 6.08 inches at Culebra to 18.85 inches at Porto Bello, that at Culebra being least of record for October since 1888. The average for the Chagres basin was 11.52 inches against a 13-year average of 14.26 inches. Evaporation was everywhere above normal.

A series of seismic disturbances was recorded at Ancon and Gatun beginning October 1, which, in number, intensity, and duration of tremors, has not been equalled since the installation of the Ancon seismograph in 1908. In all, 39 distinct shocks were recorded at Ancon. Most of these were of slight in-

tensity, but four shocks were of sufficient force to throw all pens off the seismograph sheets. The heaviest shock occurred at 11.25 p. m., October 1. Its intensity on the Rossi-Foré scale was estimated at V or VI. This shock, while generally felt over the Isthmus, resulted in no damage to the Canal works. A second pronounced shock, Intensity III, occurred about twenty minutes later. A third, Intensity III, was recorded on the fourth of October and another, Intensity IV, was recorded on October 23. All except two of the 39 shocks registered during the month seemed to have a common point of origin, or epicenter, located approximately 115 miles southwest of Ancon, in the vicinity of the lower coast of Los Santos province. A careful examination has failed to disclose any damage to the Canal works resulting from this series of earth tremors.

The total yield of the Gatun Lake watershed for the month was about 10 per cent below normal, while the yield at Alhajuela was about 16 per cent below. During the month, the lake rose from 66 to 72.46 feet, representing a storage of 23.23 billion cubic feet of water.

WIRELESS TELEGRAPH STATION.

The buildings for the Darien radio station—power house, operating buildings, and operators' quarters—were staked out on the last of the month. Two and one-half foot contours were taken over the footings for the three towers on the sites selected by the Navy Department. Topography was taken over average sections of 100 feet square for each footing and additional topography taken where the formation of the ground warranted it. Maps were drawn up, one showing the relation of the three towers to each other and to the topography, and three, taking each tower separately, showing the location of each footing in detail.

INSPECTOR OF SHOPS.

The shipways shops at Balboa were transferred from the Sixth to the Mechanical Division on October 22. The installation of machines and tools, shafting, motors, etc., in the Paraiso shops was completed, and the repairing of dredges of the Sixth Division working in Culebra Cut was commenced. These shops are operated by the Mechanical Division. The Gatun power plant and the sump pumps in the Gatun Locks were transferred from the Atlantic to the Mechanical Division on October 15. The sump pumps in the Pedro Miguel and Miraflores locks and in the Miraflores spillway, were transferred from the Fifth to the Mechanical Division on October 15.

Fourth Division—Office of the Chief Engineer.

The Central Division was abolished on October 10, and dry excavation on the slopes of Culebra Cut was placed under the Chief Engineer. In the territory of the old Central Division, 269,400 cubic yards of material were excavated by steamshovels. Of this quantity, 216,000 cubic yards were classified as primary excavation in the Canal prism, and 53,400 cubic yards as "Plant" excavation. Of the latter, 30,500 cubic yards were removed from Sosa Hill rock quarry; 5,918 cubic yards were removed from the mooring basin at Paraiso, and 16,982 cubic yards from pontoon bridge basin. The total steamshovel excavation classified as primary excavation was all from outside prism lines, from slides and high levels as preventive work against slides. The daily

average number of steamshovels at work during the month was 9.44, and the total number of shovel days was 255. The total estimated amount of material removed and to be removed in the Central Division, according to the revised estimate of July 1, 1913, is 115,696,455 cubic yards; and, up to November 1, 1913, 109,445,155 cubic yards had been removed, leaving 6,251,300 cubic yards to be removed, in order to complete all excavation in the Central Division.

Fifth Division—Office of the Chief Engineer.

PEDRO MIGUEL.

At the end of the month, all the backfilling had been completed except that behind the north east core wall, which has been held open for the railroad tracks. General cleaning up of the locks and the leveling up of the backfill were continued during the month. The dike across the Rio Grande valley, to prevent spoil from the suction dredges working in Cucaracha slide entering the prism south of the locks, was completed. The bulkhead gates for the center wall outlet were installed and calked. The grading for the paving over the depressed area under the emergency dams was finished, and the concrete paving was commenced on the west side. The erection of the steel work for the control house roof was finished, and some of the concrete for the roof poured.

MIRAFLORES.

The opening in the spillway left for the discharge of the water from the several rivers of the Miraflores Lake area during the construction of the dam, was closed by a timber bulkhead on the upstream side, on the morning of October 1, which caused the lake to begin to rise. The water in the channel south of the dam was pumped down below the opening, which was thoroughly cleaned of all silt and debris on that date. The placing of the concrete to fill the opening was begun on October 2, and finished on October 8, 736 cubic yards of concrete being required. Excavation for the basin south of the spillway was begun, and all tracks were removed from the lake area. On October 11, the transportation work was transferred to the Second Division, and on October 15, the remaining lock work was transferred to the First Division.

Dry filling in the west dam was increased by 4,305 cubic yards, making the total fill 1,712,944 cubic yards, hydraulic, and 661,048 cubic yards, dry. The backfill at Miraflores was increased by 38,475 cubic yards, making the total 1,948,745 cubic yards.

CONCRETE.

Concrete, amounting to 819 cubic yards, was placed, 78 yards in the lock at Pedro Miguel, five at Miraflores, and 736 at Miraflores Spillway.

ANCON QUARRY AND CRUSHER.

Excavation amounted to 57,045 cubic yards, and 53,379 cubic yards of rock were crushed.

DISTRICT NO. 5—GOLD HILL HYDRAULIC AND SLUICING PLANT.

Excavation was pushed on the high bank at the center cut and in the back edge of the slide at the south cut; and it is believed that there is no further danger of any breaking back of the top of the east Culebra slide at these points. Some cutting was also done on the north side. Installation of the third pump unit, and of booster pumps advanced, the former to

practical completion, and the latter so far that one pump is ready for work.

Sixth Division—Office of the Chief Engineer.

FIRST DISTRICT—PACIFIC ENTRANCE.

Six dredges removed 543,758 cubic yards of rock and earth, 110,660 cubic yards of which were taken from the inner harbor and terminal basin. There remain to be removed 2,224,957 cubic yards.

CULEBRA CUT.

Excavation was begun at Gamboa Dike on October 10, by ladder dredge No. 5 and suction dredge No. 86; on October 20, dredge No. 86 began the removal of material from the north side of Cucaracha slide, and on October 22, the dipper dredges *Chagres* and *Mindi* were also set at work there. Suction dredge No. 85 began excavating from the south side of the slide on October 26. The amount removed by these dredges was 60,370 cubic yards.

CHAMÉ SAND SERVICE.

The ladder dredge *Gopher* removed 26,140 cubic yards of sand at Punta Chamé.

Second District—Atlantic Entrance.

Five dredges removed 309,538 cubic yards of earth and 28,161 cubic yards of rock from the Canal prism. On November 1st, 40 feet of water could be carried from the beginning of the Canal 2,100 feet inland, and 35 feet to the locks at Gatun. There remained to be excavated from the Canal prism, north of the locks, 524,809 cubic yards.

Two dredges removed 61,070 cubic yards of sand and 37,853 cubic yards of coral rock from the site of the coaling station.

Dredging at Coco Solo Point for the east breakwater amounted to 30,807 cubic yards.

At the bridge pontoon, 1,960 cubic yards of earth were removed.

GATUN LAKE.

Suction dredges Nos. 82 and 86 removed, respectively, 61,105 cubic yards and 22,659 cubic yards of sand and gravel from the Canal prism at Gamboa.

MISCELLANEOUS.

No dredged material was dumped on the breakwater during the month. The usual surveys were made behind the dredges at Coco Solo Point and the site of the coaling station.

Division of Municipal Engineering—Office of the Chief Engineer.

NORTHERN DISTRICT.

Work was continued on the new waterworks for Colon. This plant is about 95 per cent completed, and should be ready for the installation of sand and gravel not later than the first of December. The regular work in connection with the maintenance of the streets, water, and sewer lines in Colon, Cristobal, Mount Hope, and Gatun was continued. The resurfacing of the highway from Mount Hope to Gatun was completed, and miscellaneous installations of various types of water lines for other divisions were accomplished.

SOUTHERN DISTRICT.

At Balboa, the construction of the storm sewers for the new Ancon townsite was continued; 1,675 cubic yards of excavation were removed; 505 cubic yards of reinforced concrete were placed. At the close of the month the storm sewer work of this town was approximately 65 per cent completed.

Construction work on the new townsite at La Boca was continued, and approximately 6,403 cubic yards of excavation were made, and a total of 2,436 cubic yards of

backfill was placed. In the streets, 5,077 linear feet of curb and gutter were laid, and approximately 2,395 square yards of macadam were spread. Work was continued laying certain water lines and sewers. The construction of this townsite was approximately 61 per cent completed at the end of the month.

The regular maintenance of streets, roads, water, and sewer lines in the city of Panama and throughout the towns of the Southern District was carried on as usual.

NEW PANAMA WATERWORKS.

Work was continued at the site of Miraflores pump station No. 1; at the site of the purification plant, and at the site of the high service reservoir on Ancon Hill.

Atlantic Division.

GATUN LOCKS.

Gatun Locks were transferred to the First Division of the Office of the Chief Engineer on October 15, and the operation of the power plant and the pumps were transferred to the Mechanical Division. The total backfill to date is 2,234,187 cubic yards, 99.52 per cent of the total. Grading operations progressed satisfactorily, 119,700 square yards having been finished to final grade, a total to date of 150,000 square yards. The construction of the dam at Gatun saddle was completed early in the month.

Three carloads of cement were received on the east side of the locks for use in the transmission duct line and small jobs of finishing remaining under this division. The cement shed had been cleared out during the previous month, and this month the handling machinery in the shed was dismantled.

Issues of material included 782 cubic yards of Porto Bello rock, 667 cubic yards of sand, and 33 cars of screenings.

Forty-four cubic yards of concrete were placed in the construction of the control house prior to October 15, and all forms for monitors had been constructed.

GATUN DAM.

The fill was increased by 24,871 cubic yards, bringing the yardage in place up to 22,011,764 cubic yards, of which 10,124,082 cubic yards are wet fill, 94,330 cubic yards are the broken stone and riprap used in paving, and the remainder is dry fill. The dam is completed, with the exception of filling a number of low places caused by slow consolidation, and the extension of the crest at the east end.

GATUN SPILLWAY.

The spillway proper is practically completed. Concrete laid amounted to 570 cubic yards, the total in place being 230,443 cubic yards.

BREAKWATERS.

The total amount of Porto Bello rock unloaded upon the west breakwater to date is 346,150 cubic yards, the amount unloaded in October being 25,990 cubic yards.

Preliminary work in connection with the east breakwater was continued.

Central Division.

The filling of Culebra Cut was begun at 8.15 a. m., on October 1, when the pipes through Gamboa dike were opened. On October 10, at 2.03 p. m., a portion of the dike at Gamboa was blasted, and water from the lake flowed into the Cut. The filling of the section south of Cucaracha slide was completed on October 27. On October 10, the Central Division was abolished. The record of work in this territory will be found under Fourth Division, Chief Engineer's Office, for dry excavation, Fifth Division, for hydraulic work, and Sixth Division, for dredging.

Quartermaster's Department.

LABOR.

The labor force report as of October 22 shows a decrease of 3,339 men from the force report of September 24. Included in this figure is a decrease of 553 men in the contractors' forces. The actual decrease in the Commission's forces proper is 136 gold and 2,663 silver men.

The United Fruit Company has been sending to this office lists of the men they are taking from the Isthmus. These lists show a total of over 900 laborers taken to Honduras, Bocas, and Costa Rica, during October. So far it has not been necessary to make any special provision for the transportation of the repatriated laborers.

BUILDINGS.

The building division has been very busy during the month, although the gangs have been somewhat reduced. Work on the buildings for the Navy at Caimito, and the Ancon commissary, has been begun. The Pedro Miguel commissary has been completed. Work on the removal of buildings from Bas Obispo and Las Cascadas has been begun.

QUARTERS.

The census shows a decrease in quarters of approximately 100 gold bachelors, 75 American families, 400 Europeans, and 500 West Indians. The decrease in gold men is confined largely to Gatun and Cristobal; in silver men, to Miraflores, Empire, Culebra, and Las Cascadas. The number of gold and silver employees quartered at Ancon, Corozal, and Balboa has been increased.

Constant shifting of the forces has increased the work and expense of this department. This is particularly applicable to the transfers of families. It is probably not an exaggeration to state that there have been more transfers of families within the last six months than there have been for the past five years. The handling and shipping of the effects of these families mounts up considerably.

MATERIAL.

The total value of material received from the United States during the month was \$803,301, a decrease of over \$200,000, from the same month in the preceding year. Local purchases, which include purchases of coal, crude oil, and miscellaneous purchases from the Panama Railroad Company and local merchants, decreased very considerably, the largest decrease being in coal. Coal consumption was less than in any preceding month, and it is approximately \$50,000 less than for the same month during the preceding year. Over 7,000,000 feet of lumber were received during the month, the largest amount of lumber received for some time. The material came forward in 38 steamers, the total weight of cargo, exclusive of lumber, piling, and ties being 18,288 tons.

Subsistence Department.

A total of 507,231 meals was served during the month, 178,798 at the line hotels, 315,975 at laborers' messes, and 12,458 at the Hotel Tivoli. The operation of the line hotels, restaurants, and laborers' messes resulted in a net profit of \$1,466.55. The Hotel Tivoli was operated at a net profit of \$2,916.21. The total net profit on subsistence operations for the month of October was \$4,382.76.

Department of Civil Administration.

COURTS.

In the month of October, 77 civil and 35

criminal cases were disposed of in the circuit courts, and 114 civil and 365 criminal cases in the district courts.

DIVISION OF POSTS, CUSTOMS, AND REVENUES.

Money order sales for October amounted to \$340,895.46, and the fees to \$1,642.89. Receipts from stamp and card sales, and newspaper postage, aggregated \$9,460.62. The total collection of revenues made by the division was \$15,028.09, and the collection on account of court fines, costs, and fees \$1,906.15.

During the month, a total of \$137,072 was deposited in postal savings accounts, and a total of \$170,799 was withdrawn.

At the port of Ancon, 22 vessels entered and 21 vessels cleared, and at the port of Cristobal, 17 vessels entered and 17 vessels cleared. Four hundred and fifty-eight passengers arrived at the port of Ancon, and 632 at the port of Cristobal, while 529 and 689, respectively, departed.

Forty-five estates were settled during the month, and on October 31 there were 41 estates in course of settlement.

The total number of persons arrested was 385, of whom 339 were men and 46 women. Twenty-one nations, or 38 separate states and dependencies, were represented. There were 14 deportations of criminal characters during the month.

DIVISION OF SCHOOLS.

The schools were opened for the term on October 1, with 963 pupils enrolled in the schools for white children, and 550 in those for colored children, as compared with 909 and 555, respectively, at the opening of the school year 1912.

The net enrollment during October was 1,109 white children, average belonging 1,039.3, average daily attendance 985.7. The net enrollment of colored children was 1,058, average belonging 885.4, average daily attendance 756.3. At the close of the month, 45 teachers were employed in the schools for white children, and 25 in those for colored children, as compared with 47 and 32, respectively, at the close of the school year in June.

Department of Sanitation.

The total number of deaths from all causes among employees was 37, divided, as follows: Disease, 25, and violence 12, giving the annual average per thousand of 5.14 and 2.47, respectively.

In segregating according to race, the annual average death rate per thousand from disease among employees was: For whites, 3.21, and for blacks, 5.60, giving a general average for disease of 5.14. For the same month during 1911, the annual average death rate per thousand from disease among whites was 4.87, and blacks, 10.56, giving a general average of 9.15; and in 1912, from disease among whites, 3.84, and blacks, 7.66, giving a general average of 6.71.

Among employees during the month, deaths from the principal diseases were, as follows: Dysentery, one; lobar pneumonia, four; malaria fever, E. A., one; tuberculosis, six, leaving 13 deaths from all other diseases, and 12 deaths for external violence.

No cases of yellow fever, smallpox, or plague originated on, or were brought to the Isthmus, during the month.

Respectfully,

GEO. W. GOETHALS,
Chairman and Chief Engineer.

GOLD CLAIMS INVESTIGATED.

Pannings By Geologist in Canal Zone Streams Show Slight Values.

A number of placer claims lying along the Gatun River and its tributaries, some of them within and some without the Canal Zone, have been investigated by Mr. D. F. MacDonald, the Commission geologist, with the result that nowhere was gold found in paying quantities, and in most instances there was only a "Color." The gravels were sampled with gold pans in the parts of the streams which seemed most likely to carry values, and the gold in these samples was recovered and weighed.

Along Guineal Creek, a small feeder of the Gatun River, very little gravel was found, and 17 pans yielded but one small color. On Palenque Creek, 30 pans were washed, which yielded six-tenths of one cent's worth of gold, equal to about 2.1 cents per cubic yard. On Cuatro Calles Creek, 20 pans were washed, with a yield of .13 of one cent's worth of gold, equal to about seven-tenths of a cent a cubic yard. On the Agua Clara River, the northeast branch of the Gatun River, a total of 52 pans of gravel produced less than one cent's worth of gold, equal to about two cents to the cubic yard.

Sampling was continued down the Gatun River for a mile or more below the mouth of the Agua Clara. From 46 pans of samples selected in this locality, the yield was .55 of one cent's worth, equal to about one cent to the cubic yard. A bar of gravel about one-half hectare in extent occurs on the Gatun River, just above the mouth of the Agua Sucia. It was the richest place found, and the pannings from it were kept separate on that account. At this point, six pans gave .45 of one cent's worth of gold, equal to about 7.5 cents to the cubic yard. The geologist was of the opinion that the gravel here could not be made to yield a profitable return, because the exceedingly fine character of the gold would cause a considerable percentage of loss in recovery. A second trial made at the same bar with six pans of gravel yielded but .07 of one cent's worth of gold, or about 1.2 cents a cubic yard.

The Agua Sucia Creek is a fairly large tributary of the Gatun, and enters it about a mile below the mouth of the Agua Clara. It flows through a wide, flat tract of country, with much alluvium, relatively little gravel, and few outcrops of rock. Out of 47 pans washed along this stream, not one yielded a color. This was regarded as remarkable, because most of the streams in the Canal Zone and its vicinity, show occasional colors. On the Gatun River, below the mouth of the Agua Sucia, 28 pans were washed, which gave .35 of one cent's worth of gold, equal to about 1.3 cents to the cubic yard.

Investigations were made also on the Quebrada Lopez, a tributary of the Quebrada Media. This creek was reached by going over the divide from Minas Bay. It flows through a very deep, steep-sided valley, so that the ground at its bottom should be the result of a high degree of stream concentration. Well up toward the headwaters, five pans of gravel were washed, and these yielded .07 of one cent's worth of gold, equal to about 1.4 cents a cubic yard. One hundred yards downstream, three pans yielded .08 of one cent's worth of gold, equivalent to about 2.7 cents to the cubic yard. Half a mile farther down, three pans returned no colors. Two-thirds of a mile

from the first washing, three pans produced .23 of one cent's worth of gold, equal to about eight cents to the cubic yard. The claims along this stream are regarded as valueless, because there are only a few gravel bars, and where there are colors, the gold is not in paying quantities.

The following table gives a summary of the various washings, together with the estimated value of gold to the cubic yard, and the estimated cost of working per cubic yard:

LOCATION.	No. pans	Values per cubic yards, cents.	Cost per cubic yard of working gravels.
Guineal Creek.....	17	Trace	\$1 plus.
Palenque Creek.....	30	2 1	1 plus.
Cuatro Calles Creek.....	20	.7	1 plus.
Quebrada Pato.....	22	.6	1 plus.
Quebrada Mollejonas.....	12	0	1 plus.
Agua Clara.....	52	2 0	12 cents plus.
Main Gatun River.....	46	1 0	12 cents plus.
Bar near mouth of Agua Sucia Creek.....	6	7 5	12 cents plus.
Another part of same bar.....	6	1 2	12 cents plus.
Agua Sucia Creek.....	47	.0	60 cents plus.
Main Gatun, below mouth of Agua Sucia.....	28	1 3	12 cents plus.
Quebrada Lopez.....	14	2 7	60 cents plus.

The cost of the working varies with the amount and depth of material to be washed. The geologist is of the opinion that the particular territory sampled has practically no value for mining purposes.

Progress on Atlantic Entrance Coaling Plant.

Excavation for the approaches and storage basins of the permanent coaling station for the Atlantic entrance is being carried on by the pipeline suction dredge No. 83. About 11.5 per cent of the estimated requisite excavation has been completed, the total removal to November 15 being approximately 64,372 cubic yards of coral rock, and 70,889 cubic yards of coral sand. The plant is to be situated at the north end of Mindi Island, across the French canal from a point about midway between Dock 13 and Pier 11, and the spoil from the dredge is deposited in adjacent low places on the island and in shallows well removed from the channels of the French and American Canals. The material being handled is soft; the surface of the island at this end is a semisubmerged swamp, and a typical section of the soil shows shells, sand, and soft coral near the surface, going down through silt and loose coral, with shells mixed in, to brown clay and gravel, merging into soft blue rock at about 55 feet below sealevel. Excavation for the wet storage basin will go 28 feet below sealevel. The wharves and coal-handling towers are to be supported on caissons sunk well into rock.

Rail connection with the site is being constructed by forces of the Panama railroad. A spur track leaving the Mount Hope yards near the dry dock runs south about 3,000 feet, approximately parallel to the French canal, swings to the right and across the Canal by means of a pile trestle, then, over a 90-degree curve, strikes north for 3,500 feet to the site of the plant. For the greater part of the way, it runs through watery marsh, and considerable difficulty was experienced in the first laying of track. Crib work of old ties was built in the swamp, and the track advanced by spans of bridge stringers. Earth was then dumped from the track to form a permanent embankment, which has been raised to about 10 feet above sealevel and is very firm. Red clay for the embankment is now being supplied by steamshovel No. 225, working in a borrow pit near the obsolete storage yard at Mount Hope, and placed by two trains of Oliver dump cars. The trestle across the French

canal is to be replaced by a permanent steel bridge with movable span, in order to allow navigation of the channel. The crossing has been placed well beyond the Mount Hope docks, in order to afford tying-up places for the dredging and general service floating equipment employed at the Atlantic entrance.

The "Newport" Again in Service.

The steamship *Newport*, which sank at

Balboa on August 17, 1912, when the wooden wharf alongside which it was moored collapsed, returned to Balboa on November 24, on its first voyage since it was recovered and repaired. The vessel was floated on November 10, 1912, and, after disposing locally of all its cargo not consigned to San Francisco, sailed for that port under its own steam on December 10. It was repaired by the Union Iron Works, and at the same time considerably remodeled for passenger service in the tropics, and equipped to use oil instead of coal for fuel. On its first voyage it carried 45 cabin and 55 steerage passengers.

The Pacific Mail Steamship Company, which owns and operates the *Newport*, is suing the Panama Railroad Company, owner of the wharf which collapsed, for \$800,000 damages, in the Admiralty Court of the District of New York. The railroad denies fault. Its defense is being conducted by the district attorney of the United States for the District of New York, and Mr. Richard Reid Rogers, general counsel for the Panama Railroad Company.

Drainage Culvert under New Terminal Yards at Balboa.

The track for the permanent yards of the Panama railroad, in rear of the concrete head wall and pier now under construction, will be laid on a fill east of the east toe of the abandoned Sosa Dam, which is used at present for the storage of material and spare parts. In preparation for the completion of the fill, a reinforced concrete culvert is to be constructed south of Diablo Hill for the passage of the Curundú River, and of drainage water from the swamp area being reclaimed between El Diablo and Ancon. The culvert is to be of the twin type, a reinforced concrete wall, two feet thick, separating the two passages, each of which is to be 10 feet wide and seven feet high. It will be 256 feet long, traversing at right angles a site for 13 parallel railway tracks, and a 20-foot highway. As the natural soil at this point is a swamp, the culvert is to be supported on 425 wooden piles, driven on 3½-foot centers. Excavation and pile-driving are being accomplished in the dry, under the protection of dikes, and when the culvert is completed the Curundú River will be diverted through it.

Launch Service to Taboga.

The steam launch *Sanidad* leaves the dredge landing at Balboa at 9 o'clock, Tuesday, Thursday, and Saturday mornings. On the return trip it arrives at Balboa about 4 p. m., in time to make connection with the evening trains.

JOINT LAND COMMISSION.

Opinion

on the status of tenants on that portion of the estate of Matachin acquired by the United States under deed of May 3, 1909.—In the determination of the status of occupiers on that portion of the Matachin estate, purchased by the United States under date of May 3, 1909, it is necessary to consider the terms of the memorandum of agreement entered into between Maria E. Jaramillo de Bosque, Carmen B. de Paredes, Manuela D. J. Bosque, and Richard Reid Rogers, General Counsel, Isthmian Canal Commission, on June 29, 1908. The precise wording of the pertinent portion of this agreement is, as follows:

"The Isthmian Canal Commission as soon as funds therefor are available, will pay to the said Maria E. Jaramillo de Bosque, Carmen B. de Paredes, and Manuela D. J. Bosque for quitclaim and release of the said lands at the following rates: For all high and dry lands, whether improved or unimproved, at the rate of \$5 gold per hectare. The foregoing price is based upon the assumption that the parties represented above are the sole owners of nine-tenths portion thereof, and exclusive of any interest which the United States may be entitled to assert. If it develops that this interest is less than the entire interest,

"It is mutually agreed by and between the parties hereto, that the said Maria E. Jaramillo Buda de Bosque, Carmen B. de Paredes, and Manuela D. J. Bosque shall remain in possession of the property herein released and collect all rents that might accrue from tenants free of rent to the Isthmian Canal Commission until actually occupied by the Isthmian Canal Commission or inundated with water.

"Maria E. Jaramillo Buda de Bosque, Carmen B. de Paredes, and Manuela D. J. Bosque undertake at or before the time of the actual occupation of the said lands by the Isthmian Canal Commission that without cost to the Commission that the tenants thereon, whether located in the village of Matachin or elsewhere, shall remove their improvements.

"The said Maria E. Jaramillo Buda de Bosque, Carmen B. de Paredes, and Manuela D. J. Bosque guarantee the United States Government against the claim of any third party to the lands covered by this agreement."

"This agreement is without prejudice to any rights that the said claimants may have under existing agreements to pass upon the Panama Railroad Company, or as against the tenants upon the said lands, but is not intended to confer upon the claimants rights which otherwise they would not have."

Whatever relationship or obligation such an agreement may create as between the grantor and the grantee, it is evident that such an agreement cannot affect the rights of third parties who acquired either an interest in the estate or a right to compensation for improvements made thereon.

If, therefore, such rights or interests had accrued at the time of the purchase, these rights, and interests were not affected by reason of the agreement of June 29, 1908, and, upon ejectment the claimants may, in the proper cases, present their claims against the United States for damages, and awards will be made accordingly.

It is furthermore strongly urged by the United States that the warranty clause inserted in the deed of May 3, 1909, under which 71.3 hectares were conveyed by the members of the Bosque family to the United States, places upon the grantors the duty to remove the said occupants and tenants without cost to the United States of America. The covenant of warranty herein referred to reads, as follows:

"To have and to hold the above designated and described lands, together with all rights, claims, leasehold interests, and demands of whatsoever nature appertaining thereto unto the said United States of America, its successors, or assigns forever; we do hereby for ourselves and for our heirs, administrators, executors, and assigns covenant and agree to warrant and defend these lands unto the United States of America, its successors and assigns against the lawful claims and demands of all persons whomsoever, and we do hereby likewise release and surrender any and all claims for actual or consequential damages to the said lands which may have heretofore been caused or claimed by reason of the action of the Isthmian Canal Commission, the Panama Railroad Company, or any of their agents, servants, or employees."

The Commission has had occasion to pass on the effect of such covenants of warranty, and it is only necessary, in this connection, to cite the opinion of the Commission on a similar covenant contained in the deed of May 1, 1909, under which the United States acquired that portion of the estate of Bailamonos Sur situated below the 87-foot contour line. In the course of the opinion on this covenant, the Commission said:

"Such a covenant creates an obligation between the vendor and the purchaser. In case of a breach of this covenant, the adjudication of the relative rights of vendor and purchaser are beyond the jurisdiction of the Commission.

"The covenant contained in the deed of May 1, 1909, under which the United States acquired that portion of the estate of Bailamonos Sur below the 87-foot level, did not affect the status of those who had either an interest in the land or had acquired a right to compensation for improvements.

"The Commission, after having taken into consideration the terms of the covenant of warranty and the provisions of Articles 1880 to 1893 inclusive, of the Civil Code in force in the Canal Zone, has reached the conclusion that where rights accrued to persons occupying the portion of the estate of Bailamonos Sur purchased by the United States in 1909, which rights had accrued prior to the date of this purchase, award against the United States be made."

The same principle is to be applied in this case in the interpretation of the covenant of warranty. Where rights accrued to persons occupying the portion of the estate of Matachin, purchased by the United States by deed of May 3, 1909, the present grantee, to-wit, the United States, is primarily responsible for any damages arising out of the eviction of tenants or occupiers from such lands.

Having disposed of the questions involved in the memorandum of agreement and the covenant of warranty, it becomes necessary to determine the principles of law which govern the compensation due tenants upon eviction.

The evidence before the Commission shows that tenants on the estate of Matachin did not have written leases, and that, although the payments were made from month to month, the duration of such leases was not fixed.

It has been urged upon the Commission that the status of such tenants is governed by Article 2009 of the Civil Code, which reads, as follows:

"Article 2009. If no time for the duration of the contract shall have been fixed, or if the time be not determined by the special service to which the thing leased is destined or by custom, neither of the parties shall have the right to cause it to cease, unless they give notice to quit in advance.

The notice in advance shall be adjusted to the period or measure of time which governs the payments. If the lease be at so much per day, week, month, the advance notice shall be respectively of one day, of one week, of one month.

The notice to quit shall begin to run at the same time as the next period.

The provisions of this article do not apply to the lease of immovables, treated of in Chapters 5 and 6 of this Title."

An examination of the Code will show, however, that this article is intended to govern the lease of things or movables. Article 2009 expressly refers to the fact that it is not intended to govern the lease of immovables treated of in Chapters 5 and 6 of this Code. The principles of Chapter 5 of the Civil Code refer exclusively to the leasing of dwelling houses and other buildings. Leases of land are, therefore, governed by Chapter 6 of the Civil Code. The article of this chapter governing the right to compensation of tenants on that portion of the estate of Matachin purchased by the United States in deed dated May 3, 1909 reads, as follows:

"Article 2043. Should there be no fixed time for the duration of the lease, notice to quit must be given one year in advance, in order to terminate it.

The year shall be understood in the following manner:

The day of the year upon which the delivery of the estate to the tenant was begun, shall be considered as the initial day of the successive years, and the year in advance shall be counted from this initial day, even though notice to quit shall have been served some time before.

The parties may agree on another rule, if they deem it advisable."

The Commission has, therefore, reached the conclusion that on that portion of the estate of Matachin acquired by deed of May 3, 1909, tenants are entitled to compensation for the value of their unexpired leaseholds.

(Signed) FEDERICO BOYD, ROLAND P. FALKNER, SAMUEL LEWIS, L. S. ROWE, Commissioners.

September 16, 1913.

Certification of Disagreement No. II.

Under the provisions of Article XV of the Treaty between the United States of America and the Republic of Panama ratified February 26, 1904, it is provided:

"The President of the United States shall nominate two persons and the President of the Republic of Panama shall nominate two persons and they shall proceed to a decision; but in case of disagreement of the Commission (by reason of their being equally divided in conclusion) an umpire shall be appointed by the two Governments who shall render the decision."

Pursuant to the provisions of this article the Commission desires to bring to the notice of the Governments parties to the Treaty that the Commission has been unable to reach an agreement on the following question:

Do the provisions of Article VI of the Treaty between the United States of America and the Republic of Panama ratified February 26, 1904, grant

a right to compensation for improvements to those tenants of public lands who held such lands under revocable leases or licenses issued by the Isthmian Canal Commission, but who purchased the improvements on such lands from persons who occupied such lands before accepting Isthmian Canal Commission leases or licenses, but who, prior to the sale of their improvements to the present claimants, accepted such leases or licenses.

The Joint Commission herewith certifies this disagreement to the Governments parties to the Treaty for reference to an umpire, as provided for in Article XV of said Treaty.

OFFICIAL CIRCULARS.

Appointment of Accountable Officials.

CULEBRA, C. Z., November 19, 1913.

CIRCULAR No. 514:

The following accountable officers are hereby appointed, effective January 1, 1914, and as such will make returns for all property over which they have jurisdiction:

Mr. W. G. Comber, Sixth Division.
Mr. R. B. Tinsley, Fifth Division.
Mr. J. A. Walker, Balboa terminals, Second Division.
Mr. W. J. Holmes, transportation department, Second Division.

Mr. J. C. Keller, chief clerk, Fifth Division, will prepare invoices as of December 31, 1913, against the above named accountable officers, who will check same and be prepared to start their returns as of December 31, 1913.

The accountability of Mr. J. C. Keller, chief clerk, Fifth Division, will be closed upon final audit of his accounts for the period ending January 1, 1914.

GEO. W. GOETHALS,
Chairman.

Regulations Governing the Issuing of Data for Notice to Mariners in Connection with Aids to Navigation.

CULEBRA, C. Z., November 11, 1913.

CIRCULAR No. 513:

The order or class and characteristic distinction of all aids to navigation in the waters of the Canal Zone shall be fixed by the Chairman and Chief Engineer and no change in them shall be made without his authority. Public notice shall be given of all authorized changes.

Increase in aids to navigation.—Except to mark wrecks, and newly discovered and dangerous obstructions which must receive immediate attention, the authority of the Chairman and Chief Engineer must be obtained before increasing the buoyage or other aids to navigation in the waters of the Canal Zone; if immediate action is necessary, the fact must be reported at once to the Chairman and Chief Engineer, with information as to the type and color of buoys or other aids, character of light, height of light above lake or sealevel, and position of buoys or beacons by angles or bearings, distances, etc., illustrated, if practicable, by a portion of a chart or map showing graphically the location, depth of water, etc.

Application for authority to establish or maintain all other temporary or permanent aids shall be accompanied by full description of the aid, position, bearings, distances, etc., and be approved by the Chairman and Chief Engineer.

When a temporary or permanent aid has been authorized, it shall not be discontinued, moved, or changed in any manner, without the authority of the Chairman and Chief Engineer, and the request should be made, when practicable, in sufficient time to permit of the issuance of a notice to mariners in advance of the proposed change.

Aids to navigation maintained by division and resident engineers and the Panama railroad.—The Chairman and Chief Engineer hereby directs division and resident engineers and the Panama railroad to notify the assistant engineer of the Lighthouse Subdivision in every case where aids to navigation for the purpose of marking works of harbor or channel improvements are established or discontinued under their direction. Notice should be given of such aids as may be of use or interest to general navigation in the waters of the Canal Zone, but need not be given as to such buoys or lights as are of temporary or unimportant character, or of importance only to the works of said harbor or channel improvements.

In placing aids to navigation in connection with harbor or channel improvement works, division and resident engineers and the Panama railroad should see that they do not, in characteristic or otherwise, conflict with other aids to navigation in the vicinity, and should, when desirable, confer with the assistant engineer in charge of the Lighthouse Subdivision on this subject.

On receipt of this circular the aforementioned engineers and Panama railroad will furnish the Lighthouse Subdivision with complete information regarding all aids to navigation heretofore established, which are now maintained by them.

Notice to mariners.—In cases of casualty or the restoration thereafter of an aid to navigation to service condition, or changes affecting minor aids in the waters of the Canal Zone, the assistant engineer in charge of the Lighthouse Subdivision shall, in the name of the Chairman and Chief Engineer, issue a local notice to masters and pilots. One copy thereof shall be transmitted to the Chairman and Chief Engineer. The Lighthouse Subdivision shall furnish copies of such notices only to division and resident engineers, the Panama railroad and the port captains, who, in turn, shall

post the notices in such places as may in their opinion, best subserve the interests of navigation, as, for instance, I. C. C. pilots' headquarters, places where I. C. C. masters report for duty, the collector of customs, and local steamship offices.

In cases of authorized changes in aids to navigation, or the establishment of permanent aids affecting the Atlantic and Pacific approaches to the Canal, the data for the publication of a notice to mariners shall be sent to the Chairman and Chief Engineer for transmittal to the Hydrographic Office, Washington, D. C., in time to insure its publication and the distribution of the notice one month in advance of its taking effect. Such data will also be distributed to local interests, pending the receipt of the regular weekly notice to mariners published by the Hydrographic Office.

Lights on bridges.—The Panama railroad shall maintain at its own expense, from sunset to sunrise, such lights on its bridges as may be required by the Chairman and Chief Engineer for security of navigation.

GEO. W. GOETHALS,
Chairman and Chief Engineer.

Reductions in Foremen to be Referred to Inspector Greenslade.

CULEBRA, C. Z., November 17, 1913.

HEADS OF DEPARTMENTS AND DIVISIONS:

Before letting out any foremen or general foremen employed on construction work, it is directed that Inspector George A. Greenslade of this office be notified at least three days in advance, in order that he can make the necessary arrangements in case their services are needed by any other department or division. Similarly, departments and divisions requiring construction foremen should notify Inspector Greenslade directly, so that he can assist in filling their requirements on the Isthmus, thus avoiding the necessity of making United States requisition.

GEO. W. GOETHALS,
Chairman and Chief Engineer.

Receiving and Forwarding Agent, P. R. R., at Balboa.

PANAMA RAILROAD COMPANY,
OFFICE OF GENERAL SUPERINTENDENT,
COLON, R. P., November 17, 1913.

CIRCULAR No. 279:

To all concerned—Effective November 24, 1913, Mr. A. S. Jussen is appointed receiving and forwarding agent of the Panama Railroad Company, with headquarters at Balboa, C. Z., vice Mr. C. H. Mann.

Approved: F. MEARS,
Acting General Superintendent.
GEO. W. GOETHALS,
President.

Change in Time Table No. 16.

PANAMA RAILROAD COMPANY,
OFFICE OF GENERAL SUPERINTENDENT,
COLON, R. P., November 18, 1913.

BULLETIN No. 19:

To all concerned—The following change in schedule of time table No. 16 will be made, effective at once, in order to permit parties visiting Panama on holidays to leave that point on a later train:

Trains Nos. 54 and 55 will be operated on holidays in lieu of trains Nos. 50 and 51, during the life of time table No. 16.

F. MEARS,
Acting General Superintendent.

Examination by Board of Local Inspectors.

ANCON, C. Z., November 20, 1913.

The Board of Local Inspectors will conduct examinations at the Administration Building, Ancon, on Wednesday, December 3, beginning promptly at 2 p. m., for persons desiring to procure the following classes of licenses: Pilots, masters, mates, marine engineers, chauffeurs, and navigators of motor boats. All applicants for licenses must procure from the Executive Office, Ancon, forms of applications and information respecting the filling out of same, not later than the day previous to the examination. In addition, all persons desiring chauffeurs' licenses must provide themselves with automobiles, with which to demonstrate their ability properly to operate the same.

Note.—The demonstration test for chauffeurs will be given on Tuesday, the day preceding the regular examination, at 2 p. m., at the Administration Building, Ancon; on Wednesday, the day of the regular examination, at 9 a. m., at the police station, Cristobal; and for out-of-town applicants, on Wednesday, the day of the regular examination, at 2 p. m., at the Administration Building, Ancon.

W. V. JUDSON,
Chairman, Board of Local Inspectors.

Supplies for the Canal.

The following steamers, with supplies for the Isthmian Canal Commission and Panama railroad, arrived at the ports of Colon, Balboa, and Cristobal during the week ending November 22.

Alliance, November 16, from New York, with 156

bundles pipe, for administration building; 203 rolls wire fencing, for Panama railroad; 132 packages electrical machinery, for Mechanical Division; 37 cases electrical machinery, for First Division; 1,119 bundles steel bars for Second Division; 24 barrels asphalt paint, 37 coils wire, 918 pigs lead, 74 kegs rivets, 75 kegs bolts, for stock; and a miscellaneous cargo, the whole consisting of 1,398 pieces, weighing 182 tons.

Cristobal, November 16, from New York, with 9,085 bundles steel bars, for Second Division; 172 pieces pipe, for administration building; 598 pieces structural steel, for First Division; 11 cases electric cranes, for Mechanical Division; 28 pieces armament, for fortifications; 60,000 bags cement, 46 bundles wire, 63 bundles galvanized sheets, 250 pieces beams and angles, 34 bundles shovels, 38 barrels lubricating grease, 500 cases petroleum, 176 kegs rivets, 57 kegs bolts, for stock; and a miscellaneous cargo, the whole consisting of 70,050 pieces, weighing 4,450 tons.

Tivies, November 16, from New York, with 20 crates insulators, 302 barrels enameled brick, 16 cases pumps, for First Division; 37 cases electrical material, for Mechanical Division; 70 cases structural material, for fortifications.

Carlago, November 17, from New Orleans, with 129 pieces oak lumber, for Sixth Division; 225 untreated piles, for Atlantic Division; 40 barrels coal tar, 82 kegs washers, 1,478 bales hay, for stock.

Prinz August Wilhelm, November 17, from New York, with 30 steel rods, for fortifications; two boxes screws, eight kegs bolts, for stock.

Aztec, November 19, from San Francisco, with 5,548 pieces lumber, for Mechanical Division.

Zacapa, November 20, from New York, with 18 cases structural material, for fortifications; 30 crates valves, for Division of Municipal Engineering; 168 pieces steel rods, for Sixth Division; 324 pieces structural material, for First Division; 250 bundles steel channels, 10 kegs nails, 15 crates sump wagons, for stock.

Abauguez, November 21, from New Orleans, with 30 barrels alcohol, for Sanitary Department; 30 crates iron doors, for First Division; 2,859 pieces lumber, 40 bundles shingles, 1,612 bales hay, 59 bales cotton waste, 24 bales cotton duck, for stock.

Misdirected Letters.

The following insufficiently addressed letters, originating in the United States and its possessions, have been received in the office of the Director of Post, and may be procured upon request of the addressees:

Bentley, James E.	Mitchell, Joseph
Breckneridge, Capt.	Murphy, Mrs. I. Louise
and Mrs. E. L. D.	Neal, A. L.
Briggs, Mrs. T.	Owen, N. J.
Cook, Charles	Reed, Miss Etta
Creager, Gray H.	Saunders, Miss Ida
Davis, Miss Anna	Sheehan, Frank C.
Davis, Sam	Sherer, Mrs. M. E.
Dunn, John	Smith, E. C.
Goodman, Helen (2d class)	Stanley, Archibald
Hamburger, Gus	Svenson, Capt. Chas. (3)
Hebert, Everett E.	Traves, Charles E. (6)
Jackson, Van B. (package)	Travers, Charles E.
Johnson, Harry C.	Trotter, Alex
Kimball, Clifton P.	Trower, James D.
Kistler, J.	Wiggins, Miss Louis
Kuchler, Fred J.	Wilkes, R. H.
McConney, Christopher	Wilson, J. M.

Married.

GRANT-FAIRBANKS—On Friday, October 31, at Brooklyn, N. Y., Miss Myrtle B. Fairbanks of Gatun, to Mr. George F. Grant, of Portland, Me., the Rev. Edward Eichhorn of Brooklyn officiating. Canal Zone residence, Gatun.

JOHNSON-HAYES—At the home of the bride's parents in Corozal, on Thursday, November 20, Mary Otus Hayes of Whitehouse, Ohio, to George Johnson of Brooklyn, N. Y., the Rev. Harry Compton officiating. Canal Zone residence, Culebra.

Tide Table.

The following table shows the time of high and low tides at Panama for the week ending December 6 1913:

DATE.	Low	High	Low	High	Low
November 30 . . .	A.M.	A.M.	A.M.	P.M.	P.M.
December 1 . . .	4.47	11.10	5.22	11.30	
	5.30	11.53	6.07		
December 2 . . .	12.17	6.16	12.40	6.52	
December 3 . . .	1.05	7.03	1.28	7.40	
December 4 . . .	1.55	7.53	2.18	8.30	
December 5 . . .	2.50	8.48	3.12	9.25	
December 6 . . .	3.50	9.50	4.08	10.22	

75th meridian time.

COMMISSION CLUBHOUSES.

Activities of the Young Men's Christian Association.

GENERAL.

The following is a list of pictures to be exhibited during the week, December 2 to 7: "The unfulfilled oath," "The nurse at Mulberry Bend," "The mountaineers," "What George did," "The man he might have been," "The wives of Jamestown," the latter being a feature film in two reels.

The standing of the teams in the basketball league on November 24, was, as follows:

Team.	Won.	Lost.	P. C.
Empire.....	10	0	1,000
Camp Elliott.....	7	3	.700
Gatun.....	6	4	.600
Cristobal.....	3	6	.333
Culebra.....	3	7	.300
Corozal.....	0	9	.000

The standing of the teams in the bowling league, November 24, was as follows:

Team.	Won.	Lost.	P. C.
Cristobal.....	14	4	.778
Empire.....	15	6	.714
Corozal.....	12	9	.571
Culebra.....	11	10	.524
Gatun.....	5	13	.278
Camp Elliott.....	0	15	.000

There will be two companies from the United States to entertain in the clubhouses during the holidays. Dr. and Mrs. Frederic Poole will sail on December 11, and will entertain with moving pictures of China and Panama. Mrs. Poole will exhibit the various Chinese costumes. The Pennsylvania State College Glee Club, assisted by a reader, will sail for the Isthmus on December 17, for a limited stay. This organization recently made a tour of the Sante Fe system, entertaining at the various points along the line.

COROZAL.

At a farewell tendered Mr. D. E. Connor at the clubhouse on Tuesday, November 18, Mr. Connor played all comers in a simultaneous chess match, winning all but two of the games played.

The Culebra basketball team played Corozal on the local floor on Wednesday night, November 19, and was defeated by a score of 27 to 13.

The Camp Elliott basketball team came to Corozal and on Saturday night, November 22, and was defeated by the locals by a score of 43 to 20. A game with the Empire team is pending.

The Corozal bowlers took two of the three games played with Cristobal on the local alleys on Saturday night, November 22.

At a Thanksgiving service on Sunday evening, Mr. W. B. Childers of Gatun, gave an interesting talk on the subject, "Thanksgiving." A solo was given by Mr. H. W. Dohrmann of Empire.

CULEBRA.

On Friday night, November 21, Captain Nilsen entertained an audience of 250 people, describing his trip to the Antarctic region with Captain Amundsen. His talk was illustrated by maps, showing the route, and he was aided by Mr. Wisting, who made the trip to the South Pole with Captain Amundsen, and who also accompanied the latter on his trip through the Northwest Passage. Articles of wearing apparel, skis, shoes, etc., were exhibited.

At the regular Sunday night service, the subject of Thanksgiving, its origin and purpose, was discussed. Owing to unforeseen circumstances, Mr. W. W. Warwick was unable to be present, but will speak at a later date.

The last game in the basketball league was played at Empire with the Cristobal team on Saturday night, November 22, Culebra winning by the score of 18 to 15. The following was the lineup:

Cristobal—D. Raymond, W. Fraser, forwards; A. Fraser, center, T. Taylor, Carpenter, guards.

Culebra—Stripling, Bracker, Forwards; Gassman, center; Rudolph, Worsley, guards.

The "Open house," which was to have been held on Wednesday night, has been postponed until Friday night, November 28. The ladies may bring a pie if they wish. Games of all kinds will be played and music will be furnished.

EMPIRE.

On Monday night, November 17, the Guatemalan orchestra gave a concert. Their native instrument the "Marimba," was the feature of the evening.

Captain Nilsen of the polar ship *Fram*, gave his lecture on Wednesday evening, November 19.

The Empire bowling team defeated the Culebra team in three straight games on Thursday, November 20. These were Isthmian tournament games.

On account of business reasons, Señor Gomez, who has been teaching Spanish at the Empire clubhouse for the past two years, has resigned his position. For the major part of the time Señor Gomez has had five classes. Mr. Nock will take charge of this work, and all those

wishing to continue, or start in the new class, are requested to make arrangements as soon as possible.

The action of Cristobal and Gatun in forfeiting their basketball games to the Empire team gives the latter the championship for this season. It has won all games played. This year's team was composed of Messrs. Johnson, captain; Hultquist, Bartholomew, Plank, Sawyer, Miller, and Stevens. Gold medals will be awarded the members of the winning team. The gymnasium classes will be started about December 1.

GATUN.

A Spanish class, composed of about 30 members, was formed on Friday evening, November 21. The teacher will be Madam Delfess of Colon, and the DeTornos system will be used. Classes will be held twice a week on Tuesdays and Thursdays. The ladies' class will be held in the afternoon from 4 to 5 p. m.; beginners' class will be held from 6.45 to 7.45, and the advanced class for men from 7.45 to 8.45 p. m. The classes are open to all ladies of Gatun and to all male members of the Gatun association. The fees will be 25 cents per lesson, or \$2 per calendar month, in advance.

Gatun took three games of tenpins from the Camp Elliott team on Saturday evening, November 22. The lineups and results were, as follows:

Gatun.	Camp Elliott
O'Meara.....	164 163 209
Otto.....	151 128 168
Sherrard.....	151 147 170
Grover.....	154 162 136
Claherty.....	171 168 162
Darnell.....	156 154 124
Weiss.....	135 201 149
Ogle.....	113 102.....
Coleman.....	135 105 141
Thompson.....	145 198 146
Hobert.....	131.....

Totals..... 791 763 845 684 760 691

The Isthmian basketball tournament having been brought to a close, renewed activity is expected in the gymnasium classes, which will be held every Tuesday and Friday nights.

Special moving pictures will be held on Thursday evening, at 8 p. m., November 26, and regular moving pictures on Saturday evening, Nov. 29.

CRISTOBAL.

The Cristobal second team defeated the Gatun second team at basketball on Friday, November 21, by a score of 28 to 8.

Three teams have been chosen among the members of the boys' department for a local athletic and gymnastic contest. Two contests have been held, and the standing of the teams is, as follows. "Yale," 139.35 points; "Harvard," 139.2 points; "Princeton," 136.6 points. A similar contest will begin in the men's classes early in December.

On Saturday morning, November 22, the Corozal boys played basketball at Cristobal. After lunch the boys were treated to a trip to the *Fram*. The Cristobal midgets defeated the Corozal first team midgets at basketball score, 13 to 5. The Corozal second team defeated the Cristobal second team, at basketball by a score of 7 to 4. The Cristobal boys won the relay race, but lost the duckpin tournament.

Lieutenant-Colonel Wilson was unable to appear before the discussion club on November 20, but will do so at a later date. Mr. W. L. Henderson of Mobile, Ala., will appear before the discussion club on Thursday evening, December 4. Subject, "The Southeast and its possibilities after the opening of the Panama Canal."

The Guatemalan orchestra furnished the music for the Buckwheat moving pictures of the Canal, on Tuesday, November 25.

PORTO BELLO.

A meeting of all those interested in a Christmas entertainment was held in the clubhouse on Tuesday night, November 11. Mr. Walter Thompson was elected chairman and P. T. Woolworth, secretary. The following committees were appointed: *Finance*—C. J. Urwiler, chairman; A. W. Colberg, A. D. Hoehne, *Purchasing*—Mrs. Ray Keene, chairman; Mrs. J. C. Jensen, Mrs. D. Hall, *Refreshments*—Mrs. T. H. Smith, chairman; Mrs. Vanvoy, Mrs. Geo. F. Cleveland, Mrs. A. W. Colberg, *Decorations*—Mr. Cecil Wilkes, chairman; J. H. Geyer, D. Hall, J. C. Jensen, T. J. Sherrard, *Program*—Mrs. Vanvoy, chairman; Mrs. A. Hoehne, Mrs. J. H. Geyer, Mrs. Cecil Wilkes.

The Union Sunday school holds its Christmas tree the same night and furnishes the program. As customary, a general celebration will be held by the Sunday school, and a fund has been subscribed to purchase a gift for every one in Porto Bello.

Sale of Cows at Ancon Hospital.

ANCON, C. Z., November 11, 1913.

There will be sold at public action at the Ancon Hospital dairy on Saturday morning at 10 o'clock, November 29, five cows. The right to reject any and all bids is reserved.

A. B. HERRICK,
Acting Superintendent.

Cold Storage Prices.

Prices of cold storage articles sold at the commissaries remain unchanged, with the exception of Jamaican oranges, which have been reduced to 12 cents a dozen.

*Amended schedule, resulting from temporary withdrawal of the *Allianca* for repairs.

Panama Railroad Company's steamers sail from Pier 11, Cristobal, at 3 p. m.

Royal Mail steamers leave for New York on alternate Tuesdays at 1 p. m.; for Southampton on alternate Tuesdays at 10 a. m.

United Fruit Company's ships for New Orleans direct, leave on Thursdays and Saturdays at 3 p. m.; ships for New York via Kingston, on Tuesdays at 1.30 p. m., and Thursdays at 1.30 p. m.; for Bocas del Toro on Mondays at 5 p. m.; for Limon, via Bocas del Toro, on Tuesdays at 5 p. m.; and for Limon direct, Tuesdays at 3 p. m.

Hamburg-American steamers sail for New York, via Kingston, Santiago de Cuba, and Fortune Island, on Tuesdays; the *Prinz August Wilhelm* and *Prinz Joachim* at 10 a. m.; the *Carl Schurz* and the *Emil L. Boas* at 2 p. m. (Effective November 25.)

The following vessels arrived at, and departed from, the port of Balboa, during the week ending November 22:

Arrivals—November 15, *Aztec*, from San Francisco; November 17, *Mantaro*, from Callao; November 17, *Rupanco*, from south ports; November 19, *Palena*, from south ports.

Departures—November 16, *Chile*, to Guayaquil; November 17, *Pachitea*, to Callao; November 17, *Guatemala*, to south ports; November 18, *Quito*, to intermediate ports.

CANAL

RECORD

Volume VII.

ANCON, CANAL ZONE, WEDNESDAY, DECEMBER 3, 1913.

No. 15.

The Canal Record

Published weekly under the authority and supervision of the Isthmian Canal Commission.

The Canal Record is published free of charge, one copy each to all employees of the Commission and Panama Railroad Company whose names are on the gold roll. Extra copies and back numbers can be obtained from the news stands of the Panama Railroad Company for five cents each.

Address all Communications,

THE CANAL RECORD,

Ancon, Canal Zone,

Isthmus of Panama.

No communication either for publication or requesting information, will receive attention unless signed with the full name and address of the writer.

NOTES OF PROGRESS.

Improvements at the Tivoli.

Work on the additions and improvements at the Hotel Tivoli is going forward rapidly and it is hoped to have everything completed before the rush of the tourist season in December and January. In addition to the kitchen improvements, the installation of facilities for complete *a la carte* service, and an enlarged modern steam and electric laundry, a pergola has been erected, opening from the writing room, which will be equipped with modern fittings for an ice cream parlor. The open roof will be shaded by a rolling cover of canvas, and vines have been planted at the sides of the pergola. The roof of the new Colonial *porte cochere* will be fitted up as an observation platform and out-of-door sitting room. The veranda at the entrance has been extended out several feet at the sides of the stairway. The grounds in front of the hotel are being enlarged and improved. The driveway circle extends around the band stand and is bounded by a concrete wall. Within this circle there are two medallions for flower beds. Concrete sidewalks are being laid in front of the hotel extending past the tennis court on the left and to the tramway tracks on the right. A 22-foot space will be left between the sidewalks and the hotel, and between the circle wall and the road, for the planting of flowers and shrubbery. The main office has been entirely reconstructed, with the addition of a telegraph and cable office; and a new telephone system, which will concentrate and facilitate the service for guests.

Changes in Corozal Passenger Station.

The railroad station at Corozal has been remodeled, by having the ticket office transferred from the north end of the building to the center of the waiting shed, thus providing separate spaces for the first and second-class passengers. Concurrently with this work, the carpenters renewed the timber supports for the building, and raised it about

10 inches above its former level. The alighting platform is being graded accordingly. At the south end, a new platform, with stairs leading to the highway in rear of the station, was built between the station proper and the recently erected news stand, which was transferred from Gorgona. About 75 feet north of the station, a waiting shed has been erected for the accommodation of hospital patients.

Passage of Dredge "Corozal" Through Pacific Locks.

The ladder dredge *Corozal* was lifted from the Pacific entrance channel to Culebra Cut during the forenoon of December 2, and in the afternoon made its way, through bridge No. 57½, at Paraiso, to the south side of Cucaracha slide. It began excavating on the morning of December 3. The dredge was accompanied by the tugs *Reliance*, *Cocoli*, and *La Boca* towing six mud scows and a sand barge. The vessels entered the lower lock at Miraflores at 7.30 a. m., and emerged from the lock at Pedro Miguel into Culebra Cut at 9.30 a. m., the passage through the Pacific locks and Miraflores Lake occupying exactly two hours.

For the present the *Corozal* will proceed in the wake of the *Marmot*, which is engaged in cutting a pioneer channel through the slide and excavate to the full width of the Canal, with a depth of 40 feet. Spoil from both dredges will be dumped in the old drainage ditch, and in an area near the relay pumping station, from which it will be rehandled by pipeline suction dredge. This gives a short, quick haul, and is estimated to be scarcely more expensive than original dumping on a long haul.

The *Corozal* is the largest of the Commission's ladder dredges, and has the greatest excavating capacity. Under local conditions of operation, it will handle about 600 cubic yards of material per hour. It is 260 feet long, 47 feet wide, and draws 14 feet nine inches of water. In its passage through the gap in bridge No. 57½, it was handled by its own winches, drawing on hawsers attached to dead men on both banks of the Canal. Wrecking cranes lifted the removable span and placed it on the trestle barge at 1.05 p. m.; the barge was pulled aside, and the prow of the *Corozal* entered the gap at 1.25 p. m.; the stern passed the trestle at 1.52 p. m. The last of the tugs and barges cleared the trestle at 3.05.

Dredge No. 1 which has been working in the Culebra Cut section was passed through Gatun Locks from Gatun Lake to sealevel on Tuesday forenoon, December 2, in tow of the crane boat *La Valley*. It went into Cristobal dry dock for overhauling. The tug *Bahio* was locked down at Gatun on Tuesday afternoon to be fitted with a new propeller at the Cristobal marine shops. It returned to its work in the lake and Cut sections early Wednesday forenoon, December 3.

RAISING RIM OF LAKE.

Fills Necessary at Two Saddles to Prevent Overflow Into Sea.

The Isthmian Canal Commission has awarded a contract to R. W. Hebard and Company, Inc., and Thomas R. Lombard, jointly, for the building of an earth dike at Caño saddle, No. 4, along a ridge about 12 miles southwest of Gatun, to raise the rim of Gatun Lake at that point to 105 feet above sealevel. The saddle is between the headwaters of the Siri River, a tributary of the Trinidad, and the Lagarto River, which flows into the Caribbean Sea. The surface of the earth at the lowest point is 87.4 feet above sealevel, and the fill is necessary to remove the danger of an overflow of the lake into the sea. The fill will be approximately 900 feet long, between the 105-foot contours on knolls at the ends of the saddle. It is to be 15 feet wide at the top, with a slope of one on three on both sides, and will contain about 71,500 cubic yards. Payment is to be made at the rate of 68 cents per cubic yard, place measurement, of completed fill.

The contractor is to begin work within 15 days after date of award and finish within four months. The surface of the earth is to be cleared of vegetation at the site of the fill, and for five feet beyond the stakes delineating its outer edges. The earth is to be broken thoroughly to a depth of at least six inches, and a ditch for locking the fill with the natural earth is to be dug along the longitudinal center line of the site to a depth of three feet, with a width of two feet at the bottom and four feet at the top. The fill is to be laid in layers not more than two feet thick, over the full width, as determined by the elevation. The Commission will furnish water transportation once a week from Gatun to the site, and extend the privileges of hospital, hotel, and commissaries to the employees of the contractor. The contractor will use his own machinery, including a steamshovel and dump cars, to be purchased from the retired equipment of the Commission.

A fill was recently completed by the Atlantic Division at the only other point in the perimeter of the lake, exclusive of the site of Gatun Dam, which required raising. This was in a ravine at the headwaters of Las Guachas Creek, half a mile east of Gatun, where the natural elevation was 85.7 feet above sealevel. A fill about 350 feet long and containing approximately 4,117 cubic yards was made by means of mule-team scrapers, borrowing from adjacent hills. It raised the surface to 105 feet, with a crown width of 15 feet.

The topographical surveys necessary to define the limits of the proposed Gatun Lake were begun in 1906. These indicated that all the saddles low enough to warrant close investigation were contained in a distance of about 50 miles, extending from the Pavon

River at a point 31.4 miles southwest of Gatun, to the Santa Rita mountains, about 18.7 miles northeast of the same station. Careful surveys of these places were made between February, 1909, and January, 1911, and test holes were drilled at all of them to determine the perviousness of the underlying strata. With the exception that the elevation at Gatun East, and Caño No. 4, saddles was not sufficient and required to be raised by dikes, the results were reassuring in all instances.

Features of the low places in the rim of the lake are indicated in the following tabulations:

Name	Elevation at lowest point (feet)	Least thickness at el. 485 (feet)	Location from Gatun (Mts.-Dir.)

Opportunities for Skilled Men in Detroit, Mich.

The following communication, received under cover of a personal letter to one of the officials of the Isthmian Canal Commission, may be of interest to readers of THE CANAL RECORD:

THE EMPLOYERS' ASSOCIATION OF DETROIT,
ASSOCIATION ROOMS, STEVENS BUILDING,
DETROIT, Mich., November 6, 1913.

MR. HOWARD E. COFFIN,
HUDSON MOTOR CAR COMPANY,
DETROIT, MICHIGAN.

My dear Mr. Coffin:

There is here in Detroit a constant demand for skilled labor, and if as we understand, there is now available in the Canal Zone, or soon will be, a number of such men, we believe that it would be of considerable service to them if they could be informed of the conditions prevailing in this locality.

Just at this writing, owing to the usual slackening down in many industries at this time of the year, there is not so general a demand for labor as during the busy spring and early summer months. There is, however, a reasonably good call for skilled workmen, i. e., real mechanics, and, in fact, such men can always quite readily find employment to their liking here.

We would not be justified in urging men of less skill to come here, as there is now quite a supply of such help available—handymen, helpers, laborers, etc. This is also the case to a considerable extent in so far as technical men are concerned, as well as executives, superintendents, foremen, etc.

It will be of interest to you, I am sure, to know that during the month of October we placed more men than in any October during the eleven years that our bureau has been in operation. Not only did we exceed previous records in numbers, but also in quality: that is, the men directed to positions last month were largely mechanics, the percentage of unskilled men being comparatively small.

The members of the Employers' Association of Detroit, by whom the labor bureau is maintained, and who draw upon it for their labor, have on their pay rolls an aggregate of about 100,000 workmen, or about 80 per cent of the skilled men em-

ployed in Detroit. Up to the first of November we have placed this year with the various members, 21,509 men, or an average of 92 men every full working day. This has been done without any expense whatever to the workmen, no fee being charged them, our only requirements being that they have the necessary skill to qualify for the position they are seeking, that they are law abiding citizens, and that they have no objections to working under "Open shop" conditions; and with regard to this last qualification, Detroit, as you well know, is as a barren desert to the man who will engage only in a "Closed" shop.

We will be very glad indeed to receive in our bureau men who have rendered satisfactory service in the Canal Zone, and to do all within our power to direct them to plants where men of their particular experience are being called for.

The employment here for skilled help has always been reasonably steady. Wages compare very favorably with those paid in other cities of like size, and vary with the skill of the operative, the class of work upon which he is engaged, etc.

You understand, of course, that it is not possible for us to guarantee positions to any individual man, or any number of men.

I wish to thank you on behalf of our board, and our members, for the interest you have taken in this matter, and for your splendid and most interesting talk regarding those matters in the Canal Zone in which we are most interested from an industrial standpoint.

Very respectfully,

JOHN J. WHIRL,
Secretary.

EMPLOYERS' ASSOCIATION OF DETROIT.

Progress of Dredging in Culebra Cut.

On account of activity of the slides on both sides of the Canal at Culebra on November 26 and 27, the dipper dredge *Mindi* was transferred on November 28 from the north side of Cucaracha slide to the channel between the east and west Culebra slides, to assist the *Chagres*, which has been engaged there since October 24. These slides are the largest and most active along the Canal, and, with Cucaracha, are the only large slides now in motion. The small slides showing motion, which offer no considerable obstruction, include the north La Pita slide, on the east bank about half a mile north of Empire; one on the east bank, south of the Empire suspension bridge, and one south of Contractor's Hill, on the west bank. On the west bank, at a point about 2,500 feet south of Contractor's Hill, there has also been a slight movement of surface earth on a hillside, but as the material has done nothing more to date than to obstruct the railway track on the west berm, and the bank beneath is firm rock, it is not expected that this will ever become a real slide.

Excavation at Cucaracha slide is being carried on by the ladder dredge *Marmot*, working on the south side. Up to the night of November 26, a channel about 125 feet wide and approximately 24 feet deep, at the present level of the lake, had been cleared through all, except about 150 feet of the 1,800-foot section of channel affected by Cucaracha slide. A movement of part of the slide on the night of November 26 deposited about 10 feet of material, and narrowed the width of the channel abovementioned about 50 feet. The *Marmot* immediately moved to the south of the new movement and proceeded to redredge the former channel.

In the construction of the 300-foot timber wharf on the west bank at Paraiso, to be used in connection with dredging operations, the approach and about 150 feet of the wharf proper have been driven. A part of the approach has been fitted with a chute, for handling coal into barges to supply the steam vessels in the dredging fleet. Landing stairs, with the base resting on a covered steel lighter, have been erected opposite the office building of the Sixth Division, and stairs of railroad

ties, set in the bank, have been provided at the north end of Paraiso, for the convenience of employees. Ladders have been provided on both banks, at Cucaracha slide. Landing stairs have been built at Gamboa station, for the use of dredges in that vicinity, and a permanent timber wharf is under construction on the east bank, at a siding controlled from Tower R of the Panama railroad. The former landing, opposite this site, is to be abandoned on account of the flooding of the old line of the Panama railroad, north of Bas Obispo, by the waters of Gatun Lake.

Increased Pumping Facilities at Ancon.

A pump of the horizontal duplex-piston type, purchased by the Canal Commission in 1911 from the Deane Brothers Steam Pump Works, and used until the abandonment of Gorgona in connection with the old water works system at that point, was installed in the Ancon pump station on November 22 to furnish an increased pressure in the Panama water mains, when required, as well as to shorten the time necessary to fill the high service reservoir on Ancon Hill. It is fitted with 12-inch high pressure steam cylinders, 18-inch low pressure steam cylinders, 10½-inch pump cylinders, and has a maximum working pressure of 150 pounds to the square inch. Its capacity is 1,500 gallons of water per minute. Four smaller pumps, each with a capacity of about 250 gallons of water per minute had been performing the service prior to the installation of the larger pump, so that the present pumping capacity at this station is approximately 2,500 gallons of water a minute. Early Monday morning, November 24, two days after the pump was installed, a fire occurred in Panama. As soon as the alarm was turned in the big pump was set to work, and the pressure in the Panama mains went up to 110 pounds to the square inch, furnishing a water pressure for the fire hose, about equalling the efficiency of the automobile fire engines. Although the fire was in the upper part of a wooden building, which is said to have burst into a mass of flames almost at once, the firemen extinguished it without difficulty.

SOCIAL LIFE OF THE ZONE.

Cristobal Woman's Club.

Miss Mary E. Woolley, president of Mount Holyoke College, and Miss Ferris of the Sorosis Club, New York City, were the guests of honor at a special meeting of the Cristobal Woman's Club on Wednesday afternoon, November 26. There was a large attendance of club women including a number of invited guests from the line. Mr. Phillips of Colon gave several vocal selections, accompanied by Miss Enid Wardlaw, and Miss Woolley delivered an address on higher education for women, giving a short sketch of Mount Holyoke and its founder, Miss Mary Lyon. The next meeting of the club will be on Wednesday afternoon, December 19. The subject scheduled for the meeting is a discussion of the public schools.

Farewell Reception.

The ladies' auxiliary of the Gatun Christian league held a farewell reception in honor of its president, Mrs. Charles O. Purdy, on November 14, at the home of Mrs. E. Gilbert. A number of invited guests were present, in addition to the members of the auxiliary. A Wedgwood tea set and a Canton linen luncheon set were presented to Mrs. Purdy. The auxiliary will discontinue its meetings for a time, on account of the departure of its president, and the unsettled condition of its members.

Federation of Women's Church Societies.

The committee which has been advancing the plans for the federation of the women's societies engaged in Christian work in the Canal Zone has issued a call to those societies which have expressed a desire for federation to send delegates to the meeting of the Methodist Missionary Society, which will be held on Saturday, December 6, at 2.30 p. m., at the home of Mrs. Charles W. Ports, Seventh street, Panama. Opportunity will be given at the meeting to consider a tentative constitution for the federation, the same to be presented for final action at a general missionary rally, which will be held in January. All women interested in forming a permanent society, whether they are now members of church societies or not, will be welcome at the meeting.

Coordination of Church Work in the Zone.

Plans are being considered for the coordination of interdenominational church work in the Canal Zone, so that the chaplains who were taken off the pay roll of the Canal Commission on November 15, under provision for reenrollment as honorary chaplains, with privileges of quarters and the use of the commissary stores, may be able to continue their work in the Canal villages. Any one who desires to assist this work may write to Mr. George Butters, Cristobal.

Aquatic Meet at Gatun.

The results of the aquatic meet, held at Gatun on Thanksgiving Day, November 27, under the auspices of the Y. M. C. A., are as follows:

25-yard dash—First, Joe Belmont, Empire; second, D. Simons, Cristobal; third, B. Gordon, Cristobal. Time, 12 1/5 seconds.

25-yard back swim—First, Joe Mitchell, Gatun; second, C. C. Dustheimer, Gatun; third, Leon Gravelle, Empire. Time, 17 4/5 seconds.

50-yard dash—First, D. Simons, Cristobal; second, J. R. Stapler, Paraiso; third, Joe Belmont, Empire. Time, 29 1/5 seconds.

Fancy diving—First, L. C. Kyes, Gatun, 8.56 per cent;

second, J. Arthur Hanson, Miraflores, 7.82 per cent; third, W. H. Van Fleet, Pedro Miguel, 6.09 per cent.

Relay race—First, Gatun—Huber, Mitchell, Bingham, Dustheimer; second, Cristobal—D. Simons, P. Simons, Fraser, Gordon; third, Corozal—Stapler, Jackson, Giavelli, Greene. Distance, 2 feet 15 1/5 inches.

Plunge for distance—First, B. Gordon, Cristobal, 51 feet 6 inches; second, J. C. Luitwieler, Ancon, 50 feet; third, J. Fred Huber, Gatun, 46 feet 6 inches.

100-yard dash—First, James W. Greene, Toro Point; second, J. R. Stapler, Paraiso; third, C. C. Dustheimer, Gatun. Time, 1 minute 15 seconds.

One mile race—First, J. R. Bingham, Gatun; second, James W. Greene, Toro Point; third, Wm. Fraser, Cristobal. Time 30 minutes 20 3/5 seconds.

50-yard dash for boys—First, Hal Wardlaw, Cristobal; second, Edward L. Greene, Pedro Miguel; third, Clarence Atkins, Empire. Time, 40 2/5 seconds.

Underwater swim—First, D. Simons, Cristobal, 103 feet; second, Wm. Fraser, Cristobal, 101 feet; third, J. A. Hanson, Miraflores, 91 feet 3 1/2 inches.

440-yard swim—First, J. R. Bingham, Gatun; second, J. R. Stapler, Paraiso; third, W. H. Porter, Gatun. Time, 6 minutes 47 3/5 seconds.

PERSONAL.

Col. H. F. Hodges sailed for New York on Saturday, November 29, on the *Colon*, on his annual leave of absence. Mrs. Hodges will sail for New York on the steamer *Advance*, which is due to leave Cristobal on Friday, December 5.

Col C. H. Hunter of the United States Coast Artillery Corps, accompanied by Mrs. Hunter, arrived on the Isthmus on the *Colon*, on November 23. They returned to New York on the same vessel, sailing from Cristobal on Saturday, November 29.

Lieut.-Col. Chas. F. Mason, who attended the sixth annual Pan-American Medical Congress, held at Lima, Peru, returned to the Isthmus on the steamer *Mexico*, which arrived off Culebra Island quarantine on Monday, November 24.

Mr. H. O. Cole returned from his annual leave of absence on the United Fruit Company's steamer *Atenas* from New Orleans, on Thursday, November 27.

Mr. W. B. Childers, superintendent on the Isthmus for the McClintic-Marshall Construction Company, sailed for New York on the *Colon*, on Saturday, November 29, and does not expect to return. Mr. W. M. Sterrett will have charge of the closing up of the company's work on the Isthmus in connection with its Canal contracts.

Mr. Walter Emery, who, during the period from October 25 to November 30, inclusive, had been acting as special district judge during the absence of Judge S. E. Blackburn of the Ancon district court, on leave, resigned from the Canal service, effective November 30. He arrived on the Isthmus on July 19, 1904, and was chief clerk at the Ancon Hospital until July 16, 1905, when he was appointed Clerk of the Circuit Court for the First Judicial Circuit at Ancon. On October 1, 1908, his duties were enlarged to include those of Acting Clerk of the Canal Zone Supreme Court, filling the two positions until his appointment to the special judgeship.

American Institute of Electrical Engineers.

The board of directors of the American Institute of Electrical Engineers has author-

ized a section to be known as the "Panama section," and from 25 to 30 members of the Institute now on the Isthmus will hold a meeting at the Hotel Tivoli on Sunday, December 7, at 3 p. m., for the purpose of electing officers and completing the local organization.

Peruvian Steamship and Dry Dock Co.

The Panama agency of the Peruvian Steamship and Drydock Company of Callao, Peru, will hereafter be under the management of the Panama Agencies Company, representatives of W. R. Grace and Company. The office of the Panama Agencies is at the corner of Central Avenue and B street, and its post-office address is Box 153-B, Panama.

Rewards for the Apprehension of Two Men.

A reward of \$50 is offered by the Division of Police and Prisons, in two separate cases, one for the apprehension of the person causing the death on November 3, of Demartis P. Francesco, an Italian laborer, and the other for the person causing the death of Emanuel Sewell, a Jamaican laborer.

Francesco worked as a contract laborer in a gang at Balboa under metal check No. 14915. On October 28, he was riding to his work in a car reserved for Europeans in the Balboa labor train. Near the Hotel Tivoli some eight or 10 negroes boarded the car, causing the Europeans to remonstrate. When the train stopped at Bishop's Hollow, two or three of the negroes left the car, and on reaching the ground, one of them picked up a rock about the size of a man's hand and threw it at the European laborers. It struck Francesco on the head, fracturing his skull, and causing death.

Sewell was employed as a laborer in the Fourth Division under metal check No. 117074. He became involved in an altercation with another laborer in his gang named Federic Castell, near the East Balboa commissary, and during the fight that ensued, he was struck several blows about the body including one in the abdomen, which resulted in his death. Castell disappeared from his gang and has not been heard of since.

Obituary.

George F. Hill, an Australian employed in the telephone and telegraph department of the Panama Railroad Company, living at Empire, died at Ancon Hospital on Wednesday, November 26. He was 33 years of age, had been on the Isthmus since June 13, 1909, and is survived by his wife and two children. His home address was Middleton Beach Road, Albany, West Australia.

Missing Men.

Any one having information as to the present location of V. L. Ott, or Morton Murrell Morgan, thought to be on the Isthmus, is requested to communicate with L. L. Morrison, Shukert Building, Kansas City, Mo.

Married.

MILLER-NEVILLE—At the home of the bride's parents in Gatun, on November 26, 1913, Florence Irene Neville of Utica, N. Y., to Albert Carter Miller of Columbus, Ga., the Rev. C. O. Purdy officiating. Canal Zone residence, Empire.

PARSONS-GRANUM—At the home of Mr. and Mrs. A. F. Symms, Gatun, C. Z., on November 26, 1913, Josephine Olean Granum, to Earl Russel Parsons, both of Chicago, Ill., the Rev. C. O. Purdy officiating. Canal Zone residence, Gatun.

LOST—A bunch of keys, about 12, on a ring, including two large, brass fire alarm box keys. Finder is requested to communicate with Chas. E. Weidman, Fire Chief, Cristobal, C. Z.

LOCK ENTRANCE CAISSON.

Vessel Carrying Pumps, to Close Entrances and Unwater Chambers

The lock entrance caisson being constructed by the Union Iron Works of San Francisco will be a floating gate or dam for closing the entrance to the locks, so that any of the chambers may be unwatered for inspection, cleaning, or repairs. The width of the lock chamber is 110 feet; beyond the line of the

against the shoulders and letting water into its hold to sink it on the sill.

Pumps in the interior of the caisson will then be employed to unwater the chamber, while the water pressure from the outer side will force the caisson securely against the frame, reducing leakage around the edges. When it is desired to remove the caisson, the lock chamber will be filled with water, relieving the pressure, and the water within the caisson

complex than that of the spillway caisson.

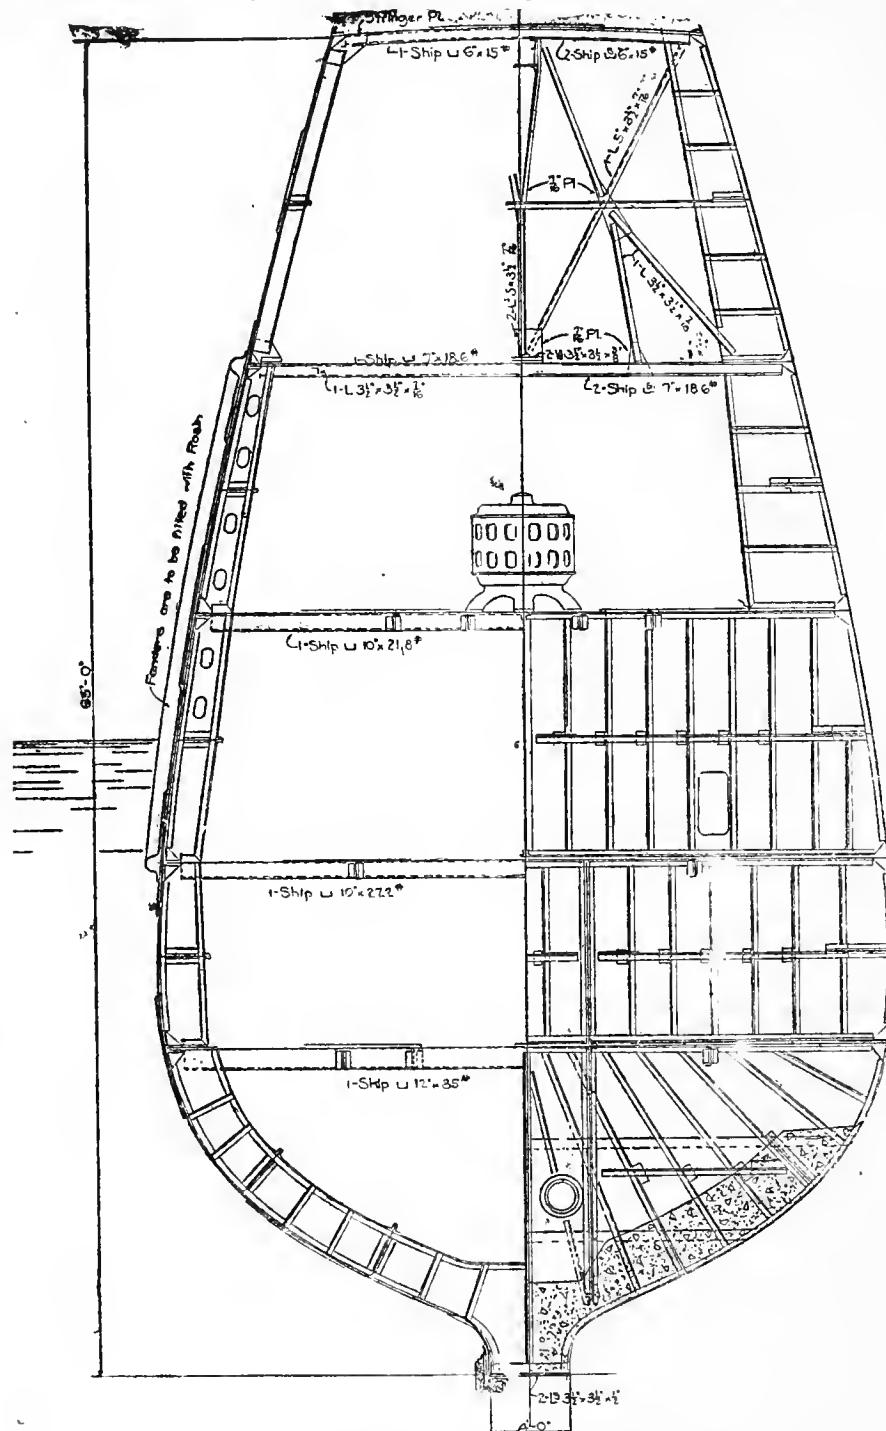

The caisson is designed for interchangeable use at all locks, and will have a draft when light of 32 feet, to allow its convenient handling through the locks. The lower elevation of the sill at the Pacific end of Miraflores Locks, 50 feet below mean sealevel, in connection with the tidal fluctuation which raises the surface as high as 11 feet above mean, requires that the extreme draft of the caisson, when sunk, be 61 feet. Provision for a proper freeboard makes the aggregate depth of the structure 65 feet. The achievement of static stability at the various depths of immersion, without undue bulkiness or excessive weight in the different parts, makes the design of especial interest.

In form, the bottom of the hull will be convex, the ends pointed, and the sides will slope inward from a maximum width of 36 feet, at about one-third the way up from the keel, to a breadth half as great at the top. A typical transverse cross-section of the structure resembles in outline the vertical section through a pear-shaped carbon-filament electric lamp. The cross frame at the longitudinal center of the caisson is shown in the accompanying sketch (A). The horizontal lengthwise sections vary with the inward slope of the slides; in general, they resemble those of the ordinary vessel of commerce, and may be described as flattened ellipses, blunt at the ends to contain the girders and breasthooks by which the pressure will be transmitted to the vertical sills, or shoulders, on the lock walls. The length between the vertical ends will be 112 feet 6 inches, and the extreme length, including the timber cushions, 113 feet 10 inches.

It is desired that the side walls of the locks shall carry practically all the static load from the caisson when it is supporting the water pressure. Accordingly, there will be a number of horizontal decks and end breasthooks to carry the load to the vertical ends; and a system of vertical framing, built intercostally and extending from the keel to the top deck, will transmit the panel loading to the horizontal decks and breasthooks. The essential features of the structure will be the transverse and longitudinal framing, with bulkheads; the horizontal plate decks, girders, and stringers; the girders at the ends and along the keel; the end breasthooks; and the plating to cover the skeleton in forming the hull proper. These elements will all be made from open-hearth structural steel.

The transverse framing system will consist of nine cross frames, spaced about 12 feet apart and extending the whole height of the caisson, and intermediate frames, spaced at intervals of about two feet between the main cross frames. All will be built intercostally between the five horizontal decks. Two of the cross frames will be built watertight and designated as "Collision bulkheads," to form trimming tanks at each end of the vessel, for maintaining longitudinal stability and settling the caisson on even keel when it is to be put in use. The seven other cross frames will have apertures in their lower sections to make them serve as swash bulkheads for controlling the water within the caisson by which the depth of immersion will be regulated.

A longitudinal bulkhead will extend the entire distance between collision bulkheads, from keel to operating deck, along the center line. Its lower part will be sufficiently water-

(A) TYPICAL TRANSVERSE SECTION OF CAISSON.

emergency dams, the approach is widened by an offset of 24 inches on either side. The shoulders so formed, with a connecting horizontal sill across the bottom of the chamber, afford a frame into which the caisson is fitted to dam off the interior of the lock. This is to be accomplished by floating the caisson

will be pumped out to allow it to be floated away. The general principles of construction are the same as in the caissons for Gatun and Miraflores Spillways, described in THE CANAL RECORD of September 25, 1912, but the requirements and conditions of its use make the design of the lock caisson more

tight to form two distinct lengthwise compartments, dividing the free surface of the water ballast and increasing the static stability of the caisson, as against lateral motion.

There will be five horizontal decks, built continuously from vertical end to vertical end. The two lower decks, 16 and 25 feet, respectively, above the base line, will be entirely plated over with the exception of openings for hatches and manholes, the hatches being made large enough for the installation or removal of the pumps through them. The operating deck, 37 feet above the keel, will be entirely plated from end to end, and made absolutely watertight. This deck will support the motors for the pumps, with switchboards, gage registers, etc. The plate-stringer deck, 49 feet above the base line, will be an open truss with diagonal bracing for the central

strakes, running longitudinally over the frames, making lap seams and butt joints which are to have double splice plates. At all the horizontal decks, and around the pipe discharge and suction openings, the sheathing will be doubled. Fenders against external impact will be provided between the 25 and 49-foot levels, by bent plates securely riveted to the sheathing, the space between being filled with poured rosin. Towing rings will be attached along the 37 and 43-foot levels.

End reaction castings will provide connection of the decks and breasthooks, up to and including the 49-foot stringer deck, with the vertical girders, for transmitting to the latter the reactions of horizontal forces. They will be made of carbon steel and closely fitted during construction.

Along the exteriors of the ends and keel

level of the water at the lower end of the flight. The floor of the intermediate level at Gatun is $13\frac{3}{4}$ feet below sealevel. The floor at Pedro Miguel Lock is at elevation plus 9, which is 46 feet below the normal level of Miraflores Lake. The upper of the two levels at Miraflores is $18\frac{1}{2}$ feet below mean sealevel, which means a minimum depth of water in it of about eight feet, at low tide of the Pacific. Moreover, the caisson dams will afford the only means of working in the dry on the outward faces of the guard gates, and the sills for the emergency dams.

The main pumping system will consist of four vertical-shaft centrifugal pumps, having a 20-inch discharge and a 22-inch suction. The practical test governing its design is that it shall be able to pump out in not over 25 hours all the water in the upper and lower

(B) SIDE ELEVATION OF LOCK ENTRANCE CAISSON, WITH SHEATHING OF LEFT HALF REMOVED.

two-thirds of its length. The top deck, 65 feet above the base, will be plated over from end to end, with openings for manholes, skylights, deck cranes, companionways, and scuppers.

Six plate breasthooks will be built at each stem of the vessel, at intervals between the decks. They will serve to transmit the end shears from the decks to the vertical girders. One of these breasthooks, situated 31 feet above the base line, will have its plating calked to watertightness and serve as the bottom for the end trimming tank. At the same level as the breasthooks will be longitudinal intercostals, securely riveted to the transverse frames and to the sheathing.

The skeleton will be entirely sheathed over with steel plating worked in in-and-out

will be fastened cushions of British Guiana greenheart timber. They will be planed to make even contact with the plated sill and reduce leakage to a minimum. Greenheart timber is notably durable under water, either fresh or salt, and has been used for the sills of the miter gates in the Canal locks.

PUMPING SYSTEM.

The pumps installed within the caisson are designed to regulate the water ballast, determining the depth of immersion, and to unwater any portion of the locks between the upper and lower entrances. Of all the lock chambers, the only ones which can be cleared of water without pumping are the two in the upper flight of Gatun Locks, because they are the only ones the floors of which are below the

chambers of one flight of Miraflores Locks, between mean sealevel and the top of the sill of the lower chamber (elevation—50 feet), the tidal level to be at elevation 0 when the pumping is begun, and the tide rising. The total quantity to be pumped out, including 518,000 feet for leakage, will be about 10,285,000 cubic feet. The average discharge under these conditions, for the entire period of pumping, would be about 13,000 gallons per minute for each of the four pumping units. Two of the pumps are to be arranged for pumping out the caisson when it is to be removed from its position against the sill.

Inasmuch as the sill for the caisson is higher than the level of the floor, suction extension pipes are to be provided to cross the sill on

the bottom of the chamber, to allow its complete unwatering. The suction extensions will be lowered by cranes on the deck, and attached from a pontoon, similarly handled.

An auxiliary pump, with suitable pipe connections, will be used to regulate the end trimming tanks, flush the scuppers, and scour the sills.

ELECTRICAL EQUIPMENT.

The caisson will have no means of auto-propulsion, but will be towed from place to place. Its motors will be for operating the pumps, and their details will be determined by the pump characteristics. Four 2,200-volt motors will drive the main pumps, and one of 220-volts potential will operate the auxiliary pump. Another 220-volt motor will drive a ventilating fan. Current will be received at 2,200 volts from chambers in the lock walls, through four flexible cables, and a three-phase transformer is to be provided for the 220-volt motors, and for the lighting equipment. A switchboard will be installed in the operating room, which is on the operating deck, 37 feet above the base line.

MISCELLANEOUS PARTS.

A stairway, as shown in the accompanying sketch (B), will be built from the top deck to the operating deck, and ladders will be installed within the caisson to make all parts accessible. Exterior ladders will be provided on the sides of the hull, as a means of boarding the caisson when it is at light draft, with the top as high as 33 feet above the surface of the water. Manholes in the top deck will give access to the end trimming tanks.

There will be four portable cranes on the top deck, to handle various loads. Each must be capable of raising another at a radius of 14 feet, by two-man power. The pontoon for making the suction extension attachments will be stowed on the top deck and handled by cranes. A deck capstan, hand-operated, will be provided at each end of the top deck. It must be able to withstand a pull of 10,000 pounds.

Two ventilators, 16 inches in diameter, with hoods of Navy standard type, will be placed on the top deck, for ventilating the operating room. One, discharging a short way below the 49-foot deck, will have a multi-vane exhaustor, motor-driven. Twelve air vents, two inches in diameter, to allow the escape of air and gases from the interior compartments, will lead to the top deck. Two skylights, eight by 16 feet, will be set in the top deck, symmetrical with the axes of the caisson. The covers will be made in two parts, for portability, and a hand-operated device will be provided for raising and lowering them. The skylights will be watertight against a hose discharge under 50 pounds pressure.

Fixed ballast, composed of pig iron punchings and concrete, is to be placed in the bottom of the hull, as indicated in the accompanying sketch, to a normal thickness of about a foot and a half. The pig iron will at all points be at least six inches from the sheathing. Two 70-foot lengths of anchor chain will be provided for mooring the caisson when it is not in service, and chain lockers for them will be built of reinforced concrete at the ends of the 37-foot deck.

PROGRAM OF CONSTRUCTION.

Only one caisson is being built at present, though it is expected that two will be provided for the operation of the Canal. The first is

to be completed about September, 1914, and towed to the Isthmus for test at the lower end of Miraflores Locks, as described. The test may suggest modifications; if not, the second caisson will be constructed like the first. The patterns for all the castings in the structure will become the property of the Isthmian Canal Commission on acceptance of the caisson, and will be delivered with it. Fabrication and erection of the first caisson are being supervised at the plant of the contractor by Mr. Lewis A. Mason, assistant engineer, who was associated with Mr. Henry Goldmark, designing engineer, in working out the design, plans, and specifications.

Disposition of Wrecking Cranes.

A committee, consisting of Lieut.-Col. T. C. Dickson, chairman; Mr. R. K. Morris, Mr. M. B. Connolly, and Mr. Snyder, appointed to consider future requirements on the Isthmus for wrecking cranes, and to make recommendations in regard thereto, has reported that one wrecking outfit complete, including the 100-ton wrecking crane No. 32, will suffice for wrecking purposes, both under present conditions, and under the permanent organization. The wrecking outfit should be stationed at Paraiso until transportation and other conditions make it advisable to transfer same to the Balboa shops, its proper station under the permanent organization.

Crane No. 64 should be assigned to the Mechanical Department and stationed at Cristobal for use by any division or department requiring the services of a 75-ton crane, and also for use in wrecks requiring a crane to operate from the north end. The operator of this crane should be a machinist regularly employed at the Cristobal shops.

When crane No. 3, which is a self-propelling machine, can be spared by the Mechanical Division, it should be transferred to Cristobal and retained there permanently, and crane No. 64 should be transferred to Balboa shops for use on the repair wharf, and also for wrecking purposes when two cranes are required, or when crane No. 32 is out of service.

Until the Empire shops are abandoned, 75-ton crane No. 3, and 30-ton nonself-propelling Crane No. 33 should be retained there for use with the steamshovel repair outfit, and for use by any division or department requiring emergency or irregular service, other than wrecking.

When the three 40-ton locomotive cranes, Nos. 72, 73, and 74 become available, one or two of these cranes should be permanently stationed at Cristobal for use by the various departments and divisions; the remainder should be transferred to Balboa terminals. These cranes are well adapted to terminal work on account of their capacity and the length of their booms; moreover, they are comparatively new. Under the above arrangement, 75-ton crane No. 4 will not be required, either under present or permanent conditions, and may be disposed of. The recommendations of the committee as outlined above have been approved.

Seeing the Canal from Near Contractor's Hill.

A section of railroad track about 1,000 feet long will be built from the Rio Grande spur to a point on the west bank of the Canal, just south of Contractor's Hill, for the use of the sightseeing train, which will go in on the spur from the Panama-Bas Obispo line. An obser-

vation platform will be erected near where the train will stop, from which the Canal may be viewed as far north as the Empire suspension bridge, and as far south as Pedro Miguel Lock. This site will also afford an excellent view of Cucaracha slide, and the dredging operations on either side of it.

Rainfall, Nov. 1 to Nov. 30, 1913, Inclusive.

OFFICIAL CIRCULARS.

Care of Empty Cement Bags.

CULEBRA, C. Z., November 25, 1913.

CIRCULAR No. 335-B:

Since July 1, 1913, empty cement bags to the value of nearly \$10,000 have been rejected by contractors in the States. This is a serious loss, and is the result of exposing the bags to the weather prior to shipment from the Isthmus, causing them to mildew and rot. Our rejections should not be more than one per cent, when at the present time they are running to nearly 10 per cent. In future such care must be taken in storing and handling empty cement bags that they will be returned in first-class condition, ordinary wear and tear excepted; and the surveying officer will report any instances of neglect coming under his observation.

In addition to care in storage, the following regulations must be observed:

1. Bags must be securely packed in bundles, each containing 100 bags.

2. Cars in which bags are shipped to Mount Hope must be properly tagged, showing on car tags the number of sacks contained in car; way-bill also to indicate the number of sacks forwarded.

3. Car numbers, contents, and date of shipment must be forwarded at once to the depot quartermaster, by mail, or reported to Telephone 249, Colon.

GEO. W. GOETHALS,

Chairman and Chief Engineer.

Extra Steamshovel Engineers and Cranemen.

CULEBRA, C. Z., November 25, 1913.

CIRCULAR No. 387-D:

Hereafter, all extra steamshovel engineers and crane-men will be carried on the rolls of the Fourth Division of this office, with the exception of the necessary extra men to supply the shovels working at Porto Bello and Ancon quarries.

The extra men will be carried at locations most convenient to the work, and can be secured by telephone application to the office of Resident Engineer Zinn of the Fourth Division, at Culebra.

The cost of carrying these extra men will be divided among the different departments and divisions performing steamshovel work.

GEO. W. GOETHALS,

Chairman and Chief Engineer.

Invoicing Vacation Leave.

CULEBRA, C. Z., November 22, 1913.

HEADS OF DEPARTMENTS AND DIVISIONS:

Circular letter of July 26, 1913, relative to invoicing for vacation leave due employees transferred, is cancelled, effective December 1, 1913.

The costkeeping accountant will arrange to make proper distribution of vacation time between departments and divisions when an employee leaves the service.

GEO. W. GOETHALS,

Chairman and Chief Engineer.

Rating of Concretemen.

CULEBRA, C. Z., November 28, 1913.

CIRCULAR No. 229-Z-6:

Hereafter, the rating of "Concretemen" at 13 cents an hour shall cover men handling concrete materials to mixers as well as men placing concrete in for ms.

GEO. W. GOETHALS,

Chairman and Chief Engineer.

Unclaimed Pay Receipts.

CULEBRA, C. Z., November 25, 1913.

HEADS OF DEPARTMENTS AND DIVISIONS:

In order to facilitate the handling of pay receipts, commencing with the month of December, 1913, all unclaimed pay receipts for the preceding month on hand in the various field offices on the 15th day of each month must be forwarded to the timekeeping office in which they originated.

Any requests made on field offices for pay receipts after the 15th of each month should be referred to the timekeeping office to which they have been sent.

E. W. PALMER,

Chief Timekeeper.

Approved:

GEO. W. GOETHALS,

Chairman and Chief Engineer.

Appointment of Accountable Officers.

CULEBRA, C. Z., November 19, 1913.

CIRCULAR No. 514:

The following accountable officers are hereby appointed, effective January 1, 1914, and as such will make returns for all property over which they have jurisdiction:

Mr. W. G. Comber, Sixth Division.

Mr. R. B. Tinsley, Fifth Division.

Mr. J. A. Walker, Balboa terminals, Second Division.

Mr. W. J. Holmes, transportation department, Second Division.

Mr. J. C. Keller, chief clerk, Fifth Division, will prepare invoices as of December 31, 1913, against the above named accountable officers, who will check same and be prepared to start their returns as of January 1, 1914.

The accountability of Mr. J. C. Keller, chief clerk, Fifth Division, will be closed upon final audit of his accounts for the period ending December 31, 1913.

GEO. W. GOETHALS,

Chairman.

General Superintendent, P. R. R.

PANAMA RAILROAD COMPANY.

OFFICE OF THE PRESIDENT.

CULEBRA, C. Z., December 1, 1913.

GENERAL ORDER:

Effective this date, Lieutenant F. Mears is appointed general superintendent of the Panama Railroad Company and Steamship Line on the Isthmus, vice Mr. J. D. Patterson, resigned. Lieutenant Mears will also continue to perform the duties of chief engineer.

GEO. W. GOETHALS,

President.

Revised Pay Car Schedule.

The following revised schedule for the I. C. C. pay car on the 11th and 12th of each month will be effective with the December payments:

11TH.

Leave Empire 6 a. m.

Gold Hill engine house, 6.55 a. m.

Gold Hill to Obispo Junction, 7 to 8 a. m.

Radio station siding, 8.20 to 8.30 a. m.

Transmission line forces, Frijoles, to Gatun, stops to be arranged each month with the First Division.

Gatun, north end, 9.45 to 10.30 a. m.

Gatun, near commissary, 10.45 a. m. to 12 noon.

Gamboa tower for forces on dumps, 1 to 1.15 p. m.

Paraiso, east side, 1.45 to 2.15 p. m.

Paraiso, west side, 2.30 to 2.40 p. m.

Rio Grande, 3.10 to 3.35 p. m.

Culebra, main line, 3.50 to 4 p. m.

Empire shops, 4.05 to 5 p. m.

12TH.

Leave Empire 6 a. m.

Naos Island 7.10 to 8 a. m.

Breakwater dumps, 8.10 to 8.35 a. m.

East Balboa, 8.40 to 9.15 a. m.

Ancon crusher, 9.30 to 9.40 a. m.

New administration building, 9.42 to 9.52 a. m.

Shipways shops, 10 to 10.20 a. m.

Balboa terminals, near Building 7, 10.25 to 11.45 a. m.

Pedro Miguel, 12.15 to 1.15 p. m.

Siding, Miraflores station, 1.25 to 1.40 p. m.

Corozal, 1.50 to 2.05 p. m.

Miraflores, south end, 2.15 to 2.55 p. m.

Miraflores, north end, 3 to 3.15 p. m.

(Men at power plant to walk across to car.)

Bas Obispo, 4.15 to 4.20 p. m.

Las Cascadas, 4.30 to 4.40 p. m.

Empire, 5 p. m.

Outside payments are made, as follows:

FROM CRISTOBAL OFFICE.

Toro Point, on the morning of the 11th.

Porto Bello, on the Saturday nearest the 20th.

FROM ANCON OFFICE.

Ancon Hospital, gold, 3rd or 4th, afternoon.

Ancon Hospital, silver, 12th, afternoon.

Injury patients in Ancon Hospital, 20th.

Dredges, 13th.

Taboga, 18th, 19th, or 20th, according to date the

Sanidad goes over.

Chame, Thursday, 20th, or 27th.

FROM EMPIRE OFFICE.

Gamboa stockade.

Dredging fleet on the Canal, 9th.

JOHN H. MCLEAN,

Disbursing Officer.

Approved:

GEO. W. GOETHALS,

Chairman and Chief Engineer.

Commissary Track at Pedro Miguel.

PANAMA RAILROAD COMPANY.

OFFICE OF GENERAL SUPERINTENDENT.

COLON, R. P., December 2, 1913.

G. S. BULLETIN No. 22:

To all concerned—Effective at once, the new commissary track at Pedro Miguel is O. K. for use.

F. MEARS,

Acting General Superintendent.

Interlocking Plant at Tower A, Cristobal, Temporarily out of Service.

PANAMA RAILROAD COMPANY.

OFFICE OF GENERAL SUPERINTENDENT.

COLON, R. P., December 1, 1913.

G. S. BULLETIN No. 20:

To all concerned—Effective 12.01 p. m., Tuesday, December 2, 1913, interlocking plant at Tower A, Cristobal, will be placed out of service account of rearrangements.

Switch tenders will be on duty 6 a. m., to 6 p. m. At all other times train crews will throw the switches

now interlocked. Main line home signals will be construed to be automatic signals during the period the plant is out of service and be controlled by track circuit only.

All trains using the crossing of the dock lead and switch track to roundhouse will stop, whistle, and be sure crossing is clear before proceeding.

F. MEARS,

Acting General Superintendent.

Acting Manager, P. R. R. Commissaries.

CRISTOBAL, C. Z., December 3, 1913.

During the absence on leave of Mr. John Burke, manager of Panama railroad commissaries, effective December 4, the undersigned will perform his duties.

EUGENE T. WILSON,

Subsistence Officer.

Hours for Visitors at Ancon Hospital.

ANCON, C. Z., November 26, 1913.

To all concerned—The hours for visitors at Ancon Hospital are, as follows: Tuesdays, Thursdays, and Saturdays, from 2 to 4.30 p. m. Sundays and holidays, from 9.30 to 11 a. m., and from 2.30 to 4.30 p. m.

CHAS. F. MASON,

Superintendent.

Closing of Canal Zone Schools During Christmas Holidays.

DEPARTMENT OF CIVIL ADMINISTRATION,

DIVISION OF SCHOOLS,

ANCON, C. Z., December 1, 1913.

The public schools of the Canal Zone will close for the Christmas holidays, Friday, December 19, at the close of the afternoon session. Schools will reconvene Monday morning, January 5, 1914.

A. R. LANG,

Superintendent of Schools.

Supplies for the Canal.

The following steamers, with supplies for the Isthmian Canal Commission and Panama Railroad Company, arrived at the ports of Balboa, Colon, and Cristobal during the week ending November 29:

Colon, November 23, from New York with one mortar and parts, 131 cases asbestos roofing, 309 boxes empty shells for fortifications; 1,022 cases structural steel, 20 cases electrical machinery for First Division; 965 bundles reinforcing bars for Second Division; 20 bales hair, 2,000 bags lime for administration building, Balboa; 30 cases magnesia pipe covering, 40 hales oakum, 125 cases lubricating grease, 142 pieces iron pipe, 310 drums paint, 14 barrels fire brick, 139 coils wire, 24 bundles rakes, for stock; and a miscellaneous cargo the whole consisting of 5,790 pieces, weighing 695 tons.

Niniva, November 23, from Liverpool, with four cases and three lengths of chain for Sixth Division.

Tenadores, November 23, from New York, with six reels cable, 463 cases structural steel for First Division; 100 steel rods for Sixth Division; five cases electrical machinery for Mechanical Division; 34 pieces suspension rods for fortifications.

Heredia, November 24, from New Orleans, with 180 pieces pipe, for Municipal Engineering Division; 57 pieces untreated piling for Atlantic Division; 231 pieces lumber for Sixth Division; 45 pieces lumber for stock.

Emil Boas, November 24 from New York, with 40 crates roofing paper, 125 barrels asphalt for fortifications; three cases electrical material for Mechanical Division; 134 packages gas accumulators for Lighthouse Subdivision; 1,168 pieces pipe for stock.

Almirante, November 26, from New York, with 465 pieces structural material for First Division; 44 crates metal lath for Second Division; 33 cases structural material for fortifications; 19 reels cable for Panama Railroad Company; 51 cases caustic soda, 50 packages wheelbarrows for stock.

Colusa, November 26 from Columbia River, with four spruce timbers for Sixth Division; 729, 132 (board feet) Douglas fir lumber for Atlantic Division; 2,510, 199 (board feet) Douglas fir lumber, 634 pieces piling for stock.

Atenas, November 27, from New Orleans, with 123 pieces oak lumber for Sixth Division; 260 pieces pipe for Municipal Engineering Division; 200 drums kerosene, 370 sacks feed, 40,288 (board feet) lumber for stock.

Advance, November 29, from New York with 81 barrels paint, 37 cases electrical material for First Division; 14 barrels starch for Sanitary Department; 32 barrels insulated wire, 68 cases electrical material for Mechanical Division; 56 bundles window frames and glass for administration building, Balboa; 328 bundles corrugated bars for fortifications; 17 bundles rakes, 70 bundles wheelbarrows, 22 cases paper, 67 packages lead pipe and fittings, 72 pieces steel plates, 50 kegs rivets, 200 steel angles, 50 cases lye for stock; and a miscellaneous cargo, the whole consisting of 1,621 packages, weighing 162 tons.

COMMISSION CLUBHOUSES.

Activities of the Young Men's Christian Association.

GENERAL.

The schedule for moving pictures for the week, December 8 to 13, is, as follows: Monday, Culebra; Wednesday, Corozal; Thursday, Cristobal; Friday, Empire; Saturday, Gatun.

The standing of the all-Isthmian bowling league, December 1, was, as follows:

Team.	Won.	Lost.	P. C.
Cristobal.....	16	5	.762
Empire.....	16	8	.668
Corozal.....	15	9	.625
Culebra.....	13	11	.542
Gatun.....	6	14	.300
Camp Elliott.....	0	18	.000

There is no change in the standing of the teams in the all-Isthmian basketball league.

The standing in the all-Isthmian chess tournament, is, as follows: Culebra, 27½ points; Empire, 26½ points; Gatun, 17 points; Cristobal, 16 points.

COROZAL.

Thanksgiving day was "Open house" day at the clubhouse.

High scores in bowling have been made by the following: *Duckpins*—Burke, 111, 107, 102, 120, 107, 104, 109, 101; Beall, 126, 103; Ward, 116; Souder, 105, 103; Davis, 112, 113, 105; Steele, 105, 103.

Tenpins—Taylor, 213; Parkis, 203; Beall, 208; Entermarker, 224; Edwards, 203, 209; Davis, 203; Holmes, 214.

New juvenile books were received here last week; also, a few new books for adults.

CULEBRA.

On Monday night, November 24, the Guatemalan orchestra gave a concert on the marimba, accompanied by violinello and two violins. Selections from the well known operas were given, as well as several popular airs. One hundred and fifty people attended.

On Friday night, November 28, "Open house" was observed. Games were played and a general good time was had by those present. Messrs. Ramsey, Arhuckle, and Pearsall furnished music during the evening. Refreshments of pumpkin pie, apples, and lemonade were served. This was Mr. Arhuckle's last service for the Y. M. C. A., as he left for Washington, D. C., on December 2, having been transferred to the Civil Service Department.

On Saturday night, November 29, the local team won two out of three games from the Gatun bowling team, with the following scores:

Gatun.	Culebra.
O'Meara... 145 177 149	Case... 154 136 160
Otto..... 173 174 193	Herrington... 143 150 180
Sherrard... 176 143 180	Chadbourne... 155 174 219
Humphreys... 159 139 168	Dougherty... 175 163 167
Swallow... 168 157 164	Hansli... 149 171 138

Totals... 821 790 854 776 799 870

High scores during the week were, as follows:

Tenpins—Case, 203.
Duckpins—Ferguson, 100; Palmer, 109, 102, 109, 103, 102, 110, 100, 114, 130, 128; Fitzpatrick, 100; Case, 106; Kiernan, 101; Cornthwaite, 102; Jeffries, 103, 112.

At the regular service on Sunday night, November 30 "The results of the observance of Thanksgiving" was discussed.

Moving pictures will be shown on Friday night, December 5.

EMPIRE.

Spanish classes were started this week and will be held regularly on Tuesday and Thursday evenings. The intermediate class will meet from 7 to 8 p. m., and the beginners' class from 8 to 9.

Hagy's moving picture reels of the Canal, showing the first boat through Gatun locks and the blowing up of Gamboa dike, were shown on Tuesday evening. Over 300 were in attendance. On Friday evening, Mr. H. H. Buckwalter's moving pictures of the Canal Zone and Panama were shown to an audience of 400.

The Gatun chess club played the Empire club at Empire on Saturday evening, November 29, with the following results:

<i>Empire.</i>		<i>Gatun.</i>	
Goolsby	0	Marquand	1
Goodholm	1	Marquand	0
Goolsby	0	Logan	1
Goodholm	1	Brown	0
Lippert	1	Brown	0
Lippert	0	Byrne	1
Smith	1	Byrne	0
Smith	1	Brown	0

Total... 5 3

Following are the scores of winners in the Thanksgiving bowling tournament held at Empire:

OPEN DOUBLES.

GATUN.

Special moving pictures of the Panama Canal were shown before a large audience on Monday night, December 1.

Much interest has been shown in the gymnasium classes under the direction of Mr. Kjellander.

The results of the Thanksgiving Day "Ragtime" duckpin tournament were, as follows:

First prize—P. J. Claherty, A. J. Coleman. Score 269.

Second prize—W. A. Wells, M. Conley. Score 240.

Third prize—M. Conley, Edward Walsh. Score 239.

High score, P. J. Claherty, 156.
A farewell reception was tendered to Mayor William B. Childers, superintendent of the McClintic-Marshall Construction Company, who left for the United States on November 29. The latter read a farewell address. Frank H. Wang was elected mayor to succeed Mr. Childers, and C. C. Bailey was elected to fill the vacancy on the board of aldermen. Several citizens were brought before the city court for mock trials. The new mayor will soon call a meeting of the officials to consider further municipal activities.

An interesting lecture on the South Polar expedition of Captain Amundsen was delivered to an appreciative audience, by Captain Nilsen of the *Fram*, on Monday evening, November 24.

The new Spanish classes, under the direction of Madam de Hess, were organized on Tuesday evening.

CRISTOBAL.

The scores for the single folks' bowling tournament, held November 24, are, as follows:

A. Gibson and Miss Carpenter.....	494
D. Raymond and Miss G. Butler.....	493
A. Farr and Miss C. Mathews.....	462
W. Russell and Miss Stevens.....	442
N. Drew and Miss Bevington.....	439
E. C. Cotton and Miss Ida M. Glawson.....	438
W. Scheid and Miss Gibson.....	426
J. Wechler and Miss E. Mathews.....	421
E. Nash and Miss C. Madison.....	417
A. Farrell and Miss L. Madison.....	415

Three hundred and fifty people attended the moving picture exhibition of the Buckwater films of the Canal, on Tuesday evening, November 25.

Two hundred and thirty men attended the camp fire banquet at the Hotel Washington on Wednesday, November 26. Mr. W. J. Price, the American Minister, was unable to attend. The toastmaster was Judge Thos. E. Brown, Jr., and the speakers were Dr. C. C. Pierce, Mr. W. W. Warwick, and Mr. Richard L. Metcalfe. Colonel Goethals added a few words. Mr. W. H. Kromer led in the invocation. Mr. Glenn Ward Dresbach read an original poem, entitled "An Ode to the Panama Canal." Mr. Frank Johnson sang a solo. The Guatemalan orchestra furnished the music. Following the dinner, cigars, and fruit were served. Each man present received a souvenir program of the occasion, giving his name and date of entering the service, the songs, menu, program, and President Wilson's Thanksgiving Proclamation.

Cristobal took two out of three games from Empire in the all-Isthmian bowling tournament on Saturday night, November 29, thereby practically assuring first place in the tournament for this year. The scores follow:

Cristobal.	Empire.

Cold Storage Prices.

The following changes have been made in the price of cold storage supplies since last week: Eggs advanced to 41 cents a dozen; 21 cents by the half dozen; oysters, reduced to 32 cents a quart; turkeys, reduced to 25 cents a pound; butter, creamery special, advanced to 38 cents a pound; celery, advanced to seven cents a pound; tomatoes, advanced to eight cents a pound. Other prices unchanged.

Lost—Panama hat, taken from Gatun clubhouse between 3 and 5.30 p. m., Thanksgiving Day. Kindly return to Y. M. C. A. at Gatun.

MOVEMENT OF OCEAN VESSELS.

The following is a list of sailings of the Panama Railroad Steamship Company; of the Royal Mail Steam Packet Company; of the Hamburg-American Line, and of the United Fruit Company's Line.

*Amended schedule, resulting from temporary withdrawal of the *Allianca* for repairs.

Panama Railroad Company's steamers sail from Pier 11, Cristobal, at 3 p. m.

Royal Mail steamers leave for New York on alternate Tuesdays at 1 p. m.; for Southampton on alternate Tuesdays at 10 a. m.

United Fruit Company's ships for New Orleans direct, leave on Thursdays and Saturdays at 3 p. m.; ships for New York via Kingston, on Tuesdays at 1.30 p. m., and Thursdays at 1.50 p. m.; for Bocas del Toro on Mondays at 5 p. m.; for Limon, via Bocas del Toro, on Tuesdays at 5 p. m.; and for Limon direct, Tuesdays at 3 p. m.

Hamburg-American steamers sail for New York, via Kingston, Santiago de Cuba, and Fortune Island, on Tuesdays; the *Prinz August Wilhelm* and *Prinz Joachim* at 10 a. m.; the *Carl Schurz* and the *Emil L. Boas* at 2 p. m.

The following steamers arrived at, or departed from, the port of Balboa during the week ending November 29, 1913:

Arrivals—November 24, *Newport*, from San Francisco; *Hualalaga*, from south ports (Callao); *Mexico*, from Valparaiso; November 25, *Manavi*, from intermediate ports; *Colusa*, from Puget Sound; November 27, *Pennsylvania*, from San Francisco; November 28, *Ecuador*, from intermediate ports.

Departures—November 22, *Rupanco*, to intermediate ports; November 24, *Mantaro*, to Callao; *Palena*, to south; November 27, *Aztec*, to San Francisco; *Lyra* to San Francisco.

CANAL

RECORD

Volume VII.

ANCON, CANAL ZONE, WEDNESDAY, DECEMBER 10, 1913.

No. 16.

The Canal Record

Published weekly under the authority and supervision of the Isthmian Canal Commission.

The Canal Record is published free of charge, one copy each to all employees of the Commission and Panama Railroad Company whose names are on the gold roll. Extra copies and back numbers can be obtained from the news stands of the Panama Railroad Company for five cents each.

Address all Communications,

THE CANAL RECORD,

Ancon, Canal Zone,
Isthmus of Panama.

No communication either for publication or requesting information, will receive attention unless signed with the full name and address of the writer.

NOTES OF PROGRESS.

Progress at Cucaracha Slide.

Excavation of a channel through the base of Cucaracha slide has advanced more distinctly during the past week than in any similar period since the dredges have been working on it. The dipper dredge *Mindi*, working on the north side, and the ladder dredge *Marmot*, on the south, had approached within 30 feet of each other by noon of December 9, but a later movement caused the *Marmot* to move back 125 feet. The ladder dredge *Corozal*, widening the channel behind the *Marmot*, excavated 5,750 cubic yards during the 24 hours ending at 6 p. m., December 6. The total excavation of the three dredges during the week ending at 6 a. m., December 10, was about 52,000 cubic yards.

Pipeline suction dredge No. 4, now at Margarita Island, is to be brought up through Gatun Locks, probably on Thursday, December 11, to assist in the excavation at Cucaracha. The derrick barge *La Valley* and the ladder dredge, No. 1, will be brought to Gamboa at the same time.

Progress on Permanent Canal Crossing.

Upon the recommendation of a committee, consisting of Lieut. F. Mears, chairman, Mr. A. S. Zinn, and Mr. T. B. Mönliche, it has been decided to make the connection between the bridge pontoon for crossing the Canal at Paraiso, and the land approaches, by means of a pile trestle at each end of the pontoon, with concrete piers at the connections between pontoon and trestles. The actual juncture between the trestle on the pontoon, and the piers, is to be made by using some of the spare lock gate girders, now in storage at Paraiso, so arranged as to move vertically to meet variations in the surface of the water in the Cut. The approach trestle will be driven with six creosoted piles in each bent. The bents will be spaced on 13-foot centers, and the 12-inch by 12-inch caps on them will be

18 feet long, to provide room for a wagon road, in addition to the railway track.

Work on the approach trestles will be started within the coming week, as soon as piles and other requisite materials are delivered at the sites. The greater part of the concrete for the piers is already in place, and after the trestles have been built out to them, the operating machinery and remaining concrete will be placed. It is expected to have the approaches in entire readiness by the time the pontoon is ready to anchor to the piers.

The barge for the pontoon is being constructed in the French canal, north of the dry dock at Mount Hope. Progress on it has been delayed by nonarrival of material. The heavy sill timbers to be placed along the keel of the barge, as part of the stiffening trusses beneath the bents of the trestle which the barge will support, arrived at Mount Hope on December 5, and the construction of the barge will now be pushed.

Emergency Dams at Miraflores Locks Completed.

The emergency dams at Miraflores Locks have been completed, and the final tests, to be carried out for 10 days, will begin about December 15 on Dam F, east dam; and about January 15 or Dam E, west dam.

Preparations for Reclamation of Gravel.

A span is to be lifted out of the Chagres River bridge of the Panama railroad, at Gamboa, on Sunday, December 14, to allow dredging equipment to pass up the river to Cruces to recover gravel for use in concrete and in railroad ballast. The span to be taken out is the second 80-foot plate girder span north of the trussed portion of the bridge which crosses the river bed proper. It will be lifted by wrecking cranes and laid on a barge, to be towed aside, as is done with the removable 60-foot span in the trestle at Paraiso. If the barge used at Paraiso can be towed past Cucaracha slide in time, it will be used at Gamboa also, if not, two of the barges in use north of the slide will be lashed together for the service. It is estimated that the removal of the span, passage of vessels, and replacement of span, will require about five hours.

The vessels to be passed through are the French ladder dredge, No. 1, and a clapet with two barges. They will proceed to the submerged beds staked off at Cruces before the rise of Gatun Lake, and the material will be handled down to a wharf erected by forces of the Panama railroad on the south bank of the Chagres, about 500 feet north of the bridge. This wharf is 300 feet long, with its floor at elevation 95 feet above sealevel, and is equipped with bins over double tracks for the storage of the gravel and loading into cars. Unloading from the barges will be done by means of an electric crane formerly used on the sand wharf at Balboa. The crane is of the fixed cantilever type, with a horizontal trolley extending over the mooring place and

over the storage bins. It is estimated that about 500,000 cubic yards of gravel will be reclaimed by dredging.

Gatun Lake Water for Colon and Cristobal.

Water from Gatun Lake is being supplied to Colon and Cristobal, through the tunnel between the watersheds of Brazos Brook and the Escoval Creek, a tributary of the Quebrada Ancha, in the lake area. The valves were first opened on November 17. The water comes through a 20-inch pipe, the center line of which is 76 feet above sealevel, and is passed by pipeline to the upper edge of the reservoir, where control valves, governed by an automatic controller, regulate the supply. The lake water is regarded as auxiliary to the regular Brazos Brook supply, and is automatically cut off when the surface of the reservoir comes within one foot of the spillway channel in the dam, at elevation 50. The controller is so adjusted that it keeps the valve governing the lake supply wide open when the surface of the reservoir is as high as 48.7 above sealevel, but shuts off entirely by the time it reaches elevation 49. The water is filtered at Mount Hope before it is pumped into the Colon-Cristobal supply mains.

Swing Bridge for Crossing French Canal.

The rail approach to the permanent Atlantic coaling station, situated at the north end of Mindi Island, across the French canal from Cristobal, is to be provided with a horizontal swing draw bridge over the French canal, about half a mile south of the Mount Hope dry dock, in order that the channel may be continued in use as an additional means of navigation to Gatun. Several types of lift-span bridge were considered for use at this crossing, but local conditions of operation, necessitating a wide clearance for both trains and vessels, with concurrent problems in the distribution of weight, as well as considerations of the effect of the atmosphere on the exposed parts of the machinery, which will be used comparatively seldom, led to the adoption of the horizontal, instead of the bascule type of opening span. Award for the fabrication and erection of the swinging span and operating mechanism has been made to the American Bridge Company, on a design submitted by it, in the sum of \$55,404. The piers and land approaches on either side are to be constructed by the Panama railroad.

The pivot for the bridge is to be built on the east side of the French canal, and the cantilever arm which will balance the opening span will serve for connection with the track embankment on Mindi Island. The approach to the bridge from the Mount Hope side will be effected over a girder span recovered from the Barbacoas bridge, on which the old main line of the railroad crossed the Chagres River. The old parabolic plate girders, of which this span uses two were installed at Barbacoas

about 1868, and though still in good state of preservation, require reinforcement for carrying the heavy loads of modern rolling stock. The span to be used at the approach to the French canal is 108.79 feet long, and will be braced at the middle by three 4-foot concrete caissons sunk to rock. The pivot for the swinging bridge will be a reinforced concrete cap, resting on six 6-foot steel caissons driven to rock, and filled with concrete, reinforced at each quarter of the circle with vertical lengths of 70-pound steel rail. The six caissons will be arranged in a circle with a diameter of about 20 feet. Abutments at the ends of the earth embankments leading to the bridge will be of reinforced concrete, supported on creosoted piles.

The base of the rails across the bridge will be 20 feet above sealevel. When the span is open, the clearance for vessels will be 90 feet horizontally, and unlimited overhead. In anticipation of future use of the French canal, the channel at the site of the bridge has been dredged to 30 feet below sealevel.

Ancon Crusher.

Following is a statement of rock crushed at Ancon quarry for the three weeks ending December 6:

Cuba Wants European Laborers.

A report on the steps taken by the Government of Cuba to attract the surplus European labor on the Canal to that island has been made by Mr. James L. Rodgers, the United States Consul General at Habana. The report is dated November 1, 1913, and is, in part, as follows:

The decree of the President which contemplates offering Cuban inducements to large numbers of the white European workmen who are now at Panama, but for whom there will soon be no work, has been received with much satisfaction by the sugar mill interests and by the farmers who are growing cane for these mills. The present sugar cane acreage of Cuba is approximately one million, and it is becoming apparent that the annual transient immigration from Spain and the Canary Islands, added to that drawn from the West Indies, will not be sufficient to provide the labor necessary to cut the cane and provide for the constantly increasing capacity of the mills. A great deal of the cane of Cuba was left uncut in this last season, and it was more than probable that many of the mills would have had capacity to have ground more than they did had it not been for the scarcity of labor.

The decree of the President provides that the Cuban representatives in Panama shall urge the laborers in question to come to Cuba; that the Secretary of Agriculture shall have a fund from which legitimate expenses will be paid; that the steamship companies whose ships ply between Colon, Panama, and Santiago and Antilla, Cuba, shall be given a bonus of \$5 for each immigrant of the desired class brought, and that each immigrant

intending to locate in Cuba shall be furnished with a certificate of authorization from the representative of Cuba in Panama. It is further provided that there shall be a physical examination of these immigrants, and that no one of a bad character as determined by his record upon the Canal work will be accepted for work in Cuba. The Secretary of Agriculture has designated a Cuban physician, Dr. Eduardo Nufiez, to proceed to Panama and to take up the duty of the examination of these immigrants.

LIEUT.-COL. DAVID DUBOSE GAILLARD.

General Notice.

The cable brings the sad news of the death of Lieut.-Col. D. D. Gaillard, Corps of Engineers, U. S. A., member of the Isthmian Canal Commission, on the morning of December 5, 1913, at Baltimore, Md.

Colonel Gaillard was born in Fulton, Sumter County, South Carolina, September 4, 1859. He was graduated from the West Point Military Academy in 1884, and was appointed Second Lieutenant of Engineers on June 15, 1884. After graduation from the Engineering School of Application he served on River and Harbor and Fortification work in various parts of the United States; and from February, 1892, to December, 1894, was a Commissioner on the Mexican Boundary Survey. During the war with Spain, he was appointed Colonel of the Third United States Volunteer Engineers, serving in the United States and Cuba in 1898 and 1899, a part of the time as Chief Engineer of the District of Santa Clara in Cuba. He was Assistant to the Engineer Commissioner of the District of Columbia, following his service in Cuba, until February, 1901. On the organization of the General Staff of the Army, he was selected as one of its members, and was engaged on this duty when appointed a member of the Isthmian Canal Commission in 1907. He arrived on the Isthmus in March, 1907, and was appointed subsequently head of the Department of Excavation and Dredging, retaining that position until a new organization was created on July 1, 1908, when he was made Division Engineer of the Central Division, which included the Culebra Cut. He was in charge of the work in the Cut until its virtual completion, being compelled to abandon his duties through illness in July last.

Colonel Gaillard's period of Canal service was coincident with that of the other engineering members of the present Commission, and included the years of most active construction work. He brought to the service trained ability of the first order, untiring zeal, and unswerving devotion to duty. His name is connected inseparably with the great task which was brought to completion under his guidance, and will be held in lasting honor. His associates mourn him as a valiant soldier, true man, and beloved companion.

GEO. W. GOETHALS,

Chairman and Chief Engineer.

CULEBRA, C. Z., December 6, 1913.

Locomotive No. 656, which was damaged in the collision of November 6 on the Panama-Bas Obispo branch of the Panama railroad, was returned to duty from Empire shops on December 3. Locomotive No. 203, injured in the same wreck, will not be repaired, but will be stripped and scrapped. Repairs to all the other rolling stock, with the exception of the flat car which was demolished, have been completed.

RED CROSS SEALS.

Canal Zone Chapter Hopes to Dispose of 50,000 this Holiday Season.

Although the number of gold employees on the Canal Zone has decreased considerably since the holiday season of 1912, the officers of the Red Cross are anticipating a heavy sale of Red Cross seals during the month of December.

The Canal Zone Chapter has been one of the leading agents in the world in the percentage of seals sold, according to population, and it is anticipated that the Americans will purchase a large number of these seals this year, thus helping in the fight against tuberculosis and at the same time helping the Canal Zone Chapter to maintain its position among other chapters. Last year, 81,270 seals were sold in the Zone, and, although it

will probably not be possible to equal that record this year, the officers of the society hope to dispose of at least 50,000. So far this season, the record is held by the Chief Quartermaster's department in Culebra, which has already remitted for 3,100 seals. Seals may be had at the offices of all the district quartermasters, clubhouses, and from chief clerks of divisions and departments. Those unable to locate selling agents easily are requested to consult with the following district chairmen of the Red Cross, who will be glad to give information: B. C. Poole, Ancon; Geo. Lemire, Corozal; I. W. Pickett, Paraiso and Pedro Miguel; E. E. Lee, Culebra; T. L. Clear, Empire; Col. H. A. Greene, Las Casca; Lieut. E. A. Ostermann, Camp Elliott; Mr. J. T. Smith, Gatun; Dr. C. A. Hearne, Cristobal.

American Institute of Electrical Engineers.

There was an attendance of 38 members, applicants, and prospective members, at the meeting of the Panama section of the American Institute of Electrical Engineers, held at the Hotel Tivoli on Sunday, December 7. Mr. Edward Schildhauer was elected chairman, and Capt. W. H. Rose, secretary-treasurer.

Election of Officers.

At the meeting of Pacific Lodge, No. 4, Independent Order of Odd Fellows, held at Ancon Hall on Thursday night, December 4, officers were elected for the ensuing term, as follows: Noble grand, Karl P. Curtis; vice-grand, Norman C. Anderson; treasurer, A. S. Curtis; secretary, Emil J. Rall. The installation of the newly-elected officers will take place at the first meeting in January.

Obituary.

Albert Joseph Miller, a private in the U. S. Marine Corps at Camp Elliott, died at Camp Elliott, Bas Obispo, on December 1. He was single, 24 years of age, was born in San Francisco, Cal., and had been on the Isthmus one year and seven months. He is survived by his uncle, Mr. Fred Pitts, living at Hastings, Minn.

SOCIAL LIFE OF THE ZONE.

Ancon Study Club.

The Ancon Study Club convened on Thursday afternoon, December 4, after a recess of two weeks. The fourth volume on the study of United States history was completed, the work having been brought up to the beginning of the Civil War. On December 11, there will be a mixed program. Miss Inez Perry of Boston, historian of the Wayside Inn Chapter of the Daughters of the American Revolution, will read a paper on the Wayside Inn. On December 18, the program will consist of papers on Christmas in many lands. Following this meeting, the club will enter upon the Christmas vacation of two weeks, resuming meetings on Thursday, January 8. The club will enter upon the third year of its existence on January 24.

Church Work.

The Ladies' Auxiliary of the Empire Christian League held its semiannual meeting, with an election of officers, in the Commission chapel on Friday afternoon, December 5. The meeting was opened by an address of welcome to new members who were received at the meetings in October and November. This address was given in rhyme by Mrs. Goolsby, and the reply, also in rhyme, was given by Miss Elizabeth Ash, the youngest of the new members. The summary of the lesson, which completed the course on "China's new day," was read by Mrs. Holmwood; there were special readings by Mrs. Greener and Mrs. Hoffman. Mrs. W. D. Stanton gave a short talk on the completion of the study of China. The election of officers resulted, as follows: President, Mrs. Phil Kelly, reelected; first vice-president, Mrs. W. D. Stanton; second vice-president, Mrs. Homer Smith; secretary-treasurer, Mrs. H. Holmwood. The semiannual report of the outgoing secretary, Mrs. Drake, contained the following: During the last term, six meetings have been held, the first Friday in each month being the regular meeting day. On July 8, the society met with the Fidelity Bible Class, when there was a general program, with an informal reception following. The subject for the August meeting was "Chinese women." The Rev. Alfred DeRoos, a visiting evangelist, was the guest at the September meeting and led the devotional exercises, following with a short talk on the work of women in the church. The society voted a sum of money to be presented to Mr. DeRoos to be used in his work. In October, the subject for the meeting was the Chinese church. The November meeting was held at the home of Mrs. McLean; this was the Thanksgiving meeting. There was a special program, and the mite boxes were opened. There was about 20 guests present. The society will take up the new course of study, home missions, at the meeting in January.

At the meeting of the Woman's Foreign Missionary Society of the Methodist Episcopal Church, held in Panama, on Sunday afternoon, December 6, there were present delegates from the church societies at Cristobal, Empire, and Ancon. A tentative constitution for the formation of a federation of church societies composed of women was accepted, and arrangements were made for a meeting of representatives of the several societies to be held at St. Luke's Hospital chapel on January 14. These delegates will

be empowered to arrange for the organization meeting to be held as soon after this date as possible. Mrs. Homer C. Stuntz, the wife of Bishop Stuntz of the Methodist Episcopal Church, was the guest of the society, and delivered an informal address on the work of the Woman's Foreign Missionary Society in various parts of the world.

Bishop Stuntz of the Methodist Episcopal Church arrived on the Isthmus on Friday, December 5, on his annual visit to the mission in Panama. On Saturday evening, he delivered a lecture in the seawall church, his subject being India and the Sepoy rebellion. The bishop preached in the church on Sunday morning.

The Rev. H. R. Carson, chaplain of Ancon Hospital, returned to the Isthmus on Thursday December 4, and resumed his duties at St. Luke's Hospital chapel. Services will be as usual, every Sunday morning at 10 o'clock, and on the second and fourth Sundays at 7 a. m. Sunday school will continue at 9 a. m., every Sunday. On Friday afternoon, December 5, a quiet hour was held for the women of St. Luke's Guild in the chapel, from 4.30 to 5.30. The Rev. Edward J. Cooper, rector of Christ Church, Colon, conducted the meditation, which was followed by evensong.

The Rev. Carl H. Elliott, minister of the Union Church, Cristobal, has accepted a call to the pastorate of a Presbyterian Church in Salem, Oregon, and will sail for the United States on the *Panama*, on Thursday, December 11.

The Rev. Mr. Elliott came from Toledo, Ohio, in January, 1909, in response to a call from the Union Church, Cristobal. He established the church on a good working basis, made its services attractive, and was especially active in extending its activities in the lines of social service. The organization of young people's societies were encouraged; classes for manual training for boys, and sewing for girls, were established with his encouragement, and a class in English for Chinese men was organized and taught by him. In 1911, the church building was erected in Cristobal for the Union Church congregation. This building was used for schoolroom, social hall, and meeting place for the societies, and it contained the minister's study. For the past year, Mr. Elliott has issued a weekly bulletin in connection with the church work in Cristobal. He has served in the preaching services at Las Cascadas and Corozal, and held frequent meetings at Camp Otis and Camp Elliott.

The officers and congregation of the church tendered a farewell reception to the departing minister at the church on Wednesday evening, December 10.

The parish of St. Ferdinand's Church, Empire, tendered a reception to the priest in charge, the Rev. Father Allot, who returned from his annual leave of absence on November 29, at the parish house on Saturday evening, December 6. A short program was given and there was a large attendance. The annual Christmas bazaar of St. Ferdinand's church will be held in the basement of the parish house on December 12, 13, and 14, opening on Friday evening. The usual articles will be offered, such as fancy and practical aprons, boudoir caps and slippers, silk bags,

and Parisian novelties suitable for Christmas gifts. There will be a booth for toys and Christmas tree ornaments. Ice cream and cake will be sold.

PERSONAL.

Lieut.-Col. William L. Sibert, accompanied by his niece, Miss L. Blair, returned from his annual leave of absence on the *Ancon*, which docked at Cristobal on Monday, December 8. His son, Lieut. Franklin C. Sibert of the Tenth Infantry at Camp Otis, accompanied by Mrs. Sibert, was also a passenger on the *Ancon*.

Surgeon Claude C. Pierce resigned as superintendent of Colon Hospital on November 26, and, with his family, will sail for the United States about January 1, 1914, to resume his duties with the United States Public Health Service, with which he has been connected since June, 1900. He arrived on the Isthmus on January 5, 1904, having been sent here to investigate and report the health conditions as they then existed. He was transferred to the Canal Commission service on June 26, 1904, and was appointed quarantine officer at Ancon and Panama, a position he held until January 13, 1905, when he was made executive officer of the Department of Sanitation. On August 16, 1905, he was appointed quarantine officer at Colon and Cristobal, and held that post until his appointment as superintendent of Colon Hospital on January 13, 1913. He was born at Chattanooga, Tenn., and received his degree as Doctor of Medicine at the Chattanooga Medical College in March, 1898. At the outbreak of the Spanish-American war, he enlisted as a private in the Third Tennessee Volunteer Infantry, was shortly afterward made hospital steward, and in November, 1898, he was commissioned first lieutenant and assistant surgeon. Following his entry into the Public Health Service, he was on duty at the Mobile, Ala. and Key West, Fla. quarantine stations, and from October, 1901 to November 1903, he had charge of the Tampa Bay quarantine station. He was promoted to passed assistant surgeon in 1905, and to surgeon on December 1, 1912.

Mr. M. C. Rerdell resigned as district judge at Cristobal on Wednesday, December 10, and will sail for New Orleans on the *Turrialba*, on Thursday, December 11. He arrived on the Isthmus on August 15, 1904, and was connected with the Executive Office staff until the organization of the Zone into municipalities in November, 1904, when he was appointed judge and treasurer of the municipality of Cristobal. Later, on October 12, 1905, he was appointed mayor and judge of the same municipality. On April 15, 1907, when the municipalities were abolished and administrative districts established, he was appointed to the office of senior district judge, and subsequently, on April 28, 1911, was transferred to the position of district judge at Cristobal. He will be succeeded by Mr. J. W. Thompson of Raleigh, N. C.

Mr. Donald F. MacDonald, who has been the geologist of the Canal Commission since January, 5, 1911, resigned on December 10, and will sail for New York on the *Panama*, on Thursday, December 11. He came to the Isthmus from the United States Geological Survey, and will rejoin the service on his return. He was recently given the degree of LL.D. by St. Johns College, Brooklyn, N. Y.

ISTHMIAN EARTHQUAKES.

Commission Appointed by President Porras gives History and Probable Origin of Recent Shocks.

A commission consisting of Mr. Donald F. MacDonald, geologist of the Canal Commission, and Mr. William Caley Johnston, district engineer for the Panama Government, was appointed by President Porras early in October in make an investigation of the causes and effects of the recent seismic disturbances in the province of Los Santos, where the severity of the shocks was greatest. The instructions from the President, through his secretary of public works, Señor Ramón Acevedo, were to examine into the causes of the earthquakes, and to make special investigations to determine whether the regions of central and southern Los Santos were in any danger from a volcanic outburst, or other destructive visitation. The idea of a pending catastrophe was locally engendered not only by the frequency of the shocks, but also by

7 degrees 15 minutes of north latitude. The center of the region investigated is about 120 miles in a southwest direction from Panama city. Its extent and area, the routes traveled, etc., may be comprehended by reference to the accompanying maps.

Physiographic types.—The province of Los Santos may be divided into three distinct groups, or types, of land forms, as follows:

1. The mountain type, comprising steep hills and mountains up to about 3,000 feet in elevation.
2. The savanna type, consisting of flat to rolling savanna, or llano land, up to a few hundred feet in elevation.
3. Coastal plain and flood plain lands, comprising the low lying, rich, silty soil lands that border the coast and fill the lower valleys of the larger rivers. Near the sea they locally merge into coastal swamps.

Land forms of the mountain type are represented by the central Los Santos highlands, of which Cerro Canajagua, 775 meters, and

highlands of Los Santos, form one large physiographic group, which may be referred to as the Azuero Highlands. Streams have gashed them with canyons, and this, together with faulting and the unequal hardness of the rocks, has left a jumble of jungle-covered, steep-sided hills and peaks with no ridge and little range-like order.

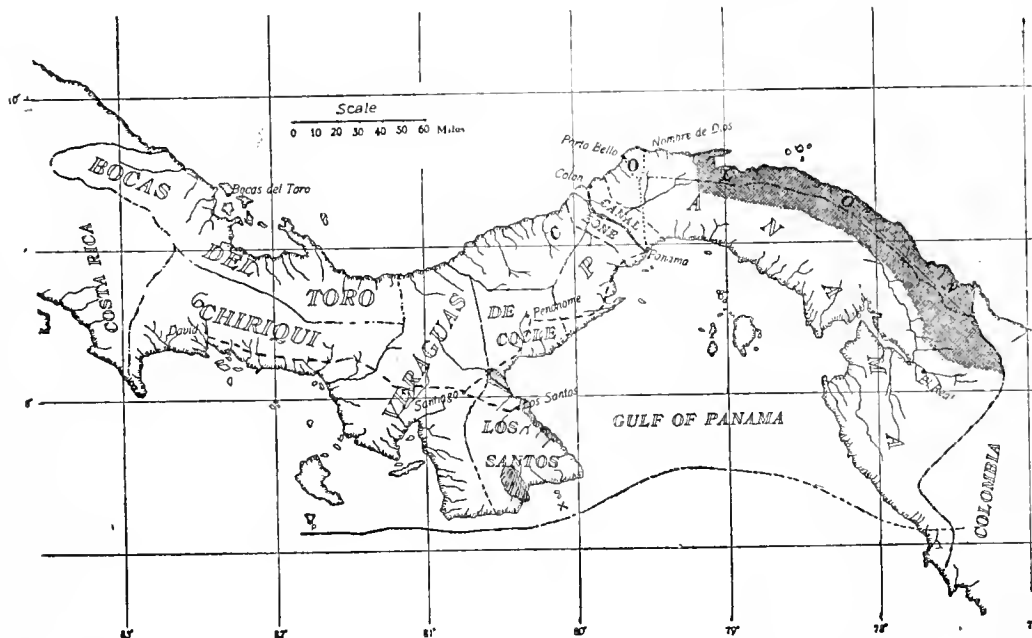

The savanna type of land form is well exemplified in the vicinity of Macaracas, where low rolling hills and broad open stretches extend for many miles. The streams and low, moist places are fringed with jungle growth, but only the hardy varieties of trees and shrubs survive the long summer drouth on the drier ground. These form shaded places here and there on the flats and gentle slopes. A few steep hill peaks stand some scores of meters above the surrounding land, and locally break the monotony of the low undulating landscape. The eastern and northern parts of the province exemplify this type of land form. Toward the coast in many places, these gentle sloped hills merge into the flat fringe of coastal plain that borders the ocean.

The coastal plains and flood plains may be classed under the same heading. The flood plain type is best represented by the wide, flat, rich soil area of the Tonosí valley. The lower valley of the Santa María River in the north, and some of the lower valleys of other large streams are also examples of this type. Such lands have been built up by the rivers having deposited silt and soil during former flood periods. The Tonosí valley is 35 kilometers long, with a maximum width of 15 kilometers. It is a large and rich area, and within its borders are some valuable forests of mahogany. The coastal plain lands are the low, flat areas that border the seacoast, especially in the western and north-western parts of the province, which rise gradually inland at the rate of a few feet to each mile. Toward the ocean, these plains locally merge into coastal swamps, and extend out under the sea as shallow areas, so that at some miles from shore, opposite these flat areas, there may be a depth of not more than 40 or 60 feet. They are due to an emergence of the land from the ocean, and if this land were to rise, say 50 feet, at the present time, thousands of square miles of what is now shallow ocean would be reclaimed. This happened in the past, and thus the present coastal plain areas were formed.

GENERAL GEOLOGY.

Rock groups.—With a few exceptions, and some local differences, the rocks encountered are the equivalents of the rocks in the Canal Zone. They consist of three broad classes, as follows:

1. Pyroclastic rocks, formed from volcanic agglomerate, ash, and other material ejected from ancient volcanoes.
2. Bedded rocks, such as sandstones, shales, limestones, etc.
3. Igneous rocks, which were once molten

the heavy subterranean detonations that preceded each. The commission was further instructed to make recommendations that might be helpful to the people, and to do what it could to relieve the anxiety and distress of those living in the disturbed territory. Messrs. MacDonald and Johnston sailed from Panama on October 8, and returned on November 2. They have prepared an exhaustive report on the subject, accompanied by drawings and photographs, the salient features of which are given herewith.

GEOGRAPHY OF THE REGION VISITED.

Location.—The region visited comprises nearly all of the central part of Los Santos province, from the south to the northeast coast. The province occupies the southern and eastern slopes of the Azuero peninsula, the most southerly part of Panama, which reaches southward into the Pacific Ocean to about

Quema, 900 meters, are the highest peaks. These highlands extend southerly as broken hill ranges, practically to the coast, and are connected with the Azuero Mountains on the western border of the province by the Bombacho Hills. The latter have a minimum elevation of about 400 meters, and, though their general trend is somewhat east and west, they curve, more or less, around the head of the Tonosí valley. The Azuero Mountains are a north-south range that extends from the bold headlands of Punta Puercos and Punta Guánico on the southern coast, to where they merge into rolling savannas, and finally into the flat Veraguas plains 45 miles to the north. These mountains, steep and broken, and but little, if any, over 950 meters in elevation, are the locus of the boundary between the provinces of Los Santos and Veraguas. They, together with the Bombacho Hills, and the central

lava, and later cooled to their present hard crystalline form.

The pyroclastic, or volcanic agglomerate, group of rocks was observed in only a few places, and its relation to the other groups is not very clear. Still, it appears to be at the base of the bedded rocks just as it is in the Canal Zone. These volcanic agglomerates are prevalent throughout most of Central America, and, in fact, in many parts of North and South America. They represent the volcanic activity that prevailed during the early stage of formation of the Central American mountains. The volcanic craters from which the material was ejected have long since ceased to exist. This group of rocks consists of volcanic ash, clay, bombs, or fragments of basalt thrown out from craters, all in masses, or roughly bedded lenses. The main mass of the formation is greenish to dark gray, but locally, brown, red, and yellow colors show the degree to which oxidization of the iron content has prevailed in favorable places.

The bedded series of rocks consists of agglomeritic layers interbedded with some sandstones and shales. Higher up in the series, the sandstones and shales predominate, and finally grade into dark and yellowish argillaceous sandstones with marine fossils. On top of this are limy beds, with a great number of *foraminifera*, and other marine organisms. This limestone outcrops at and near the village of Tonosí, where it is associated with friable shales that carry a fairly high percentage of iron in the form of magnetite sand. The limestone forms low, gently sloping hills, which ordinarily are 20 to 60 feet above the level of the valley. Near the village of Guaniquito, there are several large outcrops of limestone, and in some of these, caves of considerable extent have developed, due to the widening out of fissures by solution. Overlying the limestone are beds of sandy shales and sandstone, and on top of these are well laminated, hard, brittle beds of fine, light to yellow, and pink-colored tuff. Apparently above the tuff are well-bedded, buff weathering to dark, hard, brittle, limy shales. All of these rocks seemed to have been formed in the Oligocene period, when what is now Central America was represented only by a group of numerous islands.

The igneous group is composed altogether of basic rocks, such as basalts, andesites, and diorites; and basaltic and andesitic crushed and recemented rocks, or breccias. The Azuero mountain core seems to be largely formed of a highly crushed or brecciated andesite, which, because of its sheared and partly recemented condition, may represent an old land mass, older than the bedded rocks. Some float of a gray, dioritic rock was noted in a stream near Guaniquito. Basalt dikes, masses, and necks are very prevalent in all the highland district, and appear locally in the savanna regions. The basalts are probably later than the diorites, and both are younger than the bedded rocks. They seem to be equivalent to the Canal Zone basalts and diorites, which are probably Miocene in age. The sheared andesites of the Azuero mountain core are probably the oldest rocks in this district.

Relation of rock groups to land forms.—The igneous rocks are, in this region, the mountain forming group. With the exception of some hills of bedded rocks on the flanks of the mountains, practically all of the highlands are of igneous material, mostly basalts,

andesites, and breccias. The reason for the highlands in this particular locality is, because these hard rocks were more resistant to erosion than the softer bedded varieties, which are easily eroded away by the streams to form the present valleys and lowlands. The intrusion of the basalts, breccias, and diorites up through the bedded rocks in Miocene time lifted and disturbed the latter, for their beds are not now horizontal, but tilted at various angles. Probably maximum faulting and displacement of earth blocks also occurred at this time.

VOLCANIC ACTIVITY IN THIS REGION LONG SINCE EXTINCT.

The Miocene period in geology was one in which volcanic activity prevailed, not only in Central America, but in the western part of North and South America as well. During, and at times before, that period, the Los Santos region kept company with the other parts of North, South, and Central America in the matter of volcanic outbursts. But all these, with the exception of the recent active volcanoes in Central America, ceased countless centuries ago, and have never been revived. In fact, all those old volcanic activities are just as surely dead as a blast furnace would be after it has stood a hundred years without fire. There is no more likelihood of a volcano breaking out in Los Santos than there is of a field of glacial ice forming in the mountains and destroying the rice crop of the highlands.

ECONOMIC GEOLOGY.

In traversing the country investigating earthquake conditions, very little time for noting the geologic materials of economic value was available. However, a few things were seen that might be worthy of further investigation.

Iron ore.—The little hill on which the church stands in the village of Tonosí is chiefly limestone, but associated with this are friable sandy shales that contain a large percentage of magnetite. Another iron ore outcrop of possible value is found at Peña Prieta, about five kilometers north of Macaracas on the road to Pesé. The outcrop observed covered an area of about half a hectare, but other outcrops are said to occur nearby. It is not known what the relations of this deposit to the other rocks are; it may, or may not be, a bedded deposit. The rock outcrops in this vicinity are not very clear, and time to investigate them carefully was not available.

Limestone and road material.—The limestone deposit of the Tonosí valley would furnish an abundance of material for the manufacture of lime, and would also make good roadbuilding material. The basalts and andesites found in most of the mountains would, however, supply the best material for roadmaking purposes.

Lignite.—A deposit of lignite, or so-called coal, exists near Bombacho. It seems to be unsuitable for fuel, but might be worthy of consideration in the manufacture of producer gas.

Other minerals.—Deposits of copper are reported from certain parts of the Bombacho Hills, and deposits of gold, copper, etc., from Las Minas, and vicinity.

EARTHQUAKE BELTS.

Earthquakes have been known since the dawn of history, and they have been felt at times in nearly every land. There are certain parts of the earth's surface, however, where they are more frequent, and sometimes destructive. Such areas are known as earthquake

belts. Fortunately, Panama, unlike most of the other Central American countries, is outside of the Central and South American earthquake belts. In its long history, Panama has had several earthquakes, but very few of these have been heavy enough to be classed as even mildly destructive.

Causes of earthquakes.—The percentage of earthquakes that have any connection with volcanoes is very small. The majority of them are due to faults, or fractures, in the earth's crust, which result from slowly cumulative strains. These fractures may consist of one or a number of planes of breakage, or shear zones. The jar of the break gives the earthquake shock. There are other minor causes of earthquakes, such as great landslides, collapse of the roofs of large caves, etc., but these need not be considered here. Landslides also result from earthquakes, and the numerous new slides in the mountains of Los Santos are the effects, not the causes, of the recent movements. What causes strains in the earth's crust? It is a fact that certain parts of the earth's surface, as the northeastern part of North America, and parts of Northern Europe, are slowly sinking, and that other parts, as Florida and the Gulf States, are slowly rising. It is also known that rocks at depths of five to six miles below the surface of the earth are under such great pressure that no fracture or opening can be maintained in them. It has been ascertained by careful pendulum experiments, carried on by several governments, that there are areas of lesser density, or pressure, in the earth's crust. Geologic investigations indicate that there have been in the past, and are today, movements, or very slow flowage, of the deeper rocks from areas of high to areas of low pressure. The rocks relatively near the surface must, to some extent, conform to the movements of the deeper rocks in the zone of flowage, and this conformation of the brittle surface rocks can only take place by shearing and fracture. Such shearing, together, with the subsequent slipping of the great sheared blocks past each other, jars vast masses of the earth's crust, so that the elastic properties of rocks are brought into play, and earth waves, or earthquakes, result. A small piece of rubber cannot be very much compressed in an elastic way, but a large piece of rubber can. The same principle applies in relative degree to small and vast masses of rock. While it is believed that the earth's volume is slightly contracting, thus setting up unequal pressures over varying areas, it is known that where there is subsidence in one region, there is usually some degree of uplift in another. Ordinarily, this adjustment goes on very slowly, so that strains may accumulate for a long time before rupturing and faulting, with concomitant earth jars, occurs.

Effects not necessarily dangerous.—In general, it may be said that where there are no heavy or high buildings to be destroyed; where there are no volcanoes, or high, steep mountains from which landslides might be brought down on to towns at their base; and where the land is 75 feet, or more, above sealevel, so as to be out of reach of tidal waves, there, can, ordinarily, be very little personal danger from earthquakes, however severe they may be. Therefore, should Los Santos again, in years to come, be visited by other earthquakes, they will, in general, create no conditions of personal danger to the people.

RECENT EARTHQUAKES.

While the recent earthquakes were quite

serious, they could not be classed as dangerously destructive. In Los Santos province, it is estimated that a maximum intensity of VII to VIII on the Rossi-Forel scale was attained.

Effects.—Records of past earthquakes on the Isthmus of Panama are somewhat meagre. The earliest reported is that in the year 1541, recorded by Juan Rodriguez. In the months of May and August, 1621, several severe and destructive shocks were experienced at Old Panama. Bidwell reports a relatively severe shake in 1845. The investigators were able to get confirmation of this shock from some of the oldest inhabitants of Los Santos province, who stated that in severity it equalled the heaviest of the recent movements. It cracked the church tower at Los Santos village, but as there were fewer tiled houses then, the general damage was less. The earthquakes of September, 1882, and February and March, 1883, were equal in severity to the recent ones. During the years 1845, 1882, and 1883, detonations were distinctly heard. In some cases they slightly anticipated the earth movements, and in others accompanied them.

The effects of the recent shocks may be classified, as follows: (1) Fissures and cracks in the loose soil. (2) Landslides. (3) Damage to farms and crops. (4) Damage to buildings. (5) Injury to individuals, and after effects.

Fissures and cracks.—At Bucaro, one or two small cracks appeared in the soil close to the beach, after the movements of October 1. These were filled by surface dirt washed in by the heavy rains. At Pajanosa, the port of Tonosí, fissures were observed in the mud, or lama, on the banks of the river, which varied from six inches to two feet in width, and had an average direction of east and west. On the main road from Pajanosa to Tonosí, and at a distance of some 200 yards from Pajanosa, a single crack in the alluvium of 12 inches in width, and with a direction of N. 35 degrees E., was observed. It was about 30 yards from the river bank, to which it was roughly parallel. Several other cracks were found, all in the alluvium and mostly parallel to the river, varying in length from 50 to 100 feet, and in width from a few inches to five feet. They were filled up with crumbled soil to within a few feet of the surface. On the approach to Tonosí, many slides on the banks of the river were observed, and near the town, a series of cracks and fissures similar to those above described, were noticed. In one place, an entire fence of barbed wire was engulfed for a distance of 500 yards, in a large crack near the river bank. At the village of Cacao, a small crack paralleled the river, trending S. 50 degrees E. At Las Huertas, some small fissures in the banks of the river were noted. Near Cerro Bonita, it was found that the Joaquin River had cut a new channel for a distance of about 50 yards, evidently caused by the opening of a fissure at a bend in its channel. At Rio Viejo, there existed an 18-inch crack on the bank of the river, with a bearing of S. 12 degrees W. The cracks above-mentioned were all in the deep, alluvial soil, paralleled the streams in nearly all cases, and trended in different directions. Most of them were opened by the heavy shock of October 1. From several, water and sand boiled up, showing that the shaking had caused the surface material to settle down and compress the water-bearing sandy layers, thus forcing some of the water up through the cracks to the surface.

Landslides.—From the deck of the steamer,

near Bucaro, many landslides on the steep slopes of the mountains could be discerned. One of the largest of these, on Loma Caimito, the northern extremity of the range of hills known by the different names of Caimito, Bonita, and Subida al Cielo, was visited. This hill, N. 45 degrees E. of Tonosí, and one mile from the village of Corosita, is a part of the ridge 250 meters high, which forms the eastern border of the valley of Tonosí. The core of the ridge is of basic igneous rock, and the slopes are very steep. The slide, which covered an area of a few hectares, was due to the slipping of the loose surface soil and rock off the sheared bedrock below. All of the other slides were of the same general nature, and most of them seem to have occurred on the slopes to the southwest of the Canajagua-Quema mountains, although others were noticeable. It is quite evident that all of the slides were of surface material, where the slopes were steep, the ground water abundant, and considerable loose material existed.

Damage to buildings.—The loss from the recent earthquakes in the province of Los Santos has, from a monetary point of view, been greatest in the towns of Los Santos, Macaracas, and Tonosí. Many of the houses in the Tonosí valley sustained more or less damage, and several in the villages near Canajagua also suffered. Native ranches with grass or palm-thatched roofs, were nowhere seriously affected, and those damaged were either out of plumb, or in a dilapidated condition, before the beginning of the shocks. Houses with galvanized iron roofs had in some cases been thrown out of plumb, but sustained no further injury. Houses with tiled roofs were damaged most, and in the principal plaza of Tonosí, hardly a tiled roof escaped injury. Storekeepers suffered considerable loss through breakage of fragile merchandise, and damage from rains through broken roofs. In the villages of Cacao, Joaquin, Flores, Olivita, El Bebedero, Mogollon, Canajagua, and others, all houses with tile roofs were more or less damaged. In the town of Macaracas, the majority of the tiles were thrown off the roofs, and, as a consequence, rain did damage to the interiors. Houses, with walls built of *quinche*, were also severely cracked and thrown out of plumb. The tower of the church at Macaracas, 25 meters high, collapsed, carrying with it one-half of the roof. The many cracks made it necessary to pull down one of the end walls to save the rest. The church is a brick and masonry building constructed about 20 years ago, and the small size of rock used no doubt facilitated the work of the earthquake. In La Villa de Los Santos, the capital of the province, a few houses showed cracks in the *quinche* walls, and a number of roof tiles were displaced. The Government palace, constructed of rubble masonry, with a galvanized iron roof, is practically a total wreck. The whole of the upper story was cracked in every direction, and the lower portion is also badly damaged. Samples of the mortar taken from the interior of the wall showed a mixture exceedingly poor in cement. The damage to this building is no criterion of the severity of the earthquake, but indicates poor construction. The police barracks nearby showed large fissures. The body of the church at Los Santos was not seriously damaged, although several minor horizontal cracks were observed in the walls. The tower, however, a structure some 35 meters in height, constructed in the time of the early Spaniards, was badly injured.

It is told that it was also cracked by the earthquakes of 1845 and 1883. It is now fissured from the highest point to its foundation, and the arches above its windows are in a crumbling condition. In the town of Las Tablas, the church showed several cracks, especially in the arches to right and left of the altar; the tower also shows two small breaks. Private dwellings were but little damaged. In Guararé, a few houses lost their tiles. Owing to the fact that very few masonry buildings exist in the province, the damage was not as great as it otherwise would have been. In the masonry structures where cracks were observed, they varied in direction, so that they furnished no information as to the direction of the maximum movement.

Damage to farms and crops.—Indirectly, considerable damage has been caused to the small farms scattered over the region traversed. The greater number of the inhabitants were about to harvest their corn and rice at the beginning of October, but the earthquakes caused them to abandon the fields and neglect the work. In some cases, fences were thrown down and had not been reconstructed, allowing the cattle, horses, and hogs to invade the fields, and destroy part of the crops.

Injury to individuals, and after effects.—Only a single case of death that could be directly charged to the earthquake, was brought to the knowledge of the investigators. A native woman, at a place called Los Gatos, district of Macaracas, died, as the result of an hysterical attack, following the shock of October 4. Not a single case of injury was discovered. A high state of nervous excitement prevailed among the inhabitants, and the conditions under which the majority of them lived during the worst month of the year will undoubtedly tell on them to some extent.

OTHER OBSERVATIONS.

In connection with the earthquake shocks, the following facts struck the investigators as significant:

1. Deep, heavy sounds like muffled thunder, or a prolonged deep and distant heavy blast, were heard just at the beginning of most of the shocks, and at many times daily, when no movements were experienced. In the general vicinity of the Quema and Canajagua mountains, these sounds were clearly determined to be subterranean. In the strong shock of October 23, the sound began northerly to northeasterly of Sierra Quema, and died away in the distance to the southward, say 25 seconds later, after having passed under the mountain. The observers were on top of this mountain at the time, and on such high, steep ground the movement was very strongly felt, and the sound was quite pronounced. In Tonosí, the detonations were heard between two limbs of an arc that included the Quema-Canajagua district. From these, and other such observations, it was quite clear that the sounds were not confined to any small region, but originated in various parts of an area some miles in diameter; that they were, at least in many, and probably in most cases, subterranean in origin; that, originating in one place, they traveled rapidly and died away in another, somewhat like the drawn-out booming sound of rupturing ice on a large lake, when shrinkage, due to very cold weather, is taking place; and that they had some connection with the earthquake shocks. It was also clear that these sounds

had no connection with any volcanic activity, because they were not localized enough, and, because there was ample proof from the types and conditions of the rock exposed, that volcanic activity in that section had been dead for countless centuries.

gradual relief of strained conditions by the formation of numerous slips and shear zones in the rocks.

3. Within the sphere of action of the earthquakes there were local areas where the effects were severe, and nearby areas, where

the center of the disturbance.

4. With the first and heaviest shock, the submarine cable broke. It was found to have parted at a point about 15 miles off the coast, in the vicinity of North Fraile Island, where a sudden drop from relatively shallow to deep

water occurs. This steep slope of deepening resembles the escarpment of a submarine fault plane. The breaking of the cable indi-

cates that it is a fault plane, and that a further faulting of considerable magnitude increased the height and steepness of the escarpment, where the cable crossed it, sufficiently to strain the strands to the breaking point. It has been reported that the broken end of the cable was found at a depth of 4,800 feet, whereas, when the cable was first laid, the depth was only about 1,000 feet. Such a differential movement seems impossible, however, under the conditions.

SINKING OF THE OCEAN BOTTOM, AND EVIDENCE OF THE RISE OF LAND.

All the evidence tends to establish the fact that the ocean bottom off the coast of Tonosí sank very considerably, and that the sinking movement was limited landward by a fault escarpment; also, that this sinking ushered in the period of earthquake shocks, and was probably directly responsible for the first and heaviest movement. It is certain, however, that this sinking was not the direct cause of the underground noises heard by the investigators in the vicinity of Canajagua and Quema mountains, and, therefore, not directly connected with the seismic movements, which certainly had a direct relation to those sounds.

If there was a sinking of the ocean bottom to any noticeable degree, one might expect some rise, however small, of the adjoining land area. The investigators found no perceptible rise of land, but it would be almost impossible to detect any such rise unless it was one of more than a meter, because of the lack of any tide gage, or precise levels, and, because storm waves and the great rise and fall of the tide give a long, sloping beach with very indefinite tide marks. There is abundant evidence, however, from old raised beaches and emerged coastal plains that the land in that section has risen 25 feet, or more, since recent (Pleistocene) geologic time.

About May 1, 1913, Mr. MacDonald, accompanied by Dr. Otto Lutz, made a trip through Chiriquí and Veraguas provinces, under the auspices of the Smithsonian Institution. Some miles out from Aguadulce, a shell mound was discovered on the slope of a small hill, which overlooked a wide, flat area of coastal plain. This mound contained many varieties of sea shells, mixed with broken pottery, somewhat similar to that found in the old Indian graves in the province of Chiriquí. A layer of soil, from an inch to a foot thick, had accumulated over the whole. The shell mound is now about 30 feet above the tide level in the Santa María River, one-fourth of a mile distant, and is separated from the coast by five miles of low lying, flat coastal plain. Between the hill on which the shell mound is situated and the present shore line, are two or three other rounded hills. It is quite obvious that what are now hills overlooking this flat land were once islands in the sea which then covered the present coastal plain to a shallow depth. The inside one of this little group of former islands was used as a canoe landing by the Indians. The discarded shells of the shell fish, which they used as food, together with their broken pots and dishes, were thrown in the edge of the tide, and now form the shell mound described. The pottery fragments label it as being approximately 1,000 years old.

The striking connection between this shell mound and the recent earthquake series, however, is this: Sometime in the last 1,000 years, this land mass rose at least 30 feet above

its former level. Relatively speaking, this is a very rapid emergence. The wide areas of flat coastal plain and raised beaches are striking evidences of a geologically recent land emergence, but the shell mound clearly establishes that most of the emergence took place within historic time. The steepness of the submarine escarpment off the southern coast of Los Santos, together with the fact of a recent differential movement along its course, is fairly conclusive evidence that it represents a fault plane of relatively recent geologic age, and, therefore, it may be correlated with other Isthmian faults which are of Pleistocene time. There seems to be no other explanation than that the sinking of the ocean bottom was the direct cause of the rise of land. This condition of interdependent rise and fall of different areas is known to be a fact in some cases, and theoretically holds good.

CAUSES OF UNDERGROUND SOUNDS.

As already explained, the underground sounds heard were deep and heavy like prolonged subterranean blasts. Some were long and some short, and of slightly different timbre. They were not heard in the Canal Zone at all. The only reasonable explanation of these noises is that they were caused by a fracturing of the rocks over the area of country most affected by strains. In cases where the fracturing was slight, or very deep, no noise would be heard at the surface at all. In the case of large fractures close to the surface, maximum detonations would result. A long fracture, with accompanying sound, might begin on one side of the observer, and end far on the other side. One large fracture might cause local strains that would produce some smaller fractures, with accompanying sounds and small shocks. The investigators were unable to find recent fissures in the solid rocks observed. This, however, does not preclude the possibility of fissuring, because only relatively small areas of bedrock could be found sufficiently free from jungle and soil cover to make fissure observations practicable. Furthermore, many of the fissures might be more or less parallel to the horizontal and never reach the surface at all. Along the shore, and especially along the sea cliffs near Punta Guanico, where the rocks are well exposed, they show old joint and fracture planes to a remarkable degree. This is striking evidence of the straining and breaking that these rocks have undergone within recent geologic time. It is also a confirmation of the belief that if it were possible to find a large exposure of bedrock in the central part of the disturbed area, careful search would reveal joint and fissure planes that date from the recent disturbances. What is the explanation of the fact that the subterranean noises were usually heard just at the beginning of the earthquakes, and not at the latter end of them? The measured velocity of earthquake waves traveling through rocks relatively near the surface is about $3\frac{1}{2}$ kilometers a second, or not much, if any, greater than the velocity with which sound is propagated in rocks. Furthermore, a strain-fracture occurring in solid rock, say 1,000 feet deep, would cause two different sets of waves to reach the surface, namely, those propagated directly upward in the relatively elastic upper rocks, short and rapid in their action, and those propagated downward into the relatively rigid, deep rocks. The latter waves would also affect the upper rocks in an undulatory way, and as the column, or depth, of rock affected

by these latter waves would be much longer than the column of rock affected by the former, the amplitude at the surface through the long column would be much greater than the amplitude of the short column. The latter waves, being something in the nature of a reflection from the deeper, rigid rocks, would reach the surface somewhat later than the smaller ones. The sound from the breaking, or strain-fracture, should, therefore, reach the surface from its postulated 1,000-foot depth about simultaneously with the first light, perhaps imperceptible, tremors, and well before the heavier oscillations from the deeper rocks arrived.

LOCALIZED EFFECTS OF EARTHQUAKES.

The reason why one movement should be felt with particular force in one place, and with minimum effects in an adjacent region, while another shock, to some extent, reversed the conditions of its predecessor in this respect, seems to be, as follows: Maximum movement would be felt closest to the break, or fracture, which caused it. If one of these occurred directly under a town, that town would be affected to a maximum degree, while a neighboring town might be relatively little disturbed. A second earthquake might result from a break, or fracture, closer to another town and thus give a new localization of effects. Towns built on relatively solid bedrock always, of course, suffer less than towns built on loose river valley material, or on made ground.

SUMMARY OF CAUSES.

To sum up, the investigators feel quite certain that the causes of the recent earthquakes are: The settlement of the ocean bottom south of an old fault escarpment; that this set up strains in the adjacent land mass of the Azuero peninsula; that these strains resulted in fracture and shearing of the rocks along lines of least resistance; that the formation of these fractures, some of which must be very deep and probably parallel to the horizontal, brought into play the elastic properties of large masses of rock, thus engendering the earthquake waves. The question as to whether the rise of land in connection with the recent sinking of the ocean bottom is, or is not appreciably noticeable, will not affect the validity of the above conclusions.

In concluding its report, the commission submitted several recommendations, one favoring the appointment of a board of building inspection, to include three competent technically trained men, who should be charged, among other things, with the duty of passing upon all buildings put up in Panama city, and all Government buildings anywhere in the Republic; and another, favoring the establishment of a permanent tide gage somewhere on the southern coast of the Azuero peninsula.

RECORDS OF ANCON SEISMOGRAPH.

In all, 39 distinct shocks were registered on the Ancon seismograph during the month of October. Most of these were of slight intensity; only four shocks were of sufficient force to throw all pens off the seismograph sheets. The heaviest shock occurred at 11.25 p. m., October 1. Its intensity on the Rossi-Forel scale was estimated at V or VI. A second pronounced shock (Intensity III) occurred about 20 minutes later. A third (Intensity III) was recorded on October 4, and another (Intensity II) was recorded on October 23. These intensity values are for Ancon only; in Los Santos province, they were much heavier. All except two of the 40 shocks registered from October

1 to November 13, inclusive, seemed, according to the records of the seismograph, to have a common point of origin, or epicenter, loca-

ted approximately 115 miles southwest of Ancon in the vicinity of the lower coast of Los Santos province.

A table of the recent movements in detail, as recorded at Ancon, is given below:

Date.	Time of beginning.	Time of ending.	Maximum amp. (mm).	Distance miles.	Probable direction.
October 1.....	18.48:30	19.06:00	2.0	350
October 2.....	4.24:50	5.40:00	*75	115	SW
October 2.....	5.59:50	6.29:50	3.0	115	SW
October 2.....	7.27:00	7.29:00	0.3	115	SW
October 2.....	8.10:50	8.18:00	3.0	115	SW
October 2.....	8.48:00	8.55:00	3.0	115	SW
October 2.....	10.18:05	10.21:00	0.7	115	SW

October 24.....	5.17:00	5.22:00	0.6	115	SW
October 25.....	14.35:00	14.38:00	0.2	115	SW
October 26.....	22.40:10	22.42:00	0.2	115	SW
November 13.....	11.54:05	12.40:00	*75	115

NOTE.—Greenwich mean time, midnight to midnight, is used in the above report. Recorded by Bosch-Omori seismograph. North-south component. Period of pendulum, 25 seconds. Magnification, 10.

*Means that recording pen was thrown off paper.

† Means that a second shock, intensity 111, followed 15 minutes later.

COMMISSION CLUBHOUSES.

Activities of the Young Men's Christian Association.

GENERAL.

The moving picture schedule for the week, December 15 to 20, is as follows: Monday, Cristobal; Tuesday, Gatun; Wednesday, Empire; Thursday, Culebra; Friday, Porto Bello and Corozal.

The final standing in the basketball league was, as follows:

Team.	Won	Lost	P. C.
Empire.....	10	0	1.000
Camp Elliott.....	7	3	.700
Gatun.....	6	4	.600
Cristobal.....	4	6	.400
Culebra.....	3	7	.300
Corozal.....	0	10	.000

The standing in the all-Isthmian bowling league is, as follows:

Team.	Won	Lost	P. C.
Cristobal.....	16	5	.762
Empire.....	18	9	.667
Corozal.....	15	9	.625
Culebra.....	14	13	.519
Gatun.....	8	16	.333
Camp Elliott.....	2	19	.099

Sanitary drinking cups have been ordered for all the clubhouses and will be installed in the near future.

A new moving picture machine has been ordered for the Empire clubhouse.

The following dates have been assigned for entertainments coming from the United States; providing the halls at Balboa and Pedro Miguel are in readiness, dates will be announced for those points next week:

Dr. and Mrs. Poole, moving picture lectures on China: Thursday, December 18, Gatun; Friday, December 19, Cristobal; Saturday, December 20, Porto Bello; Tuesday, December 23, Corozal; Friday, December 26, Empire; Monday, December 29, Culebra.

Pennsylvania State College Quartet: Thursday, December 25, Gatun; Friday, December 26, Cristobal; Saturday, December 27, Porto Bello; Tuesday, December 30, Empire; Wednesday, December 31, Corozal; Friday, January 2, Culebra.

COROZAL.

On Monday night, December 1, the regular moving picture show was held, and on Friday, December 5, Hagy's show, including three reels of recent Canal pictures, was given. The next regular show will be on Wednesday, December 10.

On the local floor, Cristobal defeated the Corozal team in the last basketball game of the Isthmian league,

leaving Corozal with a clean sheet for the present season, having lost 10 straight games and won none.

High scores in duckpins for the week were: Seebt, 105, 114; Sims, 113, 100; Regan, 100; Beall, 101; Owens, 109; Edwards, 103; Steele, 104; Fischer, 103.

Corozal will bowl Empire on Empire's alleys in the Isthmian tenpin league on Saturday, December 13.

On Saturday, December 6, physical director Kjellander of the Gatun Y. M. C. A. visited the Corozal Y. M. C. A., accompanied by his boys' class, who played the Corozal boys, basketball, indoor baseball, and duckpin bowling. The results of the games were victories for Gatun in indoor baseball and small boys' basketball. The Corozal boys were winners in the basketball game for larger boys, and also at bowling. In the afternoon, about 35 boys enjoyed a swim at Miraflores Locks.

CULEBRA.

The membership of the local Y. M. C. A., on November 30, stood at 182, a gain of 12 over the preceding month.

The Y. M. C. A. will cooperate with the Sunday school in the matter of the Christmas entertainment on Christmas Eve.

On Sunday night, December 7, Mr. W. W. Warwick spoke on the church organization of the future in the Canal Zone. A short song service preceded his address.

A local duckpin tournament is being started. All wishing to enter this tournament are requested to be present at the alleys on Thursday night, December 11, when the tournament will begin.

Mr. E. W. Palmer won high score prize in duckpins for November, and Mr. E. P. Case won high score prize in tenpins.

On Wednesday, December 3, the Camp Elliott bowling team won two out of three games from the Culebra team on the Empire alleys. This was a Camp Elliott home game which could not be rolled on their alleys.

EMPIRE.

The Empire bowling team will bowl the Corozal team on Thursday evening, December 11, instead of Saturday, December 13, as scheduled.

The Empire Y. M. C. A. has issued an invitation to all the chess teams of the Isthmus to meet at Empire on Saturday, December 13. A special program is being prepared for the evening.

An entertainment for the children of Empire will be held at the clubhouse on Wednesday evening, December 24. There will be a short program by the children and special moving picture reels of a Christmas nature. Each child will receive a half-pound box of Christmas candy. A Christmas tree and other suitable decorations

will be arranged. Those wishing to contribute toward the expenses may do so at the secretary's desk, or to Mr. E. H. Ash, treasurer of the Christmas committee.

The Spanish classes have resumed, and meet on Tuesday and Thursday evenings. Those wishing to join should do so at once.

GATUN.

The attendance in gymnasium classes is continually increasing. The attendance on Tuesday evening was 21, and the aim is to have an average attendance of at least 35. All members of the association are cordially invited to attend. Classes are held on Tuesday and Friday evenings of each week. Boys' classes are held on Monday and Wednesday afternoons, from 3.30 to 5, and Saturday morning from 9 to 11. A class for high school girls is also held on Wednesday afternoon, from 1.30 to 3, at which the girls enjoy folk-dancing. All girls of Gatun are invited to attend.

Empire took two out of three games of tenpins from the local team on Saturday evening, December 6. The lineups and results were, as follows:

Empire.	Gatun.
Gustavson.....	138 167 155
Potter.....	146 163 162
Peterson.....	163 157 170
Boson.....	165 141 171
Huson.....	139 184 152
O'Meara.....	170 129 158
Otto.....	135 125 172
Snerrad.....	126 126 125
Davidson.....	160 191 141
Claherty.....	176 168 173

Totals..... 751 812 810 767 739 769

The Cristobal Juniors defeated the Gatun class team in a game of basketball on the local floor on Friday evening, December 5, by a score of 10 to 9.

On Saturday evening, December 6, a game of basketball was played between two picked teams of the local boys, called the "Bolivars" and the "Boobs." It resulted in a victory for the former, by a score of 17 to 13. The lineups were, as follows: Boobs—Claybourne, Thompson, forwards; Feehan, center; Gray, Golin, guards. Bolivars—Huber, Benjamin, forwards; Garrison, center; Dastheimer, Martinoff, guards.

CRISTOBAL.

Mr. H. D. Brittin, assistant secretary at Cristobal, will address the Discussion club on December 18, on "The benefits of physical education."

The Hagy films of the Canal were shown to a large audience on Wednesday, December 3.

The subscription lists for raising funds for the community Christmas celebration are now in the hands of committeemen in each department. The plans as now being arranged provide for entertainment every night during the holiday week.

An all-day all-Isthmian bowling tournament will be held at the Cristobal clubhouse on New Year's Day. Invitations have been sent to all the clubhouses to participate in it.

Rainfall, Dec. 1 to Dec. 8, 1913, Inclusive.

*Indicates reduction from last list.
**Indicates 5 cents allowed for return of bottle.
†Indicates advance on last list.
††Fowls weigh each, about, as follows: 3, 3½, 4, 4½, and 5 pounds. Prices are based accordingly; when size ordered is not in stock, next lightest weight is supplied and refund note sent for difference.
‡Sold only from commissaries; no orders taken for delivery.

§Not less than half of a fresh ham or shoulder will be sold.

Supplies for the Canal.

The following steamers with supplies for the Isthmian Canal Commission and Panama Railroad Company, arrived at the ports of Balboa, Colon, and Cristobal during the week ending December 6:

Carrillo, November 30, from New York, with 778 bundles reinforcing bars, for Second Division; 31 packages structural material, for fortifications; 411 packages structural material, for First Division; 200 kegs paint, for stock.

Professor, November 30, from Liverpool, with 16 bundles dredge chain, one box springs for dredges, for Sixth Division.

Parismina, December 1, from New Orleans, with 90 pieces pipe, for Mechanical Division; 275 pieces lumber, for Sixth Division; 600 bags fire clay, 10 crates wood handles, for stock.

Prinz Joachim, December 1, from New York, with 10 boxes paint, 481 pieces pipe, for stock.

Pennsylvania, December 1, from San Francisco, with 2,612 pieces redwood lumber, for Mechanical Division.

Brynhill, December 2, from Baltimore, with 176 cases lock material, 46,797 pieces conduit, for First Division; 56 cases electric crane material, for Mechanical Division; 30 packages plectrider parts, for Atlantic Division; 109 pieces structural material, for Panama Railroad Company; 748 pieces pipe-fittings, for Division of Municipal Engineering; 16 cases paint, 250 barrels brick, 1,108 pieces sewer pipe, for stock.

Santa Marta, December 3, from New York, with 125 bundles splice bars, 41 cases electrical material, 12 reels cable, 632 packages structural steel, for First Division; 30 steel channels, for Mechanical Division; 867 bundles reinforcing bars, for Second Division; eight cases dredge sleeves, for Sixth Division; 24 boxes toe culks, 50 cases paint, 20 barrels pitch, for stock.

Samaru, December 4, from Gulfport, with 2,525 pieces yellow pine lumber, for Mechanical Division; 1,209 pieces crosscut lumber, for Second Division.

Turrialba, December 4, from New Orleans, with 292 pieces pipe, for Division of Municipal Engineering; 24 boxes armament material, for Naos Island; 260 bales timothy hay, 980 pieces pipe, 23 bundles rosin, for stock.

Panama, December 5, from New York, with 66 rolls wire fabric, for administration building, Balboa; 25 cases lock material, 1,073 packages structural material, for First Division; 43 cases paint, 274 kegs bolts and nuts, 131 boxes lubricating grease, 980 kegs nails, 100 coils manila rope, for stock.

MOVEMENT OF OCEAN VESSELS.

The following is a list of sailings of the Panama Railroad Steamship Company; of the Royal Mail Steam Packet Company; of the Hamburg-American Line; and of the United Fruit Company's Line:

CANAL

RECORD

Volume VII.

ANCON, CANAL ZONE, WEDNESDAY, DECEMBER 17, 1913.

No. 17.

The Canal Record

Published weekly under the authority and supervision of the Isthmian Canal Commission.

The Canal Record is published free of charge, one copy each to all employees of the Commission and Panama Railroad Company whose names are on the gold roll. Extra copies and back numbers can be obtained from the news stands of the Panama Railroad Company for five cents each.

Address all Communications,
THE CANAL RECORD,
Ancon, Canal Zone,
Isthmus of Panama.

No communication either for publication or requesting information, will receive attention unless signed with the full name and address of the writer.

NOTES OF PROGRESS.

Channel through Cucaracha Slide.

The dredges working at the base of Cucaracha slide have cleared a channel of sufficient width to allow the passage of any of the vessels in the dredging fleet, which makes it possible to dump all spoil from the excavation beyond the north end of Culebra Cut, instead of partly in the completed channel south of the slide, and will allow more extended operations at the slide. The two Panama railroad barges that are used in moving the girders at Bridge 57½ were taken past the slide on Saturday, December 13, together with a derrick barge for Mr. Beyer. The Panama railroad barges were required on Sunday to lift the girder span at Gamboa. On Sunday, December 14, the ladder dredge *Corozal*, tugs *Reliance*, *La Boca*, and *Cocoli*, and six scows, were transferred to the north side.

The dipper dredge *Cardenas*, the ladder dredge *Badger*, clappers No. 1 and No. 7, three dump barges, the tug *Miraflores*, the launches *Birdena* and No. 26, the wrecking barge No. 17, and a material pontoon were transferred from the Pacific entrance to Culebra Cut during the forenoon of December 15, and passed through bridge No. 57½ and to Cucaracha slide in the afternoon. The channel having been cut through the slide to a depth of 20 feet, with a width of about 150 feet, it is purposed to maintain simultaneous operations at the slide with three ladder dredges, two dipper dredges, and two pipeline suction dredges.

General Layout at New Town of Balboa.

Work will be started shortly on the erection of 10 concrete 4-family quarters on the southerly spur of Sosa Hill, which will be the first residences constructed in the permanent town of Balboa. Forces under the direction of the landscape architect are engaged in street construction in this part of the town, and on the fill between Ancon and Sosa Hills, the grade of which, including the old La Boca road is being raised to secure proper

drainage by an additional fill of about 75,000 cubic yards.

The layout of the town, details of which have not been completed, provides a radiation of streets from the new administration building, which is situated on a spur of Ancon Hill, and faces Sosa Hill. A wide avenue, or prado, with double roadways and central parking, extends directly from an elliptical plaza below the administration building to the foot of Sosa Hill, terminating at the old La Boca road in a square around which will be grouped the commissary, post-office, and clubhouse, with the hotel and other community buildings like the dispensary, etc., nearby. At the Ancon Hill end of the avenue will be grouped the police station, courthouse, and such other buildings as may be devoted to the uses of civil administration in proximity to the administration building. The intervening stretch of prado will be lined with quarters, which will also be built on lateral streets, branching on either side from the prado, but irregular and picturesque in character. The propagation of plants for the townsite has been undertaken by the Sanitary Department at the Corozal farm. It is expected that these will be ready for planting out in from nine to 18 months. Additional sites for quarters are to be provided in rear of the administration building, on Ancon Hill.

Isthmian Rocks for Smithsonian Institution.

A collection of Isthmian rock specimens made by Mr. Donald F. MacDonald, formerly Commission geologist, has been presented to the Smithsonian Institution at Washington. In making the donation, the Canal Commission reserved the right to use whatever typical specimens it may require for exhibition purposes, such as in the permanent administration building at Balboa, or at the San Francisco exposition.

The Transisthmian Duct Line.

The study of the engineering features covering the transisthmian duct line has now been completed, and it has been decided to lay a 4-way, vitrified clay duct line from Colon to Balboa, to contain the signal cable and the telephone-telegraph cable. One duct is available for lease or rental, and the other spare duct is left for future requirements.

The duct will follow the line of the Panama railroad. It will be laid on a base of concrete approximately five inches thick, and encased with three inches of concrete on the top and sides.

Manholes will be located according to the theoretical spacing of loading points, which places the manholes every 774 feet. They are to be of the concealed type, and each composed of only three different pieces. The pieces will all be cast at one central point and distributed along the right-of-way. The light weight of the parts and the flat shape

of the individual pieces will allow a knock-down shipment to be handled easily, and with a minimum of breakage.

The signal cable will consist of approximately 215,000 feet of 13 solid conductor and 50,000 feet of nine solid conductor No. 12, Brown and Sharpe gage.

The telephone-telegraph cable will consist of 257,730 feet, 38 pairs of 19-gage solid conductors, quadded, and 12 pairs of 16-gage solid conductors in pairs. This will offer an increase over the present telephone trunk lines of approximately 30 circuits.

Armored cable will be installed at bridges Nos. 140 and 309, crossing the Gatun and Chagres Rivers.

Specifications and requisitions covering the 4-way multiple duct, the cables, loading coils, and other adjuncts were completed by the telephone and signal department of the Panama railroad on November 17. Work will be started as soon as the duct arrives on the Isthmus. Duct will be laid at the rate of 1,500 feet per day.

Panama Railroad Baggage Business.

At the request of the contractor, the baggage contract between Albert Lindo and the Panama Railroad Company was terminated on November 17, when the railroad took over this branch of the business. It is now under the direct supervision of Mr. William E. Tragsdorf, general baggage agent, freight and passenger department, Panama railroad. A number of changes looking to the improvement of the baggage service have already been instituted, and more will be made from time to time in carrying out the plan of placing the business on a systematic basis.

Under the old arrangement, incoming passengers at the port of Colon were importuned by a crowd of independent baggage handlers, who had no established rate of service, but charged whatever price it was thought the passengers would pay, in many cases amounting to sheer robbery. These men are now excluded from the docks of the railroad company, as well as from the station platform at Colon, and those who desire their baggage transferred from the docks to the station, or to points in Colon are given a transfer check on payment of 25 cents for a trunk, weighing not over 150 pounds, 40 cents for a trunk over 150 pounds, or 15 cents for a grip, or other small pieces of baggage. In transferring baggage from the Colon docks to the Hotel Tivoli, or points in Panama, which means eight distinct handlings, rates of 50 and 75 cents will be charged for trunks, and 25 cents for each piece of hand baggage. The ticket agents at stations on the line of the railroad have been provided with transfer checks, so that now a resident of these villages can have his baggage checked through to the Colon docks. The status of transporting employees' baggage to and from the stations in the vil-

lages remains the same, being handled by the Quartermaster's Department.

A plan is being considered to establish branch ticket and baggage offices at the Colon docks. Under this arrangement, travelers will not only be able to check their baggage through to any hotel or residence in Panama but will be able to buy their tickets as well, thereby saving time and relieving them of the necessity of going to the Colon station baggage room to check their baggage. Four baggage wagons have been ordered, two for service in Colon, and two for Panama, and they are expected to arrive in the near future. For the present, equipment from the Quartermaster's Department is being used.

Canal Laborers Continue to Emigrate.

The excess in the number of persons leaving the Isthmus during the month of November, according to the figures of the quarantine service, as compared with the number landing, amounted to 2,037, making the net emigration from the Isthmus during the past four months 8,796, the most of which consisted of laborers on the Canal.

The total number of steamship passengers embarking from the ports of Colon and Cristobal for foreign ports during November was 4,410, consisting of 1,626 cabin, and 2,784 steerage passengers. The number of persons landing from foreign ports was 2,398, consisting of 1,407 cabin, and 991 steerage passengers. The number of persons who embarked over those who landed at these ports was 2,012. The immigration from the West Indian ports continues to decrease, only 119 cabin, and 505 steerage passengers landing during the month. Costa Rica furnished 185 steerage passengers, and Colombia, 109, while the immigration from Europe practically ceased, only 54 deck passengers landing during the month. The number of persons arriving "In transit" during November, nearly all tourists, was 1,618, a decrease of 169, as compared with October.

The number of persons landing at the ports of Ancon and Panama from foreign ports during the month was 482, consisting of 363 cabin, and 119 steerage passengers. The number of persons embarking for foreign ports was 507, consisting of 348 cabin, and 159 steerage passengers. The number of those who embarked over those who landed was 25. The total number of vessels arriving at Colon during November was 93; at the port of Ancon, 21.

Progress of Wharf Construction at Balboa.

The section of the permanent quay wall at Balboa, which extends east from that part known as the Panama railroad concrete wharf, is practically completed. This quay wall is known as "Section g-h-i" and extends along the south side of No. 1 slip, a distance of 1,238 feet and north of the shop buildings, forming a part of the repair wharf of the terminal facilities, the design and location of which has been described in a previous issue. The work remaining to be done consists of grouting the railroad track which extends along the edge of the wharf, and laying the brick pavement. This pavement will not be laid until the dry season, as water standing between the curbs on the cinder concrete would make it difficult to roll the sand cushion to the proper grade.

All but four caissons, which latter have

been under construction tracks, have been excavated to rock in the head wall section which forms the head of slips Nos. 1 and 2, a distance of about 807 feet.

On pier No. 1 there are yet to be placed 24 concrete caissons. A small steamshovel is excavating the fill on the site, which once formed a part of the west toe of Sosa Dam, and as soon as this is completed, the remaining piers can be sunk.

The total length of caisson remaining to be sunk is approximately that for an average month's work, but on account of the limited area to be covered it will probably require two months to complete.

The section of quay wall which will extend from the west end of the Panama railroad concrete dock, over the site of the present sand wharf, has not yet been begun. Preparations, however, are being made to begin driving the 6-inch steel cylinders. On account of the rock fill which has been placed in this vicinity it has been necessary to excavate the rock fill to the underlying mud, and the dipper dredge *Cardenas* has been at work clearing the site. The trestles from which the cylinders will be driven were begun on November 27. Eighty-foot piles are being used. This latter section of quay, which forms a continuous quay wall with those mentioned above, will be 718 feet long, and is known as "Section c-f".

Sale of Munitions.

In 1904, when Panama's standing army was disbanded, there was on hand a considerable amount of munitions of war. This material was turned over to the Canal Commission authorities for storage, and for a time was kept in one of the French buildings at the old Ancon corral. The Panama Government has decided to dispose of the supplies, and a public sale for the purpose will be held in the office of the Treasurer-General of the Republic on December 27, 1913. The stock to be sold consists of 1,000 Gras rifles, 246 cannon projectiles, and 1,141,000 rounds of ammunition for rifles and rapid-fire guns. The basis of the bids will be, as follows: Rifles, \$1.50 each; cartridges, \$2 for each 1,000, projectiles, \$4 for each 100.

Canal Excavation in November.

The grand total of Canal excavation to December 1 was 213,904,031 cubic yards, leaving 18,418,969 cubic yards remaining to be excavated under the revised estimate of July 1, 1913.

The total excavation for November was 1,347,756 cubic yards. The wet excavation for the month was 1,020,246 cubic yards, and the dry excavation 327,510 cubic yards.

In the Atlantic section, the total excavation for the month was 280,185 cubic yards. Of this amount, all but 1,210 cubic yards was wet excavation and consisted of material dredged from the Atlantic entrance, the dock in connection with the proposed east breakwater to extend out from Coco Solo Point, and in the terminal basin. All of the above, with the exception of 20,525 cubic yards was "Work" excavation.

The total excavation in the territory of the old Central Division was 570,586 cubic yards, 160,900 cubic yards of which were removed by Fourth Division steamshovels in terracing operations in the zone of slides; 199,194 removed by dredges in the Culebra Cut section, including Cucaracha slide; 119,092 cubic yards of mud and gravel from the

Canal channel near Gamboa cabin by suction dredges, all by forces of the Sixth Division, and 81,400 cubic yards sluiced in the vicinity of Gold Hill by forces of the Fifth Division.

In the Pacific section, operations by the dredging division resulted in the removal of 341,585 cubic yards from the Pacific entrance. The steamshovel output at the Balboa terminal site amounted to 113,630 cubic yards, and at locks, dams, and spillways, principally excavation for locks backfill, 41,770 cubic yards.

A detailed statement of excavation, and a summary of the work on the locks and dams, follow:

Mean rainfall along Canal (nine stations), 13.18 inches.

By "Work" excavation is meant excavation actually made for one of the constituent parts of the Canal, such as prism, diversions, or locks, etc., that is, it represents material taken from the area to be occupied by the Canal and constitutes excavation useful for the completed Canal.

By "Plant" excavation is meant excavation outside any of the constituent parts of the Canal, such as prism, diversions, or locks, etc. It includes material necessary to be excavated for construction purposes only, and is chargeable against the particular plant item for which it is performed, such as prism, diversions, locks, etc.

ANCON COMMISSARY.

Building of a Permanent Type Now Under Construction.

The first commissary building of a permanent type to be erected in the Canal Zone will be at Ancon. It will have a modern store front, with a large display window on each side of the vestibule, which will be fitted with small pane glass panel doors, and will open on a porch about six feet wide and 40 feet long, the roof of which will be supported by concrete pillars. From the porch a flight of steps will lead to the ground level. The walls of the building will be of concrete, probably hollow concrete blocks, and the roof, built of reinforced concrete, will be nearly flat, and

30 feet on the front to obstruct the view from the street of operations in the rear.

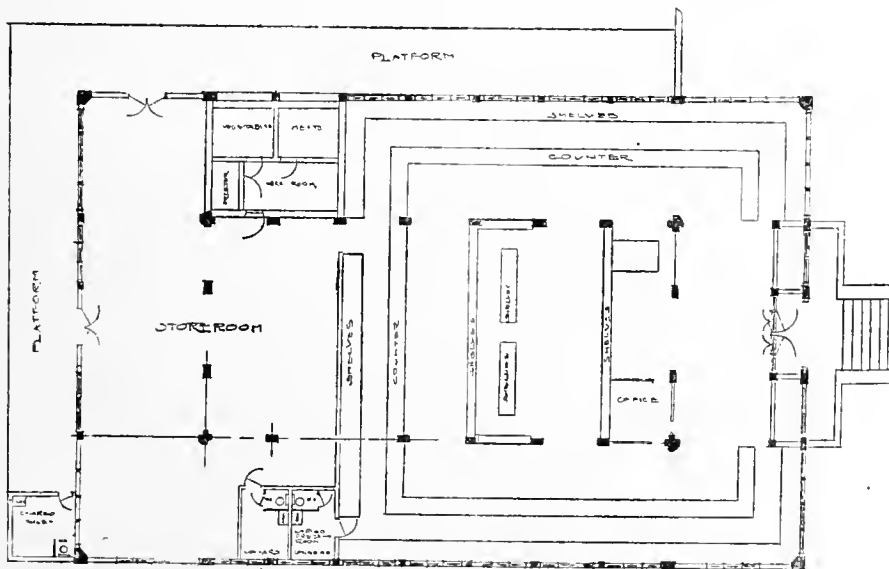

The interior arrangements will consist of a main salesroom, with tile floor, 68 by 70 feet in plan, a storeroom, 40 by 68 feet, and a refrigerator. The salesroom will have wall shelving for dry goods, furnishings, cigars and candies, groceries, and hardware. In the center of the salesroom there will be shelving for shoes, and a space for the office and order desk. The refrigerator, about 20 by 20 feet in plan, will contain four compartments; one, a workroom for the butcher and his assistants, and the other rooms for keeping butter, eggs, meat, and vegetables. In the rear of the building extending along the railroad track will be an unloading platform, 10 feet wide.

FRONT VIEW OF NEW ANCON COMMISSARY NOW UNDER CONSTRUCTION.

surrounded by a low parapet. A part of the roof will be elevated, as shown in the accompanying sketch, in order to admit light and air. The eaves will have an overhang of six feet, and directly underneath will be a 4-foot window space, also for ventilation and

The Ancon commissary will be for the use of the gold employees exclusively, and is being erected on the site of the old French building, formerly used by the district quartermaster as a storeroom, which has been torn down as far back as the saw mill to make the neces-

GROUND FLOOR PLAN OF NEW COMMISSARY BUILDING AT ANCON.

light, extending entirely around the building. The front wall will extend to the ground, but on the sides and rear, the walls will be supported by 3-foot concrete piers, leaving an open space which will be screened from public view by a hedge of foliage plants. A screen wall, also of concrete, will extend out from the commissary for a distance of about

sary room. The building will front the road leading from the hospital gate into the Tivoli section.

The members of the Wandering Herd, the local branch of the Benevolent and Protective Order of Elks, have arranged for an excursion to Taboguilla Island, on Sunday, January 11.

MUNICIPAL WORK AT LA BOCA.

Site of New Permanent Townsite for Silver Employees Nearly Prepared.

Municipal work for the new town of La Boca, exclusively for the silver employees of the Canal Commission and Panama railroad, had been advanced well toward completion by December 1. On that date, all of the sewers had been finished and the water system was 98 per cent completed. The grading of the blocks and of the streets, and the laying of concrete curbs and gutters, were all over 90 per cent complete; the remaining municipal work will be principally in macadamizing the streets and laying the 4-foot concrete sidewalks, which are 15, and three per cent complete, respectively.

The townsite is rectangular in plan, 1,046 feet long by 681 feet wide. It is laid out on a part of the large fill southwest of Sosa Hill, and its northernmost side lies approximately at right angles to the edge of the fill, back of the steel pier at Balboa. Its east and west streets, designated First, Second, Third, and Fourth streets, are, approximately, parallel to a section of the new Sosa road, which skirts Sosa Hill on the south and west, running from the Balboa commissary, past the electric plant, to the land end of the steel pier; First street is separated from Sosa road by the right-of-way of the electric street railway. The north and south streets intersect the cross streets at right angles, and are designated as First, Second, Third, and Fourth avenues, beginning with First Avenue, on the side nearest the Balboa commissary. The severity of the layout is relieved by 69-foot parking between Second and Third avenues, and a plaza between Third and Fourth streets.

On December 1st, 18 houses in the new town had been completed, of which eight are occupied by families, and seven by bachelors. The family quarters are all on the south side of the lengthwise park, and the other half of the town is to be devoted exclusively to bachelor quarters. A commissary store for supplying canned vegetables and cold storage goods to the inhabitants, has been opened recently near the northeastern corner of the town.

New Type of Water Hydrants.

An order for 200 water hydrants, modified to meet the requirements on the Isthmus, was awarded on October 18 to the Camden Iron Works of Camden, N. J., at a cost of \$44.17 each, for delivery on the Isthmus not later than January 18, 1914. A supplemental order of 111 hydrants of the same type has just been placed, 45 of which are to be installed at the new Balboa townsite; 55 in the new Bella Vista addition, and 11 on the site of the Panama national exposition. These hydrants differ from those previously installed in that they have no drip holes, which are only necessary in cold countries; the valves are seated with, instead of against the pressure; the valve stems are slightly different, and the openings, one 4-inch for fire automobile connections, and one 2½-inch for the ordinary hose connections, are so made that they can be fitted with a special coupling to accommodate either the hose used by the Canal Zone fire department, or by the Panama fire department. The special coupling is desirable, because the couplings on the hose used by the Canal Zone fire department are made with the Chicago thread, while the Panama hose couplings are made with the English thread.

RECORD OF CANAL WORK SINCE AMERICAN OCCUPATION.

TOTALS BY CUBIC YARDS OF EXCAVATION AND LOCK AND DAM CONSTRUCTION.

[All figures are of work useful for the completed Canal.]

STATUS OF LOCK GATE WORK.

Completion Expected within Contract Time—Contractor's Forces have been Reduced.

The force of the McClintic-Marshall Construction Company in the Canal Zone has been greatly reduced during the past six months, as the erection and finishing of the miter gates for the Canal locks have been drawing toward completion. The contractor is now cleaning up at Gatun and Pedro Miguel, where the only work on the gates yet to be done is a small part about some of the handrails, and the interior finishing of several leaves, the latter being done under subcontract by the American Bitumastic Enamel Company.

The remaining gate work at Miraflores Locks comprises finishing and cleaning the six leaves, which include placing the handrails and babbitting under the bearing plates at the miter ends of the 82-foot leaves of the lower operating gates. The last erection bridge, spanning the lock chambers, which has been left across the upper level at Miraflores for the accommodation of forces of the Canal Commission, is to be dismantled on December 10. The last of the 5,800,000 rivets in the gates were driven at Miraflores about the middle of November, with the exception of a few which were subsequently replaced. It is estimated that the rivets used weigh approximately a pound each, and that all the gates together contain about 2,900 tons of rivets. The completion of the work is being supervised by Mr. W. M. Sterrett, who has been local manager for the contractor since September 1, 1912; he anticipates that the gates at Gatun and Pedro Miguel will be finished on contract time, that is, by January 1, 1914, and that the completion of his company's work at Miraflores Locks will run slightly ahead of the contract date for completion, which is March 1, 1914.

The contract awarded to the McClintic-Marshall Company for the fabrication and erection of the lock gates was dated June 21, 1910. The first material erected under the contract was bearing plates, attached to hollow quoins in the upper level of Gatun Locks, on March 21, 1911. The erection of the locks proper was begun on May 17, following, when the bottom girders for the upper guard gates at Gatun were lowered into position. The largest force employed by the contractor at one time on the gates was 5,050 men, in April, 1913. No women were employed in any branch of the local work. The falling off in the force during the last six months is shown in the following tabulation of the roll at the first of each month:

Sailing of the "Fram."

The polar ship *Fram*, which arrived at Colon from Buenos Aires on October 3, departed on its trip around South America on Monday, December 15. On its arrival at San Francisco, it will be met by Captain Amundsen and outfit for a voyage to the Arctic region. During the stay of the vessel at Colon, Captain Thorvald Nilsen, its master, gave several lectures in the Commission clubhouses, and disposed of a number of

postal cards, which will be mailed by him to the addressees, at points farthest north.

Steamshovel Work on Sides of Culebra Cut.

During the month of November, the total amount of material excavated by the Fourth Division in Culebra Cut was 170,900 cubic yards. Of this amount, 160,900 cubic yards were primary excavation for the Canal, and 10,000 cubic yards were classified as "Plant excavation"; 36,808 cubic yards were classified as earth excavation, and 131,092 cubic yards as rock excavation.

In addition thereto, the Fourth Division excavated at Sosa Hill 36,100 cubic yards of rock for use on the Naos Island breakwater.

All of the yardage handled by this division was excavated by steamshovels.

The Fifth Division of the Chief Engineer's office removed by sluicing at Gold Hill 81,400 cubic yards, 56,400 cubic yards of which were classified as earth, and 25,000 cubic yards, as rock excavation.

Additional Motor Boat for Sixth Division.

The motor boat *Search*, one of the three motor boats purchased from the Welin Marine Construction Company of New York for the use of the Sixth Division in inspection service, arrived on the *Carrillo* on November 30. This boat is 45 feet long, plainly fitted, equipped with twin screws, actuated by two gasoline engines of 45-75 horsepower, and is capable of developing a speed of 16 knots an hour. It was swung overboard in the dock at Colon, and taken to Gatun Lake through Gatun Locks, on Wednesday morning, December 3.

Arrival of Submarines at Colon.

The First Division of the submarine flotilla of the United States Navy arrived in Colon Harbor from Guantanamo, Cuba, on Friday, December 12, and will be stationed in Isthmian waters indefinitely. The division, consisting of submarines *C-1*, *C-2*, *C-3*, *C-4*, and *C-5*, and the tender *Severn*, was accompanied by the monitor *Ozark*, the supply ship *Cesar*, and the tug *Potomac*. The *Ozark* sailed for Guantanamo on December 15, and the *Cesar* and *Potomac* will follow shortly.

The submarines of the "C" type are 105 feet long and have a displacement, when at the surface, of about 240 tons. The first of the group, *C-1*, was built in 1908, and the four others within the two years following. The division is in command of Lieut. R. S. Edwards, who is also in command of *C-3*; the *Severn* is in command of Ensign S. A. Manahan; and *C-5*, *C-1*, *C-4*, and *C-2*, are

in command of Lieut. J. W. Rankin, Ensign T. E. Van Metre, Ensign F. A. Daubin, and Ensign L. Hancock, Jr., respectively. The other officers with the division are Ensigns D. J. Friedell, P. T. Wright, C. M. Elder, G. L. Dickson, G. A. Rood on submarine assignment, Passed Assistant Surgeon A. J. Foulon, Assistant Paymaster D. T. Chalmers, and Paymaster's Clerk L. A. Klauer.

The sale of 1,634,840 pounds of old steel lock forms has been made to M. Rovetta of

Genoa, Italy, at the price of \$3.40 per ton of 2,240 pounds. There was only one other bidder, the Chicago House Wrecking Company, which offered \$2.50 per ton of 2,240 pounds.

Civil Service Examinations.

Examinations will be held, probably on January 25, for the positions of stenographer and typewriter, Isthmian Canal Service; stenographer and typewriter, Philippine Service; and typewriter, Isthmian Canal Service. Applications will not be received after January 3; this date may be changed if necessary. Persons interested should request a copy of form No. 1,424, which contains information in regard to the abovenamed examinations.

Competitors in the abovenamed examinations must bring their own typewriting machines to the examination room.

The examinations will be held probably in the Commission clubhouse at Empire, but the place and date should be omitted in applications.

A card of admission will be sent to those found eligible to be admitted, just before the examination.

In answer to questions as to residence, applicants must show residence in a State or Territory of the United States, and county thereof, up to the time of filing application.

ISTHMIAN CIVIL SERVICE BOARD,

D. BUCKLEY, Secretary.

Culebra, C. Z., December 13, 1913.

Obituary.

The death of Ernest W. Heverly, a paymaster of the Disbursing Office, with headquarters at Ancon, occurred at Rogers, Arkansas, on Thursday, November 27, after a short illness. He left the Isthmus on his annual leave of absence on November 15. He was 28 years old, unmarried, and had been on the Isthmus since November 29, 1906. He was first employed in the office of the Local Auditor of the Canal Commission, but was transferred to the Disbursing Office on January 3, 1907. His father S. G. Heverly, and a brother, J. H. Heverly, reside at Rogers, Ark. His former home was at Center Point, Iowa.

Mrs. Albert C. Lokerson, the wife of Mr. Albert C. Lokerson, an employee of the Second Division, died at Ancon Hospital on December 11. She was 28 years of age and had been on the Isthmus only one day when admitted to the hospital. She is survived by her husband, living in Ancon.

Resolutions on the Death of Lieutenant-Colonel Gaillard.

The following resolutions have been passed by the Senate of the United States:

Resolved, that the Senate of the United States has heard with profound sorrow of the death of Lieut.-Col. David DuBos Gaillard, to whom the American people are under lasting obligations for the splendid service he rendered in overcoming some of the most perplexing difficulties in connection with the Panama Canal.

Resolved, that in further testimonial of our esteem the Secretary of the Senate be authorized to forward a copy of these resolutions to the family of Lieutenant-Colonel Gaillard.

Similar resolutions were passed by the House of Representatives on the same day.

Married.

BREWBAKER-CHAFFEE—At the Union Church, Cristobal, on December 5, Gay Lyon Chaffee, to Milo Wilson Brewbaker, both of Chicago, Ill., the Rev. Carl H. Elliott officiating, Canal Zone residence, Gatun.

LOST—At Gatun, on Thursday, December 11, a small black purse containing a sum of money. A liberal reward is offered if returned to H. M. O., Gatun, P. O. box 160.

CHRISTMAS SERVICES.

Canal Zone Churches and Sunday Schools Will Celebrate the Day.

The Christmas service at the Methodist church in Panama will be held on Sunday, December 21. On Christmas Eve, the celebration of the Sunday school will be held, when a program consisting of songs, recitations, and a Christmas cantata will be given. The program will be repeated on Christmas afternoon at the new church in Guachapali, and on the Sunday following, the same will be given for the inmates of Chiriqui prison.

At St. Luke's Hospital chapel, Ancon, there will be services on Christmas Day at 10 a. m.

At the chapel of the Sacred Heart, Ancon Hospital, midnight mass will be celebrated on Christmas Eve.

At the church of St. Mary, Star of the Sea, Balboa, mass will be celebrated at 9 a. m., on Christmas Day.

At St. Ferdinand's Church, Empire, the mass will be celebrated at midnight on Christmas Eve and the early masses will be said in accordance with the usual custom. At the Church of the Redeemer, Culebra, mass will be celebrated at midnight as usual.

The Baptist church, New Gatun, will celebrate Christmas on Tuesday, December 23. In Colon, the celebration will be on Friday, December 26.

There will be a celebration of mass at midnight on Christmas Eve at the Church of the Immaculate Conception, Colon, and the usual early morning masses will be said. On Christmas Day, there will be a tree for the children of the parish in the new parish hall adjoining the church. It is expected that about 700 native and colored children will participate. This is the first time the parish has held an extensive celebration for the children.

At Christ Church, Colon Beach, the first vespers of Christmas will be sung on December 24 at 7.30 o'clock; choral eucharist will be sung at midnight on Christmas Eve; Christmas carols and service at 5 a. m., and a second celebration of the Holy Communion will be at 7.30 a. m.

Balboa Catholic Club.

The Catholic Club of Balboa held a meeting in the lodge hall of that village on Thursday evening, December 4. This was the first meeting of the club, and there was a large attendance. The Rev. Father McDonald, assistant priest at St. Ferdinand's Church, Empire, was the speaker, and delivered an address on club life, pointing out the ways in which successful clubs are conducted. The Catholic club will meet every Thursday evening. It is purposed to conduct the club on a plan similar to that of the Empire Catholic Club.

Proposed Federation of Union Church Work.

A meeting has been called by the executive council of the Union Church of Cristobal to convene at the Commission clubhouse at Corozal on Sunday afternoon, December 21, at 2.30 o'clock, for the purpose of discussing plans for the continuance of the undenominational church work on the Isthmus. Much interest is being shown in the movement and any persons who wish to attend this general conference at Corozal are cordially invited to be present.

Exchange Libraries.

Twelve exchange libraries for circulation among the dredges engaged on the Canal work have been purchased from a fund in the

hands of the Union Church of Cristobal. Each library contains a dozen books, and will be forwarded and exchanged according to certain arrangements. Information concerning this library extension work may be obtained by addressing the Union Church Work Bulletin, Cristobal.

Strangers Club Election.

The annual election of officers of the Strangers Club was held on Saturday, December 13, and resulted, as follows: Chairman, John Burke; vice-chairman, C. E. Landers; treasurer, R. A. Brayton; secretary, R. W. Wilson. The report of the treasurer showed a marked improvement in the finances over the corresponding period of 1912. The membership is exactly as it was last year. An enjoyable "Smoker" followed the business session.

I. B. of S. S. and D. M.

A regular meeting of Local No. 19, International Brotherhood of Steamshovel and Dredgemen, will be held at the Empire lodge hall on Sunday, December 21, at 1 p. m. All members are requested to be present.

PERSONAL.

Capt. Charles W. Barber, accompanied by Mrs. Barber, sailed for New York on the *Allianca*, on Wednesday, December 17, on his annual leave of absence.

Dr. Roland P. Falkner, has resigned from the Joint Land Commission effective on his arrival in the United States. He sailed for New York on the *Panama* on Thursday, December 11.

The resignation of Dr. E. P. Beverley became effective on Monday, December 15, and on Tuesday, December 16, he sailed for New York on the United Fruit Company's steamer *Pastores*. He entered the Canal service on July 6, 1904, and was on the Ancon Hospital medical staff until May 1, 1905, when he was promoted to be district physician. On October 1, 1905, he was transferred to Colon Hospital, and performed the duties of physiological chemist, with the rating of physician, until August 1, 1907, when he was appointed chief of the medical clinic of that hospital. On October 16, 1907, he was again made district physician, but was reappointed chief of the medical clinic at Colon Hospital on July 12, 1911, and held that post until it was abolished on November 15, 1913. Dr. Beverley is from Broad Run, Va., and was graduated from the University of the South at Sewanee, Tenn., with the degree of Doctor of Medicine, in 1900. He recently accepted a position with the Pension Bureau at Washington.

Mr. C. P. Fortney, supervisor of machinery installation for the First Division of the Chief Engineer's Office, at Gatun Locks, has resigned to accept a position in the United States under Major Oakes, on one of the dams of the Ohio River near Louisville. Mr. Fortney entered the service of the Commission on August 22, 1907, as a draftsman, and was engaged on masonry and valve design. At this time the designing was done under the head of Department of Locks and Dams. On April 26, 1909, he was transferred to the field in charge of certain construction for the Gatun Locks handling plant. On September 1, 1909, he was promoted to superintendent of masonry construction at Gatun. On September 11, 1911, he was transferred to the

First Division, charged with the installation of the permanent lock operating machinery. This position he held until his resignation was accepted.

Mr. Charles F. Koerner resigned the position of assistant chief of the Canal Zone fire department on Wednesday, December 10, and sailed on the *Panama* on the following day for New York. He became a member of the fire department in September, 1906, and was stationed at Cristobal. In September, 1907, he was made assistant fire chief, with headquarters at Ancon.

Mr. M. J. Schiavoni, who has been employed as architect in connection with the permanent structures of the Canal, resigned from the Canal service on December 4, and sailed for New York on the *Panama*, on Thursday, December 11.

Mr. H. E. Bartlett, the architect in the employ of the Panama Railroad Company, who designed the company's new passenger terminal in Panama, and supervised its construction for the railroad, has resigned. He sailed for New York on the *Carl Schurz* of the Hamburg-American Line on Tuesday, December 16.

Mr. W. K. Jackson sailed for New York on Thursday, December 11, on the *Panama*, on his annual leave of absence.

Justice S. E. Blackburn, returned from his annual leave of absence on the *Ancon*, which docked on Monday, December 8.

Mr. Charles R. Williams returned from his annual leave of absence on the *Panama*, which arrived on Thursday, December 4.

OFFICIAL CIRCULARS.

Christmas and New Year's Days.

CULEBRA, C. Z., December 12, 1913.

CIRCULAR No. 517:

Christmas Day, December 25, 1913, and New Year's Day, January 1, 1914, will be observed as holidays in the Canal Zone, and as far as practicable all public business will be suspended on those days.

GEO. W. GOETHALS,
Chairman.

Amendment to Rules for Employment or Promotion of Laborers "D" at, or to, the 20-cent Rate.

CULEBRA, C. Z., December 6, 1913.

CIRCULAR No. 229-z-7:

Effective December 10, 1913, the present rules governing the employment or promotion of laborers "D" at, or to, the 20-cent rate are abolished or amended, as follows:

No European contract or noncontract laborer, other white laborer, or black American laborer, shall, after December 10, be employed at a higher rate of pay than 16 cents per hour, or promoted to a rate of pay in excess of 16 cents per hour, no matter how long he has been in the service. Laborers of these classes who are now receiving the 20-cent rate may be retained in their present employment or transferred from one division to another without reduction, but if discharged will be reemployed at the 16-cent rate only.

Any European contract laborer now or heretofore receiving the 20-cent rate, who voluntarily leaves the service and later applies for reemployment, or who is discharged on account of reduction of force, may be furnished transportation to the European port from which he sailed, or, if he prefers, may be reemployed at the 16-cent rate, provided that there is a need for such laborer at the time and he agrees to waive any contract right he may have to the 20-cent rate.

Office timekeepers will see that no laborer of above classes, whose date of employment is subsequent to December 10, is allowed on the roll at more than 16 cents per hour unless this transfer (service slip form C. E. 262-2) is attached to the time book and shows a bona fide transfer from some other gang or division in which he was formerly employed at the 20-cent rate.

GEO. W. GOETHALS,
Chairman and Chief Engineer.

Accountable Officer, Fifth Division.

CULEBRA, C. Z., December 11, 1913.

CIRCULAR No. 514-A:

Circular No. 514, issued November 19, 1913, is hereby amended to show Mr. H. O. Cole, resident engineer, Fifth Division, as accountable officer for the Fifth Division, effective January 1, 1914, in place of Mr. R. B. Tinsley, superintendent.

GEO. W. GOETHALS,
Chairman.

Changes in Manual Block Signal Operation Approved.

PANAMA RAILROAD COMPANY,
OFFICE OF GENERAL SUPERINTENDENT,
COLON, R. P., December 8, 1913.

G. S. BULLETIN No. 24:

All concerned—The changes in the manual block signal operations, requiring a numbered block clearance card between Summit and Pedro Miguel Junction, as enumerated in joint transportation bulletin No. 7 dated December 8, and issued by the chief dispatcher is hereby approved.

F. MEARS,
General Superintendent.

Sailing of the "Ancon."

PANAMA RAILROAD COMPANY,
OFFICE OF GENERAL SUPERINTENDENT,
COLON, R. P., December 13, 1913.

CIRCULAR No. 309:

All concerned—The sailing date for the steamer Ancon, which was set for Wednesday, December 17, at

4 p. m., is now changed to December 19 at 3 p. m., from Pier 11, Cristobal, Canal Zone. This cancels circular No. 300, dated December 9.

F. MEARS,
General Superintendent.

Family Quarters.

Applications for married quarters on file on November 30, were, as follows:

DISTRICT.	List No. 1.	List No. 2.
Ancon.....	25 (21)	134 (52)
Ancon Hospital.....	7 (3)
Balboa.....	7 (5)	66 (19)
Corozal.....	14 (11)	148 (52)
Cristobal.....	103 (10)
Culebra.....	2	55 (15)
Empire.....	71 (20)
Gatun.....	77 (6)
Paraiso.....	1	81 (13)
Porto Bello.....	1 (1)	10 (9)
Toro Point.....	2 (2)
Total.....	50 (38)	754 (201)

NOTE—The figures in parentheses show the number of applicants already occupying regular or nonhouse-keeping family quarters at stations other than those at which applications are filed.

Misdirected Letters.

ANCON, C. Z., December 15, 1913.

The following insufficiently addressed letters, originating in the United States and its possessions, have been received in the office of the Director of Posts, and may be procured upon request of the addressees:

Barber, John Gordon (paper)	McLean, Annie
Beatty, Branch	McNight, James

Logan, Frank	Vokes, Geo.
	Zane, Jr., H. J.

Supplies for the Canal.

The following steamers, with supplies for the Isthmian Canal Commission and Panama Railroad Company arrived at the ports of Colon, Balboa, and Cristobal, during the week ending December 13:

Pastores, December 7, from New York, with 31 packages structural material, for fortifications; 7 cases brass tubing, for Sixth Division; 8 cases electric pumps, for First Division.

Ancon, December 8, from New York, with 137 crates plumbing material, for Administration building, Balboa; 27 pieces structural steel, for Panama Railroad Company; 22 pieces structural steel for First Division; 15 crates structural material, for fortifications; 467 kegs wire nails, 34 bundles picks, 55,961 bags cement, for stock; and a miscellaneous cargo, the whole consisting of 722 packages, weighing 2,960 tons.

Carlaço, December 8, from New Orleans, with 47 crates iron doors, for First Division; 772 pieces cast iron pipe, 1,161 bales hay, 20 boxes putty, 120 bags feed, 267 bundles fire clay, for stock.

Carl Schurz, December 8, from New York, with 1,099 pieces pipe, 40 barrels avenarius carbolium, for stock.

Fort Morgan, December 8, from New York, with 40 boxes armament material, for fortifications.

Olland, December 9, from Jacksonville, Fla., with

19,146 board feet, ear lumber, for Mechanical Division; 250 pieces untreated piling, for Atlantic Division; 340 pieces untreated piling, 463,739 board feet, yellow pine lumber, 4,725 pieces cross-ties, for stock.

Metapan, December 11, from New York, with 14 packages crane material, 27 packages structural material, for fortifications; 16 crates electrical material, 725 crates insulators, 962 pieces structural material, for First Division; 15 boxes window glass, for stock.

Abangares, December 11, from New Orleans, with 26 boxes electrical material, for First Division; 700 cases kerosene, 531 bales hay, 125 pieces pipe, for stock.

Allianca, December 11, from New York, with 50 barrels cement, for administration building, Balboa; 100 barrels cement, for commissary building, Balboa; 84 rolls paper, for Sanitary Department; 1,034 bundles reinforcing bars, for Division of Municipal Engineering; 270 packages metal caging; 124 packages electrical material, for First Division; 22 crates steel, 26 packages armament, for fortifications; 800 kegs nails, 80 bundles wire, 387 pieces pipe, for stock; and a miscellaneous cargo, the whole consisting of 3,649 pieces, weighing 350 tons.

Red Cross Finances.

The financial statement of the Canal Zone Chapter, American National Red Cross, for the month of November, 1913, follows.

RECEIPTS.	
November 1, On hand.....	\$2,674.96
6, Balance of fund raised for purchase of artificial leg for Pablo Abello, donated to Red Cross.....	4.75
30, Received during November, account of Red Cross ball held Sept. 17.....	1,168.71
30, Membership dues during month.....	3.00
Total receipts.....	\$3,851.42
DISBURSEMENTS.	
November 1, Sending destitute baby from Colon Hospital to Jamaica.....	\$5.00
17, Electric sign for Red Cross ball.....	21.30
17, Relief of destitute ex-employee at Ancon Hospital.....	3.00
17, Postage.....	3.00
25, Treasurer, American National Red Cross, Washington, D. C., one-half membership dues, May to October, inclusive....	10.58
Total disbursements.....	\$42.88
November 30, Balance on hand.....	\$3,808.54

Approved: JOHN L. PHILLIPS,
EDW. SCHILDHAUER,
Chairman, Treasurer.

Tide Table.

The following table shows the time of high and low tides at Panama for the week ending December 27, 1913:

DATE.	High	Low	High	Low	High
December 21	A.M.	A.M.	A.M.	P.M.	P.M.
December 22	3.25	9.22	3.47	10.00	11.03
December 23	4.30	10.32	4.53	11.03	11.03
	5.34	11.41	5.57	11.41	11.41
December 24	12.10	6.38	12.55	7.02	12.55
December 25	1.12	7.37	1.58	8.01	1.58
December 26	2.10	8.32	2.53	8.55	2.53

COMMISSION CLUBHOUSES.

Activities of the Young Men's Christian Association.

GENERAL.

The moving picture schedule of the week, December 22 to 27, is, as follows: Monday, Empire; Tuesday, Gatun; Wednesday, Cristobal; Friday, Culebra; Saturday, Corozal.

The standing of the all-Isthmian bowling league is, as follows:

Team.	Won.	Lost.	P. C.
Cristobal.....	19	5	.792
Empire.....	20	10	.667
Corozal.....	16	11	.593
Culebra.....	14	13	.519
Gatun.....	8	16	.333
Camp Elliott.....	3	22	.120

The final standing in the all-Isthmian chess tournament is, as follows:

Team.	Won.	Lost.
Culebra.....	33	15
Empire.....	26	21
Gatun.....	20	27
Cristobal.....	16	32

COROZAL.

High bowling scores for the past week are, as follows: *Duckpins*—Sims, 103; Seebt, 101, 102; Hutchins, 109, 115; Ownes, 100, 108; Steele, 105. *Tenpins*—Ziller, 207, 214, 222, 211; Smith, 211; Edwards, 222; Parkhurst, 220, 227.

The Gatun bowling team bowls here on Saturday, December 20. It is the last game in the Isthmian tournament.

The pool and billiard table have recently been recovered and are now in good condition. It is requested that members will exercise proper care of them in future.

The Corozal boys will visit Gatun on Saturday for the purpose of playing basketball and enjoying a swim.

CULEBRA.

High scores in duckpins for the past week are, as follows: Kiernan, 109, 103, 103, 104, 119; R. Koperski, 105, 108; Case, 101, 126, 104, 115, 101, 113; DeCorra, 101, 100; Fitzpatrick, 111; Jefferies, 109; Sturt, 101; Finley, 104; Bechlem, 100, 103; E. Koperski, 126; Chadbourne, 101.

A local duckpin tournament has been started with six 5-men teams, as follows: "Blacks" (Cornthwaite, captain); "Blues" (DeCorra, captain); "Greens" (Kiernan, captain); "Oranges" (Palmer, captain); "Reds" (R. Koperski, captain); "Whites" (Ferguson, captain). The members of the winning team, winner of high average, and high single score will receive gold medals. Each team will play each other team three games, the total pinfall for the entire series to determine the winner.

The "Blues" and "Blacks" bowled three games on the 11th, the scores being 1,236 and 1,249, respectively. The "Reds" and "Greens" met on the 12th, the scores being 1,275 and 1,310, respectively.

Stereopticon views of "From Egypt to Canaan" were shown on Sunday evening, December 14.

Dr. Frederic Poole will give his moving picture lecture on China, assisted by Mrs. Poole, who will display Chinese costumes, on Monday, December 22. The admission fees will be, as follows: Members, free; adult nonmembers, 25 cents; children, 15 cents.

EMPIRE.

The last interassociation tenpin tournament was bowled on the Empire alleys on Thursday evening, December 11, between Empire and Corozal. The Empire team won two out of three games, and made the high team score of 1,012. "Dusty" Huson won the high single score with 266 pins and high three games with 646 pins. The teams scores were: Empire, 930, 1,012, 876; total pinfall, 2,868. Corozal, 916, 928, 941; total pinfall, 2,785.

The basketball game played between Empire and Corozal on December 11 was won by the Empire team by the score of 49 to 17. The Empire team will play at Cristobal on Saturday, December 27.

In future, Wednesday evening will be known as "Chess night," at the clubhouse. All those interested in the game are invited to be present.

On Saturday evening, December 13, an Isthmian chess carnival was held, the Cristobal, Gatun, Culebra, and Empire clubs taking part. The program was, as follows: From 7.30 to 8 o'clock, reception of visitors, and greetings; from 8 to 10 o'clock, "Rapid transit" chess tournament; from 10 to 11.15 o'clock, toasts, speeches, and good of the order. The toastmaster was Mr. A. M. Warner of Culebra. The committee on arrangements consisted of Messrs. W. H. Warr, William Dubois, E. M. Goolsby, J. B. Shrophshire, and J. F. Warner. This was the first time in the history of the chess clubs that all the teams were brought together. The matter of promoting other tournaments was referred to a committee. In the "Rapid transit" tournament after three rounds of play, eliminating most of the 22 players,

two players were left, Mr. Wm. Dubois of Culebra and Mr. T. Marquand of Gatun. This proved an exciting contest and was finally won by the latter who received an honor medal.

GATUN.

A brass band from the Swedish cruiser *Fylgia* gave a pleasing concert on Monday evening, December 8. The motion pictures given by Mr. Hagy on Tuesday evening, December 9, included several of recent events on the Isthmus.

The gymnasium classes continue to be well attended. Mr. Kjellander, the new physical director, announces that special classes will be formed for those who cannot attend the senior class. These will meet twice a week at 5.15 p. m.

A member of the Y. M. C. A. may join the Spanish classes at any time. There are also classes for women, which are held at 4 p. m., on Tuesdays and Thursdays of each week.

Dr. Poole lectures at the Gatun Y. M. C. A. on Thursday evening, December 18.

The Pennsylvania State College Quartet will be at the clubhouse on Christmas night.

An informal song service was held at the clubhouse after the motion pictures on Saturday evening. D. R. Homer was the accompanist.

CRISTOBAL.

There will be no more meetings of the discussion club until after the holiday season. The first meeting of the new year will be held January 8. The speaker will be Lieut.-Col. Eugene T. Wilson, and his subject, "Tolls and traffic of the Panama Canal."

The schedule for Christmas week is, as follows: *Wednesday, December 24*—Cantata, "Santa Claus' arrival." Ninety in cast. Children participating from Cristobal and Colon Beach.)

Thursday, December 25—Cantata, repeated.

Friday, December 26—Pennsylvania State College male quartet. (Regular States entertainment prices.)

Saturday, December 27—Basketball game, Empire vs. Cristobal.

Monday, December 29—Gymnastic games and calisthenics. Combined gymnasium classes.

Tuesday, December 30—Community dance, under the auspices of the Cristobal Dancing Club.

Wednesday, December 31—Demonstration of folk and gymnastic dancing. Combined gymnasium classes. Beginning of all-Isthmian tenpin bowling tournament.

Thursday, January 1, 1914—Continuance of all-Isthmian tenpin bowling tournament. "Smoker" for men only.

First night of the cantata will be reserved for relatives of children participating. Second night, open to general public. All entertainments will begin at 8 o'clock and will endeavor to be closed by 11 o'clock, except bowling tournament.

Bowling tournament from 7 p. m., to 11 p. m., December 31, and 8 a. m., to 11 p. m., January 1. No entries accepted after 10 p. m., January 1. Entry fee \$1 for each entry. Bowling to be in singles and doubles.

On Monday night, December 8, the monthly married folks' bowling tournament was held on the local alleys. Mr. and Mrs. Raymond Bell were the winners in the first-class event, and Mr. and Mrs. Britton won first place in the second-class.

The last series of games to be rolled on the local alleys in this year's tenpin league was rolled on Saturday night, December 13. Cristobal winning three games from Camp Elliott by the following scores:

Cristobal.	Camp Elliott.
Barrett..... 179 181	Darnell..... 178 133 141
Russell..... 151	Thompson..... 170 143
Barnum..... 180	Hobart..... 150 154 146
Barte..... 212 161 175	McClain..... 147 152 167
Bullard..... 170 189 140	Weis..... 176 166 153
Hess..... 128 170	Coleman..... 90
..... 159 166	

Total..... 892 818 841 821 748 697
Entries are now being received for the single folks' duckpin tournament, which will be held Monday night, December 22.

PORTO BELLO.

Messrs. Guy Allen and Charles Chase have been appointed members of the advisory council of the Porto Bello association to fill the places made vacant by Messrs. Toler and Cornelison, who have moved away.

There was no moving picture entertainment last week on account of the machine being overhauled in the Empire shops.

The children of the Sunday school are daily rehearsing their pieces and songs for the Christmas entertainment to be held in the clubhouse on Christmas eve.

The financial committee appointed to raise funds for the Christmas celebration, of which Charles Urwiler is chairman, succeeded in raising about \$100 to purchase presents for the gold employees of Porto Bello.

Mr. Charles Chase led the evening song service on Sunday of last week.

A new rug was received from the superintendent of clubhouses last week and was placed in the reading room.

No communication either for publication or requesting information, will receive attention unless signed with the full name and address of the writer.

NOTES OF PROGRESS.

Arrival of Two 1,000-yard Barges.

Two of the six 1,000-cubic yard steel dump barges, for the manufacture and delivery of which by January 1, 1914, contract was let by the Isthmian Canal Commission to the Maryland Steel Company, arrived at Colon on December 18, having left the yards of the contractor at Sparrows Point, Md., on December 2, in tow of the Merritt and Chapman Derricking and Wrecking Company's tug *Rescue*. On December 19, they were passed through Gatun Locks and towed to Culebra Cut, in which they are now moored alongside the west bank, about 800 feet north of Contractor's Hill. These barges, designed for service with the two 15-cubic yard dipper dredges now under manufacture, have just twice the capacity of the largest barges previously in the Canal service; the French clapets have capacities as great as 250 cubic yards. Further description of the new barges is to be found in THE CANAL RECORD of April 9, 1913.

Dredging in Culebra Cut.

The channel through the base of Cucaracha slide has been widened during the past week from a clearance of about 50 feet to a minimum width of about 150 feet, the draft in both cases averaging about 16 feet. The amount of material removed during the seven days ending at 6 p. m., December 22, aggregated 72,000 cubic yards. Excavation is being carried on by the dipper dredges *Cardenas*, *Chagres*, and *Mindi*, advancing from the north in an oblique arrangement, so close together that the barge into which one dredge loads touches the hull of the dredge next in line; by the ladder dredge *Marmot*, now at about the center of the slide and working south, and the ladder dredge *Badger*, 100 feet south of the *Marmot* and working toward it; and by pipeline suction dredges *No. 86* and *No. 4*, about 200 and 300 feet, respectively, south of the *Badger* and working toward the north.

With the exception of the pipeline suction

dredges, which are excavating principally clay brought down by the slide after the preliminary excavation in that area by the *Corozal*, and disposing of it through the relay line leading up the west bank of the Canal and down the Rio Grande valley, all the dredges deposit their spoil in barges and clapets, in which it is conveyed about nine miles to the dumping grounds north of Gamboa. The length of the haul and the unusual concentration of dredges necessitate careful planning to keep all the vessels busy and prevent their interfering with one another. At present, loaded barges are all handled by three tugs to a point about 3,000 feet north of the slide, and then taken in tow by other tugs assigned to haul them to the dumping grounds and back. At the same point, the empties are taken in tow by the tugs which tend the barges. In spite of the congestion, the dredges have been making fair records. The ladder dredges are working in loose rock and clay, and the dipper dredges are handling large rock. A great many pieces brought up are too large to be dumped through the dippers, and the discharge of "Dobey" blasts, breaking the rocks, so that the dippers may drop them into the barges, is an almost continual accompaniment of the work of these dredges.

The ladder dredge *Corozal*, which was transferred to the north side of the slide on December 14, is excavating at the base of the west Culebra slide, and ladder dredge *No. 5* is working to the north, at the base of a slide on the east bank, approximately opposite the Culebra passenger station.

Finishing Concrete Work at the Locks.

Forces of the First Division are preparing supports for the return tracks along the upper and lower walls of Pedro Miguel Lock by driving, with a steam hammer, 10-inch steel pipe, fitted with cast iron slip couplings, into which concrete is poured to make piles. At intervals of about 15 feet, two pipes, five feet apart, are driven to refusal, filled, and covered with a reinforced concrete cap. Steel beams encased in concrete are laid between the caps, to form the lengthwise stringers for supporting the steel cross-ties of the track, which will also be encased in concrete. The return tracks on the lower approach walls at both Pedro Miguel and Miraflores will be supported in the same manner, but the return track on the Miraflores wing walls will be supported upon reinforced concrete brackets built as part of the wing walls.

Since taking over the finishing of the locks, on October 15, 1913, the First Division has laid 335 cubic yards of concrete at Gatun, 962 at Pedro Miguel, and 2,850 cubic yards at Miraflores Locks. About 14 per cent of the reinforced concrete appertaining to First Division work was mixed and placed by the Atlantic Division, prior to September 1, 1913. The remaining concrete work for the actual

finishing of the locks, dating from December 1, 1913, consists principally in concreting man-holes, towing and return tracks, finishing handholes in the cable ducts, paving under the emergency dams at Pedro Miguel and Miraflores, and decking and floors for chain fender rooms. After December 1, 1913, there remained about 9,000 cubic yards of concrete to be placed at Gatun Locks, and about 13,000 at the two Pacific locks.

Final Work on Gatun Dam.

The two wings of Gatun Dam have been practically finished, the crests being raised as much as three feet above final level, in order to allow for settlement, and the remaining work on the dam proper will be in grading the top after the settling. Spoil from the borrow pit beyond the west end of the dam is now being placed at the west end of the east wing, next to the spillway, to cover the draft tubes leading to the hydroelectric station, and to connect the dam by suitable slopes with the side wall of the spillway discharge channel. The total amount of material placed in the dam to December 1, 1913, was 22,052,666 cubic yards.

Railroad Instruction for Marines.

In response to a request from the commanding officer of the battalion of the United States Marine Corps stationed at Camp Elliott, that a detachment of his men be given instruction in locomotive running and train handling, arrangements have been made for such instruction on trains and in the yards and engine houses of the Isthmian Canal Commission railway service. A committee consisting of Mr. James C. Craig, traveling engineer, chairman; Mr. W. T. Snyder, assistant superintendent of transportation, and Mr. J. C. Barnett, yardmaster at Empire, met in the office of the last named on December 11, in conference with Mr. J. J. Eason, assistant superintendent of the Mechanical Division, and Lieut. Howard W. Stone, U. S. M. C., and formulated the following plan, which was approved, and was placed in effect on December 22:

1. Twenty-four men are to be designated by the Commanding Officer at Camp Elliott for instruction.

2. The 24 men are to be divided into Class A and Class B, of 12 men each.

3. Class A to go on duty one week. To be composed of five men as student engineers, five as student trainmen, and two noncommissioned officers as student yardmasters, when they can be spared from military duties.

One student engineer to be assigned to the wrecker engine; two student trainmen to be assigned to the wrecking train crew; four student engineers to be assigned to I. C. C. locomotives in various services running out of Empire; three student trainmen to be assigned to conductors in various services running out of Empire. Assignments to be made by Mr. Barnett.

4. Class B, second week, to go through the same routine as Class A.

5. Class A, second week's training. Student engineers to put in half a day for one week at Empire shops, under the supervision of Mr. Eason, for instruction in locomotive machinery and air brakes.

Student trainmen to report to Mr. Barnett at Empire

for half a day in train service and half a day in instruction in the Book of Rules.

6. Class B, second week's training. To go through the same routine as Class A.

7. Class A, third week's training. Student engineers to go in hostler service at the Empire and Gold Hill roundhouses, under supervision of the night foremen. Student trainmen to go in train service during the day.

8. Class B, third week's training. To go through same routine as Class A.

9. Class A, fourth week's training. To go through the same routine as for the first week.

10. Class B, fourth week's training. To go through the same routine as Class A.

11. At the end of this period of instruction, the committee will take the force to the 95-foot level, with a locomotive and four cars, where the men will demonstrate their ability to perform the work they have been instructed in.

12. The traveling engineer will keep in close touch with the men assigned to locomotives.

13. Engineers, conductors, yardmasters, and night foremen, who have charge of students in their respective duties, will make a written report at the end of each week's service as to the progress made, and the efficiency and adaptability of students.

14. Students will carry lunches with them if they are to be absent during the whole day or night.

15. Suitable passes, countersigned by the superintendent of transportation, are to be supplied to the students in the various services, on a form prescribed by the committee.

16. Locomotive students are to be furnished a copy of the standard rules for the guidance of firemen on coal and oil-burning locomotives.

New Colon Hospital Organization.

The organization for a 50-bed hospital to take the place of the former staff at Colon Hospital has been approved. It provides for a superintendent, one physician, one clerk, one storekeeper, who will also perform the duties of druggist and look after the hospital property; six nurses; 10 attendants, seven for ward work in the main hospital, one for the chronic ward, and two for use as utility men about the grounds and buildings, one to relieve the ambulance driver occasionally, as the latter is usually on duty all day and has frequent night calls; one cook, who will do the cooking for the patients, both in the main and chronic wards, the nurses, and other employees; two kitchen helpers; two maids to look after the linen, and the effects of any women patients who may be admitted to the hospital as emergency cases; one ambulance driver; two waiters, who will look after the nurses' mess, the employees' dining room, and the serving of food to patients; two messengers, one for carrying the mail, running errands, and accompanying deported individuals to their ships, as most of the deportations from the Isthmus are made from the Atlantic side through Colon Hospital, and the other for service about the hospital and grounds; one watchman to look after the hospital at night and answer telephone calls after 6 p. m.; one policeman, who is on duty at the main gate and guards the medical storehouse; and two attendants for the chronic ward, who are to perform the necessary ward work.

The petition, signed by a large number of the American employees of the Canal Commission and Panama railroad living in Cristobal and Colon, asking that the maternity ward at Colon Hospital be reinstated, has been denied.

Rock in Storage at Ancon Crusher.

A considerable quantity of what is designated "No. 1" crushed rock is being placed in a storage pile below Ancon quarry and crusher, to be used later in the mass concrete work for the dry dock and fortifications, and in highway construction. In crushing rock for use in reinforced concrete, desig-

nated as "No. 2" size, No. 1 rock is a by-product. During the construction of the locks, the output of the quarry was about 75 per cent of No. 1 and 25 per cent of No. 2. Owing to the demand, which is now nearly altogether for No. 2, the crushers and screens have been so arranged as to give an output of 60 per cent of No. 2, and 40 per cent of No. 1. A considerable quantity of screenings is also being shipped for the manufacture of concrete blocks used in the permanent building work, and for use in finishing road surfaces and sidewalks.

Panama City Improvements.

Forces of the Division of Municipal Engineering (southern district) have begun the construction of a storm sewer on Eighteenth and B streets in the city of Panama. The work is being done under a special appropriation of \$76,500 made by the Panama Government for certain improvements of streets and grounds in Panama city, and is estimated to cost about \$18,000. The sewer is for taking care of the surface water that drains off from Ancon Hill in this section of the city, and extends from the beach at the foot of Eighteenth street to B street, a distance of 1,097 lineal feet, and west on B street for a distance of 306 lineal feet, stopping at a gully that formerly carried off the water in this locality. During heavy rains, this gully often became clogged and overflowed, inundating B street near its intersection with Ancon Boulevard, and flooding some of the stores along the street. The new work will relieve this situation, and also furnish drainage for a tract of land lying just north of B street which will be laid off into town lots. The section of the sewer on Eighteenth street will be five and one-half feet wide and six feet high; on B street five feet three inches wide and three feet six inches high. It is being constructed of concrete, reinforced at the sides and bottom with $\frac{1}{2}$ -inch and $\frac{3}{4}$ -inch reinforcing rods, and on top, where there is but little depth between the slab and the street surface, with 70-pound iron rail, spaced one foot on centers. The material removed in the progress of excavation is transported on Decauville track, and used to advantage in filling in low areas on either side of Eighteenth street in the vicinity of the beach.

Fire Protection at Balboa Shops and Terminal.

A number of measures have been taken to furnish the new shops and terminal works at Balboa with suitable protection against fire, including the adoption of a series of whistle signals, an extension of the water service, and the installation of additional hydrants at easily accessible points. The whistle was made at the Empire shops, and is readily distinguishable from all the other steam whistles in the vicinity. The signals are, as follows: One long blast, repeated four times, when a fire originates south of the new dry dock; two long blasts, repeated four times, when the fire is north of the dry dock and east of building No. 4 (boiler and shipfitter shop,) and three long blasts, repeated four times, when the fire is north of the dry dock and west of building No. 4.

Additional 2-way hydrants will be installed, as follows: One each near the east and west ends of building No. 12 (foundry); one each near the east and west ends of building No. 10 (lumber and equipment shed); one

near the south end of center of building No. 3 (steel storage shed); one near the south side of center of building No. 1 (machine, erecting, and tool shops), and one near the shore end of the new cofferdam at the shipways.

The water facilities have been increased by the installation of an 8-inch main extending along the branch line of the Panama railroad to Balboa, which taps the 20-inch Rio Grande main near the Hotel Tivoli, a 6-inch main extending to the north side of the dry dock, and another 6-inch main across the east end of buildings No. 7 and 10 (car shop, and lumber and equipment shed) to the water front. These three lines will be cross-connected at their westerly ends.

A paid fireman from Ancon No. 3 fire station is now on duty at Balboa during the day, and another fireman is regularly detailed there at night. Arrangements have been made to set up a dismounted box car to be used as quarters for a paid fireman at Balboa, and after this car is ready a paid fireman will be detailed at Balboa continuously, day and night, as at other one-man stations. This arrangement is temporary, until the new fire station at Balboa is constructed. There has also been installed a fire alarm box for temporary use, near the planing mill at the shops. The fire department is supplying the necessary fire apparatus, and has equipped the shop buildings with fire extinguishers.

Ancon Crusher.

Following is a statement of rock crushed at Ancon quarry during the two weeks ending December 20:

DATE.	Hours worked.	Cubic yards.
Dec. 8	7 40	1,509
Dec. 9	8 25	1,943
Dec. 10	7 45	1,871
Dec. 11	8 10	1,927
Dec. 12	8 35	1,333
Dec. 13	7 55	1,974
Total	48 30	10,557
Dec. 15	6 55	1,627
Dec. 16	8 45	1,210
Dec. 17	8 25	1,632
Dec. 18	8 10	2,323
Dec. 19	8 40	1,587
Dec. 20	5 15	1,107
Total	46 10	9,486

Accidental Drowning.

Arthur Lagan, a private in Company G, Tenth Infantry, Camp E. S. Otis, was accidentally drowned on Monday, December 15, in the old channel of the Mandingo River, where the water has backed up account of the rise of Gatun Lake. He was born in Brooklyn, N. Y., was 22 years of age, unmarried, and had been on the Isthmus two years, ten months, and five days. His mother, Mrs. Julia Wagner, resides at No. 461 Willon street, Allentown, Pa.

Missing Man.

Any one having knowledge of the whereabouts of J. C. Cope, formerly of Canton, Miss., believed to be on the Isthmus, is requested to communicate with the Office of the Chairman, Culebra.

Rock is being supplied from the steamshovels operating on the upper levels of the east Culebra slide for use in backfilling the northeast wing wall of Miraflores Locks. The steamshovel excavating in the borrow pit, opposite the Corozal corral, has been shut down and is being removed from the site.

CANAL ZONE CHRISTMAS.

Americans will Celebrate on about the Same Scale as During the Past Eight Years.

The American force is celebrating its eighth Christmas this week. Prior to 1906, when the Canal force was being assembled, the celebrations were more private in character and could not be classed with the large community entertainments that have been held each year since that time in the Canal villages. From 1907, these community celebrations have been held in the Commission clubhouses and social halls, and generous expenditures has been made for gifts and treats for the children. The estimates taken each year of the number of children entertained at these celebrations show that an average of 1,200 American boys and girls have participated. Notwithstanding the reduction in the Canal force this year, the number will not be much less. The number of villages in which these public celebrations have been held is reduced, however, by the abandonment of Gorgona, Bas Obispo, and Las Cascadas.

At Porto Bello, the entertainment was held in the Commission clubhouse on Christmas Eve, the children of the Sunday school participating in the program.

The Union Church Sunday school at Cristobal celebrated Christmas on Sunday evening, December 21, with a Christmas service, in which members of the school participated. The first part of the program consisted of the singing of carols and hymns by the older members of the school, and the congregation. The features of the entertainment were special parts given by the beginners' class, and the primary department, respectively. The following members of the beginners' class took part in the program; Catherine Gluck, Clunis Ross, Emery Fleming, Marie Farrell, Cybell Austin, Stella Newboldt, Rachel Weaver, Florence Zidbeck, Dorothy Sloan, Emma Banks, Doris Ellison, Gay Turner, Gwendolyn Ragsdale, Zenola Bliss, and Julia Verner.

The program of the primary department was given by the following: Dorothy Orr, Viola Bell, Hyacinth Eden, Nacinia Baxter, Florence Stewart, Harriet Herz, Hazel Foster, Nell Appleton, Helen Herz, Gladys Blakely, Edna Devol, Verdry Vaughn, Virginia Raymond, Florida Edwards, Etta Davis, Mary Hearne, Esther Green, Ruth Foster, Marjorie Carter, and Eugenia Baxter.

The Gatun Sunday school celebration was held in the Commission chapel on Tuesday evening, December 23. A program was given in which the following children took part: Elizabeth Baker, Helen Housal, Minnie Buckholdt, Charlotte Housal, Nina Hansen, Katherine Garwood, George Carkeet, Lois DeForce, Ferdinand Buckholdt, Steve Westbrook, and Alfred Morgan. Carols were sung by the school; there was a drill by a class of girls, and one by a class of boys, and the infant class sang a carol. Each child received a box of sweets, and a gift from the Christmas tree.

At Empire, the Sunday school joined with the Young Men's Christian Association in preparing for the community celebration,

and an entertainment was held in the Commission clubhouse on Christmas Eve. A cantata, "Santa Claus comes", was given by the children, the following taking part: Helen Huber, Margaret Campbell, Mary Halligan, Mildred Sawtelle, Marjorie Golden, Margaret Halligan, Flora Smith, Helen Johnston, Kitty Arthur, Dorothy Hudson, Elvis Pearson, Gertrude Kenyon, Sarah Smith, Clarence Watkins, Jerry Drake, Herman Conrad, Irving Brown, Karl Campbell, Robert Engelke, Raymond Smith, and Muro Golden. Gifts of fruits and sweets were distributed to about 280 children. A special reel of moving pictures was shown.

On Sunday, December 21, the Empire Sunday school celebrated Christmas with a special program at its regular morning session.

The Culebra Sunday school made special preparations for the celebration of its eighth and probably last Christmas. The exercises were held in the social hall in the schoolhouse on Christmas Eve. A short play was given by the children and Christmas carols were sung. Following the program, gifts were distributed among the children from the Christmas tree, which was provided and decorated by the Young Men's Christian Association. A class picture of the members of the cradle roll was presented to each one of the little ones whose name appears on the roll. The present enrollment of the Sunday school, exclusive of the auxiliary departments, is 80. There are 32 in the cradle roll, and 15 in the home department, making the entire enrollment of the organization 126.

On Christmas afternoon, there will be an entertainment for the children of the Paraiso Sunday school in the chapel.

On Christmas Eve the community celebration was held in the Commission clubhouse. The members of the Sunday school took part in the program, which included a special feature, consisting of selections by the young ladies' chorus, organized recently. The members of this society are: Miss Hackenberg, the Misses Albright, Miss Otis, Miss Swinehart, Miss Mumma, Miss Harris, Miss Christison, Miss Violet, and Miss Lindley. Several Christmas trees prettily decorated were placed in the hall. Gifts of candies and fruit were distributed to the children, and, following the program, a treat was served to the bachelors of the village.

In three Sunday schools, gift giving rather than gift receiving has been made a special feature of the Christmas celebration. At the Methodist church on the seawall, Panama, the Christmas cantata, "The heart of Santa Claus", was sung by the children at the entertainment given in the church on Christmas Eve. The gifts brought by the children were presented by a class of gift bearers, during the singing of the ancient Christmas carol, "O Santissimo." On Christmas Day, the gifts will be distributed among the negro children of the church in Guachapali.

The children's service at St. Luke's Hospital chapel, Ancon, was held on Christmas Eve, at 6.30 o'clock. The children brought gifts for distribution among the sick children in the wards of the hospital on Christmas morning. In the Cristobal Sunday school, the children were requested to bring gifts

to the Commission clubhouse for distribution among the poor children of Colon.

The Sunday school of the Roman Catholic chapel, Ancon Hospital, will hold its celebration in the rectory adjoining the chapel of the Sacred Heart on Christmas morning, immediately following the 9 o'clock mass.

On Christmas morning, the Sunday school at Balboa will hold its celebration in the social hall, at 9.30 o'clock. There will be a program in which the children are to participate, and gifts will be distributed.

The Christmas tree and entertainment of Christ Church, Colon, will be held in the schoolroom on Monday evening, December 29, at 7 o'clock. On New Year's Eve, the watch night service will be held in the church, beginning at 11 o'clock, and ending with the ringing of the bells at midnight.

The Las Cascadas Sunday School.

The Christmas entertainment that was planned for the Sunday school at Las Cascadas has been abandoned owing to the removal of the children from the village, and the difficulty of assembling them and returning them to their homes in suitable time. The teachers of the school have, however, provided a Christmas treat, consisting of boxes of candy, and one each will be mailed to the address of every pupil still on the Isthmus. The enrollment of the school was about 80 when the school closed for the holiday vacation.

Union Church Work.

In response to the call for a meeting issued by the executive council of the Cristobal Union Church for the purpose of discussing the plans for the continuance of undenominational work in the Canal villages, representatives from Cristobal, Gatun, Empire, Culebra, Paraiso, Pedro Miguel, Corozal, and Balboa were present at the meeting which was held in the Commission clubhouse, Corozal, on Sunday afternoon, December 21. The possibility of maintaining union church work in the Canal Zone by private subscription was discussed, and a committee was appointed to take up the question with religious bodies in each village with a view of securing the co-operation and support of those interested in church work. The reports of the representatives present, while not expressing with finality the views of the general public in regard to the subject, were nevertheless encouraging and showed that there is a spirit in favor of carrying on the work hitherto supported by the Canal Commission. The members of the committee are: Mr. L. Larson, Cristobal; Mr. B. F. Sisson, Gatun; Mr. W. E. Hoffman, Empire; Mr. J. F. Warner, Culebra; Mr. L. S. Kiser, Paraiso; Mr. W. H. Faulkner, Ancon; Mr. W. E. Lyon, Corozal, and Mrs. William Tomey, Balboa. The committee was instructed to be ready to report at a meeting to be held in January.

Ancon Study Club.

The Ancon Study Club has entered upon its Christmas recess, and will reconvene on Thursday afternoon, January 8, at 2.30 o'clock. The program on Thursday afternoon, December 18, consisted of readings by Mrs. Wanson, Mrs. Mountain, and Mrs. Morley. Mrs. Shigley read an original Christmas poem. The subject of the afternoon was "Christmas." Tea was served at 4 o'clock, with Mrs. McDonald as hostess, the table showing Christmas decorations.

LIGHTING CRISTOBAL DOCKS.

Modern Facilities Being Installed Inside and Outside of the New Pier Sheds.

An extensive system of lighting is being installed in the new docks at Cristobal, formerly known as docks Nos. 17 and 16, but recently renumbered 8 and 9. It provides for a total of three hundred and fifty 250-watt electric lights inside and outside of the superstructure, 870 feet long, on dock No. 8, and about two-thirds that number in connection with the superstructure, 1,122 feet long, on dock No. 9. These lights will be arranged in nine rows, spaced 30 feet apart, seven rows extending the length of the dock structures on the inside, and one row along each side of the docks outside, and also across the ends. In addition, there will be a fixture on the outside corners of both buildings, consisting of a concrete bracket and reflector, similar to the ones employed in lighting the Canal locks. Each of the outside lights will be provided with a cast iron protector hood painted with two coats of lead paint and sanded, giving them the appearance of having been made out of concrete. It is estimated that about 26 miles of wire will be required for the electrical installation at both docks. The work at dock No. 9 is being performed by the contractor, the Central American Construction Company, and on dock No. 8, by forces of the telegraph and signal department of the Panama railroad; this department is also responsible for the inspection of electric work on dock No. 9.

All the main cables are No. 4 insulated, lead-covered, and extend from the underground cable duct line in Cristobal to transformers in manholes near the docks. From the transformers, the cables are drawn into the buildings under the floors of the docks, terminating in a main panel situated in one corner of each dock structure. This panel is of slate, contains the usual switches and other operating apparatus, and was made by the Crouse-Hinds Company of Syracuse, N. Y. From this main panel, individual varnished cambric, lead-covered, No. 2, 3-conductor cables lead to eight smaller distributing panels in each dock structure, situated in the side walls, four to each side, spaced at about equal distances apart. These eight cables are carried in 2-inch galvanized iron ducts embedded in the roof concrete. From these points, the lights, in groups of four each, are supplied with current carried by No. 12 rubber-covered duplex wire enclosed in $\frac{1}{2}$ -inch galvanized iron conduit, embedded in the roof concrete. The fixtures are of the Holophane steel type S.E.E. 250 reflectors, with 250-watt tungsten lamps.

At each of the distributing panels, there will be a telephone of the type used in the Hotel Washington, connected with the Cristobal exchange, and a fire alarm box, with a red light indicator situated directly above. Provision will also be made along the depressed track in the center of the dock structure for temporary plugging for a flexible cord, with a portable lamp, to be used inside of freight cars when light is required in loading or unloading cargo. These receptacles for plugging in will be situated on each side of the depressed track at intervals of 60 feet.

On each side of the docks, outside of the dock structures, there will be four places where a temporary connection can be made by inserting a plug and flexible cord, so that electric current for lighting can be supplied to ships

in connection with the handling of cargo. At the same points, there will also be located receptacles to receive plugs and flexible cords for furnishing telephone connection on board ships when alongside the dock.

In the center of each side of the dock, at intervals of 120 feet, there will be located receptacles, where, by the insertion of a plug and flexible cord connection, current can be produced for the operation of portable electric winches, three of which have been purchased for use in hauling heavy pieces of freight along the dock. These winches will be able to move 3,000 pounds at the rate of 100 feet a minute in a single line.

It is expected that 500 feet of the east end of dock No. 8 will be ready for use by January 4, 1914.

PERSONAL.

Under authority of the Chairman of the Canal Commission, Col. William C. Gorgas, Maj. Robert E. Noble, and Dr. S. T. Darling, now in South Africa, have been granted an extension of 30 days on their special leave of absence, which will make the date of their return to duty with the Commission about March 15.

Mr. W. W. Warwick, Assistant Comptroller of the Treasury, who has been on the Isthmus for some time past in connection with plans for the permanent accounting system of the Canal, returned to Washington, accompanied by his family, on the *Ancon*, sailing from Cristobal, on Friday, December 19.

Gatun Spillway-Mindi Levee.

The levee built between the lower end of the discharge channel of Gatun Spillway and the Mindi Hills, to prevent the passage of discharge water from the spillway to the French canal, west of Gatun Locks, and thence to the American Canal at Mindi, causing currents and silting, is being raised and reinforced. The levee was begun early in 1910, in consequence of the inundation of the area it now protects by floods during the preceding November and December, and was completed in about a year, 197,556 cubic yards of material having been placed in its length of approximately 8,000 feet, and in the old bed of the Chagres River to the east, cut off by the levee. All material for raising the levee has been placed, but some additional work is being done by the Atlantic Division in armoring the outer side of the levee with large rock, where it might otherwise be scoured by currents.

Levelman and Transitman Examination.

Examination for promotion to the positions of levelman and transitman is scheduled to be held in the Commission clubhouse at Empire, on Sunday, January 18.

The examination will commence promptly at 9 a. m., and will be divided into three parts, which will be given in the order indicated, viz.: Written and oral examination, and a statement of education and experience. Competitors will be required to complete the written portion of the examination before 1 p. m.

Applications for the examination should be addressed to the undersigned, through the head of department or division, before the close of business on Thursday, January 15.

Applicants should bring to the examination room, pens, pencils, triangles, and tables of

circular functions, but no paper, ink or blotters.

Applicants who fail to appear for examination before 9 a. m., or who do not apply for examination through the proper channels before the close of business on Thursday, January 15, will not be admitted to the examination. No card of admission will be needed.

A. B. NICHOLS,

Chairman, Examining Board.

Culebra, C. Z., December 22, 1913.

Panama Railroad Restaurant.

A popular price restaurant, for gold employes of the Canal Commission and the Panama Railroad Company only, was opened in the old Washington House at Colon on Wednesday, December 10, under the direction of the Subsistence Department. It has a seating capacity for 64 people at one time, but accommodations for double that number can be provided, if necessary. The restaurant is largely an experiment, and has been established to meet the demand for a greater choice of food than is afforded by the regular 30-cent meal; it will be operated with the utmost economy commensurate with a maximum of efficiency. The hours are from 6 to 8 a. m., from 11.30 a. m. to 1.30 p. m., and from 5.30 to 8 p. m. Only commissary coupons and hotel meal tickets are taken in payment for meals; no cash is accepted.

Settlement of Land Claims.

Settlement has been made with practically all of the occupiers of land shown on the property map of Talenquera, Obispo, and Gamboa; in the territory along the Chagres River from Cruces to Alhajuela, including the village of Juan Mina; and in the upper Chagres valley from the 5-mile Canal Zone limit, below the 100-foot contour line. There are still a few occupants of these lands with whom settlement has not yet been made, but fair proposals have been submitted to all. The police department has been instructed to serve written notice on all persons occupying the above districts to remove therefrom on or before February 1, 1914, and it has been invested with the authority to see that the notice is made effective by destroying any houses remaining on the lands after that date. At Juan Mina, there are a number of valuable orange and lime trees, and along the Chagres River, above Juan Mina, and below the 100-foot contour line, on the lands known as Las Guacas, some exceptionally good banana cultivations exist. These have been turned over to the Subsistence Department for exploitation in connection with its plantation work at Frijoles.

Concrete in the Locks and Auxiliary Works.

The following is a statement of the concrete laid in the Canal locks and auxiliary works up to December 1, 1913.

Gatun Locks.....	2,067,969
Gatun spillway.....	231,410
Gatun hydroelectric station.....	7,167
Gatun control house, ducts, etc.....	2,698
Pedro Miguel Lock.....	922,276
Miraflores Locks.....	1,498,666
Miraflores dam and spillway.....	79,001
Pedro Miguel-Miraflores duct line.....	4,616
Total.....	4,813,803

81st Coast Artillery Arrives.

The 81st Coast Artillery, numbering 155 officers and men, in charge of Capt. A. Hasbrouck, arrived on the steamship *Cristobal*, on Monday, December 22, to take up station at the Pacific end of the Canal.

CANAL WORK IN NOVEMBER.

Monthly Report of the Chairman and Chief Engineer to the Secretary of War.

CULEBRA, C. Z., December 17, 1913.

The Honorable the Secretary of War,
Washington, D. C.

SIR: I have the honor to submit the following report of operations on the Isthmus for the month of November, 1913:

Department of Construction and Engineering.

The following table summarizes the principal items of work accomplished by the construction divisions during the month:

ITEM.	Unit.	Atlantic.	2d. Div.	4th Div.	5th Div.	6th Div.	Total.
Work excavation, dry.	Cubic yds...	1,210	110,014	160,900	6,970	279,094
Work excavation, wet.	Cubic yds...	*81,400	918,321	999,721
Total work excavation	Cubic yds...	1,210	110,014	242,300	6,970	918,321	1,278,815
Plant excavation, dry.	Cubic yds...	3,616	10,000	34,800	48,416
Plant excavation, wet..	Cubic yds...	20,525	20,525
Total.....	Cubic yds...	3,616	10,000	34,800	20,525	68,941
Total Canal excavation.....	Cubic yds...	1,210	113,630	252,300	41,770	938,846	1,347,756
Concrete placed, locks, dams, and spillways.	Cubic yds...	280	2,637	2,917
Fill placed in dams.....	Cubic yds.	40,902	11,480	52,382
Explosives used.....	Tons (Gross)	13.82	13.29	21.41	9.64	47	105.16
Rock drilled.....	Feet.....	9,154	42,846	57,915	16,192	31,046	157,153
Tracks removed.....	Miles.....	0.53	2.51	6.36	9.40
New track laid.....	Miles.....	1.24	2.89	5.32	1.09	10.54
Rock crushed.....	Cubic yds...	38,537	38,537
Cement used.....	Barrels.....	6,660	6,660
New roads built.....	Miles.....
Water mains laid.....	Feet.....	320	320
Sewers laid.....	Feet.....
Open drains and ditches dug.....	Feet.....	4,135	4,135
Average daily force.....	2,050	2,838	2,381	1,155	1,818	10,242
Average rainfall.....	Inches.....	16.31	9.30	13.30	10.17	13.02	13.18

*Excavated by the Fifth Division for the Fourth Division.

First Division—Office of the Chief Engineer.

LOCK GATES AND PROTECTIVE DEVICES.

Work is in progress on all the leaves of all the lock gates. At Gatun and Pedro Miguel, erection, reaming, and riveting have been completed; finishing is 98.2 per cent completed at Gatun, and 98.8 per cent at Pedro Miguel. At Miraflores, erection is 99.96 per cent completed, finishing 95.7 per cent, and reaming and riveting are completed. The total tonnage of gate material erected to date is 57,492, about 99.99 per cent of the total.

Satisfactory progress was made in the United States in connection with the fabrication of material for the chain fenders. Out of the 46 operating valves required, 11 right and seven left hand valve bodies have been cast; the casting of the smaller parts is well under way and machining of the various parts has been started, and, out of the 92 resistance valves required, 45 have been machined, but not assembled.

PONTON BRIDGE.

Plans for lifting the apron girders of the pontoon bridge across the Canal at Paraiso have been completed, and details of the girders are in the shops. Work is continuing on the plans for the machine for revolving the bridge and the smaller details of the devices for locking the bridge in position and assuring continuous rails and roadway. The committee appointed by the Chairman reported in favor of making the approaches of pile trestle, and plans are being prepared in accordance with that report.

The erection of the bridge is progressing satisfactorily, although it is somewhat delayed by the nonarrival of the timber required for the deck beams and floor. About one third of the length of the barge is now in frame.

Before erection, all surfaces are thoroughly coated with carbolineum, and, when completed, the entire interior will be given an additional coat.

LOCK ENTRANCE CAISSON.

During the month, satisfactory progress was made in the United States in connection with the fabrication and inspection of material for the first lock entrance caisson. Fifty tons of shapes and 190 tons of plates have been delivered in the Union Iron Works' yard at San Francisco, and up to November 7, out of a total of about 3,500,000 pounds of rolled steel, 1,972,752 pounds, or approximately 50

per cent completed at Gatun, and 80 per cent at Miraflores.

Mechanical erection of miter gate sump pumps is 96 per cent complete, electrical, 65 per cent; chain fender sump pumps, 11 per cent mechanical, and electrical has been started; drainage sump pumps, mechanical erection complete, electrical, 61 per cent; culvert pumps, mechanical complete, electrical, 20 per cent.

Installation of transformer rooms at all locks is approximately 89 per cent completed; 99 at Gatun, 83 at Pedro Miguel, and 85 at Miraflores.

Ninety-six per cent of the 2,508,296 feet of cable on order for the Gatun duct line, and the Pedro Miguel-Miraflores transmission line, has been delivered, and 946,587 feet have been pulled into ducts.

Work at the hydroelectric station consisted chiefly of installing the smaller electrical equipment. It is expected that about December 10, 1913, the building construction will have advanced to a stage which will permit of unhampered electrical and mechanical installation. The turbogenerators are 45 per cent completed. The headgates have been set and the operating machinery installed. The steel work at the gate house has been completed.

The control house at Gatun is completed, except the roof, which is about 90 per cent completed, and some finishing work on the second floor. The control house at Pedro Miguel is about 94 per cent complete, and the one at Miraflores is about 75 per cent complete.

Reflectors for interior and exterior illumination are being manufactured from concrete on the Isthmus. The manufacture of interior reflectors is about 65 per cent complete. Ninety-nine per cent of the lamp posts are erected with cross-arms at Gatun. Forty-one posts with single arms, 14 with double arms, and 14 posts at Pedro Miguel have been erected. Seventy-one posts with single arms, 22 with double arms, and 19 posts have been set at Miraflores.

Practically all control apparatus for the locks and spillways is on the Isthmus, except interlocking system and part of indicators for the main control board. All but one of the main control boards have been received. The material is being erected complete in the shops, and is being shipped as the status of the work will permit.

A total of 109 foundations was placed during the month, making 488 to date. Concrete amounting to 4,001.4 cubic yards, (844.2 cubic yards during the month), and 199 tons of steel reinforcement, have been used in foundations of track-span bridges. Eighty-eight track-span bridges were placed on permanent foundations during the month, and 164 to date.

Excavation was started for substations at Gatun and Miraflores.

TESTING.

Gatun Locks—Rising stem valve No. 243 was tested and accepted, and tests were made on 12 transformer rooms. Six lockages were made through the west chamber.

Pacific locks—Final tests and adjustments were made on the six remaining rising stem valve machines at Pedro Miguel. The miter gate moving machines for the east lower gates at Miraflores were tested and adjusted without struts. The struts were then attached, and the gates are now ready for operation.

Special tests were made to determine whether

per cent, had been authorized for shipment from the east.

EMERGENCY DAMS.

The emergency dams at Gatun and at Pedro Miguel locks have been completed, tested, and accepted. All material for the two dams at Miraflores has been delivered. Riveting on the east dam is completed. Concrete for the counterweight has been poured, the switch-board house has been completed, and the final painting has been begun. On the west dam riveting is about 75 per cent completed.

OPERATING MACHINERY AND ELECTRICAL EQUIPMENT.

All valve machines have been delivered. On cylindrical and auxiliary culvert valve machines, the mechanical erection is completed, on rising stem valve machines 98 per cent completed. Electrical installation is 73 per cent completed on rising stem valve machines, 92 on cylindrical valve, and 72 per cent on auxiliary culvert valve machines. Mechanical erection of the 18 guard valve machines is 90 per cent completed, and electrical installation 23 per cent.

All miter gate moving machines have been received, the mechanical erection is 97 per cent completed, and electrical installation 56 per cent. The delivery of miter gate forcing machines is completed, the mechanical erection 53 per cent, and the electrical installation 50 per cent completed.

Ninety-nine per cent of track has been completed at Gatun Locks, 97 per cent at Pedro Miguel, and 77 per cent at Miraflores. Single crossovers are 51 per cent completed and double crossovers 75 per cent.

The spillway gate machines have been erected, and electrical installation is 55 per

a rising stem valve closed at the normal rate would safely stop a flow of water through the culvert under a 50-foot head. This test was made at low tide, by discharging water at Miraflores Lake level, upper lock, Miraflores, to seal level in the lower chamber. The operation was satisfactory. No surge, vibration, or racking of the machine occurred. Four lockages were made through the east chamber at Pedro Miguel, and two through the east chamber at Miraflores.

AIDS TO NAVIGATION.

During the month, work was in progress constructing range towers Nos. 12 and 14, Gatun Lake section; clearing, and delivering material at the site for the construction of range tower No. 8, lake section; constructing reference target at Frijoles, P. I.; completing foundation for beacon at Bas Obispo north; completing water stage register at Pedro Miguel south, and excavating for water stage register at the Gatun spillway; painting and assembling gas buoys at Gatun; on preparatory work for the west breakwater light; towing caisson foundation for the west breakwater light from Limon Bay, where it had been temporarily sunk, to Toro Point, and sinking it at the permanent site.

Second Division—Office of the Chief Engineer. COAL PLANTS.

The contractor for coal handling machinery at Cristobal and Balboa visited the Isthmus during the month. Most of the outstanding doubtful points were settled during his visit, and confirmed by correspondence. Revised and approximately final general layouts for coal-handling machinery at each of the two plants were made. Studies for the Cristobal wharf structure were proceeded with, and what appears to be a satisfactory type of construction was designed. Bills of material for cylinder shells, as a basis for a requisition, were started. Questions of contractor's designs and loads as affecting substructures were incorporated in letters to the Washington Office for the expeditious attainment of information necessary to the design of the wharf structure. Studies and calculations for the adaptation of the berm cranes for the Balboa coaling plant were proceeded with.

RADIO STATION.

Considerable study was devoted to the footings for the three 600-foot towers, the results of which showed that a change in location of each tower would be advantageous.

DRY DOCK.

Studies were made of wall sections, flooding and drainage arrangements, entrances, supports for 50-ton crane track, and of modifications of the quoin post and pintle of the gate for dry dock No. 1.

Excavation was confined to the north side of the entrance basin and dry dock No. 1, and to removing the upper level of the coal pocket. The removal of the south end of the shipways permitted the excavation work to be extended northward in the entrance basin, and, together with the removal of a part of the old Balboa shops, allowed the dry dock excavation to be made to the channel lines of the north wall, thus clearing the whole area of the large dry dock. The excavation amounted to 82,949 cubic yards, about half of which was rock.

MACHINE SHOPS.

Designing and preparation of specifications were continued during the month. The lumber and equipment shed was practically completed, and was turned over to the Quarter-

master's Department for use. Erection of structural steel was completed in the machine and erecting shop, general storehouse, paint mixing shop, and roundhouse. The paint mixing shop was nearly completed, and the laying of cement tile roofing on nine buildings was finished. Excavation for shop foundations amounted to 2,957 cubic yards; concrete placed, 762 cubic yards.

PIERS AND QUAY WALLS.

Designing and checking of designs were continued on pier No. 1, and studies were made of different anchorages for snubbing post and for column of pier shed. Nearly all the caissons for the foundations are close to rock and the penetration was, therefore, small, amounting to 943 feet. All the caissons at the west end are on rock. The total sunk to rock is 125, remaining 26.

The floor slab for the superstructure of Quay Wall g-h-i was completed, 242 linear feet having been built during the month. Two of the elevator towers were removed. The curb was constructed along the rear of the dock, and the track along the face of the dock was extended 293 feet and grouted in. Cinder concrete was placed over the floor slab to bring the floor to the proper grade for the sand cushion. On account of the wet weather, it was decided to discontinue the laying of the brick pavement, except between the rails of the track, and but 2,340 square feet of brick were laid down. The dock, however, can be used for commercial purposes as it now stands, as soon as the slip can be dredged.

The sinking of caissons for Quay Wall e-f has been delayed, because of the rock fill, it having been considered advisable to dredge the rock fill out before attempting to go further with the caisson work. This was done, and a double trestle is now being constructed from which to work. It is proposed to set all the caissons between the sand dock and the lumber dock in December.

METEOROLOGY AND HYDROLOGY.

The rainfall was above normal at Porto Bello and over the upper Chagres basin, and generally slightly below normal elsewhere. The average over the basin was 16.76 inches, against a 13-year average of 19.88 inches.

A pronounced seismic disturbance was registered at Ancon and Gatun on November 13. The pens were thrown from the register sheets at Ancon, so the record of the maximum amplitude of motion was lost. The shock was estimated at Intensity III on the Rossi-Forel scale. Its origin seemed to be at a point southwest of Ancon about 115 miles, in the same section that was visited by heavy shocks during the preceding month. This shock resulted in no damage to the Canal works.

The total water yield of Gatun Lake watershed was eight per cent below the 6-year normal for November. The lake rose from 72.46 feet above seal level to 82.04, a storage increase of 39.65 billion cubic feet.

Miraflores Lake rose from 45.26 feet above seal level to 51.03, a storage increase of 146.9 million cubic feet.

Fourth Division—Office of the Chief Engineer.

Dry excavation in Culebra Cut amounted to 160,900 cubic yards, all from outside prism lines, from slides and high levels as preventive against slides. This division also excavated 36,100 cubic yards at Sosa Hill rock quarry, and 10,000 cubic yards at the pontoon bridge basin at Paraiso. The daily average number of steamshovels at work was 9.09, and the

total of shovel days 209. Naos Island trestle fill was increased by 49,362 cubic yards, total to date 1,632,808 cubic yards. The daily average number of laborers at work was 2,299, and of "Gold" employees, 82.

Fifth Division—Office of the Chief Engineer.

PEDRO MIGUEL.

Tracks from Culebra Cut that passed through the northeast core wall were removed, the concrete work was completed, and the backfilling south of the wall was begun. Backfill placed amounted to 8,530 cubic yards, total to date 1,032,783 cubic yards.

MIRAFLORES.

Excavation from borrow pits south of the spillway, for the substation, and the transmission duct line amounted to 41,850 cubic yards. Dry filling in the prism of the west dam was increased by 11,480 cubic yards, and backfill by 16,020 cubic yards.

ANCON QUARRY AND CRUSHER.

Excavation in the quarry amounted to 35,730 cubic yards of which 2,010 yards were stripping, and 33,720, rock. The output of the crusher was 38,537 cubic yards.

GOLD HILL HYDRAULIC PLANT.

Excavation amounted to 81,400 cubic yards, of which 25,000 were rock and the balance earth. The booster station started operating with one unit, and the second unit was completed during the month.

Sixth Division—Office of the Chief Engineer.

FIRST DISTRICT.

The excavation by dredging remaining at the end of the month in the district from Gamboa to the Pacific Ocean was, as follows:

LOCATION.	Earth. Cubic yards	Rock. Cubic yards	Total. Cubic yards
Miraflores Locks to sea.....	1,545,796	559,293	2,105,089
Miraflores Lake.....	346,741	346,741
Gamboa to Pedro Miguel.....	1,227,018	3,767,082	4,994,100
Total Canal prism.....	3,119,555	4,326,375	7,445,930
Inner harbor.....	6,039,429	372,062	6,411,491
Total, First district.....	9,158,984	4,698,437	13,857,421

Dredging, Culebra Cut—Seven dredges removed 47,592 cubic yards of earth, and 151,602 cubic yards of rock, from the Canal prism. Following is a statement of the excavation in detail:

LOCATION.	Earth.	Rock.	Total.
Gamboa dike (1473 to 1478).....	11,900	11,900	23,800
Hagan's slide (1848 to 1853).....	4,114	37,026	41,140
East Culebra slide (1781 to 1787).....	2,240	20,160	22,400
West Culebra slide (1777 to 1784).....	4,773	38,102	42,875
Cucaracha (1805 to 1820).....	24,565	44,414	68,979
Total.....	47,592	151,602	199,194

Material from dredges on the north side of Cucaracha was dumped north of Gamboa, and that from the south side was dumped into the old drainage ditch, Stations 1873 plus 00 to 1896 plus 00, and along the east bank of the Canal to Station 1860.

Miraflores Locks to the sea—Six dredges removed 195,948 cubic yards of earth, and 115,602 cubic yards of rock, from the prism during the month, and, in addition, 6,912 cubic yards of earth, and 2,688 of rock, at the lumber and sand wharves.

Miraflores Lake—A suction dredge ex-

cavated 30,035 cubic yards of earth from the channel in Miraflores Lake.

SECOND DISTRICT.

Ocean to Gatun Locks—Six dredges removed 202,531 cubic yards of earth, and 3,796 yards of rock, from the prism between the Atlantic Ocean and Gatun Locks. The total excavation remaining in this section is 466,973 cubic yards, of which only 1,204 are rock.

Cristobal coaling station—Drilling on the site of the coaling station amounted to 9,788 feet; 41,230 pounds of dynamite were used, and the total breakage was 58,009 cubic yards of coral. A suction dredge removed 17,374 cubic yards of earth, and 34,749 yards of coral rock. Foundation fills were started.

Gatun Lake—Suction dredges removed 114,057 cubic yards of earth, and 5,035 yards of rock, from the Canal near Gamboa.

Division of Municipal Engineering.

NORTHERN DISTRICT.

The construction of the new Colon waterworks was continued during the month, the work consisting principally of laying of exterior pavement, curb, and gutter, and macadam around the buildings; and on the interior consisted of installation of equipment in the laboratory and quarters; the waterproofing of filter tanks; the installation of windows, screens, handrailings, controllers, etc. Sand and gravel will be placed in the filter beds during the coming month.

SOUTHERN DISTRICT.

Construction of the storm sewer on the new townsite of Balboa was advanced 838 linear feet, and the sewer is 84 per cent completed. Work at the new townsite of La Boca was advanced, and is 70 per cent completed. Work on the improvements for the permanent town of Pedro Miguel was begun with the laying of sewers and construction of curb and gutter.

NEW PANAMA WATERWORKS.

At Miraflores pump station No. 1, sluice gates and equipment in the intake house were installed. The side walls of the pump station were completed up to the sole plates of the trusses for the roof. This building was ready for installation of piping in the floors and the placing of the roof as soon as the steel arrives.

Work at the high service reservoir consisted of the completion of the excavation, and the construction of approximately 90 per cent of the concrete floors.

At Miraflores filter plant, steamshovel work was continued during the entire month in double shifts on the filter site proper, and at the end of the month was practically completed. Excavation by hand at the site of the head house and aeration basin was completed. Excavation for the wash water tank on top of Miraflores Hill was completed, and the concrete floor was laid.

Atlantic Division.

GATUN LOCKS.

Grading operations were continued, 34,913 square yards being finished to final grade. The backfill was not increased, the total remaining at 2,234,187 cubic yards, 99.52 per cent completed.

GATUN DAM.

The fill was increased by 40,902 cubic yards from borrow pits, the total in place being 22,052,666 cubic yards, 10,124,082 cubic yards of wet and the balance of dry fill. The placing of fill is practically completed. Surfacing, or smoothing up the slopes of the dam, was ex-

tended by 6,900 square yards, total to date 345,920 square yards. The Gatun-Mindi levee was raised by the addition of 16,949 cubic yards.

BREAKWATERS.

Porto Bello rock was dumped on the east breakwater at Colon to the amount of 21,489 cubic yards, making the total of hard rock for armoring 367,639 cubic yards, and the total fill, 3,089,682 cubic yards. The rock was handled in 73 barges, and plant steamed 1,360 miles.

Preliminary work was continued on the east breakwater, 4,315 linear feet of track being laid, 6,715 cubic yards of ballast placed, 234 linear feet of trestle driven at the dock, 13,525 cubic yards of sand and coral excavated by suction dredge, and surveys, and borings completed at the proposed quarry.

Quartermaster's Department.

LABOR AND QUARTERS.

The force report of November 26 showed a total of 28,287 men actually at work, a reduction of 1,576 men since the previous month. Of this number, 700 represent a decrease in the forces of contractors.

Employees moved from Bas Obispo and Las Cascadas have been quartered at Empire, Culebra, Corozal, and Ancon. The transfer of employees to the Ancon-Balboa district has resulted in a congestion at Ancon.

BUILDINGS.

The removal of buildings from Bas Obispo and Las Cascadas has continued. Eleven buildings with quarters for 64 families have been reerected at the La Boca townsite for silver employees.

Construction of the new administration building at Balboa was advanced by the excavation of 550 cubic yards from the basement floor area, placing of 455 cubic yards of concrete, and of 2,130 8-inch concrete blocks, the total placed to date. Work was also advanced on the hydroelectric station at Gatun, on the gatehouse, tunnel extension, spillway, and substation. The total number of cement blocks manufactured at the end of the month was 45,721, of which 30,521 were made in November. The permanent building force was about 1,300 men.

Subsistence Department.

A total of 443,008 meals was served during the month, 168,994 at the line hotels, 263,085 at laborers' messes, and 10,929 at the Hotel Tivoli. The operation of the line hotels, restaurants, and laborers' messes resulted in a loss of \$604.89. The Hotel Tivoli was operated at a net loss of \$3,898.92. The total net loss on subsistence operations for the month of November was \$4,503.81.

Department of Civil Administration.

COURTS.

One civil and one criminal case were disposed of in the Supreme Court, 69 civil and 44 criminal cases in the circuit courts, and 75 civil and 292 criminal cases in the district courts.

POSTS, CUSTOMS, AND REVENUES.

Money order sales amounted to \$360,566.91; stamp and card sales, \$7,093.90; deposits in postal savings accounts \$149,508; withdrawals, \$142,915.

Revenues were collected to the amount of \$12,348.55; on account of fines, costs, and fees, \$2,708.35.

Twenty-one vessels entered and cleared at Ancon, 17 entered and 16 cleared at Cristobal.

Thirty estates were settled, and 39 were in course of settlement.

POLICE AND PRISONS.

The effective force, officers and men, at the end of the month numbered 161. The number of people arrested was 317, of whom 291 were men. Six persons were committed to the penitentiary, 18 were discharged, total confined 125.

FIRE PROTECTION.

Five fires occurred during the month, four in Commission, and one in private property. The total loss was \$63.

SCHOOLS.

The net enrollment in the schools was 1,136 white, and 1,137 colored, children. Forty-six teachers were employed in the white schools, and 25 in the colored schools.

Department of Sanitation.

The total number of deaths from all causes among employees was 45, from disease 22, violence 23, giving an annual average per thousand of 4.89 and 5.12, respectively.

In segregating according to race, the annual death rate per thousand from disease among employees was: For whites 4.84, and for blacks, 4.91, giving a general average for disease of 4.89. For the same month during 1911, the annual death rate per thousand from disease among whites was 6.62, blacks, 8.27, giving a general average of 7.85; and in 1912, from disease among whites, 2.80, blacks, 8.77, giving a general average of 7.31.

Among employees deaths from the principal diseases were, as follows: Lobar pneumonia, one; hemoglobinuric fever, one; malaria fever E. A., two; tuberculosis, 5, leaving 13 deaths from all other diseases, and 23 deaths from external violence.

No case of yellow fever or plague originated on, or was brought to the Isthmus, during the month.

Respectfully,

GEO. W. GOETHALS,

Chairman and Chief Engineer.

Preservation of Maps, Etc.

A committee consisting of Mr. A. S. Zinn, chairman, Mr. A. B. Nichols, and Mr. John H. Smith, Jr., appointed to consider and recommend a course of procedure looking to the preservation and consolidation of valuable maps, tracings, and blueprints covering features of the Canal construction under the various divisions, and the elimination of useless or obsolete drawings, has made the following recommendation, which has been accepted: That on account of the congestion in the present administration building at Culebra, the collection of the drawings should be deferred until the occupation of the permanent administration building, in the vaults of which will be plentiful provision for their filing and storage; that for the present the various divisions should preserve them, and in case any division be abolished, the maps and drawings should be kept intact, with indices, and allowed to remain in their present location in charge of the force taking over the office; and that, as each division is best informed as to the value of its own drawings, each should be instructed to delegate some competent employee to look through them, classifying and eliminating those which he considers useless, these to be listed and submitted to the Chairman in the regular manner on form C. E. 402, in accordance with Section 5 of the Act making appropriations for the fiscal year ending June 30, 1913.

GAS BUOYS ALONG THE CANAL.

White Lights, with Flashing Devices Being Installed for Most of Its Length.

Forces of the Lighthouse Subdivision are placing in Gatun Lake, flashing gas buoys, assembled in the abandoned borrow pit, east of Gatun Locks, preparatory to towing them away and placing them on their stations along the Canal channel. Up to December 15th, 24 of the 43 buoys required in the lake had been launched. Six others had been placed in the Pacific entrance during last March, and the four to go along the Atlantic entrance channel were placed on December 10 in temporary positions, where they serve to guide the operations of the seagoing suction dredge *Caribbean*. Two buoys will be hauled by rail to Miraflores and swung off by wrecking cranes into the waters of the lake, alongside the railroad embankment. The assembly of all the 57 buoys of this type including two spare buoys, has been completed, with the exception of placing the lanterns, and making the final pipe connections.

In conformity with Section 4678 of the Revised Statutes of the United States all the buoys in the Canal are colored and numbered, so that in entering the channel at Colon, and extending south to Miraflores Locks, red buoys with even numbers shall be passed on the starboard hand, and black buoys with odd numbers on the port hand. On entering the channel at Naos Island, and extending north to Miraflores Locks, at the Pacific entrance, red buoys with even numbers are placed on the starboard hand, and black buoys with odd numbers on the port hand.

All of the buoys are equipped with floating devices, as described in THE CANAL RECORD of January 15, 1913. Buoys on the port side will use double flashes, those on the starboard, single flashes, as follows: Buoys on starboard tangents have a characteristic of five seconds light, five seconds dark; on port tangents, two seconds light and one second dark, two seconds light, 3.8 seconds dark. Turning buoys on the starboard hand have a characteristic of .3 second light, 2.7 seconds dark; on the port hand, .3 second light, .7 second dark, .3 second light, 1.7 seconds dark.

The general custom for channel or river lighting is to have red lights on the starboard hand and white lights on the port hand, but with the perfection of devices which produce rapid flashes of whatever duration desired, it is likely that this method will eventually be superseded by the method of single and double flashes of white light on either side of the channel, especially in localities frequented by heavy fogs and rains, where the maximum efficiency of a light is required. To obtain a red light it is necessary to use ruby glass, and such glass absorbs about 75 per cent of the light. At the Atlantic and Pacific entrances to the Canal, parts of which may be navigated without Canal pilots, red flashing lights will be tentatively used on the starboard hand, but in all other parts of the Canal white lights will be used until they are proved to be confusing.

Inventory of Rolling Stock.

Pursuant to instructions of the Chairman and Chief Engineer, dated October 31, a committee, of which the surveying officer is chairman, arranged to take a complete inventory of all rolling stock, of both the Isthmian Canal Commission and Panama railroad, on Sunday, November 30. Forty-three

inventory gangs, each gang consisting of two monthly gold men and two monthly silver men, were utilized as far as practicable in taking this inventory, these men being detailed for this work from the Quartermaster's Department, Department of Examination of Accounts, Panama railroad, and the divisions having rolling stock in service. Both sides of all rolling stock were checked and information was secured as to individual numbers appearing on equipment, stencil marks, special service marks, and other data that

might be of interest to divisions to which assigned. All equipment inventoried was stencilled on both sides with the number of the gang over a 2-inch disc, both being enclosed in a triangle.

The work was commenced at 7 a.m., and all gangs completed work by 4.30 p. m. Approximately 7,000 items of equipment were listed. It is expected that the final report of the committee will be transmitted to the Chairman by the end of December.

LABOR FORCE AND QUARTERS IN NOVEMBER.

The force report for November 26 shows the actual working force of the Canal Commission to be 28,287; of the Panama railroad, 5,557, and of the contractors, 1,123, a total effective working force of 34,967, a decrease of 1,459, as compared with the statement for October. The gold force on the Canal work, composed almost exclusively of white Americans, was 3,695, an increase of 10, as compared with the previous month. A statement of the Canal force, by divisions, follows:

DEPARTMENT OR DIVISION.	SILVER EMPLOYEES*											Total silver	Total gold.	Grand total		
	Artisans.					European laborers.		West Indian laborers.								
	Monthly	44 cents.	32 cents.	25 cents.	20 cents.	16 cents.	20 cents.	16 cents.	13 cents.	10 cents.	7 cents.

(1) Includes Sabanas police station, Taboga Island, Culebra Island, Palo Seco, and Naos Island. (2) Includes 66 Panamanians. (3) Includes Miraflores. (4) Includes Gamboa. (5) Includes Colon Beach and Colon Hospital. (6) Includes 61 East Indians, 10 American citizens, and 55 Panamanians. (7) Includes 21 Asiatics. Gold force of contractors (included above): 18 families, 307 bachelors.

COMMISSARY OPERATIONS.

Last Fiscal Year's Business Largest in the History of the Panama Railroad Stores.

The business of the commissary department of the Panama Railroad Company during the fiscal year ending June 30, 1913, aggregated \$7,630,402.75, an increase of \$928,047.07, as compared with the previous year, and an increase of \$1,875,447.06, as compared with the fiscal year ending June 30, 1911. It was the largest year's business since the organization of the commissary department. Merchandise was imported to the value of \$6,029,731.95. A classified statement of importations, the figures being for cost, insurance, and freight paid delivered on the Isthmus, follows:

CLASS.	Amount.
Groceries.....	\$1,596,292.24
Hardware.....	147,580.82
Dry goods.....	1,015,896.92
Tobacco.....	258,327.88
Cold storage supplies.....	2,288,844.13
Boots and shoes.....	266,344.71
Stationery and furniture.....	85,777.12
Raw material.....	370,668.13
Total.....	\$6,029,731.95

The relative percentage of goods under each classification sold during the fiscal year ending June 30, 1913, as compared with the previous fiscal year, follows:

CLASS.	1913	1912
Groceries and staples.....	27.25	28.85
Cold storage supplies.....	38.06	37.97
Dry goods, gents' furnishings, etc.....	16.33	16.38
Boots and shoes.....	4.43	4.27
Tobacco and confectionery.....	4.27	3.88
Hardware.....	2.31	1.84
Stationery and furniture.....	1.46	1.48
Raw material.....	5.89	5.33
Total.....	100.00	100.00

The stock on hand as of June 30, 1913 was valued at \$1,148,520.01, as compared with \$1,166,481.76 for the preceding fiscal year, a decrease of \$17,961.75. Efforts were directed toward keeping the stock down to the lowest figure consistent with good service in anticipation of a decrease in business due to reduction in the Canal force. There were heavy increases in the importations of hardware, dry goods, tobacco, and cold storage supplies, especially the latter, where the increase amounted to over 10 per cent. In general, the prices of the previous year were maintained. There was a marked advance in the wholesale prices of shoes, and on a few lines, the retail prices were advanced. Although high wholesale prices of beef continued throughout the year, no increases were made in the selling price, except in a very few instances.

Up to June 30, 1913, there had been no changes in the number or location of the commissaries established, a total of 19 stores being in operation.

The following table gives the importation of meat and dairy products, in comparison with the statistics for the fiscal year 1912:

ARTICLE.	1913	1912
Fresh meats, lbs.....	6,821,029	6,453,138
Poultry, lbs.....	577,657	503,590
Cured and pickled meats, lbs.....	1,035,491	896,445
Cheese, lbs.....	172,375	142,786
Butter, fresh, lbs.....	524,268	427,683
Milk, fresh, gals.....	103,893	81,388
Cream, fresh, gals.....	49,500	37,750
Eggs, doz.....	786,250	725,580

Importations of fresh vegetables for the two years, were, as follows:

ARTICLE.	1913	1912
Potatoes, white, lbs.....	5,728,738	5,843,692
Potatoes, sweet, lbs.....	1,190,452	1,016,392

ARTICLE.	1913	1912
Onions, lbs.....	1,049,797	896,850
Cabbage, lbs.....	735,760	677,234
Yams, lbs.....	381,901	300,045
Carrots, lbs.....	151,904	135,256
Turnips, lbs.....	129,539	129,310
Beets, lbs.....	79,896	61,747
Other vegetables including celery, tomatoes, and other northern seasonable vegetables.....	850,573	741,627

Fresh fruits were purchased for the two years, as follows:

ARTICLE.	1913	1912
Apples, lbs.....	1,320,000	916,622
Peaches, lbs.....	65,504	99,457
Pears, lbs.....	52,733	83,457
Plums, lbs.....	53,218	36,226
Grapes, lbs.....	73,753	92,534
Oranges, doz.....	145,914	171,787
Lemons, doz.....	35,250	36,850
Limes, doz.....	6,708	11,225
Grapefruit, doz.....	20,724	11,254
Cantaloupes.....	106,290	62,750
Watermelons.....	23,851	34,358
Other fruits, lbs.....	34,496	104,657

The following statement shows the value of stock on hand, the value of goods received, the amount of sales and issues to departments, and the total of the average sales and issues per month:

*Stock on hand June 30, 1912.....	\$1,166,481.76
*Total stock received during year.....	\$6,029,731.95

Total..... \$7,196,213.71

†Sales and issues to departments.

Sales to Isthmian Canal Commission.....	\$1,809,176.44
Sales to United States Government.....	231,202.47
Sales to others for cash.....	116,660.33
Sales to others for coupons.....	5,055,728.83
Issued to Panama Railroad Steamship Line.....	12,076.84
Issued to departments of the railroad and used in operation of the commissary.....	277,561.31
Condemned and damaged goods, shrinkage, etc.....	127,996.53

Total..... \$7,630,402.75

†Average sales and issues per month..... 656,272.74

*Stock on hand June 30, 1913..... 1,148,520.01

*C. I. F. value.

†Selling value after adding surcharge.

MANUFACTURING PLANTS.

Laundry—There was a large increase in the amount of business handled in the laundry. The total number of pieces handled amounted to 5,035,620 as compared with 4,243,614 for the previous year. The total gross revenue amounted to \$122,913.28, as against \$108,096.85, an increase in the number of pieces handled of 729,006, and an increase in gross revenue of \$14,816.45. To meet the increased business an entire rearrangement of the wash rooms and mangle rooms was necessary. One new 6-roll mangle of the latest type was installed, and to meet the overcrowded condition of the dry rooms on account of the increase in the work, a new dry room tumbler was installed. With this increased equipment the work was handled satisfactorily and economically.

Bakery—During the year, there were 22,454 barrels of flour used, as against 20,233 the previous year, an increase of 2,221 barrels. There were 6,779,726 loaves of bread, 710,334 rolls, and 135,435 pounds of cake baked, as against 6,014,667 loaves of bread, 651,844 rolls, and 114,134 pounds of cake baked the previous year. The gross revenue of this department amounted to \$284,639.63, as compared with \$260,865.53 the previous year, an increase of \$23,774.30.

On June 1, 1913, the price of bread to all was reduced to 3 cents a loaf, and a corresponding reduction was made in other similar products. This was made possible by the general decrease in the price of flour, and the large output.

Coffee roasting—During the year, 368,870

pounds of green coffee were roasted, as against 341,780 pounds the previous year, an increase of 27,090 pounds. The number of pounds of roasted coffee produced was 301,801, as against 280,909 the previous year, an increase of 20,892 pounds. The gross revenue of this department amounted to \$69,200.21, as against \$64,220.98 the previous year, an increase of \$4,979.23.

Ice manufacture—The number of tons of ice manufactured during the year was 38,884, as against 37,248 the previous year, an increase of 1,636 tons. The quantity produced represented the full capacity of the plant. The gross revenue of this department amounted to \$241,858.02, as against \$229,535.98 the previous year, an increase of \$12,322.04.

Ice cream manufacture—The results obtained in this department justified the expenditures for modern equipment made during the previous year. During the year, 169,850 gallons of ice cream were made, as against 138,551 gallons the previous year, an increase of 31,299 gallons. The gross revenue amounted to \$134,327.50, as compared with \$110,993.68 the previous year, an increase of \$23,333.82.

Corned beef department—The number of pounds of corned beef produced during the year amounted to 265,906, as against 263,573 pounds the previous year, an increase of 2,333 pounds. The gross revenue was \$33,819.74, as compared with \$29,594.24, an increase of \$4,225.50. The result of this experiment is satisfactory. A much more satisfactory corned beef is being produced, and, in addition, it is now possible to buy full carcasses of fresh beef, resulting in obtaining fresh beef at a cheaper cost.

Butter department—The number of prints of butter made during the year was 382,321, as against 333,658 the previous year, an increase of 48,663. The value was \$148,740.66, as compared with \$122,660.26 the previous year, an increase of \$26,080.40. In addition to the printed butter, 144,145 pounds of butter in bulk were sold, the value being \$51,363.69.

Hamburger steak department—In this department, 8,774 pounds of Hamburger steak were made during the year. The total gross revenue amounted to \$1,140.62.

Industrial laboratory—The value of the product of this department for the year amounted to \$28,185.29, as compared with \$10,275.49 for a part of the previous year, an increase of \$17,909.80. The principal items manufactured were extracts of pineapple, strawberry, almond, vanilla, lemon, coffee, orange, witch hazel, rose water, preserved fruits, tooth and talcum powders, antiseptic preparations, laundry soap, and bay rum. In this department there were also bottled during the year, denatured alcohol and salad oil to the value of about \$8,000.

Packing department—During the year, 4,902,368 pounds of goods were packed in this department. In addition to this, sanitary wrappers were placed around 1,129,037 loaves of bread. The principal articles packed were, as follows:

Rice, 2,030,794 pounds; flour, 1,940,569 pounds; coffee, 303,427 pounds; beans, 265,195 pounds; peas, 206,778 pounds; starch, 91,358 pounds; nuts, 17,644 pounds; garbanzos, 655 pounds; corn meal, 5,848 pounds; Central American sugar, 40,100

pounds, making a total of 4,902,368 pounds.

Electric light, power, and refrigerating plant—All the equipment of this plant was maintained during the year. Renewals were made where required, and the high efficiency of the plant maintained.

Cold storage plant—The efficiency of the plant and organization was maintained during the year. The large increase in the amount of products handled justified the increase in facilities made during the previous year.

Postal Savings Bank Transactions.

A statement of the postal savings bank transactions at Canal Zone post-offices for the month of November, follows:

OFFICE.	Postal savings certificates issued.	Postal savings certificates paid.
Ancon.....	\$15,995.00	\$14,083.00

COMMISSION CLUBHOUSES.

Activities of the Young Men's Christian Association.

GENERAL.

The moving picture schedule for the week December 29 to January 3 is, as follows: Monday, Gatun; Tuesday, Balboa; Wednesday, Culebra; Thursday, Corozal; Friday, Empire; Saturday, Cristobal.

COROZAL.

The Corozal bowlers won two out of three games with Gatun on Saturday night, December 20. This was the last game of the local team in the present tournament.

A 5-foot addition is being built to the clubhouse for the purpose of relieving the congestion at the soda fountain.

Dr. Frederick Poole gave an interesting illustrated lecture on China to a crowded house on Tuesday, December 23.

An old-fashioned Christmas is expected at the Corozal clubhouse, and the Sunday school and Y. M. C. A. are cooperating for the occasion.

CULEBRA.

The "Greens," won from the "Blues" by a score of 1,265 to 1,296, in the local bowling tournament, on Monday night, December 15. On Tuesday night, the "Reds," defeated the "Blacks" 1,225 to 1,212. On Friday night, the "Greens" defeated the "Whites" 1,320 to 1,184.

High scores for the week are, as follows: DeCora, 101, 116, 105, 108; Palmer, 112; Kiernan, 112; Finley, 100-102; Case, 104, 110, 105, 101, 129, 104; Ferguson, 121, 102; Koperski, R., 115; Fitzpatrick, 106; Whiting, 112, 101.

The Cristobal tenpin team won three games from the local team on Saturday night, December 20, by the following scores:

	Cristobal.	Culebra.
Barrett.....	193 205 148	Case..... 155 171 149
Barnum.....	171 156 127	Herrington..... 150 156 131
Collins.....	140 187 191	Hansli..... 196 149 130
Barte.....	177 197 209	DeCora..... 146 158 149
Bullard.....	194 166 140	Dougherty..... 172 168 172

Totals.... 875 911 815 819 802 731

Mr. S. P. Verner of Cristobal gave an address on the subject, "There's a good time coming," on Sunday night, December 21. An optimistic forecast for the future was presented by tracing the steps of progress that have been made in the social, educational, and religious life of the world during the last 2,000 years.

Dr. Poole will give a talk on personal experiences in China 20 years ago, on Sunday night, December 28. No admission will be charged.

The Pennsylvania State College quartet will give an entertainment in the schoolhouse on Friday night, January 2, at 8 o'clock. Admission, members, free; adult nonmembers, 50 cents; children, 25 cents.

GATUN.

A large audience greeted Dr. Poole on his initial appearance in his Canal Zone tour, on Thursday evening, December 18, when he gave his lecture on "Peking and the great Chinese wall." The lecture was illustrated with slides and motion pictures. He was assisted in his lecture by Mrs. Poole, who wore a Chinese wedding costume. Dr. Poole will reappear at Gatun on Thursday evening, January 1.

The boys of the local clubhouse were hosts to 29 of the Corozal boys on Saturday, December 20. Corozal was victorious in indoor baseball, the score being 8 to 7, and in bowling, it won two out of three games. The Gatun boys, however, won both games of basketball. The afternoon was spent in swimming in the lower forebay of the locks. Fancy diving and under water swimming were among the special events. Mr. Page was in charge of the Corozal boys.

The Gatun Y. M. C. A. will have a service in the clubhouse at, on Christmas morning at 10 o'clock, which will be in charge of the secretary. Judge Thomas E. Brown, Jr., of the Canal Zone Supreme Court, will be the speaker. Mrs. A. C. Arthur will sing, and Miss Lang will play the piano. The Y. M. C. A. male glee club will sing a selection.

The Pennsylvania State College male quartet will make its first appearance at Gatun on Christmas night, December 25. The quartet is accompanied by an excellent reader.

A song service for men only was held at the clubhouse on Sunday evening, December 21. D. R. Homer played the piano.

A basketball game will be played at the clubhouse on Friday evening, December 26.

Mrs. Walsh and Eddie Walsh won first prize, and Mr. and Mrs. Grover won second prize in the ladies' bowling tournament, held on Wednesday evening, December 17.

On Christmas Eve, December 24, an informal social was held for the members of the association.

The clubhouse will be appropriately decorated for the

Christmas holidays. The color scheme will be green and red.

CRISTOBAL.

Unusual interest was evinced in the local French pool tournament, which closed Saturday night, December 20. Messrs. J. H. Orr, H. Smithers, and J. H. Gill, won first, second, and third prizes, respectively. The other men taking part in the tournament were, as follows: Messrs. Hagan, Raymond, Farrell, Herz, Vance, Tuttle, Dwyer, Schofield, McCullough, Roscoe, Ashton, Herrington, Brugge, McLaney, E. F. Orr, Barte, Bevington, and Nash.

The attention of the tenpin bowlers is respectfully called to the tournament to be held New Year's Eve and all of New Year's Day. It is an open tournament.

Hon. Richard L. Metcalfe, Governor of the Canal Zone, will deliver an address on Sunday, January 11, at 3 p. m., in the social hall of the clubhouse; subject, "Measuring a man." Special music will be provided for the occasion. The general public is invited to attend.

The opening night of the new year is to be observed by a "Smoker." All men of Cristobal are invited to be present. A good program is assured.

In the discussion following Mr. H. D. Brittin's paper on "The pros and cons of physical education," before the discussion club, Thursday, December 18, it was agreed that outdoor exercise is preferable. A committee, consisting of Messrs. Cousineau, Anderson, and A. Fraser, was appointed to confer with the district quartermaster as to the possibility of procuring grounds suitable for tennis and other sports.

Supplies for the Canal.

The following steamers with supplies for the Isthmian Canal Commission and Panama Railroad arrived at the ports of Colon, Balboa, and Cristobal during the week ending December 20:

Twines, December 14, from New York, with 195 pieces structural steel, for Panama railroad; 19 crates structural steel, for fortifications; 400 pieces structural steel, for First Division; 30 cases paint, 29 kegs horse-shoes, for stock.

Heredia, December 15, from New Orleans, with 34 crates iron doors, for First Division; 207 pieces oak lumber, for Mechanical Division; 89 pieces oak lumber, 66 pieces piling, for Atlantic Division.

Mounby, December 15, from Mobile, Ala., with 1,910 pieces pipe, for Division of Municipal Engineering.

Pleiales, December 14, from San Francisco, with 124,933 board feet redwood lumber, for Mechanical Division; 15 bales rubber hose, for stock.

Colon, December 17, from New York, with 516 pieces structural steel, 16 reels cable, 21 cases electrical machinery, for First Division; 18 cases electrical material, for Mechanical Division; 1,200 bundles steel bars, for stock; one launch, for Atlantic Division; 193 packages, for armament; 198 pieces pipe, 1,150 kegs wire nails, 281 coils rope, 255 kegs bolts, 1,000 rolls roofing paper, 1,000 bags oats, 96 cases lubricating oil, for stock; and a miscellaneous cargo, the whole consisting of 6,455 pieces, weighing 337 tons.

Zacapa, December 17, from New York, with 33 packages structural material, for fortifications; 277 pieces structural steel, for First Division.

Prinz August Wilhelm, December 15, from New York, with one case lead pencils, for stock.

Atenas, December 18, from New Orleans, with 5,822 board feet oak lumber, for Mechanical Division; 69 pieces piling, for Division of Municipal Engineering; 48 pieces piling, for Atlantic Division.

OFFICIAL CIRCULARS.

Instructions Governing Preparation of Official Correspondence.

CULEBRA, C. Z., December 16, 1913.

CIRCULAR No. 467-A:

In order to facilitate the filing and handling of official correspondence, the following will be observed as far as practicable:

The subject shall be stated in each communication, either in the body thereof or near the top of the first page.

No communication shall embrace more than one subject.

Names of persons shall be stated in full, or with initials, at least once in each communication concerning them.

Each communication shall be replied to separately, and a reply to one communication shall not be incorporated with a reply to another from the same office regarding a different subject or a different phase of the subject.

When there has been previous correspondence from an office concerning a particular subject, reference shall be made thereto by stating the date of the communication under reply, as well as the file number, if given. The file number may be written near the top on the left hand side of the letter, thus: "Your file No. 23-36." A space with the words "Refer to file No." is already provided on the opposite side of official letterheads for the file number of the sending office.

GEO. W. GOETHALS,
Chairman and Chief Engineer.

Issuance of Commissary Coupon Books.

CULEBRA, C. Z., December 16, 1913.

CIRCULAR No. 256-N:

Paragraph 4 of Circular No. 256-M, relative to issuing coupon books, reads:

Requests for books received before the 10th or after the 25th of the month will be honored for new employees or in the case of an unforeseen emergency. Foremen or other officials who approve requests for coupon books will be held responsible for the proper observance of this rule.

The intent of these instructions is to confine as closely as possible between the 10th and the 25th of each month the work of issuing coupon books, as after the 25th, and prior to the 10th, the clerks in the time-keeping offices must make up pay rolls, pay receipts and reports and check and distribute them, which greatly increases their regular work. It is considered only fair that other employees should cooperate to avoid a congestion of work during their period by providing themselves with books within the 16-day period allowed.

However, it is not desired that any employee go without books or suffer any deprivation if he has enough time to his credit to pay for a book. The time office can issue a limited number of books between the 5th and the 10th of the month and requests will be honored but the employee must exclaim to his foreman the necessity for making the request, and if it is plainly his own fault that he is without coupon books, the foreman or other official who approves the request will call attention to Paragraph 4 and caution the employee strictly against future negligence.

On every request for books to be issued prior to the 10th, the foreman will insert the word "Emergency" after the word "Approved," and sign the request. Otherwise, the books will not be issued until the 10th.

GEO. W. GOETHALS,
Chairman and Chief Engineer.

Issuance of \$2.50 Commissary Books.

CULEBRA, C. Z., December 23, 1913.

CIRCULAR No. 256-O:

Paragraph 1 of Circular No. 256-N, discontinuing the use of \$2.50 commissary books, is hereby modified, and the following rule will hereafter govern:

A \$2.50 commissary book may be issued in an emergency case provided for in Circular No. 256-N, between the 5th and 10th of the month, if the employee has not earned \$5 at the time the request is made.

GEO. W. GOETHALS,
Chairman and Chief Engineer.

I. C. C. Official Business Trip Tickets Not to Be Altered.

CULEBRA, C. Z., December 16, 1913.

HEADS OF DEPARTMENTS AND DIVISIONS:

The general superintendent of the Panama Railroad Company has called attention to the fact that sufficient care is not being exercised in the issuance of I. C. C. official business trip tickets, and that instances are constantly being reported in which alterations have been made by the issuing employee, such as changing the names of stations, dates, number of passengers to be carried, etc., all of which is contrary to instructions. All employees responsible for the issuance of official

business trip tickets should be instructed not to alter the ticket in any way after it has been issued.

Attention is also invited to the fact that the stopover privilege can only be endorsed on a ticket by the employee who issues the ticket and must be initiated by him.

GEO. W. GOETHALS,
Chairman.

Hunting in Canal Zone Territory.

CULEBRA, C. Z., December 19, 1913.

CIRCULAR No. 372-C:

In order to protect that arm of Gatun Lake from which a portion of the water supply for Brazos Brook reservoir is drawn, hunting is prohibited within that part of the Canal Zone lying north of the bascule bridge and east of the Panama railroad.

Employees violating this order will be discharged from the service of the Commission or the Panama Railroad Company.

GEO. W. GOETHALS,
Chairman, Isthmian Canal Commission.
President, Panama Railroad Company.

CULEBRA, C. Z., December 13, 1913.

CIRCULAR No. 372-D:

The prohibition in Circular No. 372-A against hunting by employees of the Commission or Panama Railroad Company in that part of the Canal Zone lying west of the Canal line is withdrawn in respect to the territory between the Cocoli River and the Pacific Ocean.

GEO. W. GOETHALS,
Chairman and Chief Engineer.

Acting Chief of Police.

DEPARTMENT OF CIVIL ADMINISTRATION,

ANCON, C. Z., December 17, 1913.

CIRCULAR No. 118:

Mr. Guy Johannes, assistant chief of police, is designated acting chief of police, effective December 17, 1913, during the absence of Capt. Chas. W. Barber, U. S. A., on leave.

RICHARD L. METCALFE,
Head of Department of Civil Administration.

Abandonment of Canal Siding.

PANAMA RAILROAD COMPANY,

OFFICE OF GENERAL SUPERINTENDENT,

COLON, R. P., December 17, 1913

CIRCULAR No. 313:

All concerned—The switches at Canal siding, south of Gamboa bridge, will be spiked on Thursday, December 18, and this siding will be removed, as it is no longer required.

F. MEARS,
General Superintendent.

No Sightseeing Trains on Christmas or New Year's Days.

PANAMA RAILROAD COMPANY,

OFFICE OF GENERAL SUPERINTENDENT,

COLON, R. P., December 17, 1913.

G. S. BULLETIN No. 26:

All concerned—The sightseeing train will not be operated on Thursday, December 25, 1913, and Thursday, January 1, 1914.

Please notify all concerned. F. MEARS,
General Superintendent.

Examination by Board of Local Inspectors.

BOARD OF LOCAL INSPECTORS,

ANCON, C. Z., December 18, 1913.

The Board of Local Inspectors will conduct examinations at the Administration Building, Ancon, on Wednesday, December 31, 1913, beginning promptly at 2 p. m., for persons desiring to secure the following classes of licenses: Pilots, masters, mates, marine engineers, chauffeurs, and navigators of motor boats. All applicants for licenses must procure from the Executive Office, Ancon, forms of application and information respecting the filling out of same, not later than the day previous to the examination. In addition, all persons desiring chauffeurs' licenses must provide themselves with automobiles with which to demonstrate their ability to properly operate the same.

Note—The demonstration test for applicants for chauffeurs' licenses will be given on Tuesday, the day preceding the regular examination, at 2 p. m., at the Administration Building, Ancon; on Wednesday, the day of the regular examination at 9 a. m., at the police station, Cristobal; for out-of-town applicants, on the day of the regular examination, at 2 p. m., at the Administration Building, Ancon.

W. V. JUDSON,
Chairman, Board of Local Inspectors.

Police Station at Bas Obispo Abandoned.

DEPARTMENT OF CIVIL ADMINISTRATION,

DIVISION OF POLICE AND PRISONS,

ANCON, C. Z., December 15, 1913.

GENERAL ORDER No. 1801:

Effective this date, the police station at Bas Obispo,

C. Z., is abandoned, and the necessary protection for that town will be furnished from Empire central station.

All property of the Quartermaster's Department on hand in excess of the requirements should be turned in. The property of the Department of Civil Administration, records, and files, should be forwarded to Empire central station.

C. W. BARBER,
Chief of Division.

Opening of Subpolice Station at Gamboa.

DEPARTMENT OF CIVIL ADMINISTRATION,

DIVISION OF POLICE AND PRISONS,

ANCON, C. Z., December 15, 1913.

GENERAL ORDER No. 1803:

Effective this date, the subpolice station at Gamboa, C. Z., is open for the transaction of business, with First-class Policeman Frank C. Ruggles in charge.

The property of the Department of Civil Administration, records, and files of Bas Obispo station, will be transferred to Gamboa.

The property of the Quartermaster's Department on hand in excess of the requirements should be turned in to the district quartermaster.

C. W. BARBER,
Chief of Division.

Automobile Tariff.

ANCON, C. Z., December 19, 1913.

Under the authority vested in me by the Ordinance enacted by the Isthmian Canal Commission on August 25, 1910, and approved by the Secretary of War on December 3, 1910, I hereby amend the schedule of rates for the transportation of passengers over Canal Zone streets and roads, established in the Orders of the Chairman, in charge of Department of Civil Administration, dated July 10, 1913, as follows:

RATES BY THE HOUR.

(All rates in United States currency.)

CAPACITY OF CAR.	For first hour	For each hour thereafter
5 passengers.....	\$4.00	\$3.00
6 passengers.....	5.00	4.00
7 passengers.....	6.00	5.00

For cars having a seating capacity less than that above indicated, the rate for the first hour shall not exceed \$1 for each passenger carried, exclusive of the chauffeur, and for each hour thereafter \$1 less than the first hourly rate for the car.

For any car having a normal seating capacity of more than seven passengers, the charge shall be computed for the first hour at a rate not to exceed \$1 for each passenger for which such car has a normal seating capacity, not including the chauffeur, and for each hour thereafter \$1 less than the first hourly rate.

LOCAL POINT RATES—CANAL ZONE AND CITY OF PANAMA.

Where automobiles engage in the business of carrying one or more passengers between the points shown in the following table, and such automobiles are not hired upon an hourly basis, the charges for transportation furnished between such points shall not be in excess of those hereinafter prescribed.

PANAMA, ANCON, AND BALBOA.

BETWEEN ANY POINT IN	AND	U. S. currency.
Ancon or Panama.	Any other point in Ancon (outside of hospital reservation) or Panama. One way—For each person....	\$0 50
Ancon or Panama.	Balboa docks and return: 5-passenger car.....	3 50
	6-passenger car.....	4 00
	7-passenger car.....	4 50
	No reduction for one way.	
Ancon or Panama.	Old Panama and return: 5-passenger car.....	4 00
	6-passenger car.....	5 00
	7-passenger car.....	6 00

NOTE.—The rate to Old Panama and return is that above shown, provided the time consumed does not exceed one (1) hour, in which case the charge should be computed upon the hourly basis.

The rates hereinabove prescribed are made reciprocal between points in the Canal Zone and the city of Colon by Ordinance No. 50, enacted by the Municipal Council of Colon on November 20, 1913, and between points in the Canal Zone and the city of Panama by Decree No. 23 of October 30, 1913, of the Alcalde of the Municipal District of Panama, and become effective in the Canal Zone after publication in two consecutive issues of THE CANAL RECORD.

RICHARD L. METCALFE,
Head of Department of Civil Administration.

Married.

BLUHM-RYSZCZYNSKI—At the home of the bride's father, Hoboken, N. J., on Wednesday, December 3, 1913, Frances Mary Ryszczynski to Herman William Bluhm.

*Amended schedule, resulting from temporary withdrawal of the *Allianca* for repairs.

Panama Railroad Company's steamers sail from Pier 11, Cristobal, at 3 p. m.

Royal Mail steamers leave for New York on alternate Tuesdays at 1 p. m.; for Southampton, on alternate Tuesdays at 10 a. m.

United Fruit Company's ships for New Orleans direct, leave on Thursdays and Saturdays at 3 p. m.; ships for New York via Kingston, on Tuesdays at 1.30 p. m., and Thursdays at 1.30 p. m.; for Bocas del Toro, on Mondays at 5 p. m.; for Limon, via Bocas del Toro, on Tuesdays at 5 p. m.; and for Limon direct, Tuesdays at 3 p. m.

Hamburg-American steamers sail for New York, via Kingston, Santiago de Cuba, and Fortune Island, on Tuesdays; the *Prinz August Wilhelm* and the *Prinz Joachim* at 10 a. m.; the *Carl Schurz* and the *Emil L. Boas* at 2 p. m.

CANAL

RECORD

Volume VII.

ANCON, CANAL ZONE, WEDNESDAY, DECEMBER 31, 1913.

No. 19.

The Canal Record

Published weekly under the authority and supervision of the Isthmian Canal Commission.

The Canal Record is published free of charge, one copy each to all employees of the Commission and Panama Railroad Company whose names are on the gold roll. Extra copies and back numbers can be obtained from the news stands of the Panama Railroad Company for five cents each.

Address all Communications,
THE CANAL RECORD,
Ancon, Canal Zone,
Isthmus of Panama.

No communication either for publication or requesting information, will receive attention unless signed with the full name and address of the writer.

NOTES OF PROGRESS.

Preparation for Raising Rim of Gatun Lake.

The exact location of the dike at Caño saddle No. 4 is now being made, the site having been cleared, so that accurate cross sections could be taken. The joint contractors for the work, R. W. Hebard and Company, Incorporated, and Thomas R. Lombard, have also been engaged in completing the camp at the site and assembling equipment. Quarters to accommodate about 50 men have been built of lumber and corrugated iron, and a commissary store has been stocked with supplies purchased from the Panama railroad commissary department. The 45-ton steamshovel, No. 56, equipped with a 2-cubic yard dipper, retired from the Canal service and leased to the contractor by the Canal Commission, two 36-inch gage steam locomotives, and twenty-four 4-yard, 36-inch gage dump cars, were transported by barge to the site from Gatun on December 21, and the contractors are ready to begin operations as soon as directed by the engineer representing the Commission. Supervision of the work has been assigned to the Atlantic Division.

Loss of Water from Miraflores Lake.

Owing to excavation at the base of the ogee at the Miraflores spillway in the enlargement of the spillway channel at that point, it has been advisable to keep the water in Miraflores Lake near the 51-foot level, in order to guard against a sudden overflow. Most of the surplus water has been wasted through the culvert in the west wall at Miraflores Locks. A computation has been made of the amount of water lost through this and other causes during the month of November, together with the amount of the inflow from the Culebra Cut channel by lockages and leakage at the Pedro Miguel Lock, as follows: Wastage account of lockages at Miraflores, 15 million cubic feet; leakage at Miraflores Locks and spillway, eight million cubic feet; wastage in holding

the lake to the 51-foot level, or thereabouts, 283 million cubic feet, or a grand total of 306 million cubic feet. The amount of water entering the lake through Pedro Miguel Lock from the Culebra Cut channel by lockages is computed at 7.5 million cubic feet, and by leakage through the lock, 3.8 million cubic feet, a total of 11.3 million cubic feet, which, deducted from the total of 306 million cubic feet, makes the net loss from Miraflores Lake in November from the above causes, 294.7 million cubic feet, equivalent to about 2,215,000,000 gallons. The above does not include the quantity pumped from Miraflores Lake into the Rio Grande water mains during the month, 83,903,000 gallons, equivalent to about 11,216,000 cubic feet, or the loss from seepage and evaporation, of which the latter was eight million cubic feet.

Dredging Gravel from the Chagres Arm of Gatun Lake.

The ladder dredge, No. 1, which, with the tug *DeLesseps* and two barges, was passed through the Chagres River bridge of the Panama railroad at Gamboa, on December 14, for service in the reclamation of gravel from beds submerged by Gatun Lake, has begun operations under a single shift, at a point about half a mile above the former village of Cruces. The cantilever crane on the unloading wharf at Gamboa is not ready for service on account of lack of connections for the supplying of electrical energy to its motors, and the gravel delivered at the wharf is being unloaded by two 25-ton locomotive cranes, mounted on a track along the outer side of the wharf, and equipped with grab buckets. The cranes discharge directly into dump cars and not into the storage bins which will be used in connection with unloading by cantilever crane.

Additions to Panama Railroad Locomotive Equipment.

Following the recent retirement of a great many locomotives from dirt train service in connection with dry excavation for the Canal, 10 of the 301-class locomotives, and locomotives No. 209 and No. 285, have been transferred to the Panama railroad to supplant most of the older and smaller Belgian locomotives in its yard service. With the Class 651 oil-burning locomotives, which are in good condition, the railroad has now a total of 30 large locomotives in service. Two light coal-burning locomotives of an old style, but fast on the road, No. 27 and 36, have been retained for service with the pay and sight-seeing trains. Locomotive No. 652 has been equipped with an 8½-inch compound air pump, in place of the usual 9½-inch single pump, so that it may maintain effective pressure in the brake systems of long trains, and will hereafter be ordinarily used exclusively in freight service.

GATUN SPILLWAY OPENED.

Lake Rises to Height of 84.7 Feet, But for the Present will be Kept at 84 Feet.

The gates and operating machinery at the spillway of Gatun Dam were tested on Saturday, December 27, and, beginning at 7 a. m., December 29, one gate has been left open throughout the day to lower the surface of Gatun Lake to elevation 84 feet above sea-level, at which it is to be held until the advancement of the work at Caño saddle warrants allowing the lake to rise higher. The testing began at 10 o'clock in the morning and was concluded in the afternoon. All the 14 gates were raised and lowered smoothly, and the tests were regarded as thoroughly satisfactory.

Prior to the operating tests, forces of the hydrographic office had made measurements of the leakage around the edges of the closed gates. Observations were carried on continuously for 48 hours, the flow being recorded every hour. A dike about two and a half feet high was built across the discharge channel below the ogee, using earth fill between dash boards, and a 2-foot rectangular weir, sharp-crested, with complete end contractions, was set in the center of the dike, with its crest one foot above the floor of the discharge channel. The measurements showed a total leakage from all the gates of from .8 cubic foot per second to a maximum of 2.4 cubic feet per second. The variation in leakage is in direct proportion to the temperature, the minimum occurring in the cool of the night and the maximum at the hottest time of day. This is, because the heat of the sun expands the top part of the gate, causing a slight buckling at the center. Additional apparatus was used to measure the leakage from a single gate which appeared to be most nearly watertight. The leakage from this gate varied between .005 and .0656 cubic feet per second. The head of water against the gates during these measurements was approximately 15 feet.

When the gate was opened on December 27 to lower the surface, the elevation of the lake was 84.76 feet above sealevel. It is estimated that in the absence of heavy rains on the watershed it will require about 150 hours, or approximately a week, to lower the surface to 84 feet above sealevel. When the surface is at 84.7, the lake contains 181.8 billion cubic feet of water; with a surface level of 84 feet, it contains 178.6 billion cubic feet, and the lowering will necessitate a loss of 3.2 billion cubic feet, in addition to the water which runs into the lake during the process of lowering.

It was anticipated that the currents through the opened gate would draw the floating islands and other debris to the spillway, and cause some interference with the passage of water. At this time the floating islands are for the most part up the Trinidad River, and

at other points some distance from the spillway, and as the current is intensely local, so that a cayuco can approach within 100 feet of the gate without being carried away, it is not likely that there will be much interference by debris at this time. In the future, a launch is to be employed in rounding up the floating islands and shoving them into the current, in order that they may be carried out to sea.

The sluice gates through the ogee of the spillway dam were closed on June 27, 1913, with the surface of the water 48.25 feet above sealevel. The rise of the lake to the morning of December 29 is summarized in this table:

Period.	Feet.
June 27 to July 1, inclusive.....	5.5
July.....	5.6
August.....	6.1
September.....	5.6
October.....	6.5
November.....	9.6
December 1 to 28, inclusive.....	2.8
Total.....	36.7

With the advent of the dry season, the rate of rise will decrease; but the dry season of 1912 is the only one recorded in which the rate of evaporation from the lake area exceeded the rate of run-off. In a normal dry season the supply of water is greater than the evaporation until the latter part of February after which it is slightly less, but for the entire season the supply exceeds the evaporation. It is estimated that in a season of minimum rainfall the lake, having an elevation of 87 feet at the end of the rainy season, will supply water for 48 lockages a day, and for the operation of the hydroelectric station, without lowering its surface below elevation 79½ feet, which would afford a minimum depth in the Canal channel of 39½ feet.

Changes at Bas Obispo made Necessary by Lake Rise.

The rise in Gatun Lake has necessitated the removal of the railroad track, in the section between the site of Matachin and Bas Obispo, to a point about 500 feet north of the Bas Obispo station; and from the end of the present track to a point about equidistant on the other side of the station; the track and its connections are being raised several feet, in order to maintain it above the water surface. The station and the commissary building have been lifted five feet, and a fill is being made in the triangular space occupied by them, and the site where the district sanitary inspector's office formerly stood. The water is now about even with the floor of the highway bridge across the Mandingo River, opposite the station, and the bridge is being raised about six feet by the Marine Corps, the original builders. The roadway of the concrete bridge on the highway to Empire is well above maximum lake level. Below and above these bridges, where once was a ravine with a shallow stream at its bottom, is now a broad and stagnant estuary of the lake. The native houses on the bank of this stream, just south of the station, have been abandoned, and the Canal village of Bas Obispo is being deserted, so that the settlement presents the appearance of an outpost being forced back by the advance of the lake. The sites of the demolished Commission hotel, the quartermaster's storehouse, and the sanitary office are now under water, and forces of the Quartermaster's Department are engaged in removing American quarters, which will be rebuilt at Ancon. Numerous old French quarters of various types will be left

on the hills, north of the Marine Corps camp, and may later be occupied by members of the Corps.

Pipe for Miraflores Water Supply.

The new 30-inch cast steel pipe for carrying the water supply for the south end of the Canal and the city of Panama from the Miraflores purification plant, has arrived from the United States, being furnished on Washington order No. 41056. This pipe is being distributed between the site of the purification plant on Miraflores Hill, east of the spillway, and that of the new Ancon pumping station to be built near the northwest base of Ancon Hill. The pipe is cast in lengths of 12 feet, and amounts to approximately 260 carloads, of from six to nine pieces each, weighing approximately 3,700 tons. It is being distributed by means of a locomotive crane, attached to a train made up of eight cars at a time and handled by a locomotive. The 16-inch cast iron pipe main for connecting the new Ancon pumping station with the new high service reservoir on Ancon Hill is also being distributed preparatory for laying. This 16-inch pipe was reclaimed from the former line from Rio Grande reservoir.

Change in Location of Water Mains at Pacific End.

In connection with the new waterworks system for the Pacific end of the Canal, it has been decided to lay the new 30-inch main, and to relay the existing 20-inch and 16-inch mains, in a straight line from Diablo Hill to a point immediately below the new administration building at Balboa, instead of using the present route direct to the Ancon pump station. This will carry the lines across the swamp lying between Diablo Hill and the Panama railroad between Panama and Balboa, and is expected to effect a saving of about 4,000 lineal feet each of 30-inch, 20-inch, and 16-inch cast iron pipe over any other possible location on suitable ground, together with a saving in cost of approximately \$65,000. It will also result in a saving in friction head of about 20 feet. A broad *trocha* has already been cut out along the new route and marked with stakes.

Sinking of the "Terrier."

The drill boat *Terrier*, a unit of the Sixth Division floating equipment used at the Atlantic end of the Canal, sank about 5.30 o'clock Saturday evening, December 27, in the French canal opposite dock No. 11, where it has been drilling holes for blasting in the coral rock bottom. On examination, it was found that one of the 5-inch drill hole casings had been forced up through the bottom of the hull, and it is thought that the hull had sprung a leak and settled down on the pipe, as normally there would be a clearance of about a foot and a half between the top of the casing and the bottom of the hull. The boat lay on the bottom in about nine feet of water; forces are already engaged in raising it.

The vessel was rebuilt at the dry dock shops from an old French hull in 1907, at a cost, including appraised value of hull and machinery, but not the drills, of \$23,500. It is nonpropelling, and has a length of 72 feet six inches, beam of 18 feet six inches, and depth of seven feet six inches; with a gross tonnage of 125. It is equipped with a horizontal French boiler 15 feet long, and 62 inches in diameter, eight Star well drills, 5 by 5-inch engines, without

trucks, and two Canton-Hughes duplex pumps. It was out of service for about a year, and would probably have been retired permanently after the completion of the present work.

Dedication of New Gorgona.

The site set aside by the Government of Panama from public lands on the west coast of the Bay of Panama, about 40 miles south of the city of Panama, for the proposed town of New Gorgona, to be settled principally by persons removed from the area of Gatun Lake, was formerly dedicated on Tuesday, December 30. A party, including the President of Panama, the Secretary of Foreign Relations, the Secretary of Public Works, the Secretary of Public Instruction, members of the diplomatic corps in Panama, the bishop of the diocese, and numerous guests, accompanied by the band of the Republic, sailed from the city of Panama at 7 a. m., to take part in the ceremony. The bishop pronounced an invocation on the town and dedicated a memorial tablet near the center of the site. Addresses were made afterward by the President, the Secretary of Public Instruction, and the bishop, and an address for the citizens was made by Señor Tomas Posada, a resident of New Gorgona, who set forth the primary needs of the community, as follows: A sufficient water supply, an allotment of agricultural lands, a bridge across the Chame River, and transportation to New Gorgona of building material stored on dump No. 6 at the time the houses in Gorgona and vicinity were abolished. After a luncheon in the school-building, the party embarked for Panama, arriving at about 10 p. m. New Gorgona has now a population of between 500 and 600 people, some of whom have erected their houses, but the most of whom continue to live in the temporary quarters provided by the Government. Roads have been cleared and telegraph connections established. The site of the town is a level plateau rising about 50 feet above the sea, and the agricultural lands are about two miles back from the coast.

Progress on Transmission Line.

Track-span bridges for carrying the 44,000-volt transmission line, which is to distribute electrical energy from the hydroelectric station at Gatun, have been erected between Miraflores and Gamboa, and from Caimito to Frijoles. Work between Gamboa and Caimito has been deferred on account of operations of the Panama railroad in locating a permanent track through the dumping area, north of Gamboa. Approximately 275 bridges have been erected, and foundations have been placed between Miraflores and Mindi, with the exception of the 4-mile stretch between Gamboa and Caimito. Insulators have been suspended from the side-arms of the bridges, between Paraiso and a point about two miles south of New Culebra. Several of these have been broken by thoughtless or malicious persons, and, as they cost about \$18 each, the Division of Police and Prisons has been requested to take steps to protect them.

On account of the abolition of some of the construction divisions and consequent reorganization, the Subsistence Department has asked the various departments and divisions to revise their orders for ice, in order that it may formulate a new schedule of deliveries, to be placed in effect shortly after January 1.

SOCIAL LIFE OF THE ZONE.

Woman's Clubs.

At the meeting of the Cristobal Woman's Club on January 7, Dr. M. E. Connor will speak on "Eugenics." The subject for the month is the social problem and related topics. The general meeting will be on January 21, when there will be a paper by a club member, followed by an open discussion.

Church Notes.

The corner stone of the new building of the United Methodist Church in Pedro Miguel was laid on Sunday, December 28, Mrs. William Tomey of Balboa performing the ceremony. The church ministers to a congregation of West Indian negroes, the pastor being the Rev. C. M. Anderson.

The meeting of the Woman's Altar Guild of St. Luke's Hospital Chapel will be held at the residence of Mrs. Charles F. Mason on Tuesday afternoon, January 6, at 4 o'clock. At the annual Christmas bazaar held in the parish hall of St. Ferdinand's Church, Empire, on December 12, 13, and 14, about \$300 gold was raised.

Headquarters of Pythian Sisters Changed to Ancon.

The auxiliary order of the Pythian Sisters has removed its headquarters from Las Cascadas to Ancon, where the meetings are held in the lodge hall on the first and third Thursday afternoons in each month, beginning at 2:30 o'clock. At the meeting on December 18, the second to be held in the new quarters, an election of officers was held, as follows: Most excellent chief, Susie Reese, Corozal; excellent senior, May Jordan, Pedro Miguel; excellent junior, Hannah Smith, Empire; mistress of records and correspondence, Ida Hollowell, Pedro Miguel; manager of the temple, Mary Wagner, Pedro Miguel; mistress of finance, Theresa Blake, Ancon; protector of the temple, Lettie Peterson, Panama; guard of the inner temple, Marion Stanner, Las Cascadas; past chief and installing officer, Annie N. Wilson, Paraiso.

Christmas Box for Palo Seco Asylum.

The Elysitis James Education Committee, which is composed of Canal Zone club women, sent the annual Christmas box to the patients in the leper asylum at Palo Seco, each inmate of the institution being remembered. The gifts consisted of toys for the children, one doll for the only little girl patient, ribbons, perfumery and statues for the women, playing cards, Spanish and American pipes, tobacco, cigarettes, and cigars, checker boards, dominos, and outdoor games, including a baseball bat and ball, air gun and target, for the men. There were also Christmas bells for decorations, and several boxes of candy. Fancy neck bows, strands of beads, and white lawn waists for the women were donated to the box. The usual sum of \$30 was expended by the committee for this box, and \$5 was added as a private donation. There are 50 patients in the asylum at present, six young children, 13 women, and 31 men.

The Canal Zone Public Schools.

The public schools, which were closed for the Christmas holidays on December 19, will reconvene on Monday, January 5, 1914. The following changes have been made: There will be one school at Las Cascadas for the first, second, and third grades only; children in the other grades will be transported to

Empire by brake service. This school will occupy the old Las Cascadas schoolhouse, which had been remodeled for the accommodation of two families, and is now restored to its original purpose. The partitions will be taken out, and desks, benches, and other schoolroom equipment will be installed. Miss Birmingham will be in charge of this school. In order to relieve the crowded condition in the Ancon school, the two rooms over the Commission hotel will be opened for the accommodation of the sixth, seventh, and eighth grades. The assembly room in the Ancon schoolbuilding will be occupied by the high school only.

Knights of Columbus.

The attention of members not affiliated with either of the Isthmian councils, who desire to receive the third and fourth degrees of knighthood, is called to the necessity of securing permission from their home council. The degrees will probably be exemplified on the 22d and 23d of February. Further information can be secured by communicating with C. I. Cate, G. K., Balboa, or A. P. E. Doyle, G. K., Cristobal.

PERSONAL.

Senator Thomas J. Walsh of Montana, and daughter; Representative James Manahan of Minnesota, accompanied by his wife and daughter, and Representative Winfield S. Hammond of Minnesota, arrived on the steamer *Panama*, which docked at Cristobal, on Tuesday, December 30, on a visit to the Canal.

Capt. Courtland Nixon, U. S. A., depot quartermaster and purchasing agent of the Canal Commission on the Isthmus, was relieved from duty, and will sail for New York on the steamer *Cristobal* leaving Cristobal, January 3, 1914, having been transferred to the service in the United States. He arrived on the Isthmus on September 18, 1908, and was immediately placed in charge of the supply depot at Mount Hope, the printing plant, and the operations on Dock 14, consisting principally of the unloading of supplies from ships. He was graduated from Princeton University, with the degree of civil engineer, in the class of 1895, and was employed on various engineering projects for three years. On July 9, 1898, he was given his commission as Second Lieutenant in the First United States Infantry. He was promoted to First Lieutenant in the same organization on March 9, 1899, and to captain in the Second Infantry on April 14, 1904, and saw service, first in Cuba, and later, in the Philippines. He served as assistant to the depot quartermaster during the relief work following the earthquake and fire in San Francisco, and for nearly two years prior to his transfer to the Isthmian Service, he was stationed at the quartermaster's supply depot at Philadelphia.

Mr. F. R. Blunt, the newly appointed trainmaster of the Panama Railroad Company, arrived on the Isthmus on the *Panama*, on Tuesday, December 30. He occupied the same position with the Panama Railroad Company from March 17, 1908 to March 15, 1910.

Permits to Carry Firearms.

The General Counsel of the Canal Commission has ruled that holders of permits to

carry firearms running through the current fiscal year, obtained under the old law, must take out another permit under the new law, which became effective on December 26, 1913. The text of this law was published in THE CANAL RECORD of November 26, 1913.

In order to facilitate the making of applications for the having or carrying of firearms, in accordance with the Executive Order of November 7, 1913, all Zone police stations will be provided with a supply of C. A. Dept. Form 931, "Application for permit to carry firearms," where they may be secured by those desiring to make application for such permits.

Obituary.

Edward P. Halloran, a former white American employe of the Canal Commission, died at Ancon Hospital on Wednesday, December 24. He was 32 years of age, unmarried, and had been on the Isthmus since June 25, 1907. He was first employed as a timekeeper in the old department of Excavation and Dredging, in the office at Empire, was afterwards transferred to the Substistence Department, and on September 1, 1909, he was appointed assistant at the Hotel Tivoli, a position he held until May 5, 1910. Since that time he has been reemployed on several occasions. His brother, George B. Halloran, is an employe of the Fourth Division, living at Empire. His father, Paul Halloran, resides at No. 237 Savin Hill avenue, Boston.

Glenni V. Wellman, who, until September 13, 1913, was a steamshovel craneman in the employ of the Fifth Division, died at his home in Ashville, N. Y., on Wednesday, December 10. He was 35 years of age, and entered the Canal service on September 20, 1912. His wife and four children survive him.

Warren E. Brendle, a private in the Tenth Infantry at Las Cascadas, was accidentally drowned near Camp Elliott on Monday, December 15. He was 19 years of age, unmarried, and had been on the Isthmus one year and one month. He was a native of Bernville, Pa. His father resides at No. 423 Pear street, Reading, Pa. The interment took place at Ancon cemetery.

Mrs. Johnson, wife of J. C. Johnson, residing at Corozal, died at Ancon Hospital on December 19. She was a native of Costa Rica, 19 years of age, and had been on the Isthmus only four months.

Missing Men.

Information is desired as to the whereabouts of G. E. Marshall, formerly in the employ of the Commission, who is supposed to be residing on the Isthmus. Address replies to the Chairman, Culebra.

Any one having information regarding the whereabouts of Mr. Thomas Horseman, formerly a member of the Tenth Infantry at Las Cascadas, and later, employed by the American Bridge Company at Balboa, who is supposed to be on the Isthmus, is requested to communicate with the American Legation, Panama.

Any one having information regarding the whereabouts of Mr. Joseph Coyne, who is supposed to be on the Isthmus, is requested to communicate with THE CANAL RECORD, Ancon.

LOST—Between Ancon, and Pedro Miguel Lock, a pair of amber-colored spectacles. Finder please return to John Gray, paint foreman, First Division Pedro Miguel.

RAILROAD INCREASES INCOME.

Panama Railroad and Steamship Operations for Past Fiscal Year Show Gains.

The net income of the Panama railroad and steamship line during the fiscal year ending June 30, 1913, after meeting the total cost of operation, together with fixed charges aggregating \$113,585.39, and charges for depreciation of rolling stock, floating, and plant equipment, amounting to \$268,942.62, was \$2,179,175.50, an increase of \$417,126.28 over the net income during the preceding fiscal year.

At the close of the fiscal year, the company's funds in bank amounted to \$2,520,216.13, and, in addition, there was held in the reserve fund established September 12, 1911, savings bank securities purchased at a cost of \$1,590,234.75, an increase of \$96,771.25, due to a reinvestment of accumulated interest. The sum of \$244,694.92, representing the total of losses incurred by the company from March 4, 1910 to June 30, 1913, of a character ordinarily recoverable under fire and marine insurance, but by Congressional enactment not so underwritten since the first mentioned date, has been carried to the debit of the company's "Profit and loss" account. The status of the company's indebtedness to the United States Government remains unchanged. This indebtedness amounts to \$3,247,332.11.

The gross operating revenues of the company for the fiscal year ending June 30, 1913, amounted to \$6,750,321.12, an increase over 1912 of \$211,428.40. The gross operating expenses for the same period were \$4,699,978.52, a decrease of \$154,307.94, as compared with the preceding year, making the total gain in operating revenue over operating expenses \$365,736.34.

RAILROAD OPERATIONS.

The operating revenue of the railroad from all sources shows an increase of \$57,674.23. The gains were, as follows: Seven per cent on local commercial freight; .35 per cent on local I. C. C. freight; 22.23 per cent on through passenger traffic; 11.40 per cent on local passenger traffic, and 15.44 per cent on other transportation revenue. The decreases were confined to a loss of 3.63 per cent on through commercial freight, and 5.69 per cent on nontransportation revenue. The net increase is equivalent to 1.27 per cent.

Passenger traffic.—The number of first-class passengers carried by the railroad during the fiscal year was 877,589, as compared with 777,121 during the preceding year, a gain of 12.93 per cent. The number of second-class passengers carried was 2,039,068, as compared with 1,980,550 during 1911-12, a gain of 2.95 per cent. The gross revenue from the transportation of passengers was \$826,398.54, an increase of \$88,651.18, or 12.02 per cent. The revenue received from through passengers showed an increase of \$9,148.17, or 22.23 per cent; the number of these passengers increased 8,317, of 55.16 per cent, as compared with the previous twelvemonth. Local passengers showed a gain in revenue of \$79,503.01, or 11.41 per cent, and an increase in the number carried of 150,669, or 5.50 per cent.

Freight traffic.—The following table shows the freight tonnage, including company freight, carried over the railroad during the fiscal years 1911-12 and 1912-13:

DIRECTION.	1913	1912	Increase	Decrease
	Tons	Tons	Per cent	Per cent
Southbound, to Panama.....	1,359,297	1,376,241	1.23
Northbound, to Colon.....	667,555	494,835	34.90
Total.....	2,026,852	1,871,076	8.33

The total revenue freight traffic of the railroad during the past fiscal year, including both merchandise and coal, was 1,949,215 tons, an increase of 132,296 tons, or 7.28 per cent. The total revenue derived from this traffic was \$2,785,512.70, a decrease of \$35,438.44, or 1.26 per cent. In addition to the above traffic, 77,637 tons of company freight, 2,188 tons of mails and baggage, and 3,221 tons of express were hauled. Of the total freight tonnage hauled, 67.06 per cent was southbound, and 32.94 per cent northbound, as compared with percentages of 73.55 and 26.45, respectively, for the year before. The through freight traffic was 29.31 per cent of the total tonnage carried, as against 36.80 per cent for the previous year. Coal, including that of the company, comprised 42.15 per cent of the local traffic southbound.

Summary.—The following table summarizes railroad operations on the Isthmus during the fiscal year ending June 30, 1913:

ITEMS.	1913	1912	Increase	Decrease	P. C.
Average miles operated.....	61.98	50.79	11.19	22.03
Gross operating revenue.....	\$4,599,163.13	\$4,541,488.90	\$57,674.23	1.27
Operating expenses.....	\$2,770,310.45	\$2,655,121.51	\$115,188.94	4.34
Net operating revenue.....	\$1,828,852.68	\$1,886,367.39	\$57,514.71	3.05
Per cent expense to revenue.....	60.24	58.46	1.78	3.04
Gross revenue per mile.....	\$74,203.99	\$89,416.99	\$15,213.00	17.01
Operating expense per mile.....	\$44,696.84	\$52,276.46	\$7,579.62	14.50
Net revenue per mile.....	29,507.15	37,140.53	\$7,633.38	20.55
Revenue per passenger train mile.....	\$6.24	\$6.2602	.32
Revenue per freight train mile.....	\$11.94	\$11.47	\$.47	4.10
Amount operating pay rolls.....	\$1,709,211.80	\$1,701,106.32	\$8,105.4848
Tons per loaded car.....	23.63	22.26	1.37	6.15
Tons per train.....	353.21	295.23	57.98	19.64
Locomotive mileage—					
Freight, passenger, and switch.....	892,380	803,181	89,199	11.11
Work train.....	200,295	190,230	10,065	5.29
Passenger train mileage.....	184,964	163,083	21,881	13.42
Freight train mileage.....	235,228	248,741	13,513	5.43

The total trackage on June 30, 1913, under control of the railroad, amounted to 143.19 miles.

Gravel pits.—In the operation of the gravel pits, the following amounts were excavated: From the Gamboa beds, 50,295 cubic yards; from the I. C. C. pit at Matachin, 34,407 cubic yards, and from the I. C. C. pit at dump No. 1, 24,521 cubic yards a total of 109,223 cubic yards.

Land department.—During the past fiscal year, there has been an increase in the number of lots leased in Colon, due to the fact that the lots on the east of E street were approved for building operations. At Panama, there was a slight increase in rentals due to additional lots in the district of Guachapali having been leased. At New Frijoles, Gatun, Empire, and Culebra, the rentals remained about the same; at Folks River, Cristobal, there was a small increase, and at Monte Lirio, the number was slightly less. There was a slight increase in the number of agricultural leases, 232 being in effect on June 30, 1913, as compared with 228 on the same date the previous year. The total number of land and lot leases in effect June 30, 1913, was 2,355, as compared with 2,312 on the same date in 1912. These covered 2,523 lots or parcels of land in 1913, as against 2,465 in 1912. The total amount of rental accruing from these leases during the past fiscal year was \$143,496.57, as compared with \$126,622.16 during the fiscal year 1911-12. Of the total revenue from rentals, Colon produced \$90,790.28, which includes rental from offices and stores in the new concrete building; Panama produced \$20,989.79, and Empire, \$12,819.60.

The general policy of issuing leases at nominal cost for ecclesiastical, charitable, and educational purposes was continued, and there are 76 such lots, divided, as follows: Churches, 57; parks, four; schools, 10; fire stations, four, and municipal wash house, one.

Telegraph and telephone lines.—This department experienced an active year, due to preparation for permanent installation and changes in the existing system. The new work performed included installation of underground cables in Colon and Cristobal; rebuilding of the main line between Colon and Gatun, and the stringing of a 30-pair No. 19 gage cable; placing of an additional 10-pin cross-arm on the main line between Gatun and Gamboa; substitution of glass insulators of the Hemingway type for porcelain insulators along the relocated line, made necessary by low insulation; completing construction of the pole line between Gamboa and Corozal and the stringing of a 30-pair No. 19 gage cable for a part of

the distance; placing wires underground in iron pipe at Balboa, made necessary on account of the heavy blasting and other troubles; installation of a No. 19 gage cable from the Ancon exchange into Panama to relieve the congestion around the railroad station; extension of the cable from the Ancon exchange, through East Balboa, to Balboa, and adding to the number of conductors on account of increased telephone requirements at the latter place; construction of a pipe pole line with two 6-pin cross-arms from Corozal to Balboa; relocation of the line between Gamboa and Alhajuela by placing it on the 100-foot contour line; construction of a line about two and one-half miles long, equipped with five 10-pin cross-arms, from the relocated line to the Empire suspension bridge, thence to the Empire exchange, for the purpose of connecting the trunk lines with the exchange; installation of a 140-line common battery switchboard in the Hotel Washington; and removal of one section of No. 9-D switchboard from the Gatun to the Ancon exchange to take care of increased business at that point. A switchboard of the type similar to that in the new Hotel Washington, except that it has two operators' positions, was ordered for the Hotel Tivoli; also, a complete central office switchboard and equipment for the new exchange at Balboa. Experiments were conducted during the year in treating the different types of coils used in telephonic apparatus, both telephone and switchboard, in such a manner as to make them waterproof and increase their life, with good results. All of the switchboards, apparatus, lines, and instruments were in good condition at the close of the fiscal year, with the exception of the switchboard and apparatus at Empire, which have been largely responsible for the poor trunking service at that point. This

condition will be rectified when it is found necessary to reinstall the equipment.

The trunk traffic showed a considerable increase over the previous year. On June 10, 1912, 3,809 completed calls, with 1,080 "Busies" were recorded during a period of eight hours, with 33 trunks in operation. On June 10, 1913, the same record showed 7,154 completed calls, and 2,457 "Busies," with 41 trunks in operation, an apparent increase in traffic of 3,345 completed calls per day, almost doubling the record of June 10, 1912, but with only eight additional trunks in operation.

Track department—During the year, 14,365 feet of 90-pound rail, and 30,119 feet of 70-pound rail were used in track repairs. This rail was used to replace 36,935 feet of 70-pound rail, 1,891 feet of 90-pound rail, and 5,658 feet of 56-pound rail. There were used in repairs, 4,854 creosoted ties, 12,125 untreated ties, and 1,528 hardwood ties. Ballast to the amount of 8,020 cubic yards was applied to the line between Gatun and Tower R. 3,300 cubic yards on the Gold Hill line, and 2,040 cubic yards were used elsewhere.

Hotel operations—During the period July 1, 1912 to March 23, 1913, a total of 56,573 meals were furnished to employees of the railroad and Canal Commission at the old Washington House, at 30 cents, and 23,408 meals to transients at various prices. The receipts of the old hotel up to the time the new hotel was opened on March 23, amounted to \$46,008.13, and the expenses to \$47,502, a loss of \$1,493.87, as compared with a gain of \$302.06 for the same months in the previous year. The above receipts include \$1,412.30 from the operations of the swimming pool.

The new Hotel Washington was officially opened on March 23, 1913, although some of the rooms had been in use from March 10. The gross revenue to June 30, 1913, amounted to \$34,448.81, and the expenses to \$46,058.59, a loss of \$11,609.78. On June 1, a reduction of \$2,200 a month was made in the pay roll.

STEAMSHIP OPERATIONS.

The operating revenue of the steamship line for the fiscal year was \$2,151,157.99, or \$153,754.17 in excess of the previous year. The deficit of \$201,761.13 last year was replaced this year by a net profit of \$221,489.92, thereby producing a combined increase in net revenue for the line of \$423,251.05. There was a decrease of 27,666 tons in amount of freight transported, but of only \$18,982.66 in revenue. The disproportionate decrease in tonnage and revenue is accounted for by a material reduction in unremunerative coastwise traffic, and a corresponding increase in the transportation of foreign freight at higher average through rates. The number of passengers carried increased 3,068, which resulted in a corresponding increase from that source of \$124,148.86. Mail earnings increased \$46,791.21 during the year.

The movement of cement to the Isthmus for the Canal work began in 1909. Since that time and up to June 30, 1913, a total of 1,105,828 tons of 2,000 pounds each, had been transported, 657,230 tons by the company's steamers, and 448,598 tons in extra steamers chartered for the purpose. During the past fiscal year, 145,679 tons were carried by the company's steamers at \$1.25 per net ton, and 78,383 tons were carried in vessels of foreign registry at \$2.40 per gross ton.

All the company's steamers were kept in

continuous operation during the fiscal year. Only two accidents occurred at sea, both to the steamer *Advance*, involving an expense in repairs of \$16,000 and \$4,000, respectively. All of the company's steamers are now equipped with certified life-saving apparatus materially in excess of the number of human lives each vessel is allowed by law to carry. Each vessel is also provided with a submarine signal outfit, and a duplicate wireless service plant operated by the Marconi Wireless Telegraph Company of America, successor to the United Wireless Telegraph Company. The risk of operation of the company's steamers, and other vessels as well, will be considerably reduced, when the lighthouse authorized by Congress to be erected on Navassa Island, at a cost of \$125,000, is completed. This unprotected island has always proved a menace to ships using the Crooked Channel route through the Bahama group. To meet the health requirements of the port of New York, a contract was entered into with the Fumigating and Fire Extinguishing Company of America, by which the company's steamers are fumigated at least once every six months.

The contract for bunker coal required by the company's steamers was awarded to F. R. Long and Company, for coal mined by the Ebensburg Coal Mining Company, at \$3.02 per ton, an increase of 13 cents per ton over the previous cost. This contract expires April 1, 1914.

FUTURE OF THE LINES.

The report of the vice-president for the past fiscal year states:

"There are multiplying evidences that the activities of the Panama railroad in the handling of local and through traffic will continue after the opening of the Canal, and, allowing a limited period for adjustment to new conditions on a progressively increasing scale; for that reason the course adopted by the Board of Directors, and concurred in by the owners in planning future operations and providing that all new construction and equipment work be permanent in character is fully warranted."

The report further states:

"The declared policy of the company contemplates continued operations of its steamship line after the opening of the Panama Canal to commerce. The movement of the greater part of the cement required on the Isthmus having been completed, there is a strong probability that the steamships *Ancon* and *Cristobal* will be withdrawn from our service, and necessity for two docks as at present will have been largely overcome, especially as a material reduction in the total tonnage to be handled by our vessels may be expected. Owing to the uncertain tenure of occupancy of the company's piers in New York, the necessity for permanently adequate accommodations for the line becomes a matter for serious consideration."

"At this writing, careful consideration is being given to the necessity for constructing an additional adjoining dock to replace the company's wooden piers Nos. 1, 2, and 4, in Colon, condemned by the Department of Sanitation for ultimate demolition on account of their unsanitary construction, and because the cost of maintaining them is out of proportion to their revenue earning capacity. The estimated cost of such a new pier is approximately \$1,000,000. An adequate return upon such an investment is almost assured by the extensive preparations in progress by domestic and foreign lines to avail of all terminal facilities afforded by the Panama Railroad Company at the Atlantic entrance to the Panama Canal."

Election of Officers.

At the regular meeting of Isthmian Canal Lodge, No. 1, Independent Order of Odd Fellows, held at Empire on Saturday evening, December 27, officers were elected for the ensuing term, as follows: Noble grand, Andrew Dunlop; vice-grand, F. H. McCain; secretary, H. W. Dohrmann; treasurer, Lewis A. Taber; trustee, R. R. Robinson. District Deputy Grand Sire B. F. Sisson, and suite, will install the newly-elected officers on Saturday evening, January 3. All members and visiting brothers are invited to be present.

INTERLOCKING PLANTS.

Twelve Layouts with 160 Active Levers now Maintained by the Panama Railroad.

Work has been about contested on a new interlocking plant at Cristobal, known as Tower A. The improvements consist of a new cabin, the connection of four additional switches, and the protection of all conflicting points by derails. The present plant is composed of 14 active levers; the rearranged apparatus will consist of a 36-lever machine, containing 33 active levers and controlling eight switches, nine derails, eight facing point locks, 11 mechanical dwarf and home signals, and two power-operated, semiautomatically controlled home signals. The cabin will be equipped with indicators showing the condition of the main track on either side of the cabin. The present small cabin will be used for the proposed interlocking plant at Summit.

The interlocking plant at Pedro Miguel, which was rearranged on account of recent track changes, was put in service again on November 2. This plant now contains 12 levers, controlling four switches, one derail, four facing point locks, one mechanical dwarf signal, and four power-operated home signals.

The telephone and signal department has plans prepared and material on hand to rebuild the present interlocking plant at the west leg of the Balboa wye, on account of proposed track changes. The new layout will consist of a 24-lever machine with 23 active levers, controlling six switches, six facing point locks, four derails, and nine home and dwarf signals. No electrical features will be incorporated within the functions of this point at present. The cabin has been constructed under the supervision of the Chief Quartermaster.

Plans have been approved and material ordered for an interlocking plant at the south leg or Panama end, of the Balboa wye. This plant will consist of a 24-lever machine, with 22 active levers, and will control four switches, six derails, four facing point locks, and nine mechanical home and dwarf signals. No electrical features will be used on this plant until the automatic signals are installed through this territory.

The question of installing an interlocking plant at Summit Cabin is under consideration, and, if approved, the plant will consist of an 8-lever machine with all levers active, and will control one switch, two derails, one facing point lock, and four signals.

The pontoon bridge near the present bridge No. 57½, will be equipped with locking devices and protected by semiautomatic signals as soon as it is put in place.

Not considering the authorized and proposed work, the Panama railroad is now maintaining and operating 12 plants, with 160 active levers.

Ancon Crusher.

Following is a statement of rock crushed at Ancon quarry during the week ending December 27:

DATE.	Hours worked.	Cubic yards.
Dec. 22	5 30	1,397
Dec. 23	7 40	2,133
Dec. 24	8 40	1,962
Dec. 25
Dec. 26	6 50	2,515
Dec. 27	8 35	1,720
Total	37.15	9,727

COMMISSION CLUBHOUSES.

Activities of the Young Men's Christian Association.

GENERAL.

The moving picture schedule for the week, January 5 to 10 is, as follows: Monday, Corozal; Tuesday, Balboa; Wednesday, Gatun; Thursday, Culebra; Friday, Cristobal; Saturday, Empire.

COROZAL.

The following high scores in bowling were made during the past week: *Tenpins*—Parkis, 235. *Duckpins*—Sims, 119, 101; King, 103, 100; Hartshorne, 100; Davis, 102; Steele, 102, 113; Ziller, 118; Parkis, 110; Goodnow, 106; Beall, 100; Otis, 100; *Candlepins*—Otis, 100.

An elimination duckpin tournament with 25 entries was started on December 29.

The clubhouse was crowded on Wednesday, December 24 (Christmas Eve), when the following program was carried out: "Merry Christmas," song, 25 small children; song, girls' chorus; "Story of Christmas," recitation, Hazel Smith; "Holy Child," recitation, Mary Grant; "Christmas Greeting," recitation, Randolph Davis; "If my papa were a dolly," recitation, Anna Cody; "Twas the night before Christmas," recitation, Hazel Mitchell; "Christ Child," recitation, Frank Fields; song, girls' chorus; "Good Christmas," recitation, Myrtle Horn; "Hard times for George," recitation, Guerdon Rudd; "Suppose," recitation, Arline Ballard; "Sleepy little baby mine," recitation, Dorothy Hill; "Dear Santa Claus," recitation, Ida Ruth Hammer; "Little boy blue," recitation, Alice Reese; "Dollie's lullaby," duet, Dorothy Rudd and Josie Cody.

Santa Claus appeared in person. Mail and presents were distributed from the stage, and the boys' gymnasium class drilled. Refreshments and home made cakes were served, and an old-fashioned fireplace with life-like logs blazed cheerily. The entertainment was arranged by the Sunday school in conjunction with the Y. M. C. A.; there were special electrical illuminations and decorations and almost the entire community gathered to make this one of the most pleasantly remembered affairs in the town's holiday activities.

During the moving picture show on Christmas night, special music was rendered by Hauss and Hauss; also, by Mr. Whitehead, accompanied by Mrs. Shady.

CULEBRA.

High scores in duckpins for the week were, as follows: Case, 110, 105, 100, 103, 117; Bechlem, 101, 101; Purchase, 100; Brown, 105, 102; Ferguson, 100; Kiernan, 112; Gunther, 101; DeCorra, 101, 115, 103, 102; R. Koperski, 103, 100, 100; Cornthwaite, 103; Duff, 119.

On December 23, in the local tournament, the "Whites" won from the "Blacks" by the score of 1,268 to 1,227.

On Christmas Eve, the Sunday school children gave a cantata at which Santa Claus distributed gifts and candy. The room was tastefully decorated under the direction of Mr. Ramsey. After the entertainment, the Y. M. C. A. furnished apples and lemonade, and three moving picture reels were shown. Mrs. Dickson was in charge of the program.

On Monday night, Dr. Poole, assisted by Mrs. Poole gave a lecture on "Pekin and the Great Wall," illustrated by colored slides and two moving picture reels. In addition, one reel showing the Panama Canal was exhibited. There were 200 people present.

On Sunday night, December 28, at the evening service, Dr. Poole gave a talk on Christmas in China, and spoke of some experiences there while a missionary 20 years ago. A large audience attended. A solo was given by Mr. Cantor, a new arrival at Culebra.

Dr. Poole will give an exhibition of moving pictures and colored slides, with descriptive lecture, on Tuesday, December 6, his subject being "Modern China and the revolution," also, a trip through Culebra Cut in moving pictures. Admission will be, as follows: Members, free; adult nonmembers, 25 cents; children, 15 cents.

The Pennsylvania State College Quartet will give a concert on Friday night, January 2. Admission will be, as follows: Members, free; adult nonmembers, 25 cents; children, 15 cents.

EMPIRE.

The Christmas entertainment held on Christmas Eve for the children of Empire, was attended by nearly 500 people. The program consisted of a cantata by the children "Santa Claus is coming," 24 children taking part. After the cantata, three special moving picture reels were shown. A Christmas tree, fully decorated and lighted, was on the stage, and each child present received a box of Christmas candy.

About 300 people attended the lecture given by Dr. Poole, on Friday, December 26, on "Old China." Dr. Poole's next entertainment will be on Monday, January 6, when he will describe "New China," and its recent

developments. He will also show a moving picture reel of the Culebra Cut taken last May.

Mr. Russell has taken the boys on two outings during the school holiday, one to the Mandingo River, and the other on a two days' trip to Chorrera.

GATUN.

The Y. M. C. A. building is appropriately decorated for the holiday season. A number of Christmas trees have been placed in different parts of the building, fancy green and red paper decorations and large Christmas bells adorn the walls and doorways, and colored electric lights have been strung across the ceilings. A toy Santa Claus and a large mechanical Teddy bear occupy the center of the lobby. A decorated Christmas tree stands to the left and partly in front of the stage in the entertainment hall.

Miss Lange of London, England, played for the motion pictures on December 23.

The Eduardo Unda Opera Company of Mexico City appeared at Gatun on Christmas Eve, December 24. Soprano, tenor, and baritone solos were sung, and a number of duet and chorus numbers were given in costume. Special scenery was used for the occasion. An informal "Smoker" and social was held in the reading room after the entertainment. Señorita Josefina Unda sang a special number for the men. Refreshments were served.

Special features of the religious service held at the clubhouse on Christmas morning were the address of Judge Brown and the singing of the male chorus.

Beginning at 11 a. m., on Christmas Day "Open House" was observed at the Y. M. C. A. until 11 p. m. In the evening the Pennsylvania State College Quartet gave a concert. After the concert, an informal reception was held on the first floor in honor of the company. The members of the clubhouse sang old college songs, and refreshments were served.

Dr. Frederic Poole, in a lecture on China, will be the attraction for New Year's night. "Open house" will be observed all day.

The "Old timers" played a game of basketball with a picked team from the "Boobs" and "Bolivars" on Tuesday, December 30.

CRISTOBAL.

The single folks' bowling tournament, held on December 22, resulted in the following scores:

Mr. W. Russell and Miss M. Stevens.....	482
Mr. Ernest Cotton and Miss Ida May Glawson....	481
Mr. G. R. Farr and Miss C. Mathews.....	472
Mr. H. Scheid and Miss Sutherland.....	458
Mr. D. Raymond and Miss G. Butler.....	447
Mr. S. Ashton and Miss C. Madison.....	421
Mr. E. H. Nash and Miss Nell Bliss.....	411
Mr. A. Gibson and Miss M. Butler.....	404
Mr. W. Fraser and Miss L. Madison.....	393
Mr. J. H. Gill and Miss Agnes Gibson.....	369

A packed hall greeted the cantata rendered by the children of Colon Beach and Cristobal on December 24 and 25. Santa Claus, Mr. E. A. Keeling, left quite a number of suggestive gifts for the men such as rattles, dolls, jumping jacks, tin horns, tin horses, hair tonic, etc.

Over three hundred attended the entertainment given by the Pennsylvania State College Quartet on Friday, December 26. A meeting was held afterward in the social hall downstairs, during which the quartet sang several numbers and Mr. Austin read two selections. The association members assisted in the impromptu entertainment by singing a number of the songs composed for the camp fire banquet.

Lieut.-Col. Eugene T. Wilson will be the first speaker in the new year before the discussion club. Col. Wilson will speak on "The tolls and traffic of the Panama Canal," on Thursday, January 8.

Supplies for the Canal.

The following steamers, with supplies for the Isthmian Canal Commission and Panama Railroad Company, arrived at the ports of Colon and Cristobal during the week ending December 27:

Tenadores, December 21, from New York, with 60 barrels paint, 70 cases electrical machinery, 120 pieces structural material, for First Division; 52 cases sheet copper, 20 crates structural material, for fortifications. 231 pieces structural material, for Panama Railroad Company; 50 bundles wire, for stock.

Cristobal, December 22, from New York, with 32 cases lime, for administration building, Balboa; 128 crates roof tile, 18 cases electrical machinery, 128 pieces structural material, for First Division; 33 cases electrical machinery, 94 pieces structural material, for Panama Railroad Company; 112 pieces structural material, for fortifications; 56,000 bags cement, 205,800 pounds coke, 303 bundles galvanized sheets, 400 drums chloride of lime, for stock; and a miscellaneous cargo, the whole consisting of 56,976 pieces, weighting 3,054 tons.

Nicosian, December 22, from Liverpool, with 20 bucket lips, for Sixth Division; 155 barrels carbolic acid, for stock.

Emil L. Boas, December 22, from New York, with

20 kegs sherardized bolts, for First Division; 509 bundles galvanized sheets, 200 cases polish, for stock.

Advance, December 24, from New York, with 50 boxes incandescent lamps, 17 packages electrical material, for Mechanical Division; 126 boxes paint, for Lighthouse Subdivision; 344 packages electrical material, 106 crates roof tile, for First Division; 120 pieces pipe, for Second Division; 67 packages elevator material, for administration building, Balboa; 25 cases water coolers, 211 cases lubricating oil, for stock; and a miscellaneous cargo, the whole consisting of 1,136 pieces weighting 86 tons.

Parissima, December 22, from New Orleans, with 45 pieces piling, 50 pieces oak lumber, for Atlantic Division; 11 pieces oak lumber, for Sixth Division; 20 pieces oak lumber, 378 pieces oak lumber, for Mechanical Division.

Almirante, December 24, from New York, with 12 packages structural material, for Mechanical Division; 26 packages structural material, for First Division; 15 kegs wire nails, 55 crates water pails, 126 cases caustic soda, for stock.

Turriuba, December 25, from New Orleans, with 313 pieces oak lumber, for Mechanical Division; 169 pieces oak lumber, for Atlantic Division; nine pieces oak lumber, for Sixth Division; 23 barrels rosin, for stock.

Rainfall, Dec. 1 to Dec. 27, 1913, Inclusive.

OFFICIAL CIRCULARS.

Changes in Fourth Division.

CULEBRA, C. Z., December 24, 1913.

CIRCULAR No. 183-z-3:

Effective January 1, 1914, the following changes in organization will be made:

The positions of resident engineer, superintendent, and assistant superintendent of the First District, and superintendent of the Second District, in the Fourth Division, Chief Engineer's Office, will be abolished.

The work remaining to be done in connection with relieving the load on the east side of the Cut north of Gold Hill, the construction of the Naos Island breakwater, and the fill at the new townsite, will be in charge of a general superintendent, Fourth Division. Mr. George A. Greenslade, inspector, will be appointed general superintendent.

GEO. W. GOETHALS,
Chairman and Chief Engineer.

Accountable Officer, Fourth Division.

CULEBRA, C. Z., December 27, 1913.

CIRCULAR No. 514-B:

Effective January 1, 1914, Mr. George A. Greenslade, general superintendent, Fourth Division, Office of the Chief Engineer, is designated an accountable officer, and as such will make returns of property now in use by the Fourth Division, instead of Mr. C. A. McIlvaine, chief clerk.

GEO. W. GOETHALS,
Chairman.

Procedure in Issuance of Property Releases.

CULEBRA, C. Z., December 23, 1913.

ALL ACCOUNTABLE OFFICERS:

So that there may be uniformity in the matter of issuance of property releases for responsible and accountable officers, the following procedure will become effective January 1, 1914:

Releases for responsible officers.—

To be issued by accountable officers.

Releases for accountable officers.—

To be issued by Examiner of Accounts.

Accountable officers will furnish the chief timekeeper, with copy to the surveying officer, with a list of all responsible officers as soon as practicable, and will furnish list of changes as same are made from time to time. The Examiner of Accounts will furnish the chief timekeeper, with copy to the surveying officer, with a list of all accountable officers, also advise him of changes as same are made from time to time.

GEO. W. GOETHALS,
Chairman.

Hours of Work and Rate of Pay of Unskilled Silver Laborers Not Working Under or With Gold Employes.

CULEBRA, C. Z., December 27, 1913.

CIRCULAR No. 229-z-8:

Effective January 2, 1914, so far as practicable, all unskilled silver labor not working under or with gold employes whose hours of work are limited to eight hours by law, shall be put on a nine, or preferably a 10-hour day, in which case the pay shall be 10 cents an hour. This rate shall apply to all West Indians, East Indians, and Central and South American common labor.

It is not considered necessary or desirable to employ European unskilled labor on a 10-hour day at a greater rate than 16 cents an hour, and it is believed, by giving proper attention to the matter that where it is desired to retain European labor there will be no difficulty in doing so at the 16-cent rate for a nine or a 10-hour day.

GEO. W. GOETHALS,
Chairman and Chief Engineer.

Credits Allowed for Scrap Material.

CULEBRA, C. Z., December 27, 1913.

CIRCULAR No. 323-y:

Effective January 1, 1914, the following credits will be allowed for scrap material turned over to the Quartermaster's Department:

	Cents per lb.
Leather.....	4
Hose.....	2
Rubber.....	2
Rope.....	2

GEO. W. GOETHALS,
Chairman.

Receiving and Auditing Returns of Property.

CULEBRA, C. Z., December 29, 1913.

CIRCULAR No. 183-z-4:

Effective January 1, 1914, with the approval of the Secretary of War, the duty of receiving and auditing the returns of property, and the duty of making test checks of such property from time to time, will be transferred from the Chief Quartermaster to the Examiner of Accounts. The present regulations govern-

ing property accounts will continue in force, subject to any modifications which may be authorized by the Chairman.

GEO. W. GOETHALS,
Chairman and Chief Engineer.

Rates for Use of Sixth Division Floating Shop.

CULEBRA, C. Z., December 27, 1913.

CIRCULAR No. 169-P:

The following rates are established for the use of the floating shop of the Sixth Division:

Departments and divisions (per hour).....\$3.00
Individuals and companies (per hour).....5.00

GEO. W. GOETHALS,
Chairman and Chief Engineer.

Gamboa Gravel Handling Plant.

CULEBRA, C. Z., December 24, 1913.

LIEUT. F. MEARS, General Superintendent,

Panama Railroad Company,

Cristobal, C. Z.

Sir—In reply to your letter of the 20th instant, file 219-7, relative to the gravel handling plant at Gamboa, I beg to state that as the engineering department of the Panama Railroad Company is to continue under you for the present, the Panama Railroad Company will run the gravel plant and you can go ahead and make your arrangements for operating same.

Respectfully,

GEO. W. GOETHALS,
Chairman.

Panama Railroad Changes.

PANAMA RAILROAD COMPANY,

OFFICE OF GENERAL SUPERINTENDENT,

COLON, R. P., December 30, 1913.

CIRCULAR No. 326:

To all concerned—Effective January 1, 1914, the following changes have been made in organization: The positions of terminal trainmaster, Colon and Panama, will be abolished. Mr. F. R. Blunt will be appointed trainmaster for the Panama Railroad Company, reporting to this office. Mr. E. S. Waid will be appointed general yardmaster, Colon and Cristobal yards, and Mr. S. W. Heald will be appointed general yardmaster, Panama and Balboa yards, reporting to the trainmaster.

Approved: F. MEARS,
General Superintendent.

GEO. W. GOETHALS,
President.

Operation of Single Track from Caimito to Gamboa Cabin.

PANAMA RAILROAD COMPANY,

OFFICE OF GENERAL SUPERINTENDENT,

COLON, R. P., December 27, 1913.

G. S. BULLETIN No. 27:

All concerned—Effective 12.30 p. m., Monday, December 29, 1913, rule No. 15 in time table No. 16 is annulled, and single track will be operated from Caimito cabin to Gamboa cabin, as follows: Present north main will be used Caimito cabin to old dump No. 6, and south main dump No. 6, to Gamboa. Present south main will be cut into north main near dump No. 7, to form Caimito passing track. Southward trains taking siding at Caimito will head in at Caimito interlocking plant.

F. MEARS,
General Superintendent.

Card Passes.

PANAMA RAILROAD COMPANY,

OFFICE OF GENERAL SUPERINTENDENT,

COLON, R. P., December 29, 1913.

CIRCULAR No. 322:

All concerned—All January, 1913 card passes will be honored for passage up to and including January 15, 1914.

F. MEARS,
General Superintendent.

Sailing of the "Cristobal."

PANAMA RAILROAD COMPANY,

OFFICE OF GENERAL SUPERINTENDENT,

COLON, R. P., December 26, 1913.

CIRCULAR No. 319:

To all concerned—The sailing date of the steamer *Cristobal* has been set for 3 p. m. on Saturday, January 3, 1914, from Pier 11, Cristobal.

F. MEARS,
General Superintendent.

Police Station at Las Cascadas Abandoned.

DEPARTMENT OF CIVIL ADMINISTRATION,

DIVISION OF POLICE AND PRISONS,

ANCON, C. Z., December 15, 1913.

GENERAL ORDER No. 1802:

Effective this date, the police station at Las Cascadas, C. Z., will be abandoned, and the necessary protection for that town will be furnished from Empire central station.

All property of the Quartermaster's Department on

hand in excess of the requirements should be turned in. The property of the Department of Civil Administration, records, and files, should be forwarded to Empire central station.

C. W. BARBER,
Chief of Division.

Automobile Tariff.

ANCON, C. Z., December 19, 1913.

Under the authority vested in me by the Ordinance enacted by the Isthmian Canal Commission on August 25, 1910, and approved by the Secretary of War on December 3, 1910, I hereby amend the schedule of rates for the transportation of passengers over Canal Zone streets and roads, established in the Orders of the Chairman, in charge of Department of Civil Administration, dated July 10, 1913, as follows:

RATES BY THE HOUR.
(All rates in United States currency.)

CAPACITY OF CAR.	For first hour	For each hour thereafter
5 passengers.....	\$4.00	\$3.00
6 passengers.....	5.00	4.00
7 passengers.....	6.00	5.00

For cars having a seating capacity less than that above indicated, the rate for the first hour shall not exceed \$1 for each passenger carried, exclusive of the chauffeur, and for each hour thereafter \$1 less than the first hourly rate for the car.

For any car having a normal seating capacity of more than seven passengers, the charge shall be computed for the first hour at a rate not to exceed \$1 for each passenger for which such car has a normal seating capacity, not including the chauffeur, and for each hour thereafter \$1 less than the first hourly rate.

LOCAL POINT RATES—CANAL ZONE AND CITY OF PANAMA.

Where automobiles engage in the business of carrying one or more passengers between the points shown in the following table, and such automobiles are not hired upon an hourly basis, the charges for transportation furnished between such points shall not be in excess of those hereinafter prescribed.

PANAMA, ANCON, AND BALBOA.

BETWEEN ANY POINT IN	AND	U.S. currency.
Ancon or Panama.	Any other point in Ancon (outside of hospital reservation) or Panama. One way—For each person....	\$0.50
Ancon or Panama.	Balboa docks and return: 5-passenger car.....	3.50
	6-passenger car.....	4.00
	7-passenger car.....	4.50
Ancon or Panama.	No reduction for one way. Old Panama and return: 5-passenger car.....	4.00
	6-passenger car.....	5.00
	7-passenger car.....	6.00

NOTE.—The rate to Old Panama and return is that above shown, provided the time consumed does not exceed one (1) hour, in which case the charge should be computed upon the hourly basis.

The rates hereinabove prescribed are made reciprocal between points in the Canal Zone and the city of Colon by Ordinance No. 50, enacted by the Municipal Council of Colon on November 20, 1913, and between points in the Canal Zone and the city of Panama by Decree No. 23 of October 30, 1913, of the Alcalde of the Municipal District of Panama, and become effective in the Canal Zone after publication in two consecutive issues of THE CANAL RECORD.

RICHARD L. METCALFE,
Head of Department of Civil Administration.

Misdirected Letters.

ANCON, C. Z., December 31, 1913.

*Will carry mail from the United States.

†Will carry mail to the United States.

‡Will carry mail for Arkansas, Alabama, Louisiana, Mississippi, and Texas.

Panama Railroad Company's steamers sail from Pier 11, Cristobal, at 3 p. m.

Royal Mail steamers leave for New York on alternate Tuesdays at 1 p. m.; for Southampton, on alternate Tuesdays at 10 a. m.

United Fruit Company's ships for New Orleans direct, leave on Thursdays and Saturdays at 3 p. m.; ships for New York via Kingston, on Tuesdays at 1.30 p. m., and Thursdays at 1.30 p. m.; for Bocas del Toro, on Mondays at 5 p. m.; for Limon, via Bocas del Toro, on Tuesdays at 5 p. m.; and for Limon direct, Tuesdays at 3 p. m.

Hamburg-American steamers sail for New York, via Kingston, Santiago de Cuba, and Fortune Island, on Tuesdays; the *Prinz August Wilhelm* and the *Prinz Joachim* at 10 a. m.; the *Carl Schurz* and the *Emil L. Boas* at 2 p. m.

STATEMENT OF
CONSTRUCTION EXPENDITURES
TO SEPTEMBER 30, 1913

(Part II of The Canal Record, December 31, 1913.)

STATEMENT OF CONSTRUCTION EXPENDITURES TO SEPTEMBER 30, 1913.

Table No. 1.

Includes administrative and general expenses, but does not include "General Items" or expenditures for sanitation, hospitals, or civil administration.

ITEMS.	FIRST QUARTER, FISCAL YEAR 1914.			TO JUNE 30, 1913.			TOTAL TO SEPT. 30, 1913.		
	Quantities.	Amount.	Unit Cost.	Quantities.	Amount.	Unit Cost.	Quantities.	Amount.	Unit Cost.
<i>From and Including Gatun to the Sea—</i>	<i>Cubic Yards.</i>			<i>Cubic Yards.</i>			<i>Cubic Yards.</i>		
1 Dry excavation, prism.....				2,181,998	\$1,471,209.13	\$0.6742	2,181,998	\$1,471,209.13	\$0.6742

CANAL

RECORD

Volume VII.

ANCON, CANAL ZONE, WEDNESDAY, JANUARY 7, 1914.

No. 20.

The Canal Record

Published weekly under the authority and supervision of the Isthmian Canal Commission.

The Canal Record is published free of charge, one copy each to all employees of the Commission and Panama Railroad Company whose names are on the gold roll. Extra copies and back numbers can be obtained from the news stands of the Panama Railroad Company for five cents each.

Address all Communications.

THE CANAL RECORD,

Ancon, Canal Zone,

Isthmus of Panama.

No communication either for publication or requesting information, will receive attention unless signed with the full name and address of the writer.

NOTES OF PROGRESS.

First Steam Vessel Through the Canal.

The first passage of a self-propelling vessel through the Canal from ocean to ocean was effected on the morning of Wednesday, January 7, when the crane boat *Alex. LaValley*, Captain Carter, formerly engaged in the Atlantic entrance, but recently operating in Culebra Cut, was passed from the Cut through Pedro Miguel and Miraflores locks to the Pacific entrance. Barges from the Pacific side, passed about in the dredging operations, had previously been handled to the Atlantic side. The *La Valley* left Pedro Miguel Lock at 9.30 a. m., reaching Miraflores locks at 10.15, and was passed into the Pacific channel at 11.05 a. m. No passengers were carried, only the regular crew being allowed on the vessel.

The *La Valley* is a unit of the old French floating equipment; it was built by Lobnitz and Company of Renfrew, Scotland, in 1887, and rebuilt at the Cristobal dry dock shops in 1905. It is an iron hull, twin screw vessel, with a length of 186 feet; beam 41 feet, and depth of 15 feet, equipped with forward and amidship cranes, the forward crane having a lift of five tons, and the amidship crane a lift of 56 tons. Its propelling engines were built by Lobnitz and Company and are double compound, 16 by 30 inches, with 24-inch stroke. The boiler is of the Scotch type, American make, length 12 feet diameter 144 inches.

Changes at Mount Hope Depot.

The property accounting of the Quartermaster's Department was taken over by the office of the Examiner of Accounts as of January 1, 1914, in accordance with the provisions of a circular published in another part of this issue of THE CANAL RECORD. At Mount Hope depot, the property accounting went on a financial basis on December 1, 1913, the date of the change in depot quartermasters. Under the new plan in effect at the depot and

district storehouses, a record of stock issues and prices will be forwarded daily to the Examiner of Accounts. This plan has necessitated a change in the Mount Hope depot personnel. Mr. L. E. Willson, formerly chief clerk, together with two gold clerks, were transferred, effective January 5, to the office of the Examiner of Accounts, where Mr. W. L. will have charge of all property accounting in so far as it relates to the Quartermaster's Department, subject to the Examiner of Accounts. Three other gold clerks were transferred from the depot to the Examiner of Accounts' office on January 7 and one will be transferred on January 20. Mr. J. J. Jackson, effective January 5, has been appointed chief clerk to Depot Quartermaster C. H. Mann.

Fuel Oil from Mexico.

The first cargo of fuel oil, other than from the California wells, ever brought to the Isthmus, arrived at the port of Colon early in December on the new tank steamer *Edward L. Doheny*. It came from the Mexican oil fields near Tampico, and was purchased by the Union Oil Company of California to apply on its Canal contract, on account of a temporary lack of tank steamers. The cargo consisted of 60,000 barrels, which was discharged at the dock at Mindi through a pipe line laid especially for the purpose connecting with the company's main pipe line near Mindi. This particular cargo is lighter in gravity, and in storage emits a much stronger odor than the California output. Another shipment from the Mexican fields is expected shortly on the *Edward L. Doheny*. This vessel when loaded to capacity draws about 27½ feet of water, and while there is ample depth for it alongside the Mindi dock, the work of discharging at this point is much slower than it would be at dock No. 13 or dock No. 14. In order to avoid demurrage charges, an effort will be made to discharge the cargo at one or the other of the last-mentioned docks on the next visit of the steamer.

Two of four new tank steamers of from 8,000 to 10,000 gross tons, and with an oil-carrying capacity of from 60,000 to 72,000 barrels, built in England, for the Union Oil Company, have been completed, and were scheduled to leave the English yards for San Francisco on Christmas Day. The others will follow shortly. It is expected to use the new vessels in the Chile, Panama, and British Columbia services.

Rio Grande Observation Platform.

The observation platform on the south side of Contractor's Hill, affording a view of Cucaracha slide and the Cut on both sides, with a vista of Miraflores Lake beyond Pedro Miguel Lock, has been completed, and the trip to it has been included in the regular schedule of the Canal sightseeing train. The train leaves Panama station for Rio

Grande at 8 a. m., on Mondays Wednesdays and Fridays; the fare for the round trip is \$1.50.

Contract for Panama Exposition Buildings.

Contract for the construction of the Palace of Arts and the Palace of Government, two of the reinforced concrete buildings for the Panama National Exposition, have been awarded to R. W. Hebard and Company, Inc., in the sum of \$111,250. Bids were opened by the Secretary of Public Works on December 27. The tenders ranged from \$100,000 to \$155,000. The buildings are to be completed by October 1, 1914. The two together will contain over 8,000 electric lights.

Ice Box of Hollow Terra Cotta Tile and Concrete.

Forces of the Subsistence Department are installing a refrigerated storage box made of hollow terra cotta tile and concrete at the Pedro Miguel commissary store. This is the first box of its kind to be constructed on the Isthmus, and it is proposed to make similar installations at Balboa and in the new commissary at Ancon. The construction is supposed to afford better refrigeration than the wooden boxes and not to be subject to the deteriorating influences which affect wood. The interior arrangement will be similar to that of the wooden boxes now used; the storage space, with floor dimensions of 20 by nine feet, and height of 10 feet two inches, will be divided into four compartments, one each for meat, vegetables, and dairy products, with a working space having access to the three storage boxes.

Operations at Cucaracha Slide.

The dredges excavating at the base of Cucaracha slide occupy about the same relative positions as they have held during the past two weeks, with the exception that the dipper dredge *Cardenas* has been at Paraiso since January 3, for replacement of a broken spud hoisting gear. The channel has been cleared to almost full width, but not full depth, from the northern limit of the slide, next to the firm rock of Gold Hill, for about 150 feet, by the three dipper dredges and the ladder dredge *Marmot*, all working toward the south. The channel has been also cleared to full width, but not full depth, from the southern limit of the slide, by suction dredges No. 86 and No. 4, for 200 feet north. Directly in front of the *Marmot* the channel is narrowest, with a width of about 160 feet, at station No. 1810. About 225 feet south of this point, where the cleared channel is about 200 feet wide, the ladder dredge *Badger* is working northward making a deeper cut. A hundred feet in the rear of the *Badger*, the pipeline suction dredge No. 86 is deepening the channel, and obliquely behind it, pipeline suction dredge No. 4 is well over toward the east side of the Canal, cutting into the face of the slide. The output of all the dredges at Cucaracha slide

during the month of December was 321,193 cubic yards. The minimum depth of the channel, with the surface of the water at about 84 feet above sealevel, was about 18 feet.

The two 1,000-cubic yard dump barges recently arrived from the United States, have been placed in service in connection with dredging in the Cut. During operations, several tugs have been temporarily out of commission on account of broken propeller wheels, which were struck against the banks of the Cut in the crowded work of handling the barges to and from the dredges.

Opportunities in Detroit.

THE CANAL RECORD is in receipt of a communication signed by Messrs. H. J. Conard, E. W. Parsons, F. H. Thuron, and William A. Mitchell, members of an industrial employment investigation committee of the Detroit Metal Trades Council, challenging the statements made by Mr. John J. Whirl, secretary of the Employers' Association of Detroit, published in THE CANAL RECORD of December 3, 1913, in which attention was called to the opportunities existing in that city for skilled workmen in the employ of the Canal Commission. The following extracts cover the important portions of the letter:

"Detroit is a city of 550,000 to 600,000 population, including men, women, and children, people of all classes. It has manufacturing plants and other fields of employment, wherein, in normal times, some 140,000 to 160,000 people are employed. An unusually large percentage of this employment is of unskilled and women wage-earners. But there is no such number of employees employed here in this city at the present time. Right at this writing, Detroit is flooded with the unemployed. Every day there are from 60,000 to 80,000 people looking for a job. Such has been the situation, or growing to it, for the last six months. Neither is there any encouragement as to when the depression will end."

The communication names a number of the larger manufacturing concerns, including motor car companies, which have made reductions in force, hours of work, and rates of pay. It continues:

"Not only is the city flooded with idle men, but employers have taken advantage of the situation, and either as a retrenchment, or for other purposes, have reduced the wage rates. Skilled mechanics that six and eight months ago were receiving from 40 to 54 cents per hour, have had their wages reduced to 30, 35, and 40 cents per hour; that is, those who were six months ago receiving 40 and 42 cents per hour are now working for 30 and 32, if working at all. Skilled workmen before receiving 30 cents per hour are now being paid 20, 22, and 25 cents per hour, when the opportunity prevails for them to work. Of course, the opportunity to the unskilled is proportionately lessened, and it is true that the multitude of those out of employment are both skilled and unskilled."

"Again employees on the Isthmus should be advised that Detroit is a doorway to Canada, and, even in normal times, employees from other sections who come to Detroit must compete with the Canadian job seekers, and the latter are the most numerous."

"In justice to our own class, the wage earners, we petition you to give space to this communication as a warning to any who may be inclined to come this way for a job. It isn't here for them. There are five men in Detroit for every job today. The prospects are that it will so continue for several months. Our advice to wage earners is to keep away from Detroit, and particularly does this apply to the skilled crafts."

Canal Zone Prisoners Attempt Escape.

Three prisoners of the Canal Zone penitentiary, Ernesto de Leon, Francisco H. Zaldivar, and Juan Mosquera, escaped from the gang at work on the Empire-Gamboa highway at 1 p. m., January 5, by jumping off a loaded dump car, which was running down grade, and breaking into the jungle. The two first-named were captured within an hour, Zaldivar having been brought down by a shot through the right leg, about three inches

above the knee. Mosquera was captured early the next morning and returned to the stockade at Gamboa at 8.30.

Fires at Balboa and Colon.

A fire broke out at about 5.36 p. m., on Saturday, January 3, among a quantity of piles situated alongside the railroad track leading from the main line near El Diablo over the old Sosa Dam fill toward Balboa. The piles to the number of about 1,100, of which 600 were creosoted, were stored in separate stacks placed close together, and when the firemen arrived two of the stacks were burning, having apparently been ignited by sparks from a locomotive setting fire to the grass nearby. An alarm was turned in to the Ancon station, but owing to the location, the firemen had some difficulty in getting to the spot. The Ancon motor engine was loaded on a flat car at about 7 p. m., and hauled to the scene. As the tide was out, there was no water available close at hand, so two locomotives were used to haul the water for the fire engine, and a line of hose 1,650 feet long was laid to the nearest water tank to aid in the work. Here for the purpose was supplied by the Ancon fire engine, the Corozal wagon, and some was procured from the Sixth Division. The fire was practically extinguished by 10 p. m., although a stream of water was kept playing on the half-burned piles all night. One hundred and seventy 80-foot creosoted piles, one hundred 75-foot creosoted piles, and ninety-eight 65-foot untreated piles were burned, either whole or in part, entailing a loss estimated at \$11,998.56.

The Cristobal fire department responded to an alarm of fire given by the Colon police at 5.27 p. m., on Saturday, January 3. The fire, which had broken out in the rear of a saloon on Cash street, between Eleventh and Twelfth streets, in Colon, was caused by the explosion of a kerosene lighting plant. The Cristobal firemen laid two lines from the steam fire engine, stationed at the corner of Eleventh and Bolivar streets, one from the motor fire engine, stationed at the corner of Thirteenth and Cash streets, and one from a fire hydrant. The Colon fire department brought out its motor engine, and also laid several lines. The blaze was confined to three buildings, one, a two-story structure, containing the saloon, fronting on Cash street; the second, a two-story building south of the saloon, extending through from Cash street to Bolivar street, containing the Vienna Hotel, facing Cash Street, and the Star Theatre, facing Bolivar street; and the third, a three-story building, north of the theatre, fronting on Bolivar street. It was extinguished after about one hour and 40 minutes' work. The building in which the fire originated is practically a total loss; the front wall only is standing. The two other buildings were damaged in a varying degree, but suffered most in the upper stories. A statement of the estimated values and losses is, as follows:

Owner of building.	Est. value, Building.	Est. value, Contents.	Est. damage, Building.	Est. damage, Contents.
Bermudez and Oharrion.....	\$7,000	\$1,750	\$4,000	\$750
Domingo Diaz A.....	7,500	3,500	4,000	1,800
Ravenau (saloon)	2,500	1,000	2,500	500
Total	\$17,000	\$6,250	\$10,500	\$3,050

The people who were made homeless were

accommodated for the night in the new Masonic temple, which is situated about opposite the site of the fire.

Flag Raising by Boy Scouts.

The Cristobal troop, Boy Scouts, held a flag raising on January 1, 1914, at 8 a. m. The flag was presented to the troop by Colonel Goethals. It measures 6 by 8 feet, and it now flies daily from the 65-foot flag pole on Cristobal Point. It was given to replace the first flag presented to the troop by Capt. Frank O. Whitlock, which was raised for the first time on July 4, 1913. Since that day, the flag has been raised every morning at 7 o'clock, and lowered at sundown, one of the members of the troop being detailed for this duty each week. Permission has been given to raise the 65-foot pole 20 feet, in order that the flag may be seen in the harbor above the new docks. There is to be a yard arm near the top, and it is proposed to fly the United States flag at the top, and, from the ends of the yard arm, the troop colors, red and white, and the flag of the Canal Zone, respectively. The first United States flag belonging to the troop will be preserved under glass in a frame made of native woods, each boy in the troop having been asked to furnish a piece of such wood for the purpose. In addition to the draped flag, the frame will contain a list of the members of the Cristobal troop, with the name of the State to which each boy belongs. This souvenir of the Canal Zone Boy Scouts will be presented to the National Headquarters in New York. The Cristobal troop has a membership of 34, and is divided into three patrols. The boys are now actively preparing to take the examination for second-class scouts. Their work consists in drilling and marching, signalling, and lessons in first aid. Meetings are held in the district courtroom on Tuesday and Friday evenings each week. The scout master is E. C. Bell, first assistant scout master, C. E. Beck, and the second assistant, chosen on January 1, is W. H. Anderson.

Isthmian Sunday School Association.

The regular quarterly meeting of the Isthmian Sunday School Association will be held at the Corozal Y. M. C. A., on Sunday, January 11, at 2.30 p. m. Superintendents of the various schools along the line are requested to see that at least five delegates are named, and urge as many others to go as can do so conveniently. Railroad transportation may be procured direct from the president of the association, Mr. J. M. Weaver, Cristobal, C. Z. Immediately preceding the above meeting (1.30 p. m.), there will be a meeting of the committee on union church work on the Isthmus, in the same hall.

The January 17 dance of the Washington Cotillion Club has been postponed until January 31 on account of the annual banquet of the Society of the Chagres which is to take place on that night.

The regular dance of the Cristobal Dance Club will be held at the Commission clubhouse on Saturday, January 10, 1914.

Electric current is being supplied by the Canal Commission from the Miraflores steam plant for the operation of a rock crushing plant, the property of R. W. Hebard and Company, situated on Las Sabanas road.

New P. R. R. Time Table.

A new time table will go into effect on the Panama railroad at 12.01 a. m., on Sunday, January 11, covering both the main line and shuttle train services. On the main line, under the new schedule, Trains Nos. 9 and 10 (No. 8 and 9 present schedule), will be operated daily, instead of daily, except Sunday, making four trains each way, daily. The arriving and departing time of most of the trains has been changed slightly, notably in the case of Nos. 7 and 8, which will leave Panama and

Colon, respectively, at 4.45 p. m., instead of 5 p. m., as heretofore. The stops at El Diablo and Caimito have been eliminated, and a stop at Radio Station has been arranged for in the case of certain trains. Trains Nos. 6 and 8, and train No. 72 (Saturday only), going north will stop at New Gatun to take on passengers for Mount Hope and Colon. No stops at New Gatun will be made, however, by trains going south.

Trains Nos. 50 and 51 on the Panama-Bas Obispo line, operated daily, except Sunday,

will run daily under the new schedule, and Sunday trains Nos. 52 and 55 have been annulled. The arriving and departing time of the trains on this line has been changed slightly. The number of trains in the Colon-Gatun shuttle service remains unchanged, but the arriving and departing time has been altered to some extent.

STOLEN—From Room 24, House 38, Balboa, on Saturday, January 3, between the hours of 1 and 5 a. m., a nickel plated percolator. A reward is offered by the owner, C. A. Oglesby, for evidence that will convict the thief.

SANITARIUM TO BE CLOSED.

Will be Discontinued as a Retreat for Convalescents, but may be Operated as a Hotel.

The closing of Taboga sanitarium as an institution for the use of convalescents among white employes of the Canal Commission and Panama Railroad Company, and members of their families, will take effect on January 15, at which time the Department of Sanitation will cease to have any further connection with it. The Subsistence Department has been requested to send a representative to Taboga to make an inspection of the property with a view of taking it over and operating it as a Commission hotel for a trial period. The plan, if adopted, will also include the operation of the launch *Sanidad* from Balboa to the island and return, as heretofore, but all passengers will be required to pay for their transportation.

The sanitarium was placed on a pay basis on November 1, 1913, with a view of ascertaining if the receipts could not be made to cover the expenditures. The two months' trial has shown that this is not likely, for, in November, the cost of running the institution over and above the receipts was about \$300, and in December, about \$600. These amounts do not include the cost of operating the *Sanidad*, which, during the past year, has averaged about \$720 a month.

The sanitarium was erected by the first French company and opened in 1885. After the failure of this company and continuing to the end of the French régime, the building was used by residents of the Isthmus visiting the island to recuperate, but little or no care was taken of the property, so that when the Americans took possession in 1904, it was in a dilapidated condition. It was one of the first of the French buildings to be repaired; was reopened as a sanitarium in September, 1905, and has continued as such up to the present time. The largest number of patients taken care of during any fiscal year was that of 1911-12, when there were 3,862 admissions.

The number of patients admitted, employes, families of employes, and others, deaths, and average cost of subsistence per patient per day, by years, from August, 1906, the date of the first record, to January 1, 1914, is shown in the following statement:

DATE.	NUMBER ADMITTED.			No. deaths	Av. cost of subsistence per patient per day.
	Employes	Families of employes and others.	Total		
August to December, 1906, inclusive...	655	106	771		No record.
1907.....	2,020	393	2,413		No record.
1908.....	2,873	711	3,584	1	\$0.645
1909.....	2,706	657	3,363		0.713
1910.....	3,191	761	3,952		0.625
1911.....	3,002	723	3,725		0.597
1912.....	2,380	1,140	3,520	1	0.687
1913.....	1,776	1,258	3,034		*0.670
Total.....	18,613	5,749	24,362	2	0.656

*Estimated on the basis of the first eleven months in 1913.

It will be noted that out of 24,362 admissions to the sanitarium during the past seven and one-half years, the record shows but two deaths, and both of these were due to accidents. In 1908, a little girl fell from the balcony of the sanitarium receiving fatal injuries, and in 1912, a policeman, under care in the institution, was drowned while swimming.

Completion of Roofing Manufacture at Paraiso.

The American Cement Tile Manufacturing Company, operating a plant at Paraiso for

the manufacture of roofing for the permanent shop buildings at Balboa, made its last shipment of material at Balboa on December 22, and on December 23, made the last of about 30,000 pieces of tile which are stored at Paraiso, for use on those buildings which are not ready to receive the roof, and as surplus stock. The forces of the company, which has been reduced to seven gold and 18 silver men, from a former maximum of 10 gold and 130 silver employes, is engaged in packing for shipment the 18 tile machines, 1,800 drying plates and accessory equipment used at Paraiso. It is expected that the work of the contractor on the Isthmus will be completed by January 1. The company has manufactured at Paraiso an aggregate of approximately 123,000 pieces of tile, sufficient for about 981,000 square feet of roof.

Highway Bridge Across Rail Approach to Dry Dock Site.

In order to maintain highway connections with the permanent terminal buildings to the north of the proposed dry dock at Balboa, forces of the Second Division have constructed a highway bridge across the Cut through which rolling stock has access to the site of the dry dock excavation. The clearance of the bridge above the tops of the rails beneath is 17 feet six inches, sufficient for the passage of locomotives and cars, and provision for the passage of cranes is made by means of a hinged span in the bridge, which is swung upward on occasion, by means of cables running over sheaves on end columns and drawn by air-driven winches. The bridge affords an inside clearance for wagons of 16 feet, and is 75 feet long. The bents supporting it rest on rock foundations and are spaced 18 feet apart.

Reducing Noise in Railroad Yards.

Efforts are being made, under the direction of the traveling engineer, to reduce the noise in the Panama railroad yards at Colon and Panama during the night and early morning. These have effected considerable improvement during the hours of night, but noise at the time the early labor trains are leaving is difficult to avoid; the engines which take these trains out have been standing all night, with the result that water has condensed in the cylinders, so that the cylinder cocks have

to be opened on starting, to avoid damage to the locomotive, and on account of the crowds and darkness, a considerable amount of whistling and bell-ringing is necessitated by the requirements of safety.

Sales of fuel oil and larvacide for use in sanitary work outside of the Canal Zone and the cities of Panama and Colon will hereafter be handled through the Quartermaster's Department, under the usual rules for sale of Commission property to outside interests. Heretofore, authority was given the Sanitary

Department to supply these materials direct to the United Fruit Company, for use at Bocas del Toro.

PERSONAL.

Mr. Thomas H. Jordan, supervisor of machinery installation for the First Division of the Chief Engineer's office at Pedro Miguel and Miraflores Locks, has resigned to accept a position with Mr. H. M. Field, who has a contract with the United Fruit Company to build 470 miles of railroad in Honduras. He will remain on the Isthmus for about one month for the purpose of purchasing, and inspecting while undergoing repairs in the Commission shops, equipment purchased from the Commission for the above work. Mr. Jordan first entered the Mechanical Division of the Commission March 6, 1908, and again entered the service October 29, 1908. He was subsequently transferred to the Atlantic Division as general foreman. On November 25, 1911, he was transferred to the First Division, in charge of installing the permanent lock operating machinery of the Pacific locks, which position he held until he resigned.

Street Railway Connection with Balboa Steel Pier.

Preparations are being made for extending the Panama street railway line to a point near the office of the port captain at Balboa, at the land end of the steel pier. When the Balboa branch was laid out from Panama, it was necessary to terminate it at the old drainage canal, west of the Balboa commissary, because the filling and the municipal improvements on the west side of Sosa Hill were not sufficiently advanced to give a right-of-way. About half a mile of double track, however, was laid along the site of Sosa road in isolation, and the work now to be done will consist of laying approximately 4,500 feet of track to complete connections, installing the remainder of the tubular steel poles, spaced 100 feet apart, for carrying the overhead conductor, and erecting a waiting shed at the outer end of the line. The completion of this connection will finish the system as contemplated at present, with 11 miles of track under operation.

Ancon Crusher.

Following is a statement of rock crushed at Ancon quarry during the week ending January 3:

DATE.	Cubic yards.	Hours worked.
Dec. 29.....	2,278	8.15
Dec. 30.....	1,708	8.15
Dec. 31.....	2,155	8.20
Jan. 1.....	Holiday	
Jan. 2.....	2,368	8.15
Jan. 3.....	1,685	6.10
Total.....	10,194	39.15

Lost—Gold chain, with gold facsimile of P. R. R. employe's metal check, No. 11387, engraved on back with monogram, DWC, on train No. 5, arriving at Panama at 12.55 p. m., Saturday, December 27. Liberal reward for return to D. W. Clifton, on Train No. 2 or No 5, or by mail to same at Box 13, Cristobal.

The following steamers arrived at, or departed from, the port of Balboa during the week ending January 3, 1914:

Arrivals—December 28, *Luckenbach*, from San Francisco; December 29, *Pachitea*, from Callao; December 31, *Peru*, from San Francisco; *Palena*, from Callao; January 1, *Ecuador*, from Guayaquil; January 2, *Rupanco*, from intermediate ports; January 3, *Astec*, from San Francisco.

Departures—December 28, *City of Para*, to San Francisco; December 29, U. S. S. *Buffalo*, to Corinto; *Chile* to south ports; *Huallaga* to Callao; *Manavi* to intermediate ports; December 30, *Peru*, to Callao.

IMPROVED RAIL-JOINT.

Joint for Portable Tracks, Locally Designed, in Use Under Canal Steamshovels.

Several steamshovels in the service of the Canal Commission are operating on portable track equipped with a rail-joint designed and patented by Mr. Peter J. Thull of Culebra, a steamshovel engineer now employed by the Fortifications Division. The joints are manufactured in the shops of the Mechanical Division, and are made of cast steel.

The conditions of steamshovel operation require usually that the shovel advance, in the progress of excavation, over uneven ground of varying firmness. Six-foot lengths of track, handled by laborers in the shovel pit, are con-

tially central with them, jaws 18 are provided, forming the female portion of the joint, with a recess 19 formed in the body of the female part, and complementing the jaws 18. The jaws 18 have their end surfaces beveled, and also the end surfaces of the projections 16 and 17 are similarly beveled.

Engaging the female portion 12, by means of a tongue 21 substantially circular in shape, is the male part. The tongue fits loosely into the recess 19 of the member 12 and is provided with a projection 22 fitting into the recess 20 with sufficient play at top and bottom.

Orifices 23 and 23', substantially central with the jaws 18 and central member 21, are provided in both the male and female portions, and a bolt 24, binding these two portions, constitutes a center or pivot for the same. The male part is also provided with flanges 30, offset portions 26 and 27, similar to 16 and 17, respectively, abutting against the head and flange of the rail, and also with orifices registering with orifices 29 in another rail 31, and the male part is similarly attached to the rail 31 by means of a bolt 32, as is the case with the female part above described.

SIDE ELEVATION AND HORIZONTAL SECTIONAL VIEW OF THULL JOINT CONNECTING RAIL.

nected ahead of the forward trucks of the machine. Conditions frequently require that these lengths of track deflect, in both vertical and lateral planes, with the passage of the machine. The ordinary strap joints, using plates one inch thick, two and a half inches wide, and 10 inches long, with two 1½-inch holes punched at either end, provide for slight variation. If connected loosely enough to allow lateral turning, they make the track insecure, and vertical motion is restricted by the flanges of the rails. The provision of curved sections to meet contingencies is inconvenient and expensive.

The Thull joint is designed to be used on both horizontal and vertical curvatures, and to provide means for eliminating the horizontal displacement while keeping the vertical displacement.

Referring to the drawings, 10 represents a rail, provided near the extremity with elongated apertures 11, and engaging the end of the rail with its side flanges, or cheeks, 13, is the female part 12 of the joint. The cheeks are abutting against the top and bottom of the rail and provided with an aperture 14, registering with the aperture 11 of the rail 10, so that a bolt 15 binds the cheeks 13 of the female part of the joint to the end of the rail, forcing the upper and lower abutments of the cheeks against the head and bottom of the flange of the rail.

A portion 16 of the female part is offset so as to conform with the head of the rail, abutting against the same and having the same width, and flush at its sides with the cheeks 13. A portion 17 is also offset in a direction opposite to the offset 16, made to conform with the bottom flange of the rail, abutting against it and having the same width, and made flush with the lowermost surface.

At the ends opposite the cheeks 13 and substan-

The recess 19 formed in the female portion 12 is beveled, so as to converge toward the middle of the sides. The orifice 23' is also beveled from the center toward the extremities, so that the male portion can be translated horizontally to right or left in the extent of the bevel provided in the recess 19, and, as above described, the offsets 16 and 17 have their end surfaces beveled for the purpose of allowing the horizontal displacement.

By means of this provision in the joint for the horizontal displacement, a curvature can be formed in the joint of a certain degree, and the track may have any zigzag shape desired, in the limits of the bevel provided in the joint, that is, in the recess 19 and orifice 23'.

The vertical displacement, as can be seen, is obtained by the rotation of the joined parts about the center, which is the bolt 24, and this displacement is limited in the vertical direction, up and down, by the portion 22 of the male part engaging the recess 20, as above described.

When only vertical displacement is desired, and the horizontal is to be prevented, notches 32 and 33 are provided at each side of the facing ends of the bottom of the male and female parts, these notches being beveled from the center upward and downward, so that a spike may be inserted, preventing side displacement, but allowing rotation about a pivot, as there are bevels provided where the spike engages the female and male portions.

With this device, any safe unevenness in the ground should be taken up by the vertical displacement of the joint, that is, by the pivotal connection. Similarly, there should be no necessity for a series of curves, as the safe curvature for a rail will be formed by the articulated joint in the horizontal plane.

A trial set of these joints was manufactured at Gorgona shops at Mr. Thull's expense, for use on the shovel which he was operating. Upon their appearing satisfactory, the Canal Commission ordered the manufacture of enough to equip 10 steamshovels. Each shovel requires 22 joints. Under a contract dated July 28, 1913, the Commission pays Mr. Thull

a royalty of 70 cents on each joint which it manufactures.

In a letter dated December 30, 1913, the superintendent of construction of the Fourth Division reported to the resident engineer in charge of the division, with reference to the Thull joint, as follows:

"These joints have been in use for several months and are still giving satisfaction.

"They are much better than the ordinary strap connection under all conditions, but are especially so in cases where shovels are working on a soft bottom or where there is considerable water in the shovel pit.

"The sections when connected with these joints have almost a continuous rail. The old strap connections make such a loose joint that the wheels of the trucks will often climb the rail when moving up, unless great care is taken. This is the case where the sections are down in the mud or covered with water.

"These joints are also valuable where shovels are working in slides, where it is often necessary to back the shovel out of the pit very suddenly, without sufficient time available to line the sections up in proper shape."

Misdirected Letters.

ANCON, C. Z., January 7, 1913.

The following insufficiently addressed letters, originating in the United States and its possessions, have been received in the office of the Director of Posts, and may be secured upon request of the addressees:

Arias, H.	Jones, Miss Martha
Ashton, Miss Mabel	Landry, Wilfrid
Baily, Evans	Loudin, Herman P.
Betty, James N.	Myers, Titus
Brown, Claudius	McMahon, Geo. H. (2 cards)
Brown, James H. W.	McKnight, James
Britton, Mr. and Mrs. H. D.	Newton, John

COMMISSION CLUBHOUSES.

Activities of the Young Men's Christian Association.

GENERAL.

The Gamble Concert Company will arrive at Cristobal on the steamship *Colon*, on January 12, for the purpose of giving a series of concerts in the clubhouses. The company is headed by Mr. Ernest Gamble, one of America's prominent basses. He has appeared at the Metropolitan Opera House, New York; the Waldorf-Astoria, New York; St. George's Choral Society, London; Drei Klong Verein, Wiesbaden, Germany, and many musical organizations in America and abroad. In his company are Miss Verna Page, violinist, who is nearly as widely known as Mr. Gamble, Miss Hazel Neff, a noted soprano, who is a protégé of Mme. Schumann-Heink, and Miss Irene Kuhn. The dates will be, as follows: Wednesday, January 14, Corozal; Thursday, January 15, Gatun; Friday, January 16, Cristobal; Saturday, January 17, University Club, Panama; Tuesday, January 20, Empire; Wednesday, January 21, Culebra; Thursday, January 22, Balboa; Friday, January 23, Pedro Miguel (tentative); Saturday, January 24, Porto Bello.

The moving picture reels to be exhibited during the coming week are, as follows: "Insurance agent;" "World's series baseball games;" "The high cost of reduction;" "Kissing Kate;" "The farmer's daughter;" "Oil and water;" a feature reel in two parts; "Our enemy;" "The Wasp."

For the week January 12 to 17, the following films will be shown: "Shylock," a feature reel in two parts; "Taming the spooks;" "Absent minded lover;" "Up to date Lochinvar;" "The cub reporter's temptation."

The schedule for next week is, as follows: Tuesday, Cristobal and Balboa; Wednesday, Corozal; Thursday, Empire; Friday, Culebra; Saturday, Gatun.

BALBOA.

The Balboa recreation hall was opened on Christmas Day with "Open house." Punch was served. No charge was made for pool games on this day, or on New Year's Day. The present equipment consists of three pool tables, a billiard table, library of about 100 books, 50 newspapers and periodicals, phonograph and records, and refreshment parlors. Moving pictures will be exhibited in the room above the recreation hall every Tuesday evening and other entertainments will be given whenever possible.

Request has been made for the installation of a barbershop and cigar stand. Definite announcement concerning same will be made in a few days. New library books and pool room equipment have been ordered from the United States.

PEDRO MIGUEL.

The work on the clubhouse is nearing completion and equipment is now being moved in. The official opening will probably be held during the next two or three weeks, with appropriate exercises, the nature of which will be announced in the near future. The present building is practically a duplication of the Gorgona clubhouse, which was found to be well suited to the needs of the community. New concrete pillars, however, have been added to the front of the building, together with concrete stairways and landing, thus improving the appearance of the structure and increasing its durability. An excellent view of Miraflores Lake, Pedro Miguel and Miraflores locks, and all the surrounding country, is to be had from the second story porch.

COROZAL.

"Open house" was observed on New Year's Day, with free moving pictures at night.

Dr. Frederick Poole will give a return engagement on Thursday, January 8.

The chess club tendered a farewell reception to Dr. Sherrard on January 3. He was president of the club for several months past.

Much interest is manifested in the elimination duckpin tournament now under way, the high scores for the week being: Davis, 109; Regan, 102; Garrett, 101.

CULEBRA.

On December 29, the "Greens" defeated the "Blacks" in the local duckpin tournament by the score of 1,301 to 1,280. On December 30, the "Orange" team defeated the "Blues" by the score of 1,327 to 1,264.

High scores for the week are, as follows: Finley, 107, 102; Koperski, E., 103; Case, 112, 104, 103, 109, 107; Perkins, 100; Schmeck, 100, 116; Holme, 104; Gassman, 116; Koperski, R., 113; Ferguson, 105; Bechlem, 112; Fitzpatrick, 100; Brown, 110; Warner, 103.

Pool and billiard cloths, pool cues and balls have been ordered and the tables will be recovered as soon as they arrive.

The game of "Caroms" has been added to the equipment.

On Friday night, January 2, the Pennsylvania State College quartet gave a concert before a crowded house. They were assisted by Mrs. C. C. Robinson, accom-

panist, and Mr. L. R. Austin, reader. The following program was given:

1. "On the Sea".....Dudley Buck
Quartet.
2. Vocal Solo—"At Dawning".....Cadman
Mr. Robinson.
3. "What the Chimney Sang".....Parks
Quartet.
4. Reading—"Flash".....Will Carleton
Mr. Austin.
5. "There Little Girl, Don't Cry".....Fearnis
Quartet.
6. Solo—"Good-bye".....Toss
Mr. Leyden.
7. "College Medley".....Robinson
Quartet.
8. Reading—"David and Goliath".....
Mr. Austin.
9. Puns and Penn. State Songs.....
Quartet.
10. Solo—"Selected".....
Mr. Keister
11. Selected.....

On Sunday night a sacred concert was given by the same quartet to a good-sized audience.

Dr. Poole will give his third lecture, illustrated by moving pictures and colored slides, on Canton, China, on Tuesday night, January 13. Admission will be, as follows: Adult nonmembers, 25 cents; children, 15 cents; members, free.

EMPIRE.

Mr. Russell, who with 20 boys, visited Chorrera, returned home by the way of Panama on Tuesday, December 29. The boys stood the long walk well, and all reported the trip the best they have had.

The Pennsylvania State College quartet was at Empire on Tuesday, December 30. It was greeted with a crowded house, and the program was enjoyed by all. By request, the quartet gave a short concert on Sunday evening, January 4, when 300 people were in attendance. A reception followed.

New Year's Day was observed by an "Open house" all day. The pool and billiard tables and bowling alleys were thrown open to the public. Several of the bowlers took part in the bowling tournament held at Cristobal.

The "Ragtime" duckpin tournament started Monday, January 5. Twenty-five men have entered.

GATUN.

Considerable rivalry was exhibited in the basketball game held on Tuesday evening, December 30, between a picked team from the "Boobs" and the "Bolivars," and a number of the more experienced players who styled themselves the "Old-timers." An unusually large number of people attended. The "Darktown brass band" furnished the music for the game, as well as for the parade of the "Boobs-Bolivars." Although there was a difference of only one point at the end of the first half and the game was tied several times in the second, the "Old-timers" won the game by a score of 20 to 11. The line-ups were, as follows:

"Boobs-Bolivars"	"Old-timers."
Thompson, D.....	F.....
Huber.....	F.....
Brace.....	C.....
Claybourne.....	G.....
Thompson, R.....	G.....
	Mitchell, Lee
	Mitchell, Joe

The Gatun people were given a double treat on New Year's night, when both Dr. Poole and the Pennsylvania State Quartet appeared. Dr. Poole lectured on "Modern China" and the quartet sang five selections. A total of 357 people attended.

The Palm Tree Glee Club was organized on Friday evening, January 2, with 18 men present. D. Roswell Homer is the accompanist, and the secretary acts as leader. Weekly rehearsals will be held. The club will meet this week on Thursday.

A number of the members met on Saturday evening and formed a Spanish conversational club. Mr. Morell, who has lived in Mexico for the past eight years, is the leader.

The gymnasium classes have started again after the holiday vacation. Those who find it inconvenient to attend the evening classes are invited to come to the afternoon classes.

Basketball practice has been resumed under the direction of the physical director.

Mr. E. P. Wall holds high score in tenpins to date in the bowling contest for the month of January.

Mrs. E. T. Gilbert played piano solos at the motion picture entertainment on Wednesday evening, January 7.

CRISTOBAL.

About 75 couples attended the community dance on Tuesday night, December 30. Refreshments consisting of home made cake and punch were served. Mr. William Marsh was floor manager.

The "Smoker," on New Year's night was attended by over 200 men. Mr. L. T. Brennan of Balboa gave an exceedingly clever exhibition in juggling, using cue balls, pie pans, cue sticks, tennis rackets, and Indian clubs. Mr. Charles Ray gave a number of selections on the banjo. Mr. W. D. Shaffer of Corozal sang a

number of popular songs. Mr. Austin, reader for the Pennsylvania State College quartet, was repeatedly recalled. Mr. S. Polack sang two solos, Messrs. Max Hoffman and D. Raymond furnished a comedy sketch, and Mr. Howard Bradshaw sang a solo. The closing number was a wrestling bout between Messrs. Quinn and Halber. The Marine orchestra furnished the instrumental music, and Mr. Briggs accompanied on the piano. Ice cream, cigars, home made cakes, and punch were served.

Through the generosity of the Panama Railroad Company, 56 of the children who took part in the Christmas cantata, accompanied by four adults, spent Saturday afternoon, January 3, at Bella Vista beach in Panama. The children had an early morning dip from Dock 16 in Cristobal; took the 11.05 train to Panama, and enjoyed an afternoon frolic in the Pacific. Fire Chief Charles E. Weidman furnished the children's transportation from the depot to the beach and return. Before leaving for home, sandwiches and ice cream were served. On the train to Panama, the children sang a number of the cantata songs for Mr. Metcalfe, and his guests, Congressman Jas. Manahan of Minnesota and Senator Thomas J. Walsh of Montana.

The discussion club will be addressed by Mr. D. L. Dickson, Ensign, U. S. N., on January 15, on the subject of submarine vessels.

The following were the winners in the New Year's All-Isthmian tenpin bowling tournament:

Singles—Gustavson, 610, Louch, 559, Bullard, 524. *Single high game*—Barte, 243.

Doubles—Gustavson and Barrett, 1,132; Bullard and Parkis, 1,065; Barte and Hason, 1,049.

Entries are now in order for the married folks bowling tournament on Monday, January 12.

The combined gymnasium classes of the Cristobal Y. M. C. A. gave a demonstration of physical activities, such as games, folk and gymnastic dancing, on Monday and Wednesday evenings, December 29 and 31. The program was, as follows: March, combined classes—graceful calisthenics, Class A; progressive mat exercises, boys; folk dancing, Class B; parallel bars, men; shuttle relay and somersault races, boys; Irish lilt dance, Class A; Game of "Baste the bearer," men; Cristobal gavotte athletic dance, Messrs. Poore, Schradley, and Wechsler; comedy acrobatics by Messrs. Bell, D. Raymond and Hughes. Sixty-two men, boys, and girls took part in the exercises. Classes were discontinued during the Christmas holidays, but were resumed on Monday, January 5.

PORTO BELLO.

The Christmas entertainment furnished jointly by the Porto Bello Sunday school and the townspeople was a success. The program was under the direction of the Sunday school, with Mrs. VanVoy as chairman. The decorations were tasteful, and were under the supervision of Mr. Cecil Wilkes. Mrs. Smith, and her corps of assistants, furnished supper. The program was, as follows:

"Joy to the world," by the congregation; prayer, Mrs. Sobey; Scripture reading, Mrs. A. E. Woolworth; address by the superintendent, P. T. Woolworth; song, Mrs. Wilkes; recitation, Pauline Smith; song, "Shine shines," four little girls; "If I were God," Doris Geyer; "What I want," Gladys Smith; "Snowflakes," Mabel Collie; song, "Christmas bells," Pauline Smith and Doris Geyer; recitation, Helen Keene; recitation, Gladys Geyer and John Geyer; recitation, Hazel Bruck; "Song of the wise men," by the school; recitation, "Mary's lamb," Anna Colberg; "Carols," William Smith; recitation, "Shining star," Dorothy Bruck; recitation, Rosemary Keene; declamation, "Christmas ladder," Howard Geyer; "Boyhood," John Bruck; recitation, Russell Geyer; recitation, "Nellie Bruck," recitation, Claud Smith; recitation, Ronald Medd; recitation, Edward Keene; "Christmas tree," Howard Geyer; "We're so very little," four little girls; tableau, "Crown jewels"; piano duet, Mrs. Allen and Mrs. Mackintosh; recitation, Gladys Geyer; recitation, Lillian Colberg; recitation, Pauline Smith; "Color bearers," three little girls; song, Mrs. Wilkes; "Hark the herald angels sing," by the congregation. Mr. Walter Thompson acted as Santa Claus, and distributed the presents. Mrs. Allen was presented with a handsome bag containing a \$10 gold piece as a token of appreciation of her services as pianist at the Sunday school services and the Sunday evening song service.

The Pennsylvania State College quartet gave a concert at the Porto Bello clubhouse on Saturday night, December 27, to a crowded house.

New Year's Day was observed by a picnic at the powder house beach. A large number took advantage of the nice day. Swimming and games were indulged in, and a lunch was prepared on the beach. In the evening, a "Smoker" was held in the clubhouse. Moving pictures, with two special feature reels, and an acrobatic performance, together with feats of legerdemain, by Geo. Kelley, made up the program.

Dr. Poole gave his illustrated lecture on "China," at the clubhouse on Saturday night, January 3, to a crowded house.

OFFICIAL CIRCULARS.

Financial Accounting for Material and Supplies.

CULEBRA, C. Z., December 31, 1913.

CIRCULAR No. 520:

I. ACCOUNTING FOR MATERIAL AND SUPPLIES IN STOREHOUSES.

1. Effective with the period ending December 31, 1913, the rendition of property returns for stock in storehouses on Form QMD-7-B will be discontinued. The property returns for the stock in Mount Hope storehouse for the period ended November 30, 1913, and for all other storehouses for the period ending December 31, 1913, will be forwarded to the Examiner of Accounts as soon as practicable after January 1, 1914. With the exception of the returns for Empire and Balboa storehouses, they will be accompanied by a list of overages and shortages.

2. The financial accountability of the Depot Quartermaster for stock in storehouses under his jurisdiction will be based upon the inventory taken December 1, 1913, priced from the prices shown in the price book. The financial accountability of storekeepers at Empire and Balboa will be based upon the value of the stock in each storehouse as taken from stock cards, which will be priced and extended as of January 1, 1914. The financial accountability of the district quartermasters and other storekeepers of the Quartermaster's Department will be based upon the inventory taken by them January 1, 1914, priced from the prices shown in the price book. The financial accountability of the storekeeper of the medical storehouse will be based upon the price inventory taken January 1, 1914.

3. The classification of material and supplies to be used temporarily will be prepared by the Chief Quartermaster. The stock of articles in the obsolete storehouse will be carried as a separate class.

4. Requisitions and foremen's orders for material and supplies in storehouses will be made on the forms provided for the purpose. Items of nonexpendable property will not be included in the same requisition, or order, with items of expendable property, and requisitions for material and supplies to be immediately expended must not contain items of material and supplies which are to be placed in stock in the divisions. No requisition or foreman's order for material and supplies should contain items found in more than one class.

5. When expendable material and supplies are furnished in containers which are nonexpendable, storekeepers will invoice the containers separately on the form for nonexpendable property, and the receiving official will handle in accordance with instructions concerning such property.

6. When foremen's orders are received in the storehouses the articles will be issued, prices and classes will be inserted, and the original and one copy forwarded to the Examiner of Accounts. The Examiner of Accounts will extend the prices, and forward the copies of the orders, classified by divisions and accompanied by an adding machine list, to the proper division or cost accountant, daily.

7. Requisitions, whether for expendable or non-expendable property for stock, will be made in sextuplicate. Four copies, compiled to show the quantity supplied, the unit price and the class, will be returned to the requisitioning official, who will accomplish and return one copy to the storehouse and forward two copies to the Examiner of Accounts. Prices will be extended by the Examiner of Accounts and one copy forwarded to the proper division or cost accountant.

8. When material or supplies are transferred from one storehouse to another, or from one division to another, or when returned to stock, or received from manufacturing plants, one copy of the transfer invoice will be forwarded direct from the invoicing official to the Examiner of Accounts, and the receiving official will forward one signed copy to the Examiner of Accounts immediately after accomplishment.

9. The following reports will be made weekly to the Examiner of Accounts by the Depot Quartermaster at Mount Hope, covering bills for material and supplies and services certified by him for payment:

Abstract of U. S. bills covering material and supplies received and taken into stock, accompanied by copies of invoices.

Abstract of U. S. bills covering material and supplies purchased on A, B, D, E, F, and H requisitions, accompanied by copies of invoices.

Abstract of U. S. bills certified for services only, accompanied by copies of invoices.

Abstract of local bills for material and supplies purchased on the Isthmus and taken into stock.

Abstract of bills covering local purchases not taken into stock, such as subsistence supplies.

Abstract of other bills for services performed on the Isthmus and certified by the Depot Quartermaster.

10. A monthly report will be made by the Examiner of Accounts to the Chairman and Chief Engineer, Chief Quartermaster, and the respective storekeepers

and divisions, showing the value of stock on hand, received, issued, or expended during the month.

II. ACCOUNTING FOR DIVISION STOCK OF MATERIAL AND SUPPLIES.

11. The stock of material and supplies kept on hand by divisions shall consist only of such articles as rock, sand, gravel, cement, coal, lumber, piling, explosives, oil, and waste, or any special material used only by one division which can be stored by the division to better advantage, or material of such character as necessitates its issue in bulk, or its delivery direct to divisions to save rehandling.

12. Card records of material and supplies kept in stock shall be maintained by each division showing the quantities on hand, received, issued, and expended in the work.

13. Each division will submit to the Examiner of Accounts on the first day of each month, report of the material and supplies requisitioned for immediate expenditure, which were not expended in the work during the preceding month; also, a report of material and supplies reclaimed or returned to stock after being charged to expenditure accounts.

III. DETAILS TO BE ARRANGED AND FORMS TO BE PRESCRIBED BY THE EXAMINER OF ACCOUNTS.

14. The Examiner of Accounts will prescribe all forms and arrange the details of the procedure to be followed in accounting for material and supplies. If necessity arises he may modify the details of the procedure fixed herein.

GEO. W. GOETHALS.

Chairman and Chief Engineer.

Housekeeping Quarters at La Boca Silver Camp.

CULEBRA, C. Z., January 2, 1914.

CIRCULAR No. 518:

Housekeeping quarters at La Boca will be assigned to married silver employees and the rental for same will be fixed and collected in accordance with the following rules and regulations:

1. The district quartermaster at Ancon will maintain a regular list of applicants whose applications will be filed in the order in which they are received. He will make assignments, subject to the general rules now covering the assignment of silver married quarters.

2. The quarters must not be sublet and must only be occupied by the employee to whom assigned and the immediate family or dependent relatives of such employee.

3. The apartment occupied and the surrounding premises must be kept in a clean and sanitary condition. Employees and their families will be required to comply with all sanitary regulations and to conform in general to the regular rules governing the occupancy of silver married quarters.

4. Employees occupying quarters who leave the service either by discharge or of their own accord will be permitted to retain their quarters until the end of the month for which rental was paid prior to such separation, at which time they must vacate the quarters.

5. A monthly rental fixed by the Chief Quartermaster with the approval of the Chairman will be charged for each apartment. The rates with the effective dates thereof shall be shown on a copy of these regulations posted on each rented building.

6. The rental period will begin on the 16th day of one month and end on the 15th day of the following month. The monthly rental must be paid to the authorized representative of the Isthmian Canal Commission in advance, that is, prior to the first day of the monthly rental period. Receipt for payment must be given on the prescribed form and should be retained by occupant as evidence of right to occupancy. These receipts must be shown upon demand to representatives of the Commission.

7. In case occupancy begins during any monthly rental period, a daily rate equal to 1-30 of the monthly rate will be charged for each day the quarters are occupied, except that rental for a fractional part of a monthly period beginning after February 16, shall be determined by deducting from the monthly rental 1-30 thereof for each day between February 15 and the date the occupancy begins.

8. Should any of the above rules and regulations not be complied with, the employee will be compelled to vacate his quarters at once, and no allowance will be made on account of rental paid by him for the unexpired balance of the month.

GEO. W. GOETHALS,

Chairman and Chief Engineer.

Examination by Board of Local Inspectors.

BOARD OF LOCAL INSPECTORS.

ANCON, C. Z., January 2, 1914.

The Board of Local Inspectors will conduct examinations at the Administration Building, Ancon, on Wednesday, January 14, 1914, beginning promptly at 2 p. m., for persons desiring to secure the following classes of licenses: Pilots, masters, mates, marine engineers, chauffeurs, and navigators of motor boats.

All applicants for licenses must procure from the Executive Office, Ancon, forms of application and information respecting the filling out of same, not later than the day previous to the examination. In addition, all persons desiring chauffeurs' licenses must provide themselves with automobiles with which to demonstrate their ability properly to operate the same.

Note—The demonstration test for applicants for chauffeurs' licenses will be given on Tuesday, the day preceding the regular examination at 2 p. m., at the Administration Building, Ancon; on Wednesday, the day of the regular examination, at 9 a. m., at the police station, Cristobal; for out-of-town applicants, on the day of the regular examination, at 2 p. m., at the Administration Building, Ancon.

W. V. JUDSON,

Chairman, Board of Local Inspectors.

Disposition of Bodies, Ancon Hospital and Cemetery.

DEPARTMENT OF SANITATION.

ANCON HOSPITAL,

ANCON, C. Z., December 31, 1913.

Arrangements have been made to change the mode of disposition of the bodies of those dying in Ancon Hospital, or brought there for disposition, from burial to cremation.

All bodies remaining in the cemetery after February 1, 1914, whose disposition has not been otherwise arranged for, will be cremated. The bodies of all persons dying in the hospital after that date, or brought there for disposal, will be cremated unless their friends or relatives arrange to take the bodies away within 24 hours after death.

Friends or relatives who wish to take away the ashes of the bodies cremated will be permitted to do so, provided they make application therefor in advance; otherwise, the ashes will be placed in a common grave.

Bodies embalmed for future disposition should be removed as soon as possible; if not removed within 90 days from date of embalming they will be cremated.

CHAS. F. MASON,

Superintendent.

Transfer of District Quartermasters.

OFFICE OF CHIEF QUARTERMASTER.

CULEBRA, C. Z., December 16, 1913.

All concerned—Effective January 1, 1914, the following changes will be made in stations of district quartermasters: Roy R. Watson, from Cristobal to Ancon; B. C. Poole, from Ancon to Cristobal.

R. E. WOOD,

Chief Quartermaster.

Gamboa Passing Track Placed in Service.

PANAMA RAILROAD COMPANY.

OFFICE OF GENERAL SUPERINTENDENT.

COLON, R. P., January 5, 1914

G. S. BULLETIN No. 32:

All concerned—Effective 12.15 p. m., Tuesday, January 6, 1914, the new Gamboa passing track will be put into service and used temporarily by all trains, to permit placing permanent main line track on final grade and center.

All trains will operate over this track until further notice. A speed of 10 miles per hour will not be exceeded through the turnouts at either end of the passing track, and over the temporary incline on the curve north of water tank.

The interlocking plant at Gamboa cabin will be put out of service at the same time, and switches will be equipped with hand throw switch stands.

Please be governed accordingly.

F. MEARS,

General Superintendent.

Placing in Service of New Section of P. R. R. Main Line.

PANAMA RAILROAD COMPANY.

OFFICE OF GENERAL SUPERINTENDENT.

COLON, R. P., January 5, 1914.

G. S. BULLETIN No. 31:

All concerned—The new section of permanent main line between Dump 6 and Dump 7, will be put into service at 12 o'clock noon, Thursday, January 8, 1914. Trains will not exceed a speed of 20 miles per hour until further notice.

F. MEARS,

General Superintendent.

Interlocking Plant at Caimito Out of Service.

PANAMA RAILROAD COMPANY.

OFFICE OF GENERAL SUPERINTENDENT.

COLON, R. P., January 2, 1914.

G. S. BULLETIN No. 28:

All concerned—Interlocking plant at Caimito will be placed out of service at 10 a. m., on Monday, January 5, 1914.

F. MEARS,

General Superintendent.

LOST—Bunch of keys with metal check No. 179408 attached. Finder please return to district quartermaster's office at Culebra, or any other district quartermaster's office, notifying Culebra.

COMMISSARY DEPARTMENT.

The commissary stores are open during the following hours:

Cristobal, 8 a. m., to 12.30 p. m., and 2 to 7 p. m.
Balboa, 8 a. m. to 12.30 p. m., and 2.30 to 7 p. m.
Ancon, 8 a. m. to 1 p. m., and 3 to 6 p. m.
All others, 8 a. m. to 1 p. m., and 3 to 7 p. m.

Commissary Cold Storage.

No changes are reported in the list of cold storage supplies sold at the commissaries published in THE CANAL RECORD of December 31.

Married.

RAWSON-BRADY—On Wednesday, December 17, 1913, at Cristobal, C. Z., Isaac Maurie Brady of Marion, Ohio, to Dr. Frank Rawson of Empire, the Rev. J. L. Wise officiating. Canal Zone residence, Empire.

BLACKWOOD-HARVEY—On Wednesday, December 17, 1913, at Cristobal, C. Z., Jean Harvey to Frederick William Blackwood, both of Boston, Mass., the Rev. J. L. Wise officiating. Canal Zone residence, Empire.

McKECHINE-BARROWS.—At the home of the bride's parents in Ancon, on Thursday, December 11, Myrtle Mae Barrows to Thomas McKay McKechine, the Rev. Harry Compton officiating. Canal Zone residence, Ancon.

Supplies for the Canal.

The following steamers, with supplies for the Isthmian Canal Commission and Panama Railroad Company arrived at the ports of Colon and Cristobal during the week ending January 3:

Magdalena, December 28, from New York, with 70 reels wire cable, for stock.

Carrillo, December 28, from New York, with 31 kegs copper nails, 623 crates porcelain insulators, 187 cases electrical machinery, for First Division; one launch, for Sixth Division; 16 kegs wire nails, for Division of Municipal Engineering; 246 bundles galvanized iron, for stock.

Prinz Joachim, December 29, from New York, with 43 kegs bolts and nuts, for First Division; 24 bars steel, 22 drums, 200 sacks lime, for stock.

Carlago, December 29, from New Orleans, with 150,000 pounds pig iron, 189 pieces oak lumber, for Mechanical Division; 25 castings, 13 pieces oak lumber, for Sixth Division; 77 pieces treated piling, for Division of Municipal Engineering; 66 pieces untreated piling, 73 pieces oak lumber, for Atlantic Division; 50 kegs white lead, 26 rolls cotton canvas, for stock.

Uller, December 30, from Philadelphia, with 9,000 cases dynamite, for stock.

Panama, December 30, from New York, with 353 crates roofing tiles, 235 packages steel and bolts, 34 cases electrical machinery, 18 reels cable, for First Division; 60 pieces pipe, 858 bundles steel bars, for Second Division; 20 crates iron office material, for Sixth Division; 69 packages drugs, for Sanitary Department; 75 bundles brick, eight cases electrical machinery, for Mechanical Division; 208 bundles reinforcing bars, 142 bundles reinforcing bars, for Division of Municipal Engineering; 100 bundles reinforcing bars, 42 cases woodwork, 35 bundles liquid paint and cement, for Administration Building, Balboa; 754 bundles steel, 95 boxes armament, for fortifications; 150 castings, 1,699 pieces steel, 80 drums paint, 40 cases signal oil, 200 bales oakum, 150 barrels lubricating grease, for

stock; and a miscellaneous cargo, the whole consisting of 5,686 pieces weighing 450 tons.

Santa Marta, December 31, from New York, with 109 packages tile, 1,437 packages structural steel, 109 packages tile, for First Division; 48 packages bridge iron, 16 cases structural material, for fortifications; 30 cases concentrated lye, 380 coils wire, for stock.

Abangarez, from New Orleans, January 2, with 246 pieces oak lumber, 111 tons pig iron, for Mechanical Division; 370 sacks feed, for stock.

Benefactor, January 2, from Liverpool, with 50 steel dipper teeth, for stock.

Rainfall, Dec. 1 to Dec. 31, 1913, Inclusive.

WEATHER CONDITIONS, CANAL ZONE, DECEMBER, 1913.

Except for a general rain on the 12th and frequent showers along the Atlantic Coast, dry season weather prevailed during the greater part of the month. The rainfall was below the station averages at all stations except Ancon. The deficiencies were greatest in the central section and over the Chagres River basin. The monthly totals ranged from 1.03 inches at El Vigia to 12.52 inches at Brazos Brook. The maximum precipitation recorded in one day was 3.75 inches at Brazos Brook on the 1st.

Air temperatures, wind movement, and atmospheric pressure were slightly above normal, while the cloudiness was generally deficient.

Few fogs were observed during the month. Of the fogs observed, 59 per cent were dissipated by 6.30 a. m., 74 per cent by 7.30 a. m., and 96 per cent by 8.30 a. m.

The following table summarizes the weather conditions for the month:

STATIONS.	Press're (reduc'd to mean of 24 hours.)	Temperature.					Precipitation.			Wind.					
		Mean	Maximum	Date	Minimum	Date	Mean relative humidity.	Total inches	Station average.	Number of rainy days.	Total movement (in miles).	Prevailing direction.	Max. velocity (in miles).	Direction.	Date.

THE CANAL RECORD,

Ancon, Canal Zone,

Isthmus of Panama.

No communication either for publication or requesting information, will receive attention unless signed with the full name and address of the writer.

NOTES OF PROGRESS.

Additional Pier at Cristobal Terminal.

At a meeting of the Board of Directors of the Panama Railroad Company, held in New York City, on December 22, the construction of an additional pier in the dock system at the Cristobal terminal was authorized at a cost of approximately \$1,100,000. This pier, which will be known as pier No. 7, will be of about the same size as pier No. 8, and, although there will probably be some modifications as to details, the plans, in general, will conform to those for piers Nos. 8 and 9, now nearing completion. Borings on the site of the proposed pier, which will be separated only by the width of the slip from pier No. 8, directly south, have been begun. Mr. T. B. Mönniche, formerly designing engineer in the Department of Construction and Engineering, in charge of the details for the emergency dams, was transferred, effective December 31, 1913, to the Panama railroad, and will have charge of the design of the new pier.

The matter of abandoning the old Colon docks of the railroad company on or about January 1, 1919 came up at the directors' meeting on December 22, but in view of the fact that it will be 12 months, or more, before dock No. 7 can be completed, definite action was postponed until a later date.

Transfer of Generating Equipment to Miraflores Power Plant.

In order to supply the shops at Balboa with electrical energy before the permanent electric system is in operation, the Miraflores power plant is being supplemented by the transfer to it of one of the three generating units in the steam plant at Gatun. The two stations were originally twin plants, having three Curtis steam turbines of 1,500 kilowatts capacity, direct-connected to generators, which, driven at a speed of 1,500 revolutions per minute, produced each 394 amperes of alternating current at a potential of 2,200 volts.

Steam for each turbine is supplied at 175 pounds pressure from twin Keeler boilers, oil-burning, and equipped with superheaters, each having accessory equipment of condenser and vacuum pump.

The transfer is being done by forces of the Mechanical Division, which has charge of both plants. The turbogenerator and its accessories are being handled directly to flat cars, on a track entering the north end of the plant, by the 20-ton overhead electric crane; the boiler parts will be handled by locomotive crane. The material will be hauled to the west side of the upper approach to Gatun Locks and loaded on a barge, which will carry it through the Canal to Miraflores.

Vacuum Cleaners for New Administration Building.

Award has been made to the American Rotary Valve Company for supplying a vacuum cleaning system at the new administration building at Balboa, at the price of \$1,869. The contract calls for six vacuum cleaning machines, equipped with 20-horsepower motors of the 230-volt, 3-phase, 25-cycle, A.C. type, together with six 12-inch carpet renovators, six 18-inch bare floor renovators, six desk and shelf renovators, six wall brushes, six 1-inch automatic valve handles, 450 feet of 1½-inch wire line vacuum hose, and 36 bronze flush valves. All exposed parts of the vacuum machines are to be treated with an anticorrosive preparation.

New Sightseeing Barge.

The passenger-carrying barge for the Panama railroad's sightseeing service has been completed, and will be placed in use within the next few days. A steel mud dump barge, one of four built by William Cramp and Sons Ship and Engine Company for the Isthmian Canal Commission, brought in sections to the Isthmus in July, 1909, and assembled at the Balboa shipways, has been utilized for the purpose. It has a length of 154 feet; beam, 32 feet; depth, 10 feet and seven inches, and is of 500 gross tons. The work of converting the barge to its new use was performed in the slip between docks Nos. 8 and 9, by forces of the Panama railroad.

The dock structure is modeled after that on the sightseeing cars; its floor is raised at the after end to a height of eight feet nine inches, and gradually descends to about two feet at the forward end, so that the occupants of the rear seats can overlook those in front without obstruction to the view. The roof and floor timbers are eight by 16 inches in size, the latter being bolted securely to the hull. The roof, upheld by 8 by 8-inch wooden stanchions, is covered with 1-inch ceiling lumber, in turn covered over with sailcloth, painted and sanded. For the protection of those who prefer to ride on the roof, a double row of 2½-inch pipe railing has been built around the outer edge. An aisle, or passage-

way extends through the center of the interior of the structure, with rows of wooden seats on either side. Seating accommodations have been provided for 276 passengers. The barge will be equipped with the usual marine safeguards, including life preservers to a number equivalent to its passenger-carrying capacity. These preservers will be stored in a specially designed loft attached to the ceiling in the after part of the structure, so arranged that in case of use, they can all be released at one time. Toilet facilities have been installed in the space underneath the high part of the structure, served by an iron tank placed between it and the master's cabin. A wooden railing extends entirely around the main barge deck, with space between it and the superstructure for a passageway. A rate of \$1.50 will be charged for the lake trip between Gatun and Gamboa.

Work at Cucaracha Slide.

Conditions at Cucaracha slide have remained practically the same during the past week, the least width of channel being still about 160 feet, with the seven dredges engaged on either side of the narrowest point. The slide appears to be in slight motion clear to its outermost break, which is 1,832 feet from the Canal center line, and it is believed that not less than 1,500,000 cubic yards of spoil, and possibly more, will have to be removed from it before it will cease to menace the channel.

Two more of the six 1,000-cubic yard dump barges ordered from the Maryland Steel Company, of which two are now in service, left the plant of the contractor at Sparrow's Point, Md., on January 10, in tow for the Isthmus.

Permanent Locomotive Roundhouse at Balboa.

Most of the material for the motor-driven turntable to be installed in the permanent roundhouse of the Balboa terminals, situated on the northeastern edge of the site of the shops and south of the yards at the head of the proposed new pier, has arrived from the United States, and the foundation for the turntable is being erected. The foundation will consist of a reinforced concrete pivot at the center of the 35-foot radial turning area, mounted on a 6-foot caisson, and of supports for the outside track, made of reinforced concrete resting on concrete piles and 10 and 12-inch steel tubes, filled with reinforced concrete. All caissons have been sunk to rock, which is about 40 feet below the surface of the ground.

The steel work for the roundhouse building has been completed, with the exception of final alignment of some of the roof purlins. The roundhouse is 75 feet deep, with its interior rim 45 feet from the outer track of the turntable carriage, and is built in a segment of 160 degrees. It is to have 15 stalls, and the concrete work for all the pits has been

completed, in readiness for the track. The three pits centrally situated have extra heavy and wide walls, for the use of jacks in repair work. Opposite them, on the outer side of the roundhouse, is an office and machine shop, about 20 feet deep by 100 feet long. Foundations for nine machines, such as drills, lathes, boring mill, etc., are to be placed in the machine shop.

All the steel work of the structure is to be encased in concrete to protect it against the corrosive effect of the gases from the locomotives, and the roof is to be of reinforced concrete, provided with concrete smoke jacks for ventilation. The outer side of the roundhouse is to be enclosed with a concrete wall to a height of six feet above the ground, with the exception of the machine shop, for which a wall three feet six inches high will be built and surmounted by movable louvres.

Fill at Miraflores.

The triangular space between the spur track leading to the summit of the hill at Miraflores, on which the new water purification plant now under construction by the Division of Municipal Engineering is located, and the Panama railroad main line, is to be filled level with the top of the present railroad embankments. This fill does away with the pool of stagnant water occupying the depression, and provides space for a wagon road, which will probably be built after the tracks are removed, connecting the site of the purification plant with the Canal Zone highway. This road can be utilized by teams in the transportation of chemicals and other materials required at the purification plant. The work of making the fill has already been begun by Fourth Division forces. About 12,500 cubic yards will be required.

Progress on Pontoon Barge for Crossing the Canal.

In the construction of the pontoon barge to support the trestle for railway and highway traffic across the Canal at Paraiso, by which the Empire suspension bridge and bridge No. 57½ of the Panama railroad will be supplanted, the transverse floor timbers, spaced about 20 inches apart, have been laid for the full 378 feet of length, the seven lengthwise bulkheads directly over the floor timbers have been extended almost the entire length, and the deck beams extending across the tops of the bulkheads have been laid for over one-third of the length of the barge. Work has been begun on the decking. No work has been done on the flooring, or sheathing, which will be placed on the under side of the floor timbers to form the hull. The sheathing will be of 12-inch plank, three inches thick, and all joints are to be securely caulked.

The barge is being constructed on the east, or Mount Hope, bank of the French canal, immediately north of the approach to the dry dock. It is mounted on cribbing, built up about five feet above the surface of the earth, and is to be launched, when completed, by means of improvised shipways laid alongside. A force of 16 gold and about 78 silver men is employed on the work, and it is expected that the barge will be finished, ready for launching, within three months.

Water was admitted to the west chamber of Pedro Miguel Lock on Friday, January 2, and to the east flight of Gatun Locks on January 3, in the course of tests of valves

and gates, preparatory to getting the flights in readiness for operation. As far as the tests have advanced, the results have been satisfactory.

Progress on Electrical Substations.

The structural steel for the superstructures of the four substations, through which current from the Gatun hydroelectric station will be distributed along the Canal, in connection with the 44,000-volt transmission line, is arriving from the plants of the American Bridge Company, which has the contract for its fabrication and erection. The superstructures of the buildings will be identical; each will have approximate plan dimensions of 126 by 72 feet, with a maximum height of 36 feet. The first steel for the Gatun substation arrived at the site, immediately north of the Atlantic Division office building, on January 3, and forces of the contractor are engaged in sorting material and erecting the first columns.

The foundation of this station, built by forces of the Quartermaster's Department under supervision of the First Division, was completed ready for steel, with masonry plates and anchor bolts in place, on December 17. Excavation for the foundation had been started in November. Excavation for the substation at Miraflores, also begun in November, has been completed and the foundation is nearly in place. No work has been done on the sites of the Balboa and Cristobal substations. A committee has recently selected the ground in rear of the north end of Dock 13, between Mount Hope and Cristobal, as the site for the Cristobal station. That for the Balboa station is under advisement.

Ancon Crusher.

Following is a statement of rock crushed at Ancon quarry during the week ending January 10:

DATE.	Cubic yards.	Hours worked.
Jan. 5.....	1,915	8.20
Jan. 6.....	1,832	6.20
Jan. 7.....	2,793	8.50
Jan. 8.....	2,321	8.35
Jan. 9.....	2,444	8.25
Jan 10.....	2,450	6.40
Total.....	13,755	47.10

Progress on Hydroelectric Station.

At the Gatun hydroelectric station the concrete work under way at present consists in finishing the under parts of the 12-foot overhanging eaves which are recessed in architectural design based on the position of the supporting beams, smoothing the exterior and interior surfaces of the concrete walls, and various touches of finishing work in the installation of machinery. No concrete is received from the spillway mixing plant, but cement is drawn from the supply store at the plant. The first and second galleries in the west side of the building, to contain the bus compartments and the switchboards, respectively, and the gallery at the south end for office space, have been completed, except for smoothing, and the installation of bus bars, oil switches, etc., is under way.

The turbines for the turbogenerators have been completed for some time, except for the connection of their governors and lubricating systems; masons are now engaged in lining the turbine pits with white enameled brick. The 30-ton overhead electric crane is about

ready for use, and in a short time power for its operation will be supplied from the Gatun steam electric plant, through the duct lines laid to connect the hydroelectric station with the transformer station east of Gatun Locks. The crane will then be used in installing the generators on top of the turbine frames.

The reinforced concrete headgate house, at the east end of the spillway dam, has been completed; mechanical installation of the controlling machinery is complete, and the placing of electrical connections and control panels is in progress.

Renewing Storage Batteries on Submarines.

Three of the five submarine vessels stationed at the Atlantic entrance are having their storage batteries replaced by new cells, which are charged with current from the Subsistence Department's plant at Cristobal. For the purpose of this work, the vessels were transferred from alongside Dock 8 to the east end of Dock 13 on January 5. The charging of the batteries will begin about January 15, under the direction of forces of the Mechanical Division. Direct current of 300 amperes, at 140 volts, is supplied from the motor generator set in the Subsistence Department plant.

Visit of Masons.

Mr. Charles F. Buck, sovereign inspector general of the Louisiana and Canal Zone consistory of Masons, accompanied by Mr. Gus D. Levy, grand master of the Kadosh, Mr. William A. Briant, knight commander, and secretary of the Louisiana bodies, and Mr. Thomas F. Gessner, representative of Jerusalem temple, all from Louisiana, arrived on the Isthmus on Monday, January 12, on the *Parissima*, for the purpose of completing arrangements for a consistory reunion and shrine ceremonial, which it is planned to hold here in March. Messrs. Buck, Levy, and Gessner are thirty-third degree Masons.

Missing Men.

Any one having information regarding the following named men who are supposed to be on the Isthmus is requested to communicate with the American Legation, Panama: William J. Reid of Brooklyn, N. Y., James J. Bowes, or Phillips, of New York City, and William Donahue of Clifton Springs, N. Y.

Fong Tsiang Kwong has been appointed consul-general of the Republic of China in Panama, succeeding Owyang King. He entered upon the duties of his office on January 7.

The Sosa Hill and Balboa dry dock excavation work were combined on January 1, under Superintendent J. A. Walker of the Second Division.

The fire protection pump, formerly a part of the equipment of the tug *Bolivar*, has been transferred to claret No. 7.

The road paralleling the water front at Colon, between the Strangers Club and Eleventh street, is to be improved.

The Pedro Miguel post-office was moved on January 9, from the west side of the Panama railroad, in an area later to be raised by filling, to the building formerly occupied by the Pedro Miguel police station. This building is on a knoll at about the center of the permanent town.

SOCIAL LIFE OF THE ZONE.

Woman's Clubs.

The Ancon Study Club resumed its sessions after two weeks' vacation, on Thursday afternoon, January 8, and will continue regular meetings on Thursday afternoons at 2.30 o'clock. At the meeting on January 15, the plan of study for the next six months will be decided upon. On January 29, there will be an election of officers, and, as the occasion will be the third anniversary of the club, a special program will be provided.

There was a large attendance at the meeting of the Cristobal Woman's Club on Wednesday afternoon, January 14, when Dr. M. E. Connor spoke on "Eugenics." The president of the club, Mrs. Thomas Edwin Brown, Jr., will read the principal paper on social problems at the meeting on Wednesday afternoon, January 22.

Folk Dancing.

Folk dancing has been introduced as extension work in the Y. M. C. A. at Cristobal, and classes have been organized for women and girls under the direction of the physical director, H. Darnell Brittin, who has made a specialty of the work. The classes of girls is divided into two sections. Class A is composed of 20 girls between the ages of 12 and 15, while Class B has 12 girls of 12 years old and under. The work of Class A consists of gymnastic exercises, and games, leading to the folk dances. The little girls in Class B, which meets on Monday afternoons, do folk dances only. Although these two classes have been organized only a little over a month, the members were able to give an exhibition of their work at the clubhouse in December. On Friday afternoon, January 9, a class for women was organized, when practice in the first work of gymnastics was begun.

Sunday School Work.

The quarterly convention of the Isthmian Sunday School Association was held in the Commission clubhouse, Corozal, on Sunday afternoon, January 11, when there was an attendance of 91 delegates, Sunday school workers, and visitors. The federated Sunday schools were represented by 36 delegates; these were from East Balboa, Panama, Corozal, Paraiso, Culebra, Empire, Gatun, Cristobal, and Porto Bello. The questions discussed at the business meeting included the matter of supplying books from the traveling library for the families living in the more isolated villages on the relocation of the Panama railroad. The president, Mr. J. M. Weaver, asked for volunteer assistance in the work of distributing and collecting the books at these outlying centers. Mr. Weaver also asked the cooperation and assistance of the federated Sunday schools in the establishing of Union church work on a permanent basis. The report of the treasurer showed the finances of the association to be in a good condition. The nominating committee was composed of Messrs. Higgins, Keyser, Chase, and Mesdames Tomey, and Harrison. This committee presented the following names for officers of the association for the six months ending June 30, 1914: For president, J. F. Warner, Culebra; vice-president, W. E. Hoffman, Empire; secretary, W. H. Kromer, Cristobal; treasurer, James Stokoe, Balboa. By unanimous vote of the convention the nominating ticket as presented was accepted.

The formal program, which began about

3.30 o'clock, included the following numbers: Contralto solo, Mrs. Adolf Faure of Culebra; paper on mechanical aids in Sunday school work, Mr. Hoffman of Empire; vocal duet, the Misses Harrison and Larcom of Cristobal, accompanied by Mrs. Brittin of Cristobal; a talk on the influence of the teacher on the every day life of her pupils, Mrs. Hackenberg of Corozal; an address on the potential influence of the Sunday school by the Hon. William Jennings Price, United States Minister to Panama.

A statistical report of the association follows: Number of Sunday schools federated in the association, nine; number of children enrolled, 600; number of adults enrolled, 163; number in the cradle roll, four schools, 153; total enrollment in all schools, 916; average attendance at all schools, 523. The largest Sunday school is at Cristobal, with a total enrollment of children, adults, and the cradle roll, of 262.

Preceding the meeting of the Sunday school association, a meeting of the committee on union church federation was held, representatives being present from Panama, Balboa, Corozal, Empire, Culebra, Gatun, Cristobal, and Porto Bello. The reports of these representatives showed a promising outlook. It was conservatively estimated that a monthly sum of \$250 could be depended upon for the support of the work. The members of the committee expect that within a short time enough money will be pledged to warrant the calling of two ministers for the denominational work in the Canal villages. Such ministers will be accorded the privileges of Canal employes by the courtesy of the Isthmian Canal Commission. There will be a general meeting for the further discussion of this work at the Commission clubhouse at Corozal, on Sunday, January 25.

Cristobal Union Church.

Col. Charles Rothwell of the Salvation Army will preach in the Union Church, Cristobal, on Sunday evening, January 18, at 7.45.

Colonel Rothwell comes direct from Southampton, England, and is on a tour through the West Indies, Central America, and the northern states of South America.

Members of the Union Church are urged to attend; all others are cordially invited.

Reopening of Canal Zone Schools.

The Canal Zone schools were reopened on Monday, January 5, after a vacation of two weeks. The number of pupils attending on the opening day in the white schools, including the high schools, was 975, or 12 more than the number in attendance when the schools opened in October, 1913. The attendance in the colored schools on the opening day was 732, being an increase of 182 over the attendance at the opening of the schools in October. The colored school in the native village of Mandingo was not reopened, because the children have all moved away.

A set of new regulations governing the registration of students in the high school was issued before the opening of the school. These regulations apply to the number of subjects to be carried, the voluntary discontinuance of subjects, the regulation of credits, the provision for examination to be given at the end of each semester, and the provision for the frequent use of tests, with the

object of developing habits of thoroughness, neatness, and accuracy in mechanical work and independent thought.

On Saturday, January 10, the first teachers' meeting for the year was held in Ancon school-building. At the general session of white teachers an address was delivered by Dr. E. G. Dexter, director of the National Institute of Panama.

The program for the colored teachers' meeting included original papers on various topics, as automatic accuracy in the fundamental processes, reading and literary interpretation, arithmetic, as a means of teaching independent thought, and its relation to the general experiences of the child outside of the schoolroom.

Isthmian Tennis Association.

The Isthmian Tennis Association tennis tournament, in doubles, held at Gatun on January 11, was won by the Ancon Hospital club team. The matches were played, as follows:

Gatun (Wells and Rose) defeated Tivoli Club of Ancon (Edwards and Kalor), 6-3, 2-6, 6-3.

Ancon Hospital (Runyan and Earhart) defeated Culebra (Goethals and Fleischman), 6-3, 6-4.

Pacific Club of Ancon (Pearman and Nevius) defeated Camp Otis (Swartz and Stewart), 6-1, 6-4.

Gatun defeated Empire (Newbold and Oakey), 6-3, 6-3.

Ancon Hospital defeated Pacific Club, 6-4, 6-2.

Ancon Hospital defeated Gatun, 6-4, 6-2.

Annual Dinner of the Society of the Chagres.

The third annual dinner of the Society of the Chagres will be held on the roof of the Hotel Washington in Colon, on Saturday evening, January 17. If the weather is unfavorable, the event will take place inside the hotel.

Order of Railroad Telegraphers.

There will be a meeting of Panama Railway System Division, No. 158, Order of Railroad Telegraphers, in the courthouse, Cristobal, at 8.30 p. m., January 17, 1914. All members are requested to attend.

J. F. STAHL,

Secretary-Treasurer.

CULEBRA, C. Z., January 10, 1914.

I. B. of S. S. and D. M.

The regular meeting of Local No. 19, International Brotherhood of Steamshovel and Dredgemen, will be held at Empire lodge hall on Sunday, January 18, at 12.30 p. m.

The Wandering Herd, consisting of members of the Benevolent and Protective Order of Elks residing on the Isthmus, accompanied by their families, gave an excursion to the island of Taboguilla on Sunday, January 11. The party numbered about 240. The trip was made on the tug *Bolivar* and barges.

Married.

SPANGLER-COSSEY—At the Union Church, Cristobal, on December 11, 1913, Mabel Tuller Cossey of Mechanicsville, N. Y., to Henry Everett Spangler of Cripple Creek, Va., the Rev. Carl H. Elliott officiating. Canal Zone residence, Cristobal.

LEVY-JACOBS—On Sunday evening, December 28, at Houston, Texas, Miss Tillie Jacobs, daughter of Mr. and Mrs. J. Oppenheim, to Mr. N. L. Levy, Dr. Henry Barnstein officiating. Canal Zone residence, Gatun.

FORGING PRESS AT BALBOA.

Heavy Machine for Working Down Billets at Permanent Forge.

A 500-ton forging press, is being built by the Bethlehem Steel Company of South Bethlehem, Pa., for use in the forge shop of the new Balboa shops. The contract price of the machine is \$9,600, and delivery is to be made within 170 days from the date of receipt of notice of award. The following extra dies and tools, at an additional cost of \$1,740, were ordered at the same time: Two sets of V dies, with two die holders; 20 chipping gouges, with handles, and 10 knives, with holders.

The press will be capable of working down an 18-inch billet, and is designed to operate normally with compressed air at a pressure of from 85 to 95 pounds per square inch, but it may be operated with steam at 100 pounds pressure per square inch, if desired. It is of the 4-column type, and will be equipped with an intensifier, low pressure tank, necessary valves, pipes, etc. The total stroke of the forging die will be 30 inches, with a power or forging stroke of five inches as the maximum; it will be possible to obtain the full stroke at any point of the 30-inch travel.

The base plate of the press proper will be a massive iron casting, machined top and bottom, and bored and faced for the attachment of columns and die holders. The press will be supported on two heavy cast iron girders grouted and bolted to the foundation, which will be of concrete sunk to rock. All of the four columns are to be forged steel, and will be used as guides for the crosshead, a heavy steel casting machined to receive the upper die holders, and arranged to slide smoothly on the vertical guide columns. The stalk of the crosshead is fitted to receive the plunger cap, and as the cylinder is bored a close fit throughout its length, and no grooving of any kind is done, the plunger cap can be used as a guide for the forging ram, in addition to the guide on the columns, thereby insuring steadier forging, when work is placed on one side of the dies only. The cylinder will be a steel casting exactly parallel with the guide columns; the plunger will be of close-grained cast iron.

The upper frame will be a heavy steel casting, bored in the upper ends for the four columns, and faced for connecting the main hydraulic cylinder with the lifting cylinders. The latter will be of cast iron and placed on the upper frame, one on each side of the main hydraulic cylinder, so arranged that the main press plunger can be lowered clear of the cylinder for examination and repacking.

The lower die holder will be a steel casting attached to the bedplate of the machine in such a manner as to permit ready removal of the bottom die. Two sets of flat dies of hard tool steel, approximately one per cent carbon, will be furnished. These will be keyed to the lower die holder and crosshead, respectively.

Pneumatic pressure will be transformed to hydraulic pressure by means of an intensifier, located on one side of the press. Normally, air at a pressure of from 85 to 95 pounds per square inch will be admitted to the lower vertical cylinders, and the resulting load transmitted through forged rod and piston to the upper, or water cylinder. The air and water cylinders and spacers will be tied together by means of four forged steel rods, so as to relieve the cylinder bolts of undue strains. Sufficient

compression will be provided in the oil cylinder to prevent knocking or shock when the piston is lowered quickly. The hydraulic cylinder will be of forged steel founded on an entablature carried by the four steel columns. The movements of the intensifier and the press will be regulated by the valve control gear.

In order to compensate for leakage of water, a pressure tank will be installed on one side of the intensifier, designed for a safe working pressure of 90 pounds of air per square inch, and tested to a pressure of 500 pounds per square inch.

The operating mechanism of the press will be simple. The adjusting and power strokes of the main hydraulic cylinder will be controlled by a single lever conveniently situated, so that the operator can see the pressure gages, as well as the work under the dies. The press will be fitted with single lever control gear, all motions being obtained by the operation of a single lever to give short, rapid strokes, as well as for lifting and quickly lowering the press head in any part of the total stroke, according to the requirements of the work, and allowing the press head to return immediately and automatically to working on the short strokes, as soon as the longer strokes are no longer required. The control lever to bring the lifting cylinder into action immediately the forging stroke begins, prevents any possibility of the crosshead dropping should the resistance be relieved suddenly. If the pressure is raised or lowered, working with long strokes, or short power strokes, the die will at all times, and in any position, exactly follow the movements of the operator's hand. A small movement of the lever will give a short stroke of the press, and a greater movement, a longer stroke.

In recapitulation, the press will exert a maximum pressure of 500 tons; its maximum consumption of free air per minute, based on twenty 5-inch strokes per minute at 500 tons pressure, will be 4,000 cubic feet; its maximum consumption of steam under the same conditions, 172 pounds per minute; maximum pressure per square foot on foundation, 2,000 pounds; number of power strokes per minute, short (one inch), over 100; medium (two and one-half inches), over 60; long (five inches), over 20.

An arrangement has been entered into with the contractor, whereby Mr. E. M. Ploessel, a blacksmith at the Balboa shops, will spend some time at the South Bethlehem works familiarizing himself with the machine, or one of similar capacity. He sailed for the United States on the *Panama* on Monday, January 5.

Progress on Duct Lines for Electrical Distribution.

The digging of the trench for the subterranean duct line to connect the Miraflores substation of the transisthmian system of electrical distribution with Miraflores Spillway and Locks, began on January 12. The line between this station and Pedro Miguel Lock, following the right-of-way of the Panama railroad for most of the distance, has been completed, with the exception of a part which crosses an area now occupied by construction tracks, west of the Panama railroad at Pedro Miguel. The duplicate lines, about 600 feet apart, from the hydroelectric station to Gatun Locks, and the transformer station east of the locks, have been completed, except about 200 feet near the hydroelectric station. All

of these lines have duct sections of vitrified tile, encased in concrete. The duplicate lines from the hydroelectric station have each 20 ducts; the line to Pedro Miguel Lock has 16 ducts, and that to Miraflores Spillway and Locks has 16 sections. The cable required at present has been pulled into the line to Pedro Miguel Lock, and in one line in Gatun Dam; the placing of cable in the second line to Gatun Locks and substation is in progress.

Opportunities in Detroit—A Communication.

Editor, THE CANAL RECORD,

ANCON, C. Z.

Dear Sir: I have read with interest the communication of the four gentlemen from Detroit, in this week's issue of THE CANAL RECORD. They advise our mechanics to "Keep away from Detroit." In response to their cordiality, it might be noted that four gentlemen from Rochester, Rome, or Rahway might advise the Canal workers to "Keep away" from their towns with just as much reason, as jobs are just as hard to find in these towns as in Detroit. The ex-Canal workers should then stay away from the United States entirely, and it might be better to direct the Panama railroad boats to Barcelona, or Hongkong, or some place where Canal men will be more welcome than in their native land.

Last month I visited my native city of Detroit, and I did not hear of any bread line or soup kitchen recently established there. The factories were running at as great a capacity as in any similar town in the country, and I noted that the largest manufacturer of motor cars is building an enormous addition for the purpose of doubling his output this coming year.

The American mechanics of the Isthmus are picked men, while the foreigners are the laborers and helpers. First-class men, such as we have, are never idle for long periods through lack of a chance to work, and I hope if any Canal workers come to Michigan, they will come to stay "In Detroit, where life is worth living."

Very truly yours,

MAURICE W. FOX.

CULEBRA, C. Z., January 9, 1914.

Postal Savings Bank Transactions.

A statement of the postal savings bank transactions at Canal Zone post-offices for the month of December, follows:

OFFICE.	Amount issued.	Amount paid.

LOST—Sorority pin in the form of a crescent, set with small pearls, somewhere between Panama and Balboa. Finder is requested to return article to the office of THE CANAL RECORD. Reward.

RULES FOR THE MEASUREMENT OF VESSELS FOR THE PANAMA CANAL.

BY THE PRESIDENT OF THE UNITED STATES OF AMERICA.

A PROCLAMATION.

I, WOODROW WILSON, President of the United States of America, by virtue of the power and authority vested in me by the Act of Congress, approved August twenty-fourth, nineteen hundred and twelve, to provide for the opening, maintenance, protection, and operation of the Panama Canal and the sanitation and government of the Canal Zone, do hereby prescribe and proclaim the "Rules for the measurement of vessels for the Panama Canal," which are annexed hereto and made a part of this proclamation.

In witness whereof, I have hereunto set my hand and caused the seal of the United States to be affixed.

Done at the city of Washington this twenty-first day of November in the year of our Lord one thousand nine hundred and thirteen and of the independence of the United States the one hundred and thirty-eighth.

[SEAL]

WOODROW WILSON.

By the President:

W. J. BRYAN,

Secretary of State.

[No. 1258.]

Rules for the Measurement of Vessels for the Panama Canal.

ARTICLE I. All vessels, American and foreign, except warships, including vessels of commerce and Army and Navy transports, colliers, supply ships, and hospital ships, applying for passage through the Panama Canal shall present a duly authenticated certificate stating the vessel's gross and net tonnage as determined by these rules. Vessels of commerce, Army and Navy transports, colliers, supply ships, and hospital ships without such certificate shall, before passing through the Canal, or before being allowed to clear therefrom, be measured, and shall have their gross and net tonnage determined in accordance with these rules.

All warships, American and foreign, other than transports, colliers, supply and hospital ships, shall present duly authenticated displacement scale and curves stating accurately the tonnage of displacement at each possible mean draft.

It is to be understood that "Supply ships" shall include Army and Navy ammunition ships, refrigerator ships, distilling ships, repair ships, submarine tenders, and destroyer tenders, as well as Army and Navy vessels used to transport general Army and Navy supplies, and that "Colliers" shall include Army and Navy vessels used to transport coal or fuel oil.

Vessels designated as "supply ships and colliers," as well as Army and Navy vessels used to transport general Army and Navy supplies, and that "Colliers" shall include Army and Navy vessels used to transport coal or fuel oil.

Rules Applying to Vessels of Commerce, Army and Navy Transports, Colliers, Supply Ships, and Hospital Ships.

GROSS TONNAGE.

ARTICLE II. Gross tonnage as determined by these rules shall express the total capacity of vessels, i. e., the exact cubical contents of all spaces below the upper deck, and of all permanently covered and closed-in spaces on or above that deck, excepting such spaces as may be hereinafter permitted as exemptions from measurement. Gross tonnage shall include not only all permanently covered and closed-in spaces which are or may be used for stowing cargo and stores or for providing shelter and other comfort for passengers or crew, but also such spaces as are used, or are

intended to be used, in navigating and serving the vessel.

Only such spaces as are specifically mentioned in Article IV, below, shall be exempted from measurement. All other spaces shall be considered as closed-in and shall be included in gross tonnage.

ARTICLE III. By permanently covered and closed-in spaces on or above the upper deck are to be understood all those which are separated off by decks or coverings, or fixed partitions, and which, therefore, represent an increase of capacity that is or may be used for the stowage of cargo, or for the berthing and accommodation of the passengers, the officers, or the crew. No break in a deck, nor any opening or openings in a deck or the covering of a space or in the partitions or walls of a space, nor the absence of a partition shall prevent a space from being measured and comprised in gross tonnage if the openings in the deck, partition, or side wall can be closed in, or if the absent partition can be put in place, after admeasurement and the spaces thus closed in be thereby better fitted for the transport of goods or passengers.

In the case of a vessel having a "Trunk" or "Turret," the deck forming the covering of the trunk or turret shall be considered the upper deck, and all spaces below that deck within the trunk or turret shall be considered as covered and closed-in. The space within the turret or trunk shall be measured as are other between-deck spaces. Spaces considered as "Permanently closed-in" and spaces permitted to be exempted from measurement shall be determined solely by the provisions contained in these rules, and not by any definitions or provisions contained in the measurement rules or regulations of any country.

ARTICLE IV. The following spaces shall be exempted from measurement and shall not be included in the gross tonnage, and no other spaces shall be exempted:

SECTION 1. Spaces on or above the upper deck not permanently covered or closed-in, or which may not be readily covered or closed-in,

In the application of this rule it will be understood that—

(a) Spaces under decks or coverings having no other connection with the body of the ship than the stanchions necessary for their support are not spaces separated off, but are spaces permanently exposed to the weather and the sea and are not to be included in the gross tonnage.

(b) A space within a poop, forecabin, bridge house, or other "Permanently covered

FIG. 1.—Poop.

$bb' > \frac{1}{2} aa'$.
E=space exempted.
M=space measured.

and closed-in" superstructure or erection may be considered as not permanently covered or closed-in, and may consequently be excluded from tonnage, if the space is opposite an end opening which is without a coaming and has no headplates or planks and is not provided with means of closing, and which opening has

FIG. 2.—Poop.

$bb' > \frac{1}{2} aa'$.
E=space exempted.
M'=closed-in houses, measured.
M=space measured.

a breadth equal to or greater than half the breadth of the deck at the line of the opening, and if the space opposite the opening cannot be used to shelter other merchandise than cargo or stores that do not require protection from the sea. If the opening is fitted with a coaming, the space within it is to be included

FIG. 3.—Forecabin.

$bb' > \frac{1}{2} aa'$.
E=space exempted.
M'=closed-in houses, measured.
M=space measured.

in the gross tonnage. This provision shall be so applied as to exempt from measurement only the space between the actual end opening and a line drawn parallel to the line or face of the opening at a distance from the opening equal to one-half the width of the deck at the line of the opening; provided, that any closed-in space between the open face and the line drawn parallel to it shall be measured. The remainder of the space within a poop,

forecastle, bridge house, or other superstructure or erection shall be considered as available for the accommodation of cargo or stores, of passengers or of the ship's personnel, and shall be measured and included in the gross tonnage. (See Figs. 1, 2, and 3.)

FIG. 4.—Poop.

$bb' < \frac{1}{2} aa'$.
E=space exempted.
M'=closed houses, measured.
M=space measured.

FIG. 5.—Poop.

$bb' > \frac{1}{2} aa'$.
 $cc' < \frac{1}{2} aa'$.
E=space exempted.
M=space measured.

FIG. 6.—Forecastle.

$bb' < \frac{1}{2} aa'$.
E=space exempted.
M=space measured.

Should the open space within a poop,

FIG. 8.—Poop and bridge with interval less than $\frac{1}{2}$ the least half breadth of the deck in way of interval.

$ac < \frac{1}{2} aa'$.
 $a'e' < \frac{1}{2} aa'$.
 $bb' > \frac{1}{2} aa'$.

E'=light and air and funnel space in lowest tier of erections, measured under Art. IV, Sec. 3.

forecastle, bridge house, superstructure, or erection between the end opening and a parallel line distant from the opening by half the breadth of the deck, become, because of any arrangement, of less width than half the breadth of the deck, then only the space between the line of the end opening and a parallel line drawn through the point where

the athwartship width of the open space within the poop, forecastle, bridge house, superstructure, or erection becomes equal to, or less than half the breadth of the deck

FIG. 7.—Bridge.

$bb' > \frac{1}{2} aa'$.
 $cd < \frac{1}{2} aa'$.
 $c'd' < \frac{1}{2} aa'$.
 $ff' < \frac{1}{2} cc'$.
E=space exempted.
E'=light and air and funnel space in lowest tier of erections, measured under Art. IV, Sec. 3.
M=space measured.
M'=closed house, measured.

shall be exempted from measurement. (See Figs. 4, 5, 6, and 7.) The remainder of the space within the poop, forecastle, bridge house, superstructure, or erection is to be included in the gross tonnage.

When two erections extending from side to side of the ship are separated by an interval the fore-and-aft length of which is less than the least half breadth of the deck in way of such interval, then whatever be the breadth of the permanent end openings of the erections, the entire erections, less the interval separating them, shall be measured and included in the gross tonnage. (See Fig. 8.)

FIG. 11.—Continuous deck with opposite side openings.

E=spaces exempted.
M=space measured.
E'=light and air and funnel space in lowest tier of erections, measured under Art. IV, Sec. 3.

SECTION 2. Spaces in way of opposite side openings at least three feet in height not provided with means of closing shall be exempted. In the case of a continuous deck with one or more deck openings (usually designated as

tonnage openings) that may be so closed as to permit cargo or stores to be carried in the space under the deck, or under portions thereof, only the spaces under such a deck that are exactly in way of opposite openings at least three feet in height in the side walls of the ship not provided with means of closing and corresponding to each other in the opposite walls of the ship shall be exempted; and the remaining spaces under such a deck shall be measured and included in gross tonnage. In the case the openings in the side walls of the ship are provided with means of closing, no portion of the space under such a deck shall be exempted. (Fig. 11.)

SECTION 3. The spaces framed in round the funnels and the spaces required for the admission of light and air into the engine rooms shall be exempted from measurement to the extent that such spaces are above the deck or covering of the first or lowest tier of side-to-side erections, if any, on the upper deck. A deck with one or more deck openings (usually designated as tonnage openings) that may be so closed as to permit cargo or stores to be carried in the space under the

(c) In a poop, forecastle, side-to-side bridge house, or other "Permanently covered and closed-in" superstructure or side-to-side erection, the space directly in way of opposite openings, the height of which is at least three feet, in the side walls of the ship not provided with means of closing and corresponding to each other in the opposite walls of the

deck or portions thereof is to be considered as the upper deck, provided that no space beneath it abreast side openings is exempted under the provisions of Section 2. There shall, however, be measured and included within gross tonnage the spaces situated within closed-in side-to-side erections on the upper deck, spaces framed in round the funnels and those required for the admission of light and air to the extent that such light and air and funnel spaces are below the deck or covering of the first or lowest tier of such side-to-side erections on the upper deck. There shall be exempted from the measurement of any superstructure or erection situated above the first or lowest tier of side-to-side erections on the upper deck such portion or portions thereof as are occupied by the spaces framed in round the funnels or by the spaces required for the admission of light and air into the engine rooms. Such exempted spaces must not be used for any other than their designated purpose and must be reasonable in extent.

SECTION 4. Space or spaces between the inner and outer plating of the double bottom of a vessel that are so enclosed and that have such openings as to make them usable only for water ballast shall be exempted from measurement, but such spaces within the double bottom as are or may be used for carrying cargo, stores, feed water, coal, or other fuel shall be measured and included in the gross tonnage.

SECTION 5. The cubical contents of hatchways shall be obtained by multiplying the length and breadth together and the product by the mean depth taken from the top of beam to the underside of the hatch. From the aggregate tonnage of the hatchways there shall be deducted one-half of one per cent of the vessel's gross tonnage, exclusive of hatchways, and only the remainder shall be added to the gross tonnage of the ship, exclusive of the tonnage of the hatchways.

SECTION 6. Companionways and companion houses shall be exempted when used solely as companionways or companion houses. When used as smoking rooms or for any other purposes than companionways or companion houses, the parts so used shall be measured and included in gross tonnage.

SECTION 7. Domes and skylights shall be exempt from measurement. When there is an opening in the floor of a superstructure immediately below a skylight, the exemption shall include the space between the skylight and the opening in the floor of the superstructure immediately under the skylight. The remainder of the superstructure shall be included in the measurement. The space, in addition to the skylight, that may be exempted by this rule is that indicated by A, B, C, D, in the following drawing:

FIG. 12.—Open space under skylight.

ARTICLE V. Should a vessel at any time stow cargo of any kind, bunker coal, or other fuel, or stores of any description in any portion whatever of any exempted space, except spaces exempted under Article

IV, Section 1, Paragraph (b) and spaces on open decks not permanently covered, or upon decks as defined in Article IV, Section 1, Paragraph (a) of these rules, the whole of that space shall be measured and added to the gross tonnage, and the space shall not thereafter be exempted from measurement.

ARTICLE VI. Spaces for the use or possible use of passengers shall not be exempted from measurement, except as stated in Article IV, Section 1, Paragraph (a).

In case of Army and Navy transports, colliers, supply ships, and hospital ships as defined in Article I, the term "Passengers" shall include all officers, enlisted men, and other persons who are not assigned to duty and who are not duly inscribed on the ship's rolls.

ARTICLE VII. If any ship carries stores, timber, cattle, or other cargo in any space upon an open deck not permanently covered or in spaces exempted under Article IV, Section 1, Paragraphs (a) and (b) of these rules, all tolls and other charges payable on the vessel's net tonnage shall be payable upon the vessel's net tonnage (as defined below in Articles X and XII) increased by the tonnage of the space occupied (at the time at which the tolls or other charges become payable) by the goods carried upon deck and not permanently covered or closed-in. The deck space occupied by the goods thus carried shall be determined at the time of the application of the vessel for passage through the Canal and shall be deemed to be the space limited by the area occupied by the goods and by straight lines enclosing a rectangular space sufficient to include the goods.

The tonnage of the space occupied by the goods shall be ascertained in the manner prescribed below by Article IX, Rule 1, for the measurement of poops or other closed-in spaces.

Nothing in this article shall in any manner affect the provisions of Articles II, III, and IV.

ARTICLE VIII. The cubical contents of the spaces included, by these rules, in gross tonnage may, in any country where the Moorsom system of measurement has been adopted, be ascertained under that system as applied in measuring vessels for national registry, provided that system is substantially similar to the Moorsom system of measurement as set forth in Article IX of these rules.

ARTICLE IX. In countries that have not adopted the Moorsom system of measuring spaces within vessels, the cubical contents of any of the spaces included in gross tonnage shall be ascertained according to the Moorsom system as set forth in the following rules: Rule I for the measurement of empty vessels; Rule II for laden vessels; Rule III for open vessels.

RULE I.—FOR MEASURING THE GROSS TONNAGE OF EMPTY VESSELS.

SECTION 1. The length for the measurement of ships having one or more decks is taken on the tonnage deck, which is—

(a) The upper deck for vessels having one or two decks.

(b) The second deck from below for vessels having more than two decks.

Measure the length of the ship in a straight line along the upper side of the tonnage deck from the inside of the inner plank (average thickness) at the side of the stem to the inside of the midship stern timber or plank there, as the case may be (average thickness), deducting from this length what is due to the rake of the bow in the thickness of the deck and what is due to the rake of the stern timber in the thickness of the deck, and also what is due to the rake of the stern timber in one-third of the round of the beam; divide the length so taken into the number of equal parts required by the following table, according to the class in such table to which the ship belongs:

Class 1. Ships of which the tonnage deck is, according to the above measurement, 50 feet long, or under, into four equal parts.

Class 2. Ships of which the tonnage deck is, according to the above measurement, above 50 feet and not exceeding 120 feet, into six equal parts.

Class 3. Ships of which the tonnage deck is, according to the above measurement, above 120 feet long and not exceeding 180 feet, into eight equal parts.

Class 4. Ships of which the tonnage deck is, according to the above measurement, above 180 feet long and not exceeding 225 feet, into 10 equal parts.

Class 5. Ships of which the tonnage deck is, according to the above measurement, above 225 feet long, into 12 equal parts.*

In the case of a break or breaks in a double bottom for water ballast, the length of the vessel is to be taken in parts according to the number of breaks, and each part divided into a number of equal parts according to the class in the above table to which such length belongs.

SECTION 2. Then the hold being first sufficiently cleared to admit of the required depths and breadths being properly taken, find the transverse area of the ship at each point of division of the length or each point of division of the parts of the length, as the case may require, as follows: Measure the depth at each point of division, from a point at a distance of one-third of the round of the beam below the tonnage deck, or, in case of a break, below a line stretched in continuation thereof, to the upper side of the floor timber (upper side of the inner plating of the double bottom) at the inside of the limber strake, after deducting the average thickness of the ceiling which is between the bilge planks and the limber strake, subject, however, to the provisions of these rules, Article IV, Section 4, regarding the measurement or exemption of double bottom spaces. In the case of a ship constructed with a double bottom for water ballast if the space between the inner and outer plating thereof is not available for the carriage of cargo, stores, feed water, coal, or other fuel, then the depth shall be taken to be the upper side of the inner plating of the double bottom, and that upper side shall, for the purposes of measurement, be deemed to represent the floor timber of the vessel. This rule for measuring the depth of the hold ap-

*A greater number of divisions is permissible, provided there be an even number of divisions.

plies to double bottom ships having top of double bottom *not* horizontal.

If the depth at the midship division of the length does not exceed 16 feet, divide each depth into five equal parts; then measure the inside horizontal breadth at each of the four points of division, and also at the upper point of the depth, extending each measurement to the average thickness in that part of the ceiling which is between the points of measurement. Number these breadths from above (i. e. numbering the upper breadth 1, and so on down to the fifth breadth); multiply the second and fourth by four, and the third by two; add these products together, and to the sum add the first breadth and the fifth. Multiply the quantity thus obtained by one-third of the common interval between the breadths, and the product shall be deemed the transverse area of the upper part of the section; then find the area between the fifth and lower point of the depth by dividing the depth between such points into four equal parts, and measure the horizontal breadths at the three points of division and also at the upper and lower points, and proceed as before, and the sum of two parts shall be deemed to be the transverse area; but if the midship depth exceed 16 feet, divide each depth into seven equal parts, instead of five, and measure, as before directed, the horizontal breadths at the six points of division, and also at the upper point of the depth; number them from above, as before; multiply the second, fourth, and sixth by four, and the third and fifth by two; add these products together, and to the sum add the first breadth and the seventh. Multiply the quantity thus obtained by one-third of the common interval between the breadths, and the products shall be deemed the transverse area of the upper part of the section; then find the lower part of the area as before directed, and add the two parts together, and the sum shall be deemed to be the transverse area.

This section applies to vessels with double bottoms, the tops of which have a rise from the middle line to each side. In vessels in which the top of the double bottom is horizontal, or in which there is no double bottom, the depths are to be divided by four or six (instead of five or seven), according as their midship depths do not or do exceed 16 feet, respectively. In such cases no subdivision of the lower part is to be made.

SECTION 3. Number the transverse sections or areas, respectively, 1, 2, 3, etc., No. 1 being at the extreme limit of the length at the bow, or of each part of the length, and the last number at the extreme limit of the length at the stern or the extreme limit at the after end of each part of the length; then, whether the length be divided according to the table into four or 12 parts, as in Classes 1 and 5, or any intermediate number, as in Classes 2, 3, and 4, multiply the second and every even-numbered area by four, and the third and every odd-numbered area (except the first and last) by two; add these products together, and to the sum add the first and last, if they yield anything; multiply the quantity thus obtained by one-third of the common interval between the areas, and the product will be the cubical contents of the space, or cubical contents of each part if the ship is measured in parts under the tonnage deck. The tonnage of this volume is obtained by dividing it by 100, if the measurements are taken in English feet, and by 2.83 if the measurements are

taken in meters. The multiplier 0.353 may be used instead of the divisor 2.83.

SECTION 4. If the ship has a third deck the tonnage of the space between it and the tonnage deck shall be ascertained, as follows: Measure in feet the inside length of the space at the middle of its height from the plank at the side of the stem to the lining on the timbers at the stern, and divide the length into the same number of equal parts into which the length of the tonnage deck is divided, as above directed; measure (also at the middle of its height) the inside breadth of the space at each of the points of division; also, the breadth at the stem and the breadth at the stern; number them successively 1, 2, 3, etc., commencing at the stem; multiply the second and all the other even-numbered breadths by four, and the third and all the other odd-numbered breadths (except the first and last) by two; to the sum of these products add the first and last breadths; multiply the whole sum by one-third of the common interval between the breadths, and the result will give in superficial feet the mean horizontal area of the space; measure the mean height of the space, and multiply by it the mean horizontal area, and the product will be the cubical contents of the space; divide this product by 100 (or by 2.83 if the measurements are taken in meters) and the quotient shall be deemed to be the tonnage of the space, and shall be added to the tonnage of the ship ascertained as aforesaid; and if the ship has more than three decks, the tonnage of each space between decks above the tonnage deck shall be severally ascertained in the manner above described, and shall be added to the tonnage of the ship ascertained as aforesaid.

SECTION 5. If there be a break, a poop, or any other permanently covered or closed-in space on or above the upper deck (as defined above in Article III) the tonnage of such space shall be ascertained, as follows: Measure the internal mean length of the space in feet, and divide it into two equal parts; measure at the middle of its height three inside breadths, namely, one at each end and the other at the middle of the length; then to the sum of the end breadths add four times the middle breadth, and multiply the whole sum by one-third of the common interval between the breadths; the product will give the mean horizontal area of the space; then measure the mean height and multiply by it by the mean horizontal area; divide the product by 100 (or by 2.83 if the measurements are taken in meters) and the quotient shall be deemed to be the tonnage of the space.

SECTION 6. In measuring the length, breadth, and height of the general volume of the ship or that of the other spaces, reduce to the mean thickness the parts of the ceiling which exceed the mean thickness. When the ceiling is absent, or when it is not permanently fixed, the length and breadth shall be reckoned from the main frames of the ship, not from the web or belt frames. The same principle is to hold in the case of deck erections; that is, the breadth is to be reckoned from the main framing or stiffeners of the same, when ceiling is not fitted. When the main framing of the ship is curved or carried upward and inboard, so as to permit the building of topside tanks or compartments outboard of the main framing, the breadth of the ship shall be reckoned from the outboard framing of such outboard tanks, thus including these tanks in the measurement.

RULE II.—FOR MEASURING THE GROSS TONNAGE OF LADEN SHIPS.

SECTION 7. When ships have cargo on board, or when for any other reason their tonnage cannot be ascertained by means of Rule 1, proceed in the following manner:

Measure the length on the uppermost full-length deck from the outside of the outer plank at the stem to the aft side of the sternpost, deducting therefrom the distance between the aft side of the sternpost and the rabbet of the greatest breadth of the ship where the counterplank crosses it. Measure also the greatest breadth of the ship to the outside of the outer planking or wales at the middle perpendicular. Then, having first marked on the outside of the ship on both sides thereof the height of the uppermost full-length deck at the ship's sides, girth the ship at the middle perpendicular in a direction perpendicular to the keel from the height so marked on the outside of the ship, on the one side, to the height so marked on the other side, by passing a chain under the keel; to half the girth thus taken add half the main breadth; square the sum, multiply the result by the length of the ship taken as aforesaid, then multiply this product by the factor 0.17 in the case of ships built of wood, and by the factor 0.18 in the case of ships built of iron or steel. The product will give approximately the cubical contents of the ship, and the tonnage can be ascertained by dividing by 100 or by 2.83, according as the measurements are taken in English feet or in meters.

SECTION 8. If there be a break, a poop, or other permanently covered and closed-in spaces (as defined above in Article III) on or above the uppermost full-length deck, the tonnage of such spaces shall be ascertained by multiplying together the mean inside length, breadth, and depth of such spaces and dividing the product by 100, or 2.83, according as the measurements are taken in English feet or meters, and the quotient so obtained shall be deemed to be the tonnage of the spaces, and shall be added to the other tonnage, in order to determine the gross tonnage or total capacity of the ship.

RULE III.—FOR MEASUREMENT OF OPEN VESSELS.

SECTION 9. In ascertaining the tonnage of open ships, the upper edge of the upper strake

of the shell plating is to form the boundary line of measurement, and the depths shall be taken from an athwartship line, extended from upper edge to upper edge of the said strake at each division of the length. **Deductions from the Gross Tonnage to Ascertain the Net Tonnage.**

(A) DEDUCTIONS FOR VESSELS NOT PROPELLED BY ENGINES.

ARTICLE X. The following spaces (enumerated below in Sections 1 to 10 of this article) shall be deducted from the gross tonnage, in order to ascertain the net tonnage of vessels *not propelled by engines*, and no other spaces shall be deducted. Unless otherwise expressly stipulated, these spaces shall be deducted whether located above or below the upper deck.

The volume or cubical contents of deducted spaces shall be ascertained in the manner specified in Article VIII or Article IX of these rules. The remainder, resulting from deducting from the total space included in gross tonnage the sum of the cubical contents of the spaces whose deduction from gross tonnage is permitted by these rules,
